THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—it is gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

1,500,000

WAYNE WASHERS SOLD Up to the Present Time
And increasing at the rate of 300 per day.—What more evidence do you want to convince you that Wayne Washers are the best to sell?

WE Know it's a
"WINNER"

Because it possesses
everything to make
it a "WINNER"

FIRST—It has fewer parts in its construction than any other rotary, and Every one knows the fewer parts there are in the construction of any machine the easier it will work and the less liability there is to wear and get out of order.

The appearance of the "WINNER" is different than any other machine upon the market. The tub is finished in the natural wood, with green bronze hoops, green enamel hand wheel, and the gearing in gold bronze; the combination making the most beautiful appearing machine upon the market. We are also using a special preparation in connection with the finishing of our tub—which holds the varnish to the surface and retains the lustre for all time. You will not find this finish on any other washing machine made.

WAYNE WASHERS
Klean Kloties

We also use the detachable stave leg, which does away with the necessity of throwing away the entire machine in case the leg becomes broken.

Simplicity—Quality—Appearance—Good Value for your money, are all possessions of the "WINNER." Order a sample from our jobber or direct from us, and we will leave the rest to you and the

"WINNER."

WHEN WRITING
to our advertisement

**REED'S
Flintstone
Enameled
STEEL WARE**

The Insignia of Excellence

North, East, South and West
the stamp of popular ap-
proval has been placed upon

REED'S FLINTSTONE Enameled Steel Ware

The Reason?

The sale of Flintstone has been so phenomenal, and we have more than trebled our output the past year, because

Flintstone Enameled Ware

has stood the most exacting tests of the best chemists in the U. S.

It is free from poisonous ingredients and practically insoluble.

Flintstone is seamless, sanitary, substantial.

It is the best moderate priced Three-Coated Enameled Steel Ware on the market.

It's pleasing to the eye. It lasts and —outlasts the other kinds.

Our Ten Years' Guarantee

with every piece. Write for prices to-day.

Reed Manufacturing Co.

CINCINNATI OFFICE: No. 11 East 2nd Street.
ST. LOUIS OFFICE: 118 North 3rd Street.

The best equipped factory, the best advertised product.

We make a few articles, in large quantities, make them better than any one else does, and we tell everybody about them.

We *know* we have the right principle in our "one-motion" Peerless Iceland Freezer and we've put up a new factory adequately equipped for turning out this freezer in great numbers.

Peerless Iceland Freezer

Our advertising—covering *every bit of freezer-selling territory* in the United States—gives an impulse, as strong as it is steady, to Peerless Iceland sales.

Every woman in the country interested in her home knows about the Peerless Iceland and believes in it. It's "the freezer the cook likes"—the freezer the *housekeeper* wants when she goes into your store.

Dana Iceless Refrigerator

For the window. No ice bill. A refrigerator that takes up no floor space and is run without ice eight months in the year.

Dana Mop Wringer

wrings the mop dry in five seconds. You stand in a natural position—both feet rest firmly on the floor.

Tub is well made, very strong and extra braced with heavy, flat iron, rust proof hoops. The rollers are of solid maple and never stick. The latest, the simplest and the best mop wringer on the market.

The Dana plant is fire-proof; we can *guarantee* delivery as promised. *Everything* about it is *modern*—selling organization and all.

Both jobber and dealer make a good profit on the Dana line.

Your jobber will be around soon. *Ask him.*

10 Warren Street,
New York.

The Dana Mfg. Co. Cincinnati.

SUPERIORITY

L. & I. J. White Co.'s Edge Tools have been marketed for nearly three quarters of a century.

It requires, therefore, no second glance to determine their superiority over any others on the market.

Thousands of skilled mechanics use them to-day because their fathers used them before them.

If you are not handling White's Edge Tools—is not that a good reason why you should?

Get our catalog to-day.

A Step Ladder That Will Not Walk

Is a New Addition to

Udell Ladders

This "Unique" ladder is the latest and best ladder that has ever been offered to the trade. The enormous sales made each day prove that it is taking preference over all others on the market.

The New Udell Catalog for 1906 is just out. It shows very complete lines of step and extension ladders, house furnishings, medicine cabinets, woodenware, etc. Have you got it? It shows goods that are far ahead of the ordinary.

Just send a postal for this new Catalog.
YOU NEED IT.

THE UDELL WORKS

1222 W. 28th St.,

INDIANAPOLIS, IND.

Remember!

The point for you to remember about the

FAULTLESS Pivot Bearing CASTER

is the turning point—

HERE—

NOT

THERE

"The Faultless" never refuses to turn, because it is supplied with Faultless Patent Steel Spring Sock-ets.

The Faultless is interchangeable; will fit six different sizes of wood bed sockets.

The Faultless received the highest award at the World's Fair, 1904, over all other casters.

It never refuses to turn itself into dollars and cents. Try a sample lot.

The Faultless Caster Mfg. Co.,
Nebraska City, Neb.

SCREEN DOORS

WINDOW SCREENS

For several years the following lines of Screen Goods have been considered "Standard":—

WABASH
OWOSSO
PORTER
PHILLIPS
PHILADELPHIA
QUEEN ANNE

The excellence of these lines has been so uniform that only a slight difference in price would swing an order from one factory to another, while other lines have had to be sold at 5 to 10 per cent. less.

These goods are as reliable and satisfactory as ever. True, they are higher in price this year, but the advance is chiefly on account of the advance in lumber.

Mr. Retailer, please call up your lumber dealer and ask him if the Yellow and Norway Pine that he bought a year ago for \$24.00 does not now cost him \$36.00—50 per cent. advance!

"Butt in" lines are always sold cheaper than "Standard" goods, but prices are always as high as the goods will bring. No line is sold for a cent less than the manufacturer's own estimate of the value of his product as compared with "Standard" goods.

The capacity of our factories, operated 10 hours a day for 9 months exceeds the entire U. S. and foreign demand, this or any other year.

The fact that these concerns survived the fierce competition indicates that they made better goods at a less cost than the 44 that quit. They understand their business and they know what goods cost.

While these factories represent enormous capacity, they have prepared for only an ordinary trade, and sales already exceed 65 per cent. of last year's sales.

If you desire "Standard" goods and prompt deliveries, your order should now be in the hands of the jobber.

Most of the Distribution cars here now gone forward. A few second cars go this month.

The Exclusive Agency

for the sale of our IMPROVED ACME WASHER is offered to live progressive dealers in territory where we don't have agents. The details of

OUR PLAN OF SALE

will be sent you upon request. Its principal features are 1, a liberal margin of profit; 2, no competition and therefore no unfair price cutting; 3, a positive binding guarantee that the machine will do all we claim; 4, a complete plan for co-operating with our agents in making sales to the consumer; and 5, an expensive and elaborate national advertising campaign. (See below.)

(NOTE—In writing for our Plan of Sale, we shall appreciate it if you will state whether you sell any other washers, and if so, what make, and also about how many machines you may be able to dispose of per year.)

Read the Advertisement Shown Here

particularly the offer in the lower part. It is not only extremely fair and liberal to the consumer, but it also shows clearly that we are spending money to create a demand for our machine, and we shall fill this demand through the legitimate channels of trade, that is, through the store of the retail dealer. This advertisement, measuring 7 inches, is the smallest we are using. Our space runs from this size up to 19 inches in most of the higher priced magazines. In fact, we are spending upwards of

\$50,000 IN ADVERTISING

At the present time we are using the February, March and April issues of the following leading publications:

Men and Women

and 16 others, with a circulation of

Over 10,000,000 Copies Per Issue

WRITE TO-DAY FOR OUR PLAN

If you are not interested in Washing Machines, you can doubtless handle our line of Wringers and our Acme Wringer Mop. Prices and terms on application. Write to-day.

ACME WASHING MACHINE COMPANY
COLUMBUS, OHIO

(Patent Pending)

The Improved Acme Washer

will wash thoroughly and perfectly clean anything, from the finest piece of lace to the heaviest blanket, without tearing a thread or breaking a button. In fact, there is nothing in the way of washing which can be done by hand or with any other machine which cannot be done better, more easily and more rapidly with the Improved Acme Washer.

Besides being made of the very best materials, handsomely finished in natural wood, it has a number of

SPECIAL FEATURES

not found on any other machine. These consist of: 1, a Movable Wringer Stand, which brings the wringer directly over the tub, so that all the water falls back into the tub, instead of on the floor. (The wringer need never be taken off.) 2, the Hinged Lid, which is practically steam-tight, prevents the water from splashing over. This is merely raised up and leaned back against the handle, so that all the suds must drain into the tub. 3, the Extension Stand holds the basket, or rinsing tub, close to and on a level with the machine, so that the clothes cannot fall on the floor, and no stooping is necessary. 4, No Iron Post runs through the machine to rust and stain or tear the clothes.

There are many other good points about the Acme, all described in detail in our little booklet entitled "Wash-day Comfort." This is free for the asking. May we send you a copy?

IS THIS A FAIR OFFER?

If you will write us that you are interested, we will give you the name of the dealer in your town who handles the Improved Acme Washer. You can see the machine at his store and learn all about it before you buy it. If you buy it, it is with the understanding that any time within 30 days, if the machine is not in every way satisfactory, he will take it away and give you back your money. He will do this cheerfully and readily, because our guarantee to him protects him against loss. You risk nothing but a two-cent postage stamp to mail us your letter.

Write To-day—even if you are not just ready to buy or even try a machine; in that case let us send the little booklet—remember, it's FREE—write to-day! Address

ACME WASHING MACHINE COMPANY
2511 S. High Street, Columbus, Ohio

THE ACME WRINGER MOP illustrated below is bound to be a winner. One dealer says, "To show it is to sell it." It is what women long have wanted—a mop which can be used in hot, cold, soapy, or lye water, without the hands having to come in contact with it when wringing.

ONCE USED, ALWAYS USED.

The IDEAL LAWNMOWER GRINDER

is a machine that within three years has, to a great extent, revolutionized the methods of sharpening Lawnmowers. It is practically impossible to sharpen a Lawnmower accurately with a file, especially as so many Mowers have hardened blades which require very hard work to file at all and at best it is a thankless task. But with our

IDEAL LAWNMOWER GRINDER

any person with ordinary intelligence can sharpen a Lawnmower with accuracy in one-half the time required by the old method. The "Ideal" Grinder will grind any desired clearance behind the cutting edge, and the blades will all be ground the same distance from the center, or straight across, so that each blade touches the steel cutting bar along its entire length.

HARDWARE CLUB OF NEW YORK.

At a meeting of the Board of Governors of the Hardware Club of New York held on March 20th, the following gentlemen were unanimously chosen as officers to serve during the coming term.

President, J. Leonard Varick
Vice President, Eugene Bissell
Treasurer, Thomas F. Keating
Secretary, Arthur G. Sherman

319482

ASTOR, LENOX AND
TILDEN FOUNDATIONS.

Each of the officers succeeds himself to the office named. The Club has now 600 resident members, 160 non-resident, with 99 names upon the waiting list.

THE SMITH & HEMENWAY CO.

The Smith & Hemenway Co., now at 296 Broadway, New York, desiring to obtain more room, and to increase their facilities for their rapidly increasing business, intend about May first moving to Nos. 108-110 Duane Street, a short distance from their present location. The company will occupy the entire first floor, one flight up, in which there is nearly three times the floor space they have in their present quarters, and in more convenient location for shipping, among other manifest advantages.

THE NEW UDELL WORKS CATALOGUE.

The Udell Works, Indianapolis, Ind., have issued their new catalogue for 1906-1907 covering a line of Housefurnishings, Woodenware, Commodore, Medicine Cabinets, Folding Tables, Ladders, etc. Several additions have been made to their old lines, one of the most important being their "Unique" Step Ladder, which they claim "is one of the best braced, strongest and most durable ladders ever placed on the market by any firm." The catalogue illustrates some very handsomely designed and constructed patterns of bath-room and medicine cabinets, some being made in weathered oak, mission style, as well as the regular golden oak. Grilled cathedral glass doors add to their attractiveness, and they are finished in a manner which makes them suitable for the most luxurious surroundings. The line of Folding Tables shown is an extensive one. The contents of the catalogue also include Hall Trees, Folding Steps, Lapboards, Invalid Trays, Ironing Boards, Towel Rollers, Drying Racks, Wash Benches, Painters' Stages, etc.

A WELL KNOWN NEW YORK ADVERTISING BUREAU REMOVES.

The Manufacturers' Advertising Bureau which has been located on Liberty Street for many years has removed to 237 Broadway, New York City.

Probably no other concern in the advertising line is as favorably and well known to the machinery trade throughout the United States as the Manufacturers' Advertising Bureau and its proprietor, Benjamin R. Western. The bureau has been established since 1877 and has made a specialty of Machinery and Engineers' Supplies advertising for many years and is considered an authority in this line. For some time, however, the Liberty Street offices have become cramped for space and it is in order to meet the demand for more room and better facilities that the change in location has been made. The bureau intends also to somewhat broaden the scope of its work and while particular attention will be given to advertising in the trade and technical journals as heretofore, it will also be equipped to handle advertising in the newspapers, magazines and all other periodicals as well.

STEVENS KEEPING UP A RECORD FOR ACCURACY.

We are gratified to state that at the recent National Tournament of the Zettler Rifle Club, New York City,—a competitive rifle shoot in which all the prominent marksmen and crack shots were represented—Stevens and Stevens-Pope Rifles again carried off the majority of the prizes. Stevens Rifle Telescopes raised records as usual, and were notable factors in the making of "top notch" scores. In the leading event of the Tournament—the 100 Shot Match—Stevens and Stevens-Pope Rifles secured the first four prizes. The winners of the first six prizes (five of the six

being equipped with Stevens and Stevens-Pope Rifles) used Stevens Rifle Telescopes.

The High Scores of the 100 Shot Match were as follows:

| | | | |
|-----------------|------|----------------|------|
| 1. A. Hubalek, | Shot | Stevens | 2468 |
| 2. R. Gute, | " | Stevens-Pope | 2464 |
| 3. W. A. Tewes, | " | No. 54 Stevens | 2461 |
| 4. L. P. Ittel, | " | Stevens-Pope | 2459 |

For best results in Target Shooting, it is obvious that a Stevens Rifle and Stevens Telescope are simply indispensable. The marvelous Stevens Accuracy means winning scores and first prizes.

STANDART-SIMMONS HARDWARE BUILDING.

One of the finest commercial buildings in Toledo is the new seven-story and basement structure which is now nearing completion for the Standart-Simmons Hardware Company. The building is located on the Clover Leaf road at Erie and Lafayette streets, with a frontage on the first named thoroughfare of 145 feet and 128 feet on Lafayette. It contains 100,000 square feet of floor space and is admirably adapted for the purpose for which it was built, mainly the conduct of a Hardware jobbing business.

The building is of mill construction with exterior of red facing brick laid in red mortar. The walls are 40 inches thick at the bottom and taper to 16 inches at the top. The height from the bottom of the foundation to the top of the wall is 125 feet.

The structure is equipped with the latest sprinkler system and has waterproof floors, making each story entirely independent of the other in event of fire. The waterproof floors are secured by covering the floors with waterproof paper which is cemented down. A tongued and grooved maple floor is then laid on top of this. Each floor has a separate drainage to the sewer, so that the flooding by water of the contents of any story would not injure the goods on the floor below.

The building will be heated by both hot water and steam, the former being used for the office alone. The heating system has already been installed in order to dry out the building and it is expected that the company will be doing business in the structure within 30 days.

The bringing to Toledo of a branch of the great Simmons Hardware Company means more to the jobbing interests of the city than can be readily imagined. Especially is this true in the case of the Hardware business, which will receive a great impetus by the advent of the Mound City Company. Toledo Hardware men welcome the entrance into the local field of the Simmons company, which is the largest concern of its kind in the world. They say that the influence of this great corporation will materially help to enlarge the jobbing interests of the city and will be the means of bringing other companies here. George J. Marquardt, of the Schunk-Marquardt company, voiced the general view of the local Hardware men when he said the other day to a representative of the *Toledo Blade*:

"The bringing to Toledo of the Simmons Hardware Company of St. Louis will be a good thing for the city. I do not belong to that little group of small-souled people who are afraid that the advent of a new concern into this field means disaster to them. Toledo is growing rapidly and there is room enough here for all. It is only a case of the survival of the fittest, and if I am not able to hold up my end, why, I deserve to go down.

"What we want is a broad liberal feeling towards all engaged in the same line of business as ourselves. Competition is fine and one man has as much right to engage in it as another. I believe the Standart-Simmons Company will not force any other local Hardware jobbers to the wall. It will bring to Toledo much business that none of us could get anyway, and we will continue to get our share of the remainder.

"We are all glad that Toledo presents such advantages as to attract the attention of the St. Louis men, who have jobbing houses in all sections of the country."

Such expressions as these of Mr. Marquardt should be published broadcast, as showing the outside world that local business men are broad enough for the great city in which they do business. It is men of this stamp who make a city great and who expand with the growth and development of the city's commerce.

The Simmons Hardware Company, when it desired to establish a branch in this section of the country, looked over the claims of Detroit, Columbus, Indianapolis, Cleveland and Cincinnati, but decided to locate here on account of the city's great railway facilities and unsurpassed geographical location.

APRIL 10, 1906

Editorial Trade Review

At last the Clerk of the Weather has relented and given us a taste of Spring. To be sure he played the same trick in January, when bushes began to bud, and some early flowers made their appearance in the gardens. This was followed by a cold March, which has kept all vegetation back, and now we are having the first breath of what promises to be the real article. What effect this will have upon trade remains to be seen; usually a lagging trade during the Winter months is followed by a brisk demand when the sun gets to work and sets the blood to circulating in humanity and the sap in the trees.

There is a feeling, however, that this year, owing to the mild Winter, Spring trade has been somewhat anticipated, and the large volume of trade during the Winter months is likely to detract from the usual Spring demand, but this is more than questionable. It is a common saying that when unseasonable weather comes and trade is poor that business lost under such conditions is never regained. It is hard to see why the same rule should not work both ways, and the general prosperity in the country should suffice to maintain a good demand throughout the Spring.

Certainly there is no room to complain: so far trade has been unusually good, so that each month of 1906 has made a new record for volume, and there seems to be nothing in sight to call for any inactivity of business; perhaps, one exception might be noted in the coal situation, which may, however, be settled before this reaches the eyes of your readers.

The bituminous question seems largely determined, but the uncertainty prevailing in the anthracite region has severely affected trade in that section. We are already in receipt of advices saying that since the suspension order went into effect the first of the month, that trade has revived, simply because uncertainty is largely removed, and the striking miners go to work fixing up their houses, working in their gardens, and doing other work calling for Hardware and supplies. We trust that good sense may prevail on both sides and the calamity of a strike yet be averted.

There is still considerable complaint of the difficulty of filling orders, and manufacturers are in many cases far behind. It is difficult to recall a time when manufacturers have been so busy as they are to-day. Said one manufacturer to the writer a few days ago, "I have never seen anything like it; the boom year of three years ago was not in it, compared with the demand to-day, and we are simply swamped." Reports like these are well nigh universal, and as far as can be seen all goods sold are going directly into consumption.

There is still room for improvement in collections, which are naturally slow during the Winter. Now the Spring is opening, farmers are once more beginning to receive some returns, and as April 1st is largely regarded as the annual settling time, it is hoped that we shall soon be able to report an improvement in this respect also.

JAMES H. RITTER,
OF BIDDLE HARDWARE CO.

FEBRUARY'S INCREASING EXPORTS.

Two-thirds of the fiscal year ending June 30, 1906, has presented its commercial record, and the growth of commerce has been sufficient to justify the assertion that for the year both imports and exports will exceed those of any earlier like period. The exports of 1905 exceed those of any earlier year; yet the exports of that part of the fiscal year 1906 recorded are 190 million dollars in excess of those of the corresponding months of 1905. Exports in each of the great groups—products of agriculture, manufactures, the mines, the forests, the fisheries, and miscellaneous articles—show an increase over the exports of the same months of last year.

The most remarkable increase in the imports occurs in manufacturers' materials. The class "articles in crude condition which enter into the various processes of domestic industry" shows for the eight months ending with February, 1906, a total of 264 million dollars, against 243 millions in the same month of last year; while the class, "articles wholly or partially manufactured for use as materials in the manufactures and mechanic arts," shows a total of 112 millions, against 92 millions in the same months of last year. Thus manufacturers' materials show a total gain of over 40 million dollars in the eight months ending with February, 1906, compared with the corresponding months of the preceding year, and seem likely to make by far the largest total of such imports in the record of our foreign commerce. The increase in the partially manufactured materials occurs chiefly in tin, copper, iron and steel and chemicals. The increase in raw materials occurs chiefly in fibers, hides and skins, leaf tobacco, and raw silk.

The increase in exports of manufactures, aggregating 45 million dollars, occurs chiefly in cotton goods, which show an increase of about 8 millions; iron and steel manufactures, an increase of 16 millions; cars and carriages, an increase of 5 millions, and manufactures of wood, mineral oils, and leather, and manufactures thereof, each show an increase of about 2 million dollars, as compared with the same months of last year.

The rapid growth in the exportation of manufactures is illustrated by comparing the February, 1906, exports with those of February of each year during the preceding decade. It will be seen from the table which follows that the February exports in 1906 were nearly three times as great as those of 1896, while the growth of exports of manufactures for the entire eight months is correspondingly great, the total for the eight months ending with February, 1896, being 144 million dollars, against 387 millions in the eight months ending with February, 1906.

Exports of domestic manufactures from the United States during the month of February, 1896 to 1906.

| Month of February— | Total. |
|--------------------|--------------|
| 1896 | \$17,259,459 |
| 1897 | 20,248,989 |
| 1898 | 21,080,901 |
| 1899 | 24,489,860 |
| 1900 | 34,226,128 |
| 1901 | 30,302,692 |
| 1902 | 31,740,842 |
| 1903 | 32,612,784 |
| 1904 | 38,189,012 |
| 1905 | 39,386,084 |
| 1906 | 46,586,585 |

NEW TRADEMARK LAW A BURDEN TO MANUFACTURERS.

The new trademark law of the United States—the Act of February 20, 1905—took effect April 1, 1905. In the nine months from that date to December 31, 15,737 trademark applications were filed at \$10 each, bringing into the Patent Office in application fees \$157,370. The total receipts from trademark application fees for the year, including the fees on 414 applications filed under the old law prior to April 1, at \$25 each, was \$167,720. The largest number filed in any previous year was 2,602 in 1902, the fees for which amounted to \$65,050. The increase in application fees for the year over the best previous year was \$102,670.

There is very general complaint among trademark owners of this city that the Patent Office fails to carry out the intended purpose of the act and by its technical rulings and delays is tending to make registration undesirable instead of encouraging it, and in regard to marks sought to be registered here in order to be subsequently registered abroad the Patent Office by its rulings is needlessly placing upon American manufacturers a burden of expense for foreign registrations which amounts almost to prohibiting the protection of American trademarks abroad.

On account of this general and well-founded complaint a bill to amend the Act of February 20, 1905, has been prepared by Arthur P. Greeley, formerly Assistant Commissioner of Patents and a member of the Commission to Revise the Trademark Laws appointed by President McKinley, and has been introduced in the House of Representatives by Mr. Currier as H. R. 5349. The following explanation of the necessity of the bill is made by Mr. Greeley:

"While out of 42,101 trademark applications filed between January 1, 1881, and April 1, 1905, 36,219 were registered, 86 per cent., out of the 15,737 filed under the new act only 4,090, or 26 per cent., had been registered, this number of registrations being only 42 per cent. of the number of applications filed prior to July 1, 1905. In other words, allowing six months for the examination and issuance of the certificates, the percentage of registrations is only 42, as against 86 under the old law.

"The difficulty and delay results in large measure from the requirement of the Patent Office for a detailed description of every feature shown on the specimens, whether an essential feature of the mark or not, and this is insisted on in the face of the fact that the trademark shows for itself what it is and detailed description is wholly unnecessary and is not required in any foreign country and is not required by the Patent Office in case of designs which bear a close resemblance in subject matter to trademarks. H. R. 5349 provides for doing away with this ruling of the Patent Office by striking out of the act all requirement for description.

"An even more serious feature of the present practice of the Patent Office intended to be remedied by the bill is the restriction of trademark applications to a single description of goods instead of permitting a single registration to cover all goods falling within a recognized class on which the trademark has been used. In other words, while in all countries of the world other than the United States, and in the United States up to 1902, a single registration would cover all the goods falling within the class of cutlery and edge tools, the Patent Office now requires from ten to twenty or more registrations to secure the same effect.

"The effect of this practice is to make it necessary for the American manufacturer of cutlery to pay ten or twenty or more fees to the Patent Office instead of one, and what is more serious, compels him in registering abroad to pay in every country ten or twenty or more times what it should cost, and in this way places upon him a burden of thousands of dollars, while his English or German or French competitor secures the same protection for a few hundred.

"The effect of this ruling of the Patent Office is a direct and serious blow to the extension of American foreign trade by the wholly unnecessary requirement of our own Patent Office. American trademark owners must register their trademarks abroad if they are to extend and continue to hold their foreign trade. They cannot register abroad without first registering here. If the law as it now stands permits the Patent Office to make foreign registration so expensive as to be practically prohibitive, and if the Patent Office insists upon this burden upon our own manufacturers, it is time the law was so changed as to restrict the power of the Patent Office and permit our foreign trade to develop."

*

There is none made so great but he may both need the help and service, and stand in fear of the power and unkindness, even of the meanest of mortals.—SENECA.

"HOW TO PROMOTE HOME PATRONAGE."

The following article won the prize offered by Shenandoah, Iowa, merchants for the best short essay on: "How to Promote Home Patronage."

Be honest, earnest and accommodating. The most powerful factor in business is the personal element, and right there is where the home merchant has the advantage of the mail order man. The farmer knows his home merchant, knows him to be honest, straightforward and obliging. If he can get anywhere near as good prices at home he will not send away. Let the farmer know that you have his interest at heart and would not knowingly sell him anything of poor quality. Educate him to the use of the best qualities and show him the differences in the grades. Make it an open deal all the way through, straight and above board. The farmer does not object to a fair profit, but the mail order men have constantly impressed on his mind that the home merchant is a robber and a villain, till sometimes the farmer almost believes it.

If he talks of sending away, say: "All right, I will take the order on the same terms. Pay me the money in advance and give me two weeks' time to send to the factory for it, pay the freight, shut your eyes and take what comes." He will open his eyes and say he couldn't think of dealing that way. But that is just the way it is when he sends off.

Make your advertisements in the home papers plain, straightforward talks along these lines. Talk it over personally with the farmer in a frank and pleasant way. This personal element and the man-to-man friendship is the basic element of all business and especially of the home patronage.

MEETING OF THE EXECUTIVE COMMITTEES AT PITTSBURGH.

The Executive Committee of the American Hardware Manufacturers' Association began a two days' session with a meeting at the Fort Pitt Hotel on March 27th. It is said a new scale of prices was discussed at length, with a strong tendency manifested by the manufacturers toward a general raise in prices. This increase in the schedule has been made necessary by a distinct increase in the cost of production, due primarily to higher wages which have recently been paid to employees; but the discussion resulted in nothing more definite than an exchange of opinion relative to raising the prices of Hardware. It was thought that the meeting would agree unanimously to this increase. The sentiment of the manufacturers was strongly for a higher schedule, but while the Jobbers' Association Executive Committee did not directly oppose this move, their voices in the conference resulted in the matter being kept in embryo until the annual convention at Hot Springs, Va., June 12 to 14.

A number of Hardwaremen, including the executive committee of both manufacturers and jobbers, were entertained at a dinner at the Union Club on the 28th by Robert Garland of the Garland Nut & Rivet Company, Pittsburgh.

At this conference, the Executive Committee of both the American Hardware Manufacturers and the Southern Jobbers Associations completed arrangements for a joint convention of the two Associations, which will be held at Hot Springs, Va., opening on June 12. An interesting programme was outlined, which includes an entertainment and banquet on Wednesday evening, June 13. The complete programme will be ready for mailing to the members in about two weeks, and will include among other features the following:

An Address of Welcome to the manufacturers, which will be responded to by C. W. Asbury, of the Enterprise Manufacturing Co., Philadelphia; an Address of Welcome to Hot Springs by J. T. McAllister; also an Address by W. P. Smith. A joint executive session of both Associations will take place on Wednesday afternoon, at which W. W. Webber will deliver an address on the "Effects of Quantity Differentials." He will be followed by another member of the Southern Hardware Jobbers' Association, to whom Robert Garland will reply. An open discussion of this subject will ensue, and also one on "Uniform Freight Classification." This subject will be opened by W. E. Newell of the Southern Hardware Jobbers' Association, to be followed by a member of the American Hardware Manufacturers' Association. Wednesday evening will be devoted to a banquet, as before suggested. On Thursday morning there will be executive sessions of each Association, and a joint session of both Associations in the afternoon, which will be an open meeting, at which an address on "The Integrity of Contracts," opened by a manufacturer, will be followed by a general discussion. There will be an address by E. M. Bush, president of the National Retail Hardware Association, subject to be announced, and an address by J. H. Kennedy, editor of the *Hardware Dealers' Magazine*. Thursday evening will be devoted to entertainment features, and on Friday at 10 A. M. will be an executive session of the Southern Hardware Jobbers' Association, election of officers, etc.

THE FEELING OF FRIENDSHIP BETWEEN COMPETITORS.

"No," replied the Hardwareman to an inquiring customer, "we don't keep A. X. brand carpet sweepers, but may I now show you the famous Sweepwell, which we consider the best carpet sweeper made?" No use my looking at it, nothing will do but a 1906 A. X.," replied the customer. "I'm sorry I don't carry it, but I think you can get it at the Other Hardware Company's. I'll telephone and see, if you wish." The customer seemed pleased at this attention, saying he would appreciate it. The Hardwareman turned to the telephone, calling up the Other Hardware Company. He found that they didn't sell this brand of sweeper—thought that Mr. Straightdealer handled it. "This is Straightdealer talking," I heard him say, "You say Smith carries A. X. sweepers, you think; I'll call him up." It was found that this particular brand was sold by Smith—but the Smith Hardware Co. was at the other end of town, some blocks away. Keeping Smith still on the wire, Straightdealer turned to his customer, asking if he wanted one sent. "Yes," and tell him to send it up C. O. D. I've never had an account there, and I don't care to open one." The order was given accordingly. The customer thanked Mr. Straightdealer for his trouble, made a small purchase, chatted a minute, and left the store feeling pleased with the treatment he had received.

Mr. Straightdealer came back to me, and after introducing myself, I remarked upon the unusual way of helping a competitor to secure business. It was the first time I had made the town, and it was explained to me how all the Hardwaremen there worked together. First, a local association had been formed, and gradually the feeling of friendship had replaced that of rivalry. "This little act of mine did three good things—it pleased my customer, whom I saw would be suited with no other brand of sweeper; it pleased both the other Hardwaremen to know that I was trying to swing a little business their way, and it pleases me to feel that I've done the other fellow a good turn. Another thing, that customer might have gone to the Other Hardware store. Not finding there what he was looking for, he might possibly have sent out of town for it, and you can't tell but that in the future he might have sent out of town again, even for goods that he could buy in my store."

It was further explained how this feeling of friendship and cordiality in business on the part of the Hardwaremen in that town was enabling all of the dealers to make more money. Not by advancing prices, but by maintaining a fair price and getting a reasonable profit on the goods sold. By clubbing some of their business and buying at lower prices, by not underbidding each other on a contract job, simply to keep the other dealer from getting the job—as is often done when the dealers of a town feel that they are only rivals and competitors. As they became better acquainted, each had found the other to be a good fellow not only, but a gentleman, and had found that all were in business for the same purpose, i. e., to make money as well as to serve the public.

As was stated by this dealer to me, business was being held in the town that might often have gone out of the city or been kept to the Hardware store that might have gone into racket or department stores. Thus, outside competition had been blocked out very largely in this town by the feelings of friendship there displayed by the Hardware merchants.

The customers of these stores notice it, and reflect it back to the dealer. Any merchant who treats his competitor in a fair and liberal manner inspires confidence in the mind of his customer—and the fundamental foundation-stone of all business is confidence.

By the practice of courtesy on the part of these dealers the business is more pleasant, and many disagreeable phases of trade are never touched.

In the town mentioned above, the Hardwaremen have monthly meetings, at which time a supper is served—some times these meetings are held at a club, but more often in the home of one of the members. A list of slow or unprofitable customers is kept, and the dead beats are spotted, and in this way much money is saved.

Another result of this friendly feeling made itself manifest on the part of the clerks in these stores. It is a positive fact that the Hardware clerks in that town are more courteous in their treatment of customers. And the traveling salesman seemed to be shown an unusual amount of consideration—all this as a result of this strong feeling of friendship between the Hardware merchants themselves.

If Hardwaremen doing business in the same town could only know and realize the many advantages and real results to be obtained by getting in touch with one another, they would find business not only more pleasant in theory but more profitable in practice.

HAMMERNAIL.

Legal Matters**OF INTEREST TO HARDWAREMEN****EMPLOYMENT—UNION—MEMBERSHIP.**

The Appellate Division of the New York Supreme Court for the First Department held, in the recent case of *The People vs. Marcus*, that section 171a of the Penal Code, rendering criminally liable any employer of labor who should make it a condition of employment that the employee should not belong to a labor union, was unconstitutional. The court said: "Such legislation is a radical departure from what has been regarded in the past as the providence of the legislature. It has always been supposed, and the decisions so holding are numerous, that an employer, so long as the contract does not affect the public health, morals or welfare, is at liberty to employ or discharge whomsoever he pleases, and to refuse to employ any person no matter what his motive thereof may be, without becoming answerable therefor, except for a breach of contract for an unjustifiable discharge of an employee; and likewise that an individual may accept or refuse any employment that he chooses or quit work at will, and that his reason therefore cannot be questioned, and he incurs thereby only liability for a breach of contract if he quit in violation of his contract."

CONTRACT—DELIVERY—DAMAGES.

The Supreme Court of Indiana held, in the case of *The Connersville Wagon Company vs. McFarlan Carriage Company*, that a contract by which one party agreed to furnish to another 10,000 articles of a certain description during the next year, or so many thereof as he might order, not less than \$5,000, became a binding contract as to so many as the purchaser ordered pursuant to the terms of the contract and within the time allowed; that upon failure of the seller to fill his orders an action would lie that a notice by the seller that he would not furnish any more, given while the purchaser still had a right to order more, gave the purchaser a right to treat all the remainder of the 10,000 contracted for as having been ordered and refused, and that damages could not be recovered for the profits which plaintiff asserted he would have made by operating his factory if defendant's contract had been strictly performed and he had furnished materials to be combined with other materials into the finished product turned out by the plaintiff.

ACCIDENT—INJURY—AGENCY.

In the case of *Sherwood vs. Warner*, recently decided by the Court of Appeals of the District of Columbia, the plaintiff claimed to have received injuries while engaged in repairing an elevator in an apartment house owned by the defendant. While engaged in the work, the plaintiff directed the janitor of the building to pull the rope of the elevator; and by reason of the fact that the janitor caused the elevator to move in the direction opposite to that desired by the plaintiff the latter was injured. The trial court held that the janitor was acting as the agent of the plaintiff in carrying out his request, and not as the agent of the defendant, and directed a verdict for the defendant, which judgment was sustained on appeal.

WARRANTY OF MACHINE—PERSONAL INJURIES.

In the case of *Birdsinger against the McCormick Harvesting Machine Company*, decided by the New York Court of Appeals, and reported by the *New York Law Journal*, it was held that a contract for sale of a harvesting machine, reciting that the machine was warranted "to do good work, to be well made, of good materials, and to be durable if used with proper care," does not cover damages for a personal injury to an operator caused by the breaking down of the machine. Such a warranty covers only the capacity of the machine, by reason of its good construction, to do good work and indemnity to the buyer against failure in that respect. The right to recover consequential damages, as the result of a breach of warranty, depends upon the terms of the warranty, considered in connection with the article sold.

RAILROAD—SLEEPING PASSENGER—ACTION.

The Supreme Court of Michigan held, in the case of *Bass vs. Cleveland, etc., Railway Company*, that where a passenger was sleeping in a day coach when the train arrived at his destination, his failure to leave the train immediately did not terminate the relation of passenger and the carriers' duty toward him as such.

THE RETAIL HARDWARE DEALER AS AN ADVERTISER

Advertising is getting favorably into public notice, whatever the means employed, and then—keeping there. To decide aright how to advertise necessitates a study by the individual retailer of the condition and characteristics of the public he desires to reach, and a study to find the very best and most economical methods of reaching them. To say how much to advertise is to advise simply that he keep at it until he has reached all the people that he cares to reach, or can reach within the bounds of financial wisdom, and then to keep at it in order to keep before them.

It is well to adjust both stock and prices to the wants of the better people among the middle class. This will give a reputation for good goods, and it will soon be found that the poorer people will eventually realize that they get more than double the value from high-class goods than from those that are a third cheaper in price.

Four different advertising mediums may with propriety be used in advertising. These are, in the order of their importance: Personality, Printer's Ink, Window Displays, Personal Canvassing. There should never be any let-up in the first and third mediums, and the second should be in almost every case just as constantly employed.

Personality, or individuality, is as necessary to success as air is to life. It must be of the kind that inspires confidence, friendship and admiration. It is the most valuable element in the stock in trade, more vital to the business than cash, for it brings cash. It is a combination of character and front. Be honest, energetic and progressive, and fasten the fact of being so in the mind of the public. Be agreeable. Get into the limelight as much as possible, and take the business in also wherever possible.

Make the store reflect your personality; your notions of order and system and salesmanship should govern the employees. Carry out this individuality in the advertising. Have a style to the newspaper advertisements and circulars. Personally meet as many customers as possible. Work the personal equation for all it is worth; it is worth a lot.

All printed advertising must be sparkling and live and crisp, and always carry a fresh story. The telling of facts is always interesting, and there is no other retail business under the sun in which so many facts may be dug out to tell.

Newspaper and circular, and in most cases the advertising letters, should correspond with each other in the subject treated, and always should have an accompaniment in the windows. This simultaneous advertising amounts to insistence. Each method reinforces the other, and while one alone may not win direct attention, the repetition of the story in another form will usually catch the eyes of those who did not see it in the first form and fix the attention of those who did see it in another form but may not have paid particular attention to it. This employment of double and occasionally triple means of telling the same story is more than doubly and triply valuable in its effect as compared with the employment of only one means at a time. It awakens to consciousness the sub-consciousness of the majority who have read or seen the story only once.

In taking up newspaper advertising the retailer must first decide just how many and what papers to employ. For illustration, we will assume a hypothetical case: There are three papers in one town, all weeklies. One is a struggling old sheet, established at some period before the war, still following the antiquated methods prevalent then. Cut it out. Another is a live, up-to-date, red-hot Republican organ in a Republican community, read by three-fourths of the population. Its rates are rather high in comparison with those of the other papers, and its editors refuse to reduce them. That is the kind of a paper to advertise in. Pay the rates cheerfully. The third paper is a comparatively new Democratic organ, enjoying the confidence and subscriptions of most of the adherents of that party, and getting many readers among the other crowd. Take space in that paper also, but in negotiating rates make capital of the fact that the paper needs both advertising and money, and also of the fact that your taking space will increase the appearance of prosperity of the paper and will have some effect in inducing other business men to give it a trial. In this way a substantial reduction from the card rates should be secured, in which case the best thing to do is to get a contract for as long a time as possible, with the privilege of forfeiting it whenever desired.

A few words about circulation. Not only should the publisher be willing to certify to his circulation and show post-office receipts, but he should give actual figures of circulation in the sur-

rounding towns. This information is of importance, as it allows the advertiser to know just who he is getting at through his newspaper advertisements, permitting him to go after the others without loss of energy or material with circulars, letters, etc.

Very often, especially if the merchant wishes to keep hammering at different lines at one and the same time, he will find it more to his advantage to take two smaller advertisements in the same paper than one large space.

To test the drawing power of a paper or to make comparisons of the power of different papers, make some offer of a free sample or of a reduced price, the condition upon which it may be secured being the presentation by the customer of a coupon clipped from the advertisement.

Do not crowd too much into the advertisement. Say things as briefly as possible. Be direct, forceful, hitting right straight at the mark. If the newspaper is a daily, change the advertisement at least as often as every other day. If it is a weekly, change with every issue. If using more than one paper, print the same advertisements in each.

In continuity lies one of the greatest forms of strength in advertising. If it pays to advertise part of the time, it will pay much better to advertise all of the time. Just as logical to close the store in dull seasons as to stop advertising.

Keep the advertisements as fresh as the daily news. Freshness in the advertisements is as of as much importance a freshness in the goods, and freshness in the advertising tends toward freshness in the goods, for obvious reasons.

Insist that the printer use attractive type. Do not exaggerate. Untruths will be found out, and a very few of them will completely spoil the effect of the advertising. When a retailer fools the public it is always at his own expense.

Don't place the advertisement where the people must look for it in order to find it. They won't look for it. Place it where they can't help seeing it, next to reading matter of interest on the editorial or one of the news pages. Space there may cost a little more, but it is worth more. Contract for the location of the advertisement as carefully as for the amount of space, and do not pay for any advertisement that is not printed in accordance with the contract.

Better to spend ten thousand in advertising and make ten thousand net than to spend five thousand and make only nine thousand. If doubling advertising expense will bring extra net profit, then double it.

If the editor is inclined toward puffing, let him go as far as he likes, except that he must not exaggerate and must always seek to give the puff some distinct news value.

Don't be funny in the advertisements, unless it is possible to be real funny. Coin or appropriate some phrase which shall appear in every advertisement and be forever coupled with the store.

A great deal of the strength of the advertisement is in the headline. The headline should be in style at least three times as large as that used for descriptive matter and at least twice as large as the type used in the sub-heads. The shorter and fewer the words used in the headline, the better. Confine headings to three lines or less. When using more than one line none of them should reach clear across the advertisement. Use words easily understood, and make the headline as descriptive as possible, then the one who sees it will likely get the meaning whether he reads the whole advertisement or not. If the advertisement is sensational, then the headline must be also; if dignified, then the headline must be dignified.

The effectiveness of an advertisement depends in large measure upon the size of those surrounding it. Don't place a small advertisement next to several large ones. Arrange the border and type so that the advertisement will stand out from the rest. Always carefully read proofs on advertisements, and see to it that they are exactly right as regards not only arrangement, but style of type, punctuation and spelling as well.

DeVine, which comes in several styles, is the best type to use in headlines and sub-heads. It may be had in compressed, extended, italic, or, in fact, almost any style wished. For general effect, however, lining DeVine is the best display type and twelve-point pica the best body type. If running an advertisement two or three columns wide, it will be found that eighteen-point lining DeVine caps make a handsome type for the heading, and also for the name at the bottom. Use twelve-point pica for the body, and any words to be brought out prominently may be set in caps of the same letter, or in a bolder face of the same point. If the advertisement is only one column wide, eighteen-

point upper and lower case DeVenne will make a good heading. Telephone number and address should be set in a bold face type of a smaller point than the body, preferably ten-point.

Advertisement writing is not hard. Write out the matter to be included and paste on the sheet some other advertisement the style of which you would like to have followed. The printer will work it out.

A good catchy illustration always adds to the power of the advertisement. Half-tones for illustrating may be made from photographs, but they do not look well in the paper ordinarily used in newspapers, taking in good shape only on calendered paper. Line drawings and etchings do best in newspaper advertising. One cut will last for a long time, if care is taken not to mark it, and all cuts should be laid away for possible future use.

Window displays are a means of advertising that is more profitable in comparison with the cost than any other form of advertising. Display one article or line at a time, changing at least as often as once a week. Make the display either catchy by means of some mechanical or other unusual device, lay figure or beauty of ornamentation or drapery, or make it effective by show of a mass of goods, or in both ways. Display prices, using attractive cards, and have a few words explaining the display printed on one or two cards. Strive for harmony in color. Make the displays timely. Have them timed and planned several weeks ahead. Make them correspond with the newspaper advertising.

If getting out circulars, mail them, under seal and with stamp. If it is an expensive circular or a letter, put a two-cent stamp on it. If it is a cheaper form of circular a one-cent stamp may do. Twenty sealed circulars, however, are read to every one that is sent unsealed. Use the ordinary-sized commercial envelopes, for the large sizes are liable to get into the second-class mails and be broken or damaged. Don't print advertisements on the envelopes. It costs more, doesn't have the effect of an advertisement at all, and is liable to give the recipient an idea of what is contained without his going to the trouble to open it.

In circular work, paper must harmonize in color and quality with the character of the printing and its purpose. If half-tones are to be used, employ only heavy, calendered paper; the same is true of fine wood engravings. Do not use thin paper, certainly not if it is to be printed on both sides. Strong colors are allowable in circulars and book covers. For booklets and counter-slips use only white, cream, straw, or very light tints of other colors. Never use two colors of paper in a booklet unless it is to use a darker color for the cover. If the body paper is white, then any color of cover is permissible so long as it does not itself affront good taste. Roughly-finished, heavy paper makes good covers. Cream and straw-coated paper make fine backgrounds for illustrations.

When in doubt, use black ink. For catalogues and booklets, blue-black for body and bright red or cardinal for marginal notes and headings is a good combination. When inks lighter than black are used they must have a heavier face. Other good color combinations are dark blue on light-blue paper, dark orange on light yellow, dark terra cotta on light orange.

Set fliers and handbills in fourteen-point English or Roman. Headings should be in light-face Roman or DeVenne, preferably the former.

Postal cards used for advertising should carry very little matter, as otherwise they are very likely to be thrown away unread. Put on just enough to be taken in at a glance. Have one strong headline, and print the body in as large type as the space will allow. It is usually better to use the regulation size postal cards. Facsimile handwriting is better for postals than printing. The recipient's name and address are not needed in the greeting. A striking border will make the postal much more effective.

One of the best forms of circulars is the typewritten letter. Of course these letters are not really written on the typewriter, but are mimeographed or gotten out by the printer. If the retailer has his own typewriter, it will be much more profitable for him to mimeograph his letters.

Never make these letters long. The fewer the words used to tell the story, the more liable is it to make a good impression. Talk like a salesman in these letters. Give facts, facts, facts!

Personal canvassing is a valuable means of reaching persons whom you may suspect do not read your newspaper advertisements and circulars, or at least who have never been drawn to your store through those mediums. Some people are not susceptible to printed advertising, but they may be got at in a straightforward talk, and they won't forget you then, either. Every person who does not come regularly to the store should be seen at his home or office at least once every three months. It may seem like a big undertaking, but it means only a few hours on certain days of the week, and the results cannot fail to inspire to further and continuous activity in that direction.

How much to spend in advertising is answered in the fact that all advertising that brings returns over its cost pays. But there is such a thing as over-advertising, that is, advertising more than

is warranted by the amount of returns one has a reasonable right to expect. But this is a fault that very few merchants have.

Public interest must be sustained, and a method of advertising that has proven a faithful friend should be treated like any other faithful friend. If you do not keep public interest sustained, some other fellow may turn the current away when you are not looking, making you a great deal of trouble to turn it back again. It is never well either to underestimate the part that advertising has played in building up your trade. Keep on pushing!

At the first of each year a general program of advertising for the year should be formulated, after you have first decided how much to spend, and this program should be followed without letting up a particle. The amount to be spent should be arrived at by taking a certain per cent. of the previous year's business. Of course, there are certain conditions and locations where the present trade could be doubled or quadrupled, and in such a case the failure to lay out enough money for advertising to bring this increase would be sheerest folly, even if the amount should seem to be all out of proportion to the annual business the store is accustomed to doing.

STIMULATING TRADE.

By LYLE MERTON.

The selling department is the department of the jobbing store. Sales must be kept up and also increased if the balance to the credit of profit and loss is what it should be at the end of the year. Goods that realize a fair profit are the ones to push.

In order to increase the sales on a certain line of goods the salesmen must have special instructions to push this particular line, to always keep it in mind and continually before their customers. They can be encouraged to increase their sales by a bonus or cash prize for the man who sells the largest amount during the year.

FILES.

Files are a class of goods which pay to push. The profit on them is fairly good, they are clean goods to handle, they do not easily deteriorate with age, there is no waste or loss in handling them, they are staples. The salesmen's attention can be drawn to the large quantity used and the desirability of large sales. To attain this he should help his customers to make sales. He can often call upon mechanics or factories or mills and make sales which he can turn into the retailer. He can in this way come in contact with the men who use files and learn much which will aid him in acquiring talking points for future business.

Cutlery is another line which should be pushed to the extreme limit by the jobber. One method of increasing sales is to present an attractive show case to the retailer who will buy a stated amount of cutlery in one order. This plan will be found to work well as many small retailers have poor facilities for displaying their cutlery, but with the gift of an attractive case their sales will increase.

STAPLE GOODS.

Some merchants argue that it does not pay to push staple goods, the profit being so small. We do not agree with this view. Although the profit, say, on nails, is only five per cent., yet the amount of capital invested is turned over many times during the year, perhaps, ten or twelve times; while an article like lawn mowers which may yield a profit of perhaps twenty per cent. sells only one or two months of the year. Which class of goods pays the better profit upon the relative capital invested? The answer is obvious. Our aim should be to push seasonable as well as everyday goods, but don't neglect the staples. By giving a little attention to them their volume may be increased and profits thereby augmented.

SPECIALTY SALESMEN.

In addition to the regular salesmen of the house it is considered good business by some houses to have men to go over the same ground as the other men but selling only one line or specialty as guns, cutlery or new goods, etc.

The ordinary Hardware salesman of the jobbing house has so many varied lines that he cannot always give some profitable goods the attention they deserve; hence the need of specialty salesman, and it will be found to pay, if judgment in selection of men and goods is used. The specialty salesman can cover more ground and in shorter time; having only one thing to talk about he can more readily interest and gain the attention of his customer. Instead of soliciting the tradesmen to visit his sample room, he can take his samples under his arm to his customer's store.

The organization of the sales department so that a definite system may be adhered to will be found to tax the best and most intelligent attention of the jobber.

The more complete the organization and more systematic it is the better the results will be. Plans may be perfected that promise much but results may be disappointing. Do not let adherence to system deter you from changing methods when such is the case.

A SUPERB DISPLAY OF "STARRETT" TOOLS.

During the time of the Convention of the Indiana Retail Hardware Association at Indianapolis, Ind., the following illustration will indicate what a magnificent display of "Starrett" tools was given by Lilly & Stalnakar of that city. The window was carefully dressed by McKinney of the concern mentioned. The rear

brass. In Fig. 3 is shown the Electric Four Blade Ceiling Fan wound for direct current only. They are perfectly noiseless, run in self-oiling bearings, requiring oil but once a season. They can be run from any direct incandescent electric light current or street railway circuit. The company keep in stock fans for 110, 167, 220, 250 and 500 volts, with four blades. The 167 and

AN ATTRACTIVE WINDOW DISPLAY.

and bottom of the window was covered with white cheese cloth. There was a glass shelf suspended from the top which does not show very well in the picture. The window is said to have attracted a great deal of attention among the visiting Hardware dealers and others, who were unanimous in giving unqualified praise for the artistic manner in which the tools were grouped.

BATES' VENTILATING FANS.

D. L. Bates & Brother Co., Dayton, Ohio, are the manufacturers of Ventilating Fans in large variety for water motor and direct current; among which is the Movable Desk and Counter Fan shown in Fig. 1, which can be arranged to sit on counter, connections to be made with rubber hose, or it can be set per-

FIG 1.—MOVABLE DESK AND COUNTER FAN.

manently on a shelf. They give a speed of a 12-inch fan of 1600 revolutions at 65 pounds pressure, 1-16 inch jet, and to a 16-inch fan, 1100 revolutions, at same pressure and jet. Fig. 2 shows the Wall Bracket fan, with adjustable ball and socket, so motor may be adjusted to throw air in any direction. Each fan is provided at the inlet with a threaded brass fitting, to which may be screwed the ordinary rubber hose coupling, or a permanent connection can be made at small expense. They are nicely finished in a combination of japan, oxidized copper and polished

250 volt fans are to be connected in series of three or two respectively on a 500 volt circuit. They can be furnished in

FIG. 3.—ELECTRIC CEILING FAN.

nickel, oxidized copper or polished brass. All fans are furnished in oxidized copper unless otherwise ordered.

COES WRENCH CO.'S NEW CATALOGUE.

COES WRENCH Co., Worcester, Mass., are distributing to the trade an artistic catalogue in colors, devoted to Coes' Genuine Screw Wrenches, and for which company J. C. McCarty & Co., 10 Warren Street and John H. Graham & Co., 113 Chambers Street, New York, are agents. This catalogue is printed on fine calendered paper, and half-tone cuts are used throughout. Views of their Shops Nos. 1, 2 and 3 are given, as well as a portrait of Loring Coes, the original inventor of the Screw Wrench. Included in the contents are illustrations and descriptions of their Steel Handle, Hammer Handle, Knife-Handle, Key and Mechanic's Model Wrenches. A price list will also be found, with sizes and specifications of wrenches, and case sizes and weights; also terms. The catalogue will be sent to any Hardware dealer upon request for the same.

MAST, FOOS & Co., Springfield, Ohio, have issued their Catalogue No. 28, descriptive of the merits of the Buckeye Lawn Mowers manufactured by them. Full descriptions and illustrations are given of their various styles, including the Foremost, Mascot, Buckeye Special, Junior, High Wheel, Standard Ball-Bearing High Wheel and Royal Buckeye Ball-Bearing High Wheel, all of which are made in four sizes. The catalogue also contains illustrations of their Combination Pinion and Clutch, used on all their high-wheel machines, as well as a view of their Ball Retainer, with balls in position, used on the Buckeye Standard and Royal Buckeye Mowers.

THE COUNTRY HARDWARE MERCHANT AND HIS STORE

By JOHN W. READ OF HODGENSVILLE, KY.

My idea of a country merchant is, first, that he should be a gentleman in the fullest sense of the word and realize that he is an important factor in his home town for the good or bad state of society. He should realize that

HE EXERTS AN INFLUENCE IN HIS COMMUNITY

and this influence should always be on the side of right.

He should be courteous to his customers.

Discourtesy is a crime and, if continued in, will banish any merchant from business if it does not land him in the penitentiary. He should study his business, try to understand the difference between raw products and finished articles and know their merits so that he can explain to his customers the points of excellence. He should study his customers as well as his stock and try to know their peculiarities and anticipate their wants and

HAVE GOODS TO SUIT THEIR TASTE.

It is not necessary that he should make every one his confidant and explain to each his financial affairs and what he is doing in business, but there are two parties to whom he should never refuse to make a statement whenever requested—the mercantile agency and his jobber.

I don't suppose that anything gives the country merchant so much thought and worry as unfair competition. His city brother can have his unions or organizations and arrange prices, what each shall sell and at what per cent., and these arrangements are lived up to, but he has no such opportunity. He generally has no competitors except grocery keepers and blacksmiths, who seem to think he has encroached upon their rights and territory and they feel in duty bound to cut his throat whenever they get a chance by selling some article for less money than cost, or getting a special order for something which they do not handle and he does and letting the customer have it at cost and freight. If you are placed in such a position make it a special point to keep your store well stocked with an assortment of Hardware which they do not handle as well as with the staple line they do, taking special care that you do not let your stock run out of any of these articles and adding from time to time such novelties as you can afford to pay for, working and selling all such lines at a reasonable per cent. profit and treating your competitors with courtesy until you have convinced them that you have a right to exist and that you are not trying to run them out of business, but are making but one effort and that effort only to be considered. A Hardware merchant always pays for goods in time to take discounts. While the discount is small on Hardware

IT PAYS TO TAKE ADVANTAGE OF IT

in more ways than one. You save more than the regular rate of interest on your money, save the annoyance of receiving statements, and the practice begets for you a name of being prompt, which is worth a great deal to a country merchant. But if it

should ever happen that you are unable to meet a bill when due, be just as prompt to notify your jobber of the fact and explain to him fully.

DO NOT SHIRK OR EVADE

or withhold anything from him, and if you are the right stripe of merchant that you should be I will guarantee that he will grant you the favor requested.

Advertising is a feature of the business that must not be neglected. No one can do this for you. Of course we all have a general idea how it should be, but if you try to copy city ads. you have wasted your time and money—that is, if your town is like the general run of country towns. I consider your county paper the best medium you can use if your ads are made attractive, not dull; honest, fair prices quoted and ads. changed ever week. Follow this with circular letters mailed to your customers calling attention to special lines handled, with a polite invitation to visit your store when in town and make it their headquarters. Perhaps you can

RUN SPECIAL SALES ON SPECIAL DAYS.

You must be judge of that.

Keep your goods in sight. Don't hide them in drawers and boxes. It is just as easy to dust and wipe off goods as to haul them out of such places when called for by customers. Show-cases and display racks are cheap and will sell you many an item in twelve months that would never be sold out of a drawer or box. Arrange your stock so you can handle it with the least expense. Group each distinct line by itself and display with price cards. Never hide goods.

KEEP EVERYTHING IN FULL VIEW.

Your stock should be as varied as your capital will permit. Purchase anything that will sell that will yield you a good profit. Of course you know horseshoes will be called for every day, but they pay only five per cent., when the same amount invested in some novelty which will call for some of your time in selling will pay fifty per cent. This is time well spent. It advertises your store as well as being a profit-maker for you.

Push lines that make profits; let staple goods take care of themselves. Don't get into a rut;

HAVE SOME GET UP AND NERVE ABOUT YOU.

Change your goods about the room. Don't allow a line to remain in one place till your customers know its position in the store as well as yourself. You are in the Hardware business; then be in it. I mean by this, keep articles that the grocery store and blacksmith do not keep; make people talk about your line, show them what you carry, and have it differ from your competitors. Every merchant makes mistakes in buying, but when you find that you have purchased some article that will not sell in your town for a profit put it on a bargain counter and let it go at once—the quicker the better.

A paper read at the recent convention of the Kentucky Retail Hardware Association.

STAR SAFETY RAZOR SHOW CASES.

The illustration which accompanies this, it is certain, will prove of interest to a large proportion of those Hardware dealers who

STAR SAFETY RAZOR SHOW CASES.

are constantly trying to make their counters look attractive, and thereby change their prosaic appearance.

To make it a pleasure for the general public to purchase the output of the enterprising firm of Kampfe Bros., 8-12 Reade Street, New York, the cut shown is the best incentive, and shows the skill of the artist in every inch of it. It is one of four cases which are shown on a folder issued by the firm for the help and convenience of this trade handling their specialties. Its dimensions are ten and three-quarter inches in height, ten inches deep and fourteen inches long, and it contains fifteen different articles, any of which will make shaving by the Star Safety Razor method as much of a pleasure as a necessity.

The second case shown in the photo is twenty-two inches in height, twenty inches deep and twenty-four inches long, and contains quite a tasty display of these conveniently arranged boxes containing shaving sets.

The third case is arranged solely for the display of strops, while the fourth case, a small one, contains an assortment of Star Safety Corn Razors.

Kampfe Bros. announce that with the first order of not less than a dozen corn razors, they will agree to furnish one of the last mentioned cases with six razors on display, and six held in reserve in a lower compartment. This is a black cloth show-case, lined with doe-skin, and provided with a neat glass sign in evidence of its contents. Complete information will be sent on request to any dealer mentioning **HARDWARE**.

THE NEW DANA MANUFACTURING CO. PLANT

The new Dana plant at Cincinnati embraces a series of model, up-to-date factories. Special work is assigned to each factory. The freezer, the mop-wringer, advances step by step, from the first building to the last, where it is finished. All of the buildings are perfectly lighted with a multitude of side and top lights. They are one-story high, all the work is done on one floor of

ing at the factory the workman enters a spacious room down the center of which are washstands of spotless neatness. It is the duty of one man to keep this locker room immaculate.

DANA MANUFACTURING CO. PLANT.

substantial concrete, and all are connected by an alley way extending from building to building, through which the different parts are taken to the assembly room and shipped.

The new plant is described in a beautifully printed pamphlet just issued by the Dana Manufacturing Co. The photographs reproduced here are some of those shown in the book. They

idea of the substantial character of the new buildings. They are built to stay and are as nearly absolutely fire-proof as modern ingenuity could make them. Prompt delivery of all orders is assured.

The working conditions have been made as pleasant as possible, to secure the best efforts of the men. Every Dana employee has his own locker for a change of clothes. On arriv-

SHIPPING DEPARTMENT.

Showing the private switch from Railroad to Factory.

Plenty of light! Plenty of lavatories! Can men, surrounded by this sort of cheer and cleanliness, fail to do their best work?

Nothing sinks a man into low company, both of women and men, so surely as timidity and diffidence of himself. If he thinks that he shall not, he may depend upon it he will not please. But with proper endeavors to please, and a degree of persuasion that he shall, it is almost certain that he will.—CHESTERFIELD.

NORTON DOOR CHECKS.

Henry Pearl & Sons Company, 74 Murray Street, New York, N. Y., are sole agents for the Improved Norton Air Door Check and Spring which is adapted to every want in the way of Door Springs and of which we give illustrations herewith.

The principle of the

NORTON DOOR CHECK

is that a compression spring operates it, no refilling nor coil to break. It opens easier, checks stronger, because stronger coil and lighter leather are used, doing away with the heavy friction common to the old pattern. The Norton Door Check can be set far out on the casing controlling the door from the center and consequently works more easily than other checks, and can be operated where there is but little space when the door is opened between door and wall; it is practically unique, and is the only article that can be supplied to such use in the door spring line.

NORTON SCREEN, PANTRY AND TELEPHONE DOOR CHECK AND SPRING.

This Check and Spring can be used either inside or outside of the screen door, telephone door, pantry door or light partition door, and even on light storm doors, and can be used on either right or left-hand doors without the use of brackets. It has an adjustable spring and the cylinder is made of brass on the same principle as the Norton Check and is extremely moderate in price, and can also be applied where there is only $2\frac{1}{2}$ inches between the two doors.

NORTON STORM DOOR CHECK.

This Storm Door Check can be used in connection with doors that are equipped with Spring hinges and can be applied between two doors in a space of $3\frac{1}{2}$ inches, and is used mostly on storm doors for private houses. It can also be furnished with an adjustable spring when so ordered.

NORTON GATE DOOR CHECK AND SPRING.

This Check can be used where there is no framed casing or trim and where it is desired to have it attached on the same side as the hinges, and also where there is very little room between the door and wall when the door is open, and is practically the only article of its kind that can be used for such purposes. Many years of experimenting has enabled them to place upon the market a superior coil spring to any yet produced, as this style of spring wire requires more than ordinary attention for the reason that these coil springs are used exclusively in making repairs; and as a consequence are set to twice the strain that they would be in a new door check, on account of the kicking action

caused either by the leakage or the evaporation of the liquid in a repair; and it is for this reason that extreme care must be exercised in the manufacture of this article.

RIXSON DOOR CHECK.

Henry Pearl & Sons Co., have just acquired the sole agency for the Double-Acting Rixson Door Check that is used in connection with double-acting spring hinges, which causes such doors to check in either direction, the spring power being furnished by the hinges themselves, and the checking medium by this door check which is applied to the inside of all doors, thus protecting it from the weather without use of auxiliary special brackets, etc. There are no springs to get out of order, and the article is composed of common joints, and is considered the greatest invention of the present age; it not only prevents the cold from going in by a door flip-flapping, but saves injury to limbs, caused by the violent swinging of the door back and forth under ordinary circumstances, but also eliminates the wear and tear on the spring hinges themselves. It saves its cost in coal in one season. This check is applied on the stile of the door, the same as the single-acting door-check and springs, and no owner of a double-acting door can very well afford to be without one.

WINN DOOR HOLDER.

They have also obtained exclusive agency of the Winn Door Holder, an article which has been on the market for several years, and has proved itself a success, being used on all government and public buildings, and is the cheapest and neatest appearing door holder on the market that will hold the highest as well as the heaviest door without the slightest possibility of breakage, the 1906 model being made stronger in every detail. They have just placed an order for 50 gross, and have an ample stock to supply the trade at any time. These door holders are made only of solid bronze, in all the different finishes.

They have also arranged to have each coil spring for every different make and size of door check, packed in a neat paste-board box, each labeled carefully and marked as regards size, model, etc., and a different tint paper to denote various makes and styles. They are the largest and only house of its kind in the world, carrying a complete stock of door checks and every part of the same.

The Henry Pearl & Sons Company are wholesale and retail distributors of all kinds of Door Checks and Springs, Door Holders and Spring Hinges in addition to the above.

THE AMERICAN BEAUTY HOT PLATES.

American Beauty Gas Stove Works, Erie, Pa., are the manufacturers of a line of Hot Plates, Ranges and Heaters that are constructed from the best material for the purpose, and are thoroughly tested and well crated before shipping. We present an illustration of the style of Hot Plate which is the most popular. The Hot Plates are made of wrought iron, which adds greatly to their strength and durability. They will not break in transit.

THE AMERICAN BEAUTY HOT PLATES.

and a fall will not injure them in any degree. They are furnished regularly with tops made of interchangeable cast sections, but when desired they are made with wrought tops. In the illustrations as given it shows the cast top. The burners are fully protected by a patent which has become so popular it has compelled its use with marked success in their Radiators. The manufacturers have recently perfected a modification of the same principle for a range burner of special design, which has been tested and found that it gives 45 per cent. more heat than the ordinary type.

MASSACHUSETTS TOOL CO., Greenfield, Mass., have favored us with a copy of their Catalogue No 4A of Precision Tools. This booklet is intended for the fine tool trade, and the contents include illustrations and descriptions of such goods as Micrometer Calipers, Depth Gauges, Screw Thread Micrometers, Micrometer Gauges, Surface Gauges, Tempered Steel Flexible and Metric Graduation Rules, Hook Rules, Steel Rule Clamps, Keyseating Rule Blocks, Steel Center Squares, Combination Squares, Bevel Protractors, Combination Sets, Blade Squares, Solid Beam Squares, Screw Pitch Gauges, Center Gauges, Surface Gauges, Precision Center Punches, etc., etc. The catalogue will be found a very valuable one to those interested.

RECENT TRADE PUBLICATIONS.

KELSEY HEATING CO., Syracuse, N. Y., with New York office at No. 156 Fifth Avenue, are sending out an exceedingly artistic little booklet showing "Just a Few Houses" in which the Kelsey Heating System is employed. Half-tone illustrations are given of some of the most beautiful residences and mansions in the country, where this particular method of heating is in operation, and from an artistic standpoint alone this catalogue is well worth the having. A sectional view of the new improved Kelsey Warm Air Generator is also given. A brief description of the merits of the Kelsey Heating System is included in the booklet, and to those interested they will be pleased to send additional booklets "About the Kelsey" and "What the Users Say."

DANA MANUFACTURING CO., Cincinnati, Ohio, have distributed a very handsome little catalogue in colors covering their line of Ice Cream Freezers. Various styles are shown, including the Peerless Iceland, Polar, Frezo and Toy Peerless Freezers; also illustrations of their scientific dasher and Peerless Ice Chippers. They also manufacture a full line of Power Freezers, the Dana Mop Wringer and the Dana Iceless Refrigerators. These illustrations are in colors. This catalogue may be had upon request.

STAR CORUNDUM WHEEL CO., LTD., Detroit, Mich., have issued their illustrated catalogue No. 8 of Emery and Corundum Wheels, Grinding Machinery and Sharpening Devices. They claim that their corundum wheels are water-proof, durable and quick cutting; that every wheel is tested before shipment, and that they produce no dust nor odor. They received the Highest Award in 1904 at the Universal Exposition in St. Louis. The contents include Elastic Wheels, Solid Craig Mine Crystal Corundum, Star Silicate, Adamite or Electric, Saw Gumming, for saw and planing mills, furniture and other wood-working factories; Star Hard Corner, Cylinder and Cup Wheels, Huntington Emery Wheel Dresser, Special Wheels for the Grinding Machinery of Brown & Sharpe, the Landis Tool Co., Cincinnati Cutter and Tool Co., Iroquois Machine Co., Wells Bros. Universal Cutter Grinder, etc., as well as Wheels for special machines, Knife and Hollow Ware Grinding Wheels; also a large assortment of Star Oil Stones of various sizes, Emery Bricks and Pocket Knife Stones, manufactured to be distributed among dealers in Hardware, machinists' tools and plumbers' supplies as an advertising novelty. They also make Knife Sharpeners, Axe, Farriers, Hacker, Scythe, Sickle, Gouge, Slip, Dry Rubbing and Sharpening Stones. Special attention is called in the latter part of the catalogue to their line of Electric and Belt-Driven Grinding Machinery, under the name of the Vulcan Grinders. There will also be found suggestions for use of wheels, rules for calculating speeds and diameters of pulleys, table of emery wheel speeds, with price lists and telegraph code.

DAVENPORT LADDER CO., 408-412 Bridge Avenue, Davenport, Iowa, are distributing their 1906 catalogue and price list to the trade. They call particular attention to their New England Spruce and Norway Pine Extension, Fire and Trestle Ladders; also Pine Poles and Lifting Rods. They state: "All of our ladders are made from carefully selected timber, with second growth hard wood rungs, *tenoned*, firmly put together, and every rung securely fastened at each end. The side pieces of our ladders are not bored clear through. The rungs so nearly through, but not quite, leaving the outside smooth, and the rungs being *tenoned* and fitted tight on the inside the ladders cannot rot, and are much stronger."

These various lines of ladders are illustrated, as well as ladders for fruit pickers and window washers; Single and Extension, and a line of Step Ladders under the name of "Perfection" and "Davenport." This company also manufacture a Painters' Special Ladder and the "Daisy" and "Star" Folding Clothes Bar. Send for a copy of this catalogue.

DAYTON MOTOR FAN CO., Dayton, Ohio, have issued their new catalogue of Ceiling and Desk Fans, with direct current. The illustrations and descriptions are numerous, and are printed on fine calendered paper with excellent half-tone cuts. All the information necessary for the operating of these very useful articles is clearly given, together with sizes, etc. Their line includes the Original "Dayton" Motor, the "Dayton" Electrolier, "Dayton" Column, "Dayton" Junior, Direct Current Swivel Trunnion Desk and Wall Fans, Imperial and Standard Guards, "Dayton" Ventilating Exhaust Motor and Water Fans, Rheostats, etc. Sectional views are also included in the contents.

PASTEUR-CHAMBERLAND FILTER CO., Dayton, Ohio, have favored us with a catalogue describing and illustrating their Pasteur Germ Proof Water Filters, showing their construction and merits. They state: "This catalogue is issued for the instruction of our dealers, to show them how the Pasteur Germ Proof Water Filter is made, of what material, its advantages over other so-called filters, how it is connected, and in fact full information in detail." Both interior and exterior views of these Filters are given, showing their Nysa Water Filter in use in the Philadelphia Stock Exchange, in the New York office of the National Cash Register Co., Sub Treasury, Chicago, and the Continental Fire Insurance Co., New York. Their Reservoir Globe Shape is also illustrated, which is especially adapted for lavatories, restaurants and bars. Interior views of these are also given, showing them in use in the Great Northern Hotel, Chicago and the Reading Terminal. They also show these Reservoir Filters in Acorn Shape, Tank or School Style, Original style, for use in factories, hospitals, schools, etc., and a line of Non-Reservoir Water Filters in use at Carnegie Music Hall, Cafe Saverin and Trinity School, New York; also a Suspended Water Filter, with two-gallon jar, set up for small family use; Storage Jars, Tourist Water Filters, Army, Camp or Field Water Filters, the Vesta, Vega, Isis, Leda, Nysa Hygienic and Non-Pressure Water Filters. This is a very valuable and complete catalogue, and may be had upon request.

NIAGARA PAPER MILLS, Lockport, New York, makers of high-grade papers of all kinds, have sent us a highly ornamental booklet entitled "The Ambassador," this being their Manufacturers Number. The contents are devoted to the most artistic and superb kinds and qualities of catalogue is gotten up in a manufactured by them, and the catalogue is gotten up in a novel and interesting manner. This catalogue will be found very useful to those looking for something superior and at the same time unique in the way of cover papers.

THE ROYAL POLISHED STEEL ROASTER CO., Troy, Ohio, are distributing to the trade several interesting pamphlets, describing their specialties in the line of Troy Ovens and Royal Polished Steel Roasters and Bakers, adapted especially for roasting meats, poultry, fish and game, and for baking bread, biscuit, cake, puddings, etc., and which are made to fit any stove or range. Directions for use are given, and price list of the various sizes. These are very useful little pamphlets.

THE JOHN DUNLAP CO., Pittsburgh, Pa., with general offices and factories at Carnegie, Pa., have issued their illustrated Catalogue No. 11 of Enameled Wares, which include four distinct lines, viz.: Monogram, Blue-Stone, Vulcan and Janet Ware, manufactured by them after their own formulas and under their own letters patent. The illustrations are numerous, many of them in natural coloring, and cover such useful household articles as coffee and tea pots, foot baths, milk or rice boilers, bowls, buckets, dinner pails, colanders, drinking cups, cuspidors, dippers, soap dishes, funnels, preserving kettles, tea kettles, ladles, cake moulds, cake, muffin and mixing pans, milk, pudding, sauce and stew pans, pie plates, roasters and bakers, skimmers and turners. This is an old concern, having been established in 1839, and their catalogue is a very full and complete one.

LATSHAW PRESSED STEEL & PULLEY CO., Pittsburgh, Pa., with works at Pennsylvania and Grant Avenues, Allegheny, Pa., are sending out their new price list of Steel Split Pulleys. The book is devoted to a description of the advantages of the pulleys of this particular make; also rules for calculating size and speed of pulleys, as well as tables of standard bores and interchangeable bushings. Terms are also given, and a telegraphic cipher for convenience in ordering. A full-page illustration of their large plant completes the contents, and those interested would do well to apply for a copy.

KEYSTONE STAMPING CO., Allegheny, Pa., are placing before the trade their Curry Comb catalogue, fully illustrated, and descriptive of their various styles, which are known by numbers, and which are made with carmine and black enameled handles. They also add an illustration and description of their Keystone Steel Garden Trowel, which they furnish lacquered and tinned, and their Keystone Corner Irons, made of soft steel in various sizes. A very useful little catalogue.

NEW GOODS AND SPECIALTIES

THE GEM LAWN CLEANER.

The Gem Lawn Cleaner, shown in accompanying cut, is one of the most valuable auxiliaries to the mower in keeping the lawn in good condition. It is an exploded notion that it improves a lawn to let the cut grass remain, as it withers up and gives the lawn an untidy appearance. At the same time it prevents circulation of air and admission of light to the ground, thus stifling a certain amount of new growth upon which the lawn depends for its best appearance. This machine has been in use for half a dozen seasons and has thoroughly demonstrated its practicality. It will not only pick up the cut grass, but will gather up

THE GEM LAWN CLEANER.

from the lawn dead leaves; paper; stones; peanut shells; apples, or any other trash which is so often found on a lawn. It cleans a strip twenty-four inches wide, leaving the grass standing straight and raising the low-lying crab grass and other running weeds, so that the mower will cut them off and prevent their germinating. This, in a short time, will rid the lawn of all such growths, as they are annuals and depend on the ripening of their seed for future growth. The Cleaner is thoroughly made of metal, wood and canvas, and put together in a substantial and mechanical manner, combining durability with lightness in construction. The revolution of the fan (which is made of a series of wood rakes with wire teeth) creates a strong current of air, which carries the refuse backward into the large canvas basket holding several bushels. This catcher is easily removed and emptied. The Gem Lawn Cleaner is now manufactured in the celebrated Pennsylvania Lawn Mower Factory, and is offered by the Supplee Hardware Co., Philadelphia, Pa., to the trade at a liberal discount from the consumer's price, which, we understand, is \$14 each.

C. C. C. SAW CLAMP.

C. W. Cardwell, Jamaica, N. Y., is placing before the trade the C. C. C. Saw Clamp, of which we give an illustration. This is an entirely new style of saw clamp, weighing slightly over one pound, and could be carried in the pocket if necessary. The

C. C. C. SAW CLAMP.

frame is made from the best grey iron, japanned. The clamping part is of rolled steel completely covered with rubber, which holds the saw perfectly rigid, taking up all vibration, and thus saves greatly in the cost of files, and at the same time reducing the noise customarily produced, and making the operation of filing practically noiseless. The manufacturer claims that this

saw clamp is an improved style that surpasses anything on the market, and is especially appreciated by wood-workers, owing to its great simplicity, lightness, durability and efficiency, together with the small space it occupies.

BEMIS & CALL'S IMPROVED PIPE WRENCH NO. 52.

Bemis & Call Hardware & Tool Company, Springfield, Mass., among the many labor-saving specialties they manufacture, are the makers of the Improved Pipe Wrench No. 52, of which we give an illustration. The Wrench consists of a one-piece forged steel bar slide with serrated steel jaw, secured by a pin and

BEMIS & CALL'S PIPE WRENCH NO. 52.

operating nut. By reason of the jaws being offset from the bar, the wrench can be applied and operated on a pipe located against a wall or in other confined places. The manufacturers refer to the fact that in the construction of this improved pipe wrench, strength and durability have received first consideration. The weakness in the standard makes of pipe wrenches is at the angle of the upper jaw. This wrench is thirty per cent. stronger at this point. It will not crush, slip or lock on the pipe, being built for hard usage from the best of materials. All parts are interchangeable, so that when worn out or broken they may be replaced. The eight and ten inch sizes are provided with wooden handles, the 14, 18 and 24 inch with steel handles, as shown in illustration.

WITHOUT LOSS IN LEVERAGE.

The Archimedeian theory that the earth could be pried up out of its running gear is too well known to require detailing at this moment. We are told that the venerable gentleman of Syracuse was an apt mathematician and, as such, not prone to make assertions without fully knowing whereof he spoke. As he was well aware that the orderly circulation of the sphere mundane among myriads of other globes in the skies was governed by laws that could not be circumvented as easily as the mere man-made kind, he jokingly took refuge behind ifs and

EVERY TUBULAR SOCKET PLAIN BACK SHOVEL.

ands to make his little miracle seem feasible. The crowbar necessary for the feat would have been extra heavy and long, and the block, upon which to rest it, rather substantial, yet with this simple paraphernalia, presto change! In the opinion of The Avery Stamping Company, whose factory is located at Cleveland, Ohio, this historical sensation bore prophetic testimony to the potentiality of their tubular socket plainback shovels. Like the imaginary block beneath the crowbar of which Archimedes dreamt, the hand of the user of these shovels gets close to the earth (loaded on the blade) and with the longer lever resulting from the elimination of the wasteful curve in the handle such as found in shovels of other makes, work is made easier by about forty per cent. The only curve in the handle of these shovels is a right-hand one, starting up from the blade itself, without loss in leverage. It is claimed that these shovels will move more earth and quicker than others. Merchants interested should have the company explain to them the "Beauty of the Simple Curve" shown in their leaflet, which is free, if HARDWARE be mentioned.

DETACHABLE HOSE RACK.

Specialty Manufacturing Co., St. Anthony Park, Minn., introducing to the Hardware trade the Detachable Hose shown in the accompanying illustration. It is furnished with two brackets, one of which is fastened to the house or over the hose is to be attached, about a foot from the faucet. The other bracket is fastened wherever it is desired to store the hose when not in use. The brackets are left permanently attached. The rack lifts off readily, and is referred to as much more convenient than a hose reel. It is not necessary to take the hose from the rack before attaching to the faucet, neither is it necessary to take the hose from the rack when it is desired to use only a short portion of it, as the water will pass

BARRETT'S XXX GLASS CUTTER NO. 15.

the hose on the rack as well as if the hose was on the faucet. The device is alluded to as keeping the hose always in the way, as not taking up nearly the space required by

DETACHABLE HOSE RACK.

ordinary hose reel, and as much more convenient to handle. The rack is made from malleable and wrought iron, galvanized. It can be used by merchants to display hose for sale. The rack weighs eighty pounds to the dozen.

BARRETT'S XXX GLASS CUTTERS.

Barrett, Bristol, Conn., is the manufacturer of the XXX

Glass Cutters, which we illustrate herewith. In the manufacture of these steel Glass Cutters he has had twenty-five years' experience, and claims to make the largest line of these labor-saving appliances which it is possible to attain, devoting as he does his whole energy and entire plant to the production of Glass Cutters only. They have become almost universally used as a substitute for the glaziers' diamond, and their inexpensiveness has largely increased the sale of them, and made the distribution a wide one. The different styles of handle, of which there are a variety, are made to conform to the hand, and will be found as suitable as the old glaziers' diamond, but instead of the diamond point they are fitted with a small hardened steel revolving wheel, the sharp edge of which cuts as well as the

diamond. The XXX Glass Cutters are made with rosewood handle, and put up attractively as shown, for show-case display. They are also furnished on cards of one dozen each, at same price as when boxed. We also give an illustration of the Standard Glass Cutter No. 15, which is designed to be used as a paper cutter or trimmer for cutting paper for use for etching purposes.

THE ROGERS BELT AND STRAP PUNCH.

The Sattley Stacker Co., Indianapolis, Ind., are bringing before the Hardware and supply trade the Rogers Belt and Strap Punch, an illustration of which is given. It will be found a very useful little appliance to add to one's assortment of tools. It

THE ROGERS BELT AND STRAP PUNCH.

is easily sharpened if it should get dull. When not in use it is drawn back into the handle, which protects it. Is easily carried in the vest pocket; will cut any size hole from 1-16 to 3/8 inch, in canvas, rubber or the heaviest double-leather, oak-tanned belting with perfect ease. In using the punch, simply extend the blade to the size hole described, push the blade straight through the belt up to the handle, pressing the end of the handle firmly against the belt and turn it one-half around, which takes out the core of the sized hole desired. In lacing a belt, it will be found convenient to wet or oil the end of the lace leather, light a match and crisp the end the least bit, which will make a hard point and makes it easy to push through

the hole in the belt. After the belt is laced, to fasten the end of the lacing push this punch through the leather straight, and it will cut a half circle, forming a catch or a gate. By nicking the lacing, after it is pushed through the opening, it is impossible to pull it out. This will hold it firm without making a knot.

THE IDEAL LAWN MOWER GRINDER.

Although the Ideal Lawn Mower Grinder, manufactured by Root Bros. Co., Plymouth, Ohio, has been on the market but three years, it has caused a good deal of "talk" among repair men, and it is evident that it has come to stay. The capacity of the factory is taxed to the utmost to fill orders and the cry is still for more. For 1906 a better machine is offered than previously, as it contains some new features. Instead of a common emery wheel, carborundum is used, though the buyer is paying no more for it. And in the present make of machine a separate shaft or screw rod is used on which the grinding wheel slides, making the machine much stronger. Other improvements have been made and the manufacturers now offer it with every assurance that complete satisfaction will be given every purchaser.

STEVENS' MAYNARD JUNIOR RIFLE.

J. Stevens Arms & Tool Co., Chicopee Falls, Mass., have made a number of changes in the well-known Maynard Junior Rifle No. 15, which are intended to make even more popular this par-

FIG. 1.—STEVENS MAYNARD JUNIOR RIFLE.

ticular product. Heretofore the rifle has been made with a flat stock, but, as will be seen in the new illustration, Fig. 1, after this date it can be furnished with the regular oval rifle stock without additional charge. In the illustration, Fig. 2, is shown the mechanism similar to the old-time Maynard, formerly made by the Massachusetts Arms Co., and justly popular in its day, which was always noted for the simplicity and durability of the action. The Maynard Junior is correctly named. It is claimed

FIG. 2.—SHOWING "MAYNARD" MECHANISM.

to be the lowest priced lever-action rifle on the market to-day, listing at \$3. It is made in .22 calibre only and chambers for .22 short, long and long rifle cartridges. A shot gun No. 15½ is also offered, which is the same as the rifle except that it has a smooth bore barrel for a 0.22 shot cartridge.

KANGAROO TRICK LOCKS.

The market and demand for good, catchy novelties is growing from year to year, and a considerable volume of cash is turned

over quickly and easily by promptly catering to this demand. That the public and trade is keen to recognize and take up a good

thing is illustrated in the experience of the General Specialty Manufacturing Co., Arcade Building, Philadelphia, with one of their latest specialties, the Kangaroo Trick Lock. On the surface the Kangaroo looks like a well-made padlock. The trick is to open it, using the key, and no one has yet been found, who discovered, without assistance, just how the trick is done. When it is once opened the hasp closes with a spring in the usual manner, so that with an open lock in his hand a joker has unlimited possibilities for mischief. The Kangaroo is also a practical padlock for securing drawers, boxes, lockers, etc. But perhaps its widest field of utility is as an advertising medium. The price of the Kangaroo lock is so low that advertisers can afford to give them away in quantity, with a trade-mark or advertising phrase stamped in the steel, as shown in the illustration. Advertising designs can also be stamped on the lock, producing a complete advertisement that is sure to endure and pass from hand to hand. For use in advertising the locks may be sent through the mails, with tag or unsealed envelope attached, under one-cent postage.

"KINGFISHER" BRAND BRAIDED SILK FISH-LINES.

E. J. MARTIN'S SONS, Rockville, Conn., makers of the "Kingfisher" Brand Braided Silk Fish-lines, are one of the largest fish-line manufacturers engaged in the business. Silk fish-lines

is a specialty with them, and they probably make the largest variety of silk fish-lines in the world. One of their newest productions this season, to which they desire to call particular attention, is their "Saltene" Enamel Line. This line is treated with a specially prepared enamel which renders it impervious to hot or cold water or water containing mineral substances. The line has extreme strength, and is most beautiful in finish. Every line

"KINGFISHER" BRAND BRAIDED SILK FISH-LINES.

is sold under the "Kingfisher" trade-mark, which is a guarantee of quality. Every one of the largest fishing tackle jobbers in this country handles "Kingfisher" lines. This alone is a high testimonial of the superior quality of the lines made by this firm.

SPECIAL FARM AND GARDEN TOOLS.

A very unusual business condition exists in the Agricultural Hand-Tool Industry. To those who are engaged in the business, it is a decidedly interesting condition on account of the opportunities for profit-increasing which are involved. There is being manufactured a great variety of what the trade calls "Special

Tools" which have a great deal of merit, but are by no means as popular as they deserve to be. These are special styles of hand-tools, designed particularly for certain kinds of work, and their advantage lies in their ability to do better work, to do it with less labor, and to save time. Outside of a comparatively small number of the most progressive Hardware jobbers and dealers, and some of the larger seedmen, these tools have but a limited sale. However, this fact does not reflect upon their desirability and merit. The situation can be readily accounted for and real-

curacy equals rifles that cost twice the price of this rifle. The Savage Target Rifle can be sold to the consumer at \$6.50, with a substantial profit to the dealer.

HOW TO SELL GOODS IN SWITZERLAND.

Consul Lieberknecht, of Zurich, writes as follows to a manufacturing company in Indiana, who addressed him in regard to introducing its products into Switzerland:

Competition is keen in all lines of trade, and merchants do

SPECIAL FARMING TOOLS.

ized, when you consider that the manufacturers have been too busy supplying the demand for staple tools in the way of forks, hoes, rakes, etc., to push special tools to the front. Dealers have never been actively urged to handle them, hence there have been no possibilities of a widespread sale or demand for them. The American Fork & Hoe Co., of Cleveland, Ohio, which manufactures the most extensive line of these tools produced in the world, are just beginning to call the attention of the trade to them through advertising, and illustrations of them are now frequently seen in the leading Hardware publications. They state

not, as a rule, carry a large stock. You will never be able to do business successfully in this country if you demand that cash shall accompany the order. My advice is to send representatives of your house to foreign countries to study the people and their way of doing business. Find out what competition you have to meet, then arrange with a good live merchant to act as general agent to sell your goods to retailers in a given territory. Circulars do not sell goods in this country. Americans who have followed these methods have been very successful. It may take

SPECIAL GARDEN TOOLS.

that retail Hardware dealers are readily recognizing the selling possibilities of such practical tools, and are placing them on sale with gratifying results. These goods are largely supplied through the jobbing trade.

SAVAGE 1905 TARGET RIFLE.

The Savage Arms Co., Utica, N. Y., are the manufacturers of the Savage Model 1905 Target Rifle, which is illustrated by the accompanying cut, and which it is claimed met with the most phenomenal sale of any low-priced single shot which was offered to the trade last year. In fact, the factory was far behind its orders

a year to two to work up a trade, but will undoubtedly pay in the end.

Consul Shepard, of Hamilton, reports that under a recent decision of the customs department of Canada tools of trade brought in by a workman (not an immigrant) are dutiable unless in actual possession at time of arrival. Tools checked as baggage, although on the same train that carries the workman, are held "to be not in actual possession" and hence dutiable.

Mrs. Traddles—Tommy, you mustn't go fishing with Peter

SAVAGE TARGET RIFLE, MODEL 1905.

during the entire season. It has exceedingly attractive and symmetrical lines, and is fitted with the Savage Micrometer rear sight, and the Ivory Bead front sight. Its equipment and ac-

Risheds. He is just getting over the measles.

Tommy Traddles—There won't be any danger, mother. I never catch anything when I'm fishing.

OSBORN LAWN MOWER SHARPENER

The only practical and easy one

Does the work quickly. Keeps lawn mowers in perfect cutting condition. Fits any blade. The sharpener follows the curve of the knife and gives the proper bevel. The iron holder has a neat and durable "Tucker," bronze finish; the file has four cutting sides, which, when worn, can be turned by simply loosening the screws in holder.

**SIMPLE IN
CONSTRUCTION**

**ALWAYS READY
FOR USE**

Sharpeners are packed one dozen in compartment box, having hinged cover, with neat two color label, making an attractive display package.

Size of box, 11 x 9 1/4 inches.

RETAIL PRICE..... 25 cents each

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED MARCH 5, 1906.

- 398,835. KEY RING. R. H. Ingersoll, New York, N. Y.
- 398,866. WASHING MACHINE. Chas. E. Warner, Malvern, Kan.
- 398,884. SASH FASTENER. J. Eberhardt, Chicago, Ill.
- 398,887. SHOVEL. E. L. Fenerty, Halifax, Nova Scotia, Canada.
- 398,889. FASTENER FOR THE MEETING RAILS OF SASHES. G. Gehring, Jamaica Plain, Mass.
- 398,981. BOX FASTENER. J. W. Shaw, Shelburne Falls, Mass.
- 398,986. SCREW DRIVER. C. A. Strasser, Baltimore, Md.
- 398,989. WRENCH. J. Tomlinson, Folsom, Cal.
- 398,997. DUST PAN. R. F. Bailey, Galva, Ill.
- 399,014. VISE. Perry Brown, Louisville, Ky.
- 399,026. LOCK. W. D. Fiske, Brooklyn, N. Y.
- 399,083. LOCK. J. Roche, Terryville, Conn.
- 399,094. KEY. O. Stoddard, Detroit, Mich.
- 399,099. WASHING MACHINE. J. A. Walker, Malvern, Mass.
- 399,141. LOCK. Wm. S. Fiske, Brooklyn, N. Y.
- 399,142. DRILL. E. L. Frantz, Sweet Valley, Pa.
- 399,229. LEMON SQUEEZER. Edwin M. Scott, Auburn, N. Y.

PATENTS ISSUED MARCH 6, 1906.

- 814,076. WEATHER STRIP. C. A. Pike, Paw Paw, Mich.
- 814,113. ANIMAL SHEARS. H. S. Burley, Chicago, Ill.
- 814,125. SUSPENDERS. W. D. Flynn, Spray, N. C.
- 814,203. GRIDDLE GREASER. C. H. Haight, Oswego, Ill.
- 814,199. SELF-LOCKING NUT. L. M. Galliher, Lexington, Miss.
- 814,201. WRENCH. M. E. Griswold, Chicago, Ill.
- 814,228. PIPE VISE. A. W. McGrahan and O. K. Ascher, Los Angeles, Cal.
- 814,253. HOLDER FOR SAD IRONS. George Uelett, Waltham, Mass.

- 814,318. HEAD FOR BIT STOCKS. William A. Peck, Jersey City, N. J.
- 814,319. RATCHET MOVEMENT. William A. Peck, Jersey City, N. J.
- 814,320. JAW ON BIT STOCKS. William A. Peck, Jersey City, N. J.
- 814,335. CHANGEABLE COMBINATION KEY LOCK. W. H. Taylor, Stamford, Conn.
- 814,343. WRENCH. George W. Austin, Hollister, Cal.
- 814,354. HINGE. John R. Carter, Augusta, Ky.
- 814,355. HINGE. John R. Carter, Augusta, Ky.
- 814,370. FOLDING CLOTHES RACK. Joseph Gruninger, New York, N. Y.
- 814,460. COFFEE BOILER. J. Kruckewitt, Pittsburgh, Pa.
- 814,562. STOVE LEG CASTER. William Peters, Melvin, Ill.
- 814,575. WRENCH. John T. Tiner, Uvalde, Tex.
- 814,608. HOSE CLAMP. J. E. Johnson, New Paynesville, Minn.

PATENTS EXPIRED MARCH 12, 1906.

- 399,252. CAN OPENER. J. H. Fisher, Deerfield, Ill.
- 399,268. LATCH. O. A. Jenison, Lansing, Mich.
- 399,308. WHISK BROOM. J. Wright, Hoosick Falls, N. Y.
- 399,365. SKATE. J. A. Whelpley, Keene, N. H.
- 399,366. SAW HAMMERING MACHINE. R. Whitehill, Milwaukee, Wis.
- 399,371. ASH SIFTER. G. W. Bown, Philadelphia, Pa.
- 399,387. HAND SOLDERING IRON. E. J. Dolan, Philadelphia, Pa.
- 399,395. TAG HOLDER AND TAG. M. L. Fogel, Superior, Neb.

PATENTS EXPIRED MARCH 19, 1906.

- 399,649. COMBINED TOOL. G. H. Brooks, Morganfield, Ky.
- 399,686. COFFEE MILL. E. H. Morgan, and C. Morgan, Freeport, Ill.
- 399,719. STOVE FOR HEATING SAD IRONS. J. B. Winter, Louisville, Ky.
- 399,722. SEAL LOCK. C. Zwischkart, Salzwedel, Prussia, Ger.
- 399,790. MEAT CUTTER. A. Shepard, Plantsville, Conn.
- 399,807. TUBULAR LANTERNS. W. Westlake, Brooklyn, N. Y.
- 399,834. COVER FASTENER FOR VESSELS. J. H. Cassidy, Leavenworth, Kans.
- 399,845. FOUNTAIN ATTACHMENT FOR WASH BOILERS. G. W. Day, Lansing, Kans.

OUR CANADIAN LETTER

OPENING OF SPRING TRADE.

The mild winter has been followed by an early Spring, and reports from all sections of the country indicates that business has been exceedingly satisfactory during the winter, and has begun well with the opening of Spring activity. While some skates, snowshoes, sleighbells and similar goods have been carried over and sales of these lines will be lighter next Fall, other lines, such as builders' Hardware, bicycles, fencing, etc., have been much greater than usual, the law of compensation working itself out again. One bicycle dealer states that February sales of wheels were as great as in June last year. March, however, was a stormy month, and sales fell off again, but the automobile shows in Toronto and Montreal are being used to boost this sport into popularity again, and a large trade is looked for in April and May. Building is on the jump again, the permits issued in Toronto for the first three months of 1906 being about \$2,000,000 compared with only \$1,100,000 during the same period in last year's record season. Vancouver is nursing a boom, an organization having been formed to jump its population from less than 50,000 now to 100,000 in 1910. The whole west is alive with activity, and railroads are being planned in every section. Emigrants are already pouring in by the trainload from Europe and the States, and fully a quarter of a million are expected to locate in the Canadian West during 1906. The wonderful discoveries of silver, cobalt, copper and iron in northern Ontario are also acting as a gigantic magnet to draw thousands of people, and every week sees new Hardware stores opened in one of the centres of activity. Where there is a movement of people and industrial activity, the Hardware store finds good business.

SPORTING GOODS TRADE.

Automobile Shows in Toronto and Montreal this month have done much to create a greater demand for motor cars and boasts at one of the shows in Toronto there being 60 different models of cars made by 21 concerns. In another building 32 motor boat and accessories manufacturers made displays. It is in accessories that automobiles have their chief interest to Hardwaremen, they being able to carry a stock of such goods as spark plugs and coils, cable for wiring, dry cells, gasoline, lubricating oils, lamps, horns and other accessories. Dealers who have found bicycles pay well as a side line will probably find auto accessories even more profitable, as the class of people who ride automobiles are much more able to spend money freely than those who rode bicycles.

Hockey, Canada's national winter game, is catching on in the United States and at the same time is becoming popular enough to be professionalized. For a couple of winters a league of professional clubs has been in existence making big jumps between Pittsburgh and the "Soo." Now plans are under way to establish artificial ice rinks and professional clubs at Chicago, Winnipeg, Toronto, Montreal, London and other cities. Hockey will undoubtedly "catch on" in the States, as it is a "fast" game full of life and vigor. And Hardware merchants by posting themselves and aiding in introducing the game into their localities, can reap a share of the rewards later on. In Toronto the revival of roller skating is certain, and the success of the first rink in having to send for an additional supply of skates will probably be followed by the opening of other rinks. A roller skate hockey team has been organized and others are under way.

INDUSTRIAL DEVELOPMENT.

Two important events in Canada's industrial development occurred during the month, one being the almost definite announcement that the United States Steel Corporation would establish a gigantic steel plant in Ontario shortly, spending \$10,000,000 on the plant, and also absorbing the nickel interests at Sudbury, with the intention of making nickel steel. The other event was the successful termination of the much talked of experiment at the "Soo" in electric smelting, the results being considered eminently successful. If steel can be smelted successfully by electricity, it will mean much to Ontario, which has unlimited water power at its disposal, but is entirely lacking in coal areas.

TAXES ON TRAVELERS.

The bitter opposition made by practically all sections of the business community against the \$300 tax imposed on "foreign" travelers doing business in Quebec Province has at last borne fruit and the law has been amended, making the tax now stand at \$50 on "foreign" travelers calling on jobbers, \$100 on those calling on retailers and \$200 on those doing business direct with consumers. This action was not taken until steps were taken by members of the Ontario Legislature to retaliate by imposing a similar tax on this Province.

NEWS OF THE TRADE.

George H. Hamm, city traveler for Emerson & Fisher, St. John, N. B., has resigned his position, and will remove to Winnipeg.

Drummond, McCall & Co., Montreal, are establishing a metal warehouse in Toronto. In the past they have merely maintained a branch office.

F. W. Fairman has been appointed president and manager of the Dominion Wire Co., Montreal, J. S. McCormack, the former occupant of the position, having resigned.

C. H. Fox, formerly with the J. O. Cadham Hardware Co., Brandon, Man., has launched out as a manufacturer's agent at Vancouver, B. C. Before leaving Brandon, he was tendered an address by Brandon's leading citizens.

The Nicholson File Co., Port Hope, Ont., who formerly sold their goods through the late Walter Grose, of Montreal, have taken over the selling end themselves and Charles S. Archibald has been appointed their traveling representative.

E. G. Prior & Co., wholesale and retail Hardware dealers, Victoria, B. C., are establishing a new branch at Vernon, B. C., and are erecting a new warehouse at Victoria.

Wilkinson, Heywood and Clark, paint and varnish manufacturers, London, Eng., have opened a branch at Montreal with F. C. Reynolds in charge.

Hector A. Bernier, advertising manager for L. J. A. Surveyor, Montreal, who has won many prizes in advertising and window dressing competitions conducted by American concerns, has again distinguished himself by winning first honors for an advertisement of Asbestos Sad Irons, made by the Dover Manufacturing Co., Canal Dover, Ohio.

J. A. Flett, who for many years has conducted a successful retail Hardware store at Vancouver, B. C., has taken Alex. McLeod and Wm. Owens into partnership and formed an incorporated company.

J. W. Barnes, Port Arthur, Ont., has turned his business over to Barnes Hardware Co., Inc.

Herbert C. Birge, secretary of the Canada Screw Co., Hamilton, Ont., and son of Cyrus Birge, president of that company, died a fortnight ago. He was only 32 years of age.

Brandram & Sons, a leading English firm, intend to establish another lead corroding plant at Montreal, the Carter Co.'s plant having been unable to supply the Canadian demand so far.

Taylor, Forbes & Co., Guelph, probably the largest and most enterprising Hardware manufacturers in Canada, have purchased the entire foundry business and patterns of H. R. Ives & Co., Montreal.

Lovett H. Crowell, of Crowell Bros., Halifax, passed away recently after a lingering illness.

Hockin & Siddons, Moose Jaw, Sask., have formed an incorporated company to carry on their business.

A new cutlery factory is to be established at Niagara Falls, Ont., by J. G. Cadham and others. At present the only cutlery factory in Canada is that of the Ontario Silver Plate Co., Niagara Falls.

OBSERVES 80TH ANNIVERSARY.

The firm of Belcher & Loomis, Hardware, Weybosset Street, Providence, R. I., tendered its employees and their wives a banquet at the Crown Hotel recently, the occasion being the 80th anniversary of the founding of the firm, which was founded in 1826 by Joseph Belcher. There were 86 persons present, 63 of them being employees.

The affair began at 7:30 o'clock with a reception in the parlors of the hotel which lasted for about half an hour, and was followed by the banquet in the large dining room at 8 o'clock. After sufficient time had been given for the satisfaction of the inner man, there were two brief addresses by members of the firm. A varied programme followed. Wilbur B. Ayer acted as toastmaster and the first speaker to be introduced was Leander Belcher, Treasurer, who told some reminiscences of the early history of the firm. The second speaker was Edward A. Loomis, who made humorous remarks, and also complimented the employees on their efficient service.

The following programme was then rendered: Piano solo, Percy Ellsworth Judd; piano duet, Mr. Judd and Miss Cora Rainville; contralto solo, Mrs. Mabel Bosworth; graphophone, H. Palmer; comedian, C. W. Clissold; baritone solo, Fred Bratesman; comedian, Harry Wood; magician, W. H. Gould, assisted by Mrs. Gould; comedians, Wood and Clissold.

(Continued on page 38.)

REVIEW OF THE MARKETS.

WIRE NAILS: The roads during the last fortnight have been in pretty bad condition all over the country, so that distribution of Wire Nails by retailers was limited, and orders on Jobbers likewise. It will not be long before they will be in good condition, when the distribution on Wire Nails will prove exceedingly heavy. The Jobbers are even now placing contracts for delivery within the next 60 days. Estimating from orders now in hand at the mills and what are expected, the mills expect to operate in full during the Summer months. Prices are firm. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers\$1.85
Carload lots to retail merchants..... 1.90

New York.—Jobbers' prices as agreed upon are well maintained. The sales for the last three months are reported by the jobbers as very satisfactory as to price, and quantity fully equal to the same time last year. Small lots from store are quoted on the basis of \$2.15 per keg.

CUT NAILS: At the last meeting of the Cut Nail Association the previous prices were re-affirmed for April. Specifications on orders are being received in a very confident manner. Quotations are as follows: f.o.b. Pittsburgh, for carload lots, \$1.80, base; for less than carload lots, \$1.85. For carload lots on dock New York, \$1.95; for less than carload lots, \$2. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—Manufacturers have run quite low on stock, and assortments have been broken. 3d Fine Nails have been difficult to get for a couple of weeks. Local demand in volume is quite conservative. Quotations are steady and on the basis of \$2.05 per keg.

BARB WIRE: The mills are having heavy specifications on contracts made by the jobbers, showing that the stocks in the hands of the trade are not large. Few orders are being received by the mills, as the heavy stock orders were all placed by the trade months ago. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|--|----------|--------|
| Jobbers, carload lots..... | \$2.00 | \$2.30 |
| Retailers, carload lots..... | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: Orders are light at the mills except for shipment on contracts, which constitutes the volume of the business received. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads\$1.70
Retailers, carloads 1.75

The foregoing prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

STRAP AND T HINGES, ETC.: Manufacturers of Wrought Butts and Strap and T Hinges announce, under date March 20, higher base prices, as given below. Beyond the discounts named, the retail trade will readily obtain an additional 10 and 5 per cent. or 10 and 10 per cent. discount:

| | Per cent. Discount. |
|---|------------------------|
| Reversible and Broad..... | 75 and 5 |
| Light Reversible, Light Narrow..... | 75 and 10 |
| Loose Joint, Narrow, Light Inside Blind, etc. | 75 |
| Back Flaps, Table, Chest..... | 70 and 10 |
| <i>Wrought Strap and T Hinges.</i> | |
| Light Strap | 65 |
| Heavy Strap | 75 |
| Heavy Strap Corrugated..... | 75 |
| Light T | 60 |
| Heavy T | 55 |
| Extra Heavy T | 70 |
| Extra Heavy T Corrugated | 70 |
| Hinge Hasps | 45 |
| Long Chest | 50 |
| Crate Hinges | 65 |
| Crate Hasps | 45 |

CONDUCTOR PIPE AND EAVES TROUGH: The new discounts recommended on 14, 16 and 20 ounce Copper Conductor Pipe and Eaves Trough are: Eastern territory, 40 and 10 per cent.; Central territory, 40 and 7½ per cent.; Western and Southern territory, 40 and 5 per cent.; Southwestern territory, 40 and 2½ per cent.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound)..... 9¼ @ 9½
Standard (500 feet to the pound)..... 9¼ @ 9½
Standard Manila (550 feet to the pound).....10½ @ 10¾
Manila (600 feet to the pound).....11½ @ 12
Pure Manila (650 feet to the pound).....12½ @ 13
Less than car lots ¼ cent advance.

ROPE: The following prices may be said to represent the market:

| | Cents per Pound. |
|-----------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ @ 13 |
| B Quality Manila | 11½ @ 12 |
| Pure Sisal, 7-16 and larger..... | 9½ @ 10 |
| No. 2 Sisal, 7-16 and larger..... | 8 @ 8¼ |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil65 cents per gallon.

THE CLEVELAND TRADE.

If the statements recently made by some of the United States Senators are true, the states have created corporations that neither the states nor the government can control. They are greater than the power that created them and nothing but revolution can prevent them from continuing to wrong the public. The law's delay make it impossible for an individual to secure his rights, and relying upon this delay in adjusting claims is a practical denial of justice. In our industrial age, transportation has become so intimately associated with business, that it can make or prevent success, and yet it can continue to devour whom it chooses with no one to say nay, and the people are constitutionally prohibited from interfering. A way out of it is sure to be found and a square deal secured if the "big stick" must be called into requisition. If the railroads are to insist upon their right to do what is clearly a public wrong, and ignore their duty to the public, the remedy is not remote, and their opposition to legislation to correct this goes a long way in the public mind to condemn them. In their zeal to preserve their rights, a disposition to perform their duties would be the surest way to obtain their purpose. The conservative element on both sides when agitation clarifies the contention will control, and rights and claims will be modified, and both sides gain. If there is any lull in business, it is to get breath. The vacation will be short in 1906, as the demand is too imperative. The consumer wants and will have the goods and the jobber must run with the crowd, or be run over, and the enterprising young men in the trade are not ready to retire. March will be another record month, showing 25 per cent increase in the sales over a year ago. There is not much indication of a lull in that. When we all learn that the relation between rights and duties are as well established as the law of gravitation, part of the anxiety to protect our rights will be transferred to the performance of our duties, and we shall have peace and permanent prosperity. Emphasizing the other fellow's duty and our own rights is too much in vogue.

Those who oppose the regulation of railroad rates are hard pressed when they are driven to the fine-spun theory, that the use of judgment by the commissioners in the performance of their duties, is unconstitutional, because it assumes the judicial

department of the government. To those not educated in the intricacies of pleading, this seems like fine-spun nonsense.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. LOCKWOOD, Pres.

THE PITTSBURGH TRADE.

The great Coal Conference at Indianapolis, affecting the labor question in four States, came to an end last week in a disagreement between operators and miners. The largest interest in the Pittsburgh district agreed to pay the advance asked for, and their works will be operated without stoppage. About half the operators (in tonnage) of this district, however, have refused to pay the advance, and the men are out. It is uncertain how long this state of affairs will continue, but probably 30 to 60 days will bring one side or the other to the other's terms.

March was a cold and stormy month all through, but a fairly good business was done. Aside from the coal strike, business would be good, but for the condition of country roads. These are almost impassable just now, but a week of sunshine will fix that trouble.

Building is quite active in our city, and several new skyscrapers are started, besides other store buildings. The Southside Terminal Warehouse enterprise, comprising 40 warehouses, and costing four million dollars, was opened for use April first. The Frick and McChesney buildings were also ready for occupancy at same date. It is a puzzle where all these immense buildings find tenants, but they are filled up as soon as opened.

LOGAN-GREGG HARDWARE CO.

THE CHICAGO TRADE.

The cold backward weather of the month of March restricted orders on several of our routes. Traveling agents were discouraged because of muddy roads, snow storms, and the dullness of small towns. The last few days have been warmer; it is now bright and sunny; roads are becoming solid, farmers can get about, and building operations have commenced in earnest.

Farming tools are in such strong demand that we are behind on our orders. Window Screens, Doors, Poultry Netting and Builders' Hardware are in most every order.

Our special brand of Adelite House Paints are going out in large lots. Our business since the issue of our new catalogue has been increasing from twenty to twenty-five per cent. each month this year over the corresponding months of 1905.

Our salesmen write us that the trade is pleased with our new book and promise us our full share of their mail orders, and since we have distributed our catalogues quite freely we expect a good business through the entire year. Business prospects generally seem quite promising all over the Western country and especially so in the section tributary to Chicago.

The coal strike is an uncertain commodity, but since the heaviest demand for coal will not begin until the first of September it is to be hoped that before that time arrives an amicable settlement shall be accomplished, that will be satisfactory to all parties concerned.

Manufacturers inform us that the demand for all the leading articles in Hardware line is so heavy that prices of staple articles will remain firm, and prospects are that moderate advances in some lines of staple goods will take place.

WELLS & NELLEGAR COMPANY,
J. B. NELLEGAR.

THE ST. PAUL TRADE.

When every man is busy and prosperous, when the sun shines brightly, then surely complaints should be scarce. Such are the conditions now existing in our country. Every day we find a stream of people going West to populate the country and each man means more business. Values of goods do not change much, though scarcity is dominant. As this month advances, we see trouble ahead to get our orders filled. The wise man has anticipated his wants and is happy. We believe that every indication points to the same condition in Fall goods and advise early buying and early delivery.

HACKETT, WALTHER, GATES HARDWARE CO.

THE DAVENPORT TRADE.

March was a very dark stormy month with country roads practically impassable; hence the trade got a black eye. Our travelers report, now that the roads are better and we are having bright sunshiny days, that they will send in more orders than we can take care of.

Locally, the sale of the electric car lines, gas and electric light companies, etc., has brought in six or eight million dollars cash and it should have quite a stimulating effect on business.

SICKELS, PRESTON & NUTTING CO.

THE SAN FRANCISCO TRADE.

Because the Pacific Coast did not escape from the elements the past fortnight we are measurably contented in that Providence did not single out this neck of the woods, but sent heavy storms to check trade all over the United States. While in the East heavy snowfalls and freezing temperatures damaged fruits and vegetables, on the Pacific Coast country transportation was delayed in some sections and the shipment of farm produce to the markets diminished. But, taken on the whole, the great storms were beneficial everywhere. They covered the winter wheat belt beyond the mountains with an ample shelter of snow, and here they moistened the ground where there had been complaints of drought, and stimulated the growth of green feed all over the

coast. With us the rain was warm, the weather being soft, and should no severe frosts be experienced from now on we will probably harvest large crops of everything.

In this connection it may not be out of place to note the steady demand for steel rails, which is affirmative of the current expansion in railroad building. This is particularly noticeable west of the Missouri River, where a number of great traffic interests are reaching out for increased connections with the Pacific, with San Francisco the objective point for several of the most important. During the next five years the railroad maps will show a pronounced revision as far as San Francisco is concerned. For over twenty years this city was ignored by these railroad extensions, though there were plenty of them to the north and south of us, but latterly the tardy railroad promoters seem to be making up for lost time.

Reverting again to the fifth annual meeting of the California State Retail Hardware Association that had just convened at the time my last report had to be posted, affording only opportunity to give the major part of the opening address by President Bennett. In continuation he advocated a "Wagon and Implement Chapter," and regarding the Paint and Oil Department of the associations ensemble he said: "This department of the modern Hardware store is growing each year, and it is an important branch of our business, but it is in a deplorable condition. It is hoped the Paint and Oil Committee will have a plan whereby our members will derive a much larger differential than we now enjoy."

In Secretary Gracey's report he said: "It is against the policy of our State Association for a wholesaler to retail. We have found that while the regular wholesale Hardware houses of San Francisco, with the exception of one, do comparatively no retailing, yet the wholesale stove and tinware houses all retail. They give as their reason for so doing that all furniture houses sell stoves, and many of the manufacturers' agents carry a line of stoves and they, and the outside wholesale agents and tinware houses carrying stoves, do the same, and that it would be cutting their own throats to give it up. The question for us to consider seriously is whether or not we should adopt with all the wholesalers the classification and differential schedule to apply on Hardware, stoves, agate and tinware the same as is in vogue covering staple commodities, such as Wire Nails, Pipe, Iron, Agricultural Implements, Wagons, Etc.

Much of the business of the convention for the betterment of conditions was of an executive order and referred to committees

who will consider the needs of the association and take action at an early day. Subsequent to the theatrical and banqueting diversions afforded the convention by the San Francisco Retail Hardware Association the following officers of the State society were elected:

President, C. M. Brown, of Hollister; first vice-president, George H. Smith of Oakland; second vice-president, H. E. Devore of Ocean Park; secretary, Frank B. Dickson, of San Francisco; treasurer, G. M. Hickman of San Francisco.

Executive Committee—F. B. Ladd and Frank Rittigstein, Oakland; J. C. Mailer, Santa Rosa; J. H. Stevens, St. Helena; H. C. Bennett and J. C. Walker, San Francisco; G. H. Glassford, Fresno; D. C. Wood, Modesto; Henry Guyot, Los Angeles; C. E. Pettis, Ocean Park; A. E. Holmes and W. J. Boschken, San Jose; Oscar C. Schulze, Dixon; John C. White, Marysville, and F. J. Reid and H. H. Buhne, Eureka.

INDUSTRIAL PRESS ASSOCIATION.

SWANK HARDWARE COMPANY'S FIRE.

The extensive establishment of the Swank Hardware Company, Johnstown, Pa., was destroyed by fire early Wednesday morning, March 28. The loss is estimated at \$300,000, partly covered by insurance. The company will appreciate the attention of manufacturers in promptly forwarding catalogues and discount sheets.

(Continued from page 35.)

The firm of Belcher & Loomis, which is one of the oldest in the city, was founded in 1826 by Joseph Belcher, father of the Treasurer of the present company. The store was then located in a building that was on the site of the Narragansett Hotel, but was later moved into a building on the corner of Weybosset and Eddy streets. After a time the firm was known as Allen & Belcher, the latter taking Benjamin Allen into partnership with him. In 1857 Mr. Belcher was succeeded by his two sons, Joseph H. Belcher, who is now dead, and Leander C. Belcher. It was then known as Belcher Brothers, and was located opposite the post office on Weybosset street. The firm moved into its present location in 1889 and was then known as Belcher & Loomis, Edward A. Loomis having become a member of the firm four years previous. In 1897 the firm was incorporated as the Belcher & Loomis Hardware Company. The present officers are as follows: President—Edward A. Loomis; Secretary—Frank M. Whitford, and Treasurer—Leander C. Belcher.

THE 3 STARS BLADE

Manufactured under a process
peculiar to Kampfe Brothers

New York, Apr. 2, 1906.

Mr. R. U. PROGRESSIVE,
Retailers of Cutlery and Hardware:

We are pleased to solicit your patronage under an agency for the Original and Mechanically Perfect STAR SAFETY RAZOR, which is endorsed by men of all nations

You, as a dealer, are offered substitutes, possibly at a lower price. Have the sales and profits on the substitutes been satisfactory to you?

Do you know that you are purchasing at the same price quoted to your competitors, and if not, are you willing to subject yourself to such methods?

We hope to interest you to write us for terms and quotations to authorized agents for the sale and distribution of Star Safety Razors and accessories.

If agreeable to you we will submit a proposition, feeling confident that it will meet with your approval and hearty co-operation, and that you will accept our offer, considering it for your business interest to do so.

In anticipation we desire to thank you for an early and favorable reply.

Very truly yours,

KAMPFE BROTHERS, Dep't "S"

8-12 Reade Street, NEW YORK

A MUSEUM OF WAR RELICS.

Certainly not in the United States and probably not in the world can there be found a more extensive dealer in rare and obsolete arms and war relics than is Francis Bannerman, of New York. It may have been surmised that he was first led to engage in this business through enthusiasm as a collector, but it is not, we believe, generally known outside of New York that he owns a private collection with which no offer will tempt him to part. Mr. Bannerman has long been ambitious to found a permanent free exhibit, and that this idea is continuously uppermost in his mind is evident in the following statement of reasons prompting a removal to more commodious quarters. The extent and importance of his business in arms, ordinance and generally military stores may be ascertained by "reading between the lines."

"In 1897, the increase in our business made it necessary for us to secure a larger building than we then occupied in premises 27 Front street. We were fortunate in securing the lease of the three floors (including store), size 25 by 200, at 579 Broadway, giving us about 15,000 feet for show room and storage. In February, 1898, just prior to the sinking of the Maine, which brought on the Spanish war, with the enlargement of the United States army, such large loads of captured and obsolete government goods were offered for sale that it became necessary for us to lease three large storehouses on the Brooklyn water front, and for the storage of cartridges we purchased an island in the Hudson river of about seven acres, on which we have erected storehouses. Our Broadway store has now, in 1905, become too small for the exhibition of samples of our immense stock of military goods, and while on the lookout for a larger place, we found offered for sale the property 501 Broadway, 30 feet front on Broadway extending 200 feet through to Mercer street (in the rear) with seven floors, giving a total of 42,000 square feet, equal to about 2¾ acres. Fortunately for us, this property was offered for sale by the Metropolitan Museum of Art, to whom it had been bequeathed by the late famous locomotive builder, Jacob Rogers. The price asked for the property was beyond our means, and we could not have very well made the purchase had not the managers of the Metropolitan Museum of Art, J. P. Morgan, Darius O. Mills and other prominent men of New York city, kindly aided us by a reduction in the price, recognizing that we were at our own expense making a free exhibit of war relics and curios in New York, on the same line that the Metropolitan Museum of Art was doing with funds contributed by wealthy New York citizens. In our original offer to purchase this property, we agreed to pay so much down, leaving a mortgage for the balance, and agreed that if our offer was accepted we would present to the museum the set of Gen. George Washington's pistols, which we valued at \$10,000; but the finance board representing the museum could only accept an offer on a cash basis. The pistols would come under another board of officers. Finally we agreed on the price without the pistols. When all was arranged, D. O. Mills jokingly remarked that no doubt we would now include the pistols. We have for the last three months been overhauling and putting the building in order, making it strong enough to exhibit ordnance on the top floor, which we expect to use for the exhibiting of our New York Museum collection of war relics and curios. An electric elevator will convey visitors to the museum floor, which we expect to have in place in about one year and in charge of veterans of the Civil War. Goods in museum exhibit will not be for sale—no use wasting time making offers. This building is not our ideal, but it is a step nearer to the time when we hope to have a building that will be the most appropriate and contain the most complete collection of war relics and curios in the world, that every American citizen will be pleased to visit.

REMEMBERING NAMES.

Cultivate your memory in every direction, but particularly towards remembering names, says *Retailers' Journal*. We do not mean by this to adopt any "memory system," but learn to concentrate your mind—that is the whole secret. Begin when you hear a man's name for the first time, and while repeating it to yourself, and perhaps shaking him by the hand, look him squarely in the face and get that fixed in your mind linked with the name. Then take a good look at the man's whole figure, noting any characteristics that may be peculiar. Keep the name in mind all the time, and when he has gone keep on thinking of the name and any particular feature that may have impressed itself on you, and the chances are that when you see him again you will remember his name. Some people, when trying to remember a name, simply take one peculiar feature, a scar, a limp or a cast in the eye, but the general effect is much better, for on meeting a man you may not see the special feature that you have taken note of and will then miss the name. It may seem a considerable task to go through the inspection and concentration mentioned above, but it will be only at first. After that it will become a habit and an easy matter; in fact, you will do it without effort and even without knowing it.

THE "BOSTON" HOSE REEL.

Pillman Hose Reel Co., Boston, Mass., are placing on the market the "Boston" Hose Reel, which is illustrated by the cut herewith. It is a well constructed article, handy in its applicability and profitable in its perfection. It is 30 inches high, with a pulp cylinder as shown in illustration, of 10 inches wide with a circumference of 38 inches. The Reel and Cylinder are finish-

THE "BOSTON."

"THE COMMON SENSE."

ed in the color of the natural wood, while the frame is painted red, and varnished in a very attractive manner. All the iron-work about it is japanned. With a truck wheel of 8 inches, it will weigh 12½ pounds. It has a capacity of 200 feet of hose. The company also manufactures the "Common Sense" Hose Reel, which presents characteristics similar to the "Boston" but with a slatted cylinder, having a circumference of only 32 inches, as shown in cut, Fig. 2.

THE HICKORY HANDLE TRUST OF AMERICA.

M. R. Grace, president of the Southern Handle Company, is financing and consummating the hickory handle trust. It is understood the Southern Handle Company of Memphis and several large hickory handle manufacturers of Louisville, Ky., have consolidated, and that all other firms who will not amalgamate their interests with a big corporation, will be absorbed by it by purchase.

Hickory timber has become very scarce in every section of the country, with the exception of the hickory belt contiguous to Memphis. It is in this section where the visible output for the future is assured, and as Memphis is the logical headquarters for the trust, there is no doubt but that the amalgamated interests will be centered there. If this takes place it will mean that all the hickory handle plants in the country controlled by the trust will be centered in Memphis, the output of which will be, notwithstanding the scarcity of timber, something enormous, the trade being both domestic and export.

Memphis is the center of the hardwood belt of the United States, and this fact is proven by the number of hardwood plants that have located there in the past year. Fern Brothers, the Arthur Hardwood Flooring Company and the Murdoch Lumber Company are erecting large plants there, and a number of smaller concerns are preparing to build.

+

The regard one shows economy is like that we show an old aunt who is to leave us something at last.—SHENSTONE.

Norvoll-Shapleigh Hardware Co.

ESTABLISHED 1843

A. P. Shapleigh

BORN JANUARY 9, 1810

DIED FEBRUARY 27, 1902

ESTABLISHED THIS BUSINESS IN ST. LOUIS, 1843

First line of Edge Tools, covered by a special brand, in the United States.

TRADE

MARK

UNITED STATES PATENT OFFICE

STATEMENT and DECLARATION of the original DIAMOND EDGE trademark, No. 15,905.
(Copy of part of declaration.)

"The trademark has been continuously used by said corporation since the month of May 25th, 1864.

"The class of merchandise to which this trademark is appropriated is cutlery and edge tools, and the particular description of goods comprised in such class on which it is used by the said company is knives, razors and axes, and other edge tools."

Norvell-Shapleigh Hardware Company,

ST. LOUIS, MO.

Norvell-Shapleigh Hardware Co.

ESTABLISHED 1843

THE QUESTION OF CONTROL

Manufacturers object to jobbers' special brands because they give the jobber the control

Jobbers object to selling only manufacturers' brands because this gives the manufacturers control and places the jobber at the mercy of his competitors.

It will not take much thinking on the part of the retail merchant to see the battle is for control.

The same chain of reasoning that leads the manufacturer and the jobber to desire to control their own brands, should lead the retail merchant to seek the control of the brands he sells.

There is greater need of the retail merchants having control because they have least protection. Jobbers are somewhat protected from unrestricted competition by manufacturers regulating selling prices.

Manufacturers bring up the question of quality. You will admit some manufacturers make better goods than others. Some manufacturers make a great many different articles. Some of the things they make are good, others are not. The expert jobbing buyer enjoys the advantage of selecting the best goods from many lines.

A first-class jobber has every reason to be just as jealous of the reputation of his goods as any manufacturer. The jobber inspects carefully. The manufacturer realizes that the penalty of poor quality is the loss of the jobbers' business.

If we have not established an agent for our line in your town we are open for business. If you secure the exclusive sale of our line of goods you fall heir to the tremendous amount of work and thought we have given to the building up of our DIAMOND EDGE Goods.

If you are satisfied on the question of control but are not satisfied on the question of quality, write for one of our salesmen—see the quality of our goods and compare our prices.

You can advertise, over your own name, that you have control of this line. We have an advertising proposition and an expert advertisement writer to help you. We will send advertising signs, cards, booklets and up-to-date advertising cuts. If you do not control your line of goods, about all you can advertise is that you are in the Hardware business. Advertising that advertises your competitor's goods as well as your own is a good deal like philanthropy.

Having an entire line of Tools under one brand, every advertisement advertises the whole line. The sale of one article under this brand helps the sale of all other articles under the same brand.

Competition in the future will become more keen than it is at present. The only way for a retail merchant to lay a firm foundation for the future success of his business is to control the lines of goods he sells

Did you ever see a manufacturer advertising any goods except his own? Did you ever see a jobber advertising goods he does not control? Is it not a reflection upon your intelligence when anyone asks you to push his goods without offering you the control?

If this subject interests you, write us.

Norvell-Shapleigh Hardware Company,
ST. LOUIS, MO.

Brain and Brawn

In Coes Wrench shop plus
down-to-date facilities and
methods in wrench manu-
facture have produced

COES New "Hammer Handle" MODEL

Size for size it is every bit as
strong as the "Steel Handle,"
and **Thirty Per Cent.**
Stronger than any
other Wrench Made.

When ordering have the
name "Coes" with you
—the best guarantee
for Wrench perfec-
tion.

Mention **HARDWARE**
when writing.

**No Gripping
Power is Lost**
...it fills the hand.

Even in the large sizes
the handle is not too large
for one hand.

The handle is of hard wood—the
heaviest on any wrench. Inserted at
both ends—held by an extra large rivet
in centre—double extra heavy riveted tip—
it can't be taken off without breaking the
rivets.

Best balanced — smoothest — best finished.
15-in., 18-in., 21-in sizes.

No advance in price over other styles. The ques-
tion remains: **How Many Do You Need?**

Coes Wrench Co.

Changes and Improvements.

Andover, Mass.—Henry McLawlin has sold his Hardware store and entire stock to Walter I. Morse.

Beatrice, Neb.—A. Palmer & Co. have purchased the stock of Hardware belonging to J. B. Mitchell.

Beatrice, Neb.—J. B. Mitchell has purchased the Hardware store of J. L. Bougham & Company.

Beaufort, N. C.—L. J. Moore, formerly of Kinston, N. C., has purchased the stock of Hardware known as the Chadwick Hardware Company.

Bedford City, Va.—The Hardware concern of McGhee & McGhee has been purchased by Harry G. Burks of the Thomas Hardware Company.

Belding, Mich.—The Tuinstra Hardware Company has purchased the stock and business of O. J. Kuhn and will move to the location of Mr. Kuhn, at the corner of Main and Bridge Streets.

Bessemer, Ala.—Plans have been matured for the consolidation of the Bessemer Cornice Works Company and the Lewis Hardware Company by which the capital stock of the company will be placed at \$125,000, and large additions will be made to the store space and stock handled.

Birmingham, Ala.—The Prowell Hardware Company has decided to increase its capital stock from \$150,000 to \$225,000. The business of the company has grown rapidly in the past few months, particularly because of the absorption of the business of the Gray & Dudley Company and the Birmingham Stove & Hardware Company.

Brunswick, Ga.—The business of R. E. Briesenick, general machinists' supplies, etc., has been merged with the business of the Colson Hardware Co. and the stock formerly carried by Mr. Briesenick on Bay Street has been removed to the store of the Hardware company on Monk Street. The two businesses will be conducted hereafter under the name of the Colson Hardware Company, the concern being composed of J. E. Dubberley, W. J. Butts and R. E. Briesenick.

Bucyrus, Ohio.—Miller & Smoth, who have conducted a Hardware store on South Sandusky Avenue since last September, have disposed of their stock to D. Pickering & Company, who will move the same to their present store as soon as possible.

Burlington, Kan.—I. B. Rhinehart, who for years has been dealing in implements, buggies and coal, has added a complete stock of shelf Hardware to his store at the corner of Sixth and Neosho Streets and is now ready for business in that line.

Caldwell, Idaho.—Ballantyne Bros. have succeeded to the Hardware stock of the Ballantyne-Dee Mercantile Company.

Chandler, Okla.—The old Chandler Hardware Company has incorporated with a capital stock of \$15,000, and succeeds to the business of the New York Hardware Company.

Chicago, Ill.—S. J. Stebbins Hardware Company has changed its name to Stebbins Hardware Company. Capital increased from \$75,000 to \$150,000.

Cleburne, Tex.—The Randle Hardware stock has been sold to W. T. Fannin of Killen and E. E. Fannin of Marlin.

Coffeyville, Kan.—A. F. Ashby has sold his stock of Hardware and tinware to John Todd, and he is moving it to Clancy.

Iwan Post Hole and Well Augor

Best in the world for all kinds of earth boring. Sizes 3, 4, 5, 6, 7, 8, 9, 10, 12 and 14 inch. Makes a hole smoothly and quickly; empties easily; is very durable. No suction when removed from the hole.

Gives you more profit than any two other augers or diggers and satisfies your customers better.

The most largely sold and most prominently advertised auger on the market.

All prominent jobbers handle these augers and our other goods.

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 800 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Allegany, N. Y.—Sidney Brooks, N. R. Robinson and W. S. Chamberlain have organized a stock company for the manufacture of Brooks' fried-cake cooker, recently patented.

Augusta, Me.—Doyle Economy Stove & Furnace Company has been organized for the purpose of manufacturing and dealing in stoves, furnaces and ore reduction plants, with \$1,000,000 capital stock. Officers: President and treasurer, I. L. Fairbanks, of Augusta.

Columbus, Ohio.—Papers have been forwarded to New Jersey for the incorporation of the Capital Lock-Nut & Washer Company of Columbus. The new corporation is the reorganization of the company which is now erecting its plant on the South Side and is largely composed of local men.

Denver, Colo.—Stay Wire & Joining Tool Company has been incorporated. Capital, \$250,000. Incorporators: Oliver C. Patton, John C. Rawlins, A. L. Digby, Oscar Fields, R. B. Glaze, Denver.

Edmunds, Wash.—Crane Bros. & Company have just completed their big foundry and machine shop, and are only waiting for skilled moulders to begin the manufacture of stoves and iron bedsteads on a large scale.

Marquette, Mich.—The Superior Washing Machine Company has been formed for the purpose of manufacturing and selling the machine invented by Fred. Olson. It is capitalized at \$7,000. The original stockholders are Ole Olson, Ole Norum, Rudolph E. Opland, Julius Berg, Nils M. Larson, James McNamara, M. L. Borchgrevink and Fred Olson.

New York, N. Y.—Willock Manufacturing Company has been incorporated to manufacture stoves; capital, \$50,000. Directors—F. J. Willock, Richmond Hill; Hayden Talbot, New York, and John Nicklaus, Jr., Ridgewood Heights, L. I.

North Milwaukee, Wis.—The Avery Scale Company has been incorporated; capital stock, \$125,000. Incorporators—Louis G. Bohmrich, George L. Williams, John Campbell.

St. Louis, Mo.—Ornamental Wire & Iron Company has been incorporated. Incorporators: Fridolin Geiger, Henry P. Wehrenbrecht, Adolph Lachmann; to do all kinds of iron and metal work.

Syracuse, N. Y.—A factory for the manufacture of a mechanical device for household use that is designed to purify water in aerated form is soon to be built in Franklin Street by the Syracuse Pure Water Still Company. This company has been incorporated with a capital of \$100,000. The directors are William H. Allen and William S. Farmer of this city, Howard B. Craig of Solvay and John A. Wilson of Leroy.

Worcester, Mass.—The Tudor Manufacturing Company of Boston has taken the factory building at East Worcester, formerly occupied by the National Emery

Wheel Company, and will occupy it for manufacturing wrenches and other small tools. The Tudor Company is a new corporation, organized under Massachusetts laws with capital stock authorized of \$500,000. It has taken over the business of the Bay State Tool Company of Boston, which has been in existence several years, occupying a shop at South Boston, where considerable manufacturing for the market has been done during the past year. The officers are: President, C. C. Marvel; treasurer, E. B. Page; directors, these officers and H. G. Brooks and W. C. Farrell.

Changes and Improvements.

Athol, Mass.—Worcester architects have begun work on the plans for the addition to be built this Spring by the Union Twist Drill Company of this place. The building will be of brick, three stories high, 125 feet long, and 60 feet wide, and will be used as a cutters' department. The company has just completed a one-story brick building, which has a floor space of 6582 feet. This is used for storing steel, cutting steel, a blacksmith shop and other purposes.

Chicago, Ill.—The Chicago Pneumatic Tool Company has arranged to open a factory in Chicago for the manufacture of rock drills. A five-story building in Plymouth place, south of Van Buren Street, has been leased.

Goshen, Ind.—The large addition to the Goshen Novelty & Brush Company's plant in the southwest part of the city is about completed and the capacity of the plant will soon be doubled.

Lynn, Mass.—The General Electric Company has plans ready for erecting at the River Works plant on the banks of the Saugus River, a foundry building, 510 by 80 feet, three stories, with two towers, each 40 feet square. It will be the largest foundry building known. The frame work will be of steel with walls of brick and concrete. A second building will be 120 by 220, one story, and a third will be an addition to what is known as Factory 64.

Manchester, Va.—The Cameron & Anderson Stove Company, which has about completed its big building and office for the manufacture of steel ranges and just gotten its machinery installed, has let a contract to build another big building and an addition to the office.

Mexico City, Mex.—All of the nail factories in Mexico, with the exception of the one at Monterey, have merged their interests, with the view of controlling the nail trade of this country. The merger includes the nail factories in this city, San Luis Potosi and Guadalajara.

Minneapolis, Minn.—Butler Bros., the Chicago manufacturing Hardware concern, have practically decided to establish a large distributing plant for the Northwest in Minneapolis.

Montour Falls, N. Y.—The Pneumatic Tool Company have acquired the Margaret Fitzpatrick property north of their main building. For many years this company has tried to obtain the property so they could enlarge their shop room.

New Britain, Conn.—The plans have been completed by the company's architect for the large factory building to be erected by the Corbin Screw Corporation. It will

be located at Lafayette and Grove Streets and will be 45 by 600 feet, seven stories high.

Pittsburgh, Pa.—Under the name of the Wallace Manufacturing Company, No. 112 Wood Street, Pittsburgh, the local company, the Victor Lighting Company, of Cleveland, Ohio; National Heating & Lighting Company, of Cleveland, and the Allright Manufacturing Company, of Olmsted Falls, Ohio, have been consolidated, and will abandon all of the plants except the one at Olmsted Falls, which is to be greatly enlarged. The merger has been effected, the company securing a charter under the laws of Ohio. It is capitalized at \$100,000. The company will manufacture ranges, stoves, radiators and acetylene goods.

St. Paul, Minn.—The Manteuffel Refrigerator Company have filed an amendment to their articles of incorporation, increasing their capital stock to \$50,000. The capital stock was formerly \$25,000.

Toledo, Ohio.—The Toledo Stove & Range Company have awarded a contract to Jacob Jacobson for the erection of a 70 foot addition to their plant. The new building will be two stories in height, of brick and steel and is to be utilized as a wareroom. It is said that work will begin on the addition immediately.

Vancouver, B. C.—The A. M. Forbes Hardware Company of Seymour Street, will build a new factory for its accommodation on the south side of False Creek. The Seymour Street property has already been sold and the company has purchased six lots on Front Street, east of Bridge, on which it will build at once.

Westfield, Mass.—An important change in the whip business of Westfield has been consummated, whereby the Searle Whip Company, which has been operated for the past year by the New England Whip Company, has been transferred to the Sterling Whip Company. The business will hereafter be managed by Frank O. Hudson of the Sterling Company.

Winsted, Conn.—The Empire Knife Company, manufacturers of pocket cutlery, have increased their capital stock from \$40,000 to \$80,000. The proceeds of the sale of the new shares will be devoted to the expansion of the company's business.

Miscellaneous.

Milwaukee, Wis.—At the annual meeting of the Fuller-Warren Company the following directors were re-elected: H. A. Viets, G. L. Graves, John E. Hansen, E. J. Lindsay, A. N. McGoch, William Woods Plankinton, Walter P. Warren and Walter Thompson. Officers will be elected later.

Reading, Pa.—The annual meeting of the Consolidated Hardware Company, of this city, was held at the office of the company, 417 Market Street, Camden, N. J. These directors were elected: Albert A. Gery, John E. Harbster, William M. Griscom, Richmond L. Jones, John G. Mohn, Isaac G. Treat, Matthew Harbster and George H. B. Martin. The Consolidated Company controls the capital stock of the Reading Hardware Works, Keystone Hardware Works and the National Iron and Brass Works.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Bay City, Mich.—Graves Brothers; new store.

Brookline, Mass.—The Harding Knitting Co. has been incorporated with a capital of \$9,000, to handle sporting goods. Hawley Harding, W. T. Stall and C. H. Dean are the incorporators.

Cambridge, N. Y.—Arthur Day has bought a half interest in the bicycle business of H. G. Barton, and the firm of Barton & Day have bought out the bicycle business of W. J. Shiland.

Camden, N. J.—White Motor Co., No. 305 Market street, has been incorporated to manufacture automobiles, motor boats, cycles and vehicles, etc.; capital, \$150,000. Incorporators, James W. White, Philadelphia; Charles F. Woodhull and Charles S. King, Camden, N. J.

Canton, Ohio—The Canton Tent and Awning Co. has been incorporated with a capital stock of \$25,000, the officers and directors being L. Halter, Ed. Halter, C. E. Yohe, E. M. Dunlap and J. E. Berry.

Chicago, Ill.—The Meriden (Ct.) Firearms Co., an underlying corporation of Sears, Roebuck & Co., has had plans prepared for an additional factory. It will be a gun barrel and tempering department. The concern will this summer erect a new power plant, in which two 500-horse power boilers will be installed and connected with a new electrical equipment.

Collinsville, Tex.—T. B. Newman has purchased the business of E. N. Wright. His stock consists of Hardware, sporting and athletic goods.

Goshen, Ind.—Fred E. Watterson is now in full control of the bicycle business formerly conducted by Watterson & Monn, at 228 South Main street.

Gray, Me.—F. D. Sawyer is extending his sporting goods business and will sell at wholesale and retail in the future. The business will be under the firm name of Sawyer & Co. and the firm will handle a general line of sporting goods, phonographs and typewriters.

Gregory, S. D.—The harness and sporting goods business of Gaughen & McKee, has been acquired by H. E. McKee.

Hudson, N. Y.—The Abercrombie & Fitch Co. have taken new and greatly enlarged quarters at 57 Reade street. The enormous growth of the business has necessitated an entire building of seven floors.

Jersey City, N. J.—The Prime Smokeless Gunpowder Co. has been incorporated with \$1,000,000 capital stock. E. S. Emson, E. L. Nicol and F. C. Wolbert are the directors.

Kalamazoo, Mich.—The Miller-Ham Co., manufacturers of fishermen's specialties, are now operating under the firm name of C. D. Miller & Co., though still at the old address, 613 W. Kalamazoo street.

La Harpe, Kans.—Hampton & Benjamin have opened a sporting goods house and general repair shop on South Main street, Gas City, Kansas.

Lowell, Mass.—The Peerless Skate Co., of 208 French street, has been organized to manufacture a new skate. The officers are: E. G. Butterfield, president; J. A. Phillips, secretary; W. N. Osgood, treasurer.

North Adams, Mass.—The Berkshire Cycle & Automobile Co., has been incorporated under the laws of that State with \$5,000 capital. W. G. Parker is the treasurer of the concern.

Norwalk, Conn.—The Federal Cartridge Co. has been incorporated with a capital of \$2,000,000. Among the directors are F. J. Kingsbury, Jr., of New Haven, Judge R. J. Walsh of Greenwich, Conn., and L. E. Warren of New York.

Oswego, N. Y.—The Willys Co. has been incorporated to manufacture bicycles, sporting and athletic goods; capital, \$6,000; incorporators, John H. Willys, John T. Skihan and C. S. Lattin.

Pine Bluff, Ark.—R. A. Bird has purchased a half interest in C. G. Schenk's bicycle house of that place. The business has grown rapidly and several important additions will be made to the plant. A turntable, air compressor, lathe, motor and other apparatus will be added, and automobiles, automobile supplies and bicycles will be kept in stock. The building now occupied will be enlarged so that it will be 30 by 120 feet, giving ample room for the increased business.

San Francisco, Cal.—The American Racycle, Novelty & Mfg. Co. of the Pacific Coast, has been incorporated with \$30,000 capital. H. O. Coughlan, J. R. Turner and D. S. Mantz are named as the incorporators.

Seattle, Wash.—The Seattle Sporting Goods Co. has been organized with a capital of \$50,000, by F. S. Clewly, S. G. Hamilton and Ira Bronson.

South Portsmouth, Ohio.—The Lloyd-Adams Company's pistol factory has resumed operations. Prospects are bright for a prosperous season.

Spokane, Wash.—Ware Brothers Co. has been incorporated with a capital of \$40,000 to deal in Hardware and sporting goods. The incorporators are Thomas B. and Alexander C. Ware.

St. Louis, Mo.—The Simmons Hardware Co., who job bicycles on a considerable scale, are making ready to establish a branch house in Oklahoma City. Contracts for a three-story fire-proof structure already have been let.

Strawn, Kans.—Arthur J. Baxter has opened a store, where he will deal in Hardware, sporting and athletic goods.

Toledo, Ohio.—Frank Mutz and L. A. Miller have dissolved partnership. Mr. Mutz continues.

Topeka, Kans.—M. W. Long has bought out the bicycle business of W. L. Taylor on East Seventh street.

Winnipeg, Canada.—The Miller-Morse Hardware Co. have recently inaugurated, in connection with their well-established business, a sporting goods department, which is in charge of Mr. H. W. Alger and a corps of capable assistants.

Miscellaneous.

men: President, George M. Armor; vice-president, John M. Sessions; secretary, H. W. Cave; treasurer, Edward J. Meehan; house committee, J. E. Kinnamon, W. R. Turner and Harry McLanahan; board of governors, George Claridge, Walter Jones and John M. Sessions; entertainment committee, George Schaeffer, J. E. Kinnamon and William J. McBride.

Coxsackie, N. Y.—The following officers have been elected by the Coxsackie Cycling Club: President, Francis Worden; vice-president, Newton H. Calkins; secretary, E. F. Tiel; treasurer, Dr. Wm. I. Saxe.

Newburgh, N. Y.—At the annual meeting of the Newburgh Wheelmen, the following officers were chosen: President, William J. Wygant; vice-president, Chas. O. Odell; secretary, Frank W. Tompkins; treasurer, John E. Drew; directors—R. N. Whelan, L. P. Brown, A. H. Crawford, R. J. Snyder, W. J. Leghorn, D. M. Sterling, W. C. Peck, W. J. Kohl and G. E. Halliday.

Fires.

Bridgton, Me.—Wm. Crosby. Loss \$300; insured.

Leland, Mich.—E. E. Chandler's boat factory has been destroyed by fire. The loss of \$5,000 was partly covered by insurance.

Logansport, Ind.—Barnhart bicycle store, fire; \$1,000 damage; insurance not stated.

Medina, N. Y.—Warner's Bicycle store. Loss \$800.

Miller's Station, Ind.—Two explosions destroyed two buildings of the Aetna Powder Works. No one was hurt.

Pittston, Pa.—Fred Schussler, store destroyed by fire; loss, \$800; insurance, \$300.

Three Rivers, Mich.—Fire completely destroyed the bicycle store of W. H. Bressley, entailing a loss of \$700.

Woburn, Mass.—William H. Luck; shop destroyed by fire; damage \$2,000.

Burglaries.

Grand Rapids, Mich.—W. B. Jarvis Co., 28 Canal street; revolvers and cutlery to the extent of \$1,500.

La Porte, Ind.—Burglars entered C. F. Sonnenberg's sporting goods store some days ago, and stole revolvers and knives valued at \$800.

HARDWARE DEALERS' RECORD

(Continued.)

Republic, Kan.—Davis & McMichael have succeeded to the Hardware business of C. McMichael and W. L. Davis.

Seymour, Iowa.—The Seymour Hardware Company has sold out its business.

Shamokin, Pa.—The Hack-Sanner Hardware Company have purchased the property at Independence and Cleaver Streets, and announce their intention of erecting a modern four-story business structure on the site.

South Bend, Ind.—J. W. and A. N. Shidler, comprising the wholesale and retail firm of Shidler Bros., at 131 and 133 South Michigan Street, have decided to go out of business as soon as they can dispose of their large establishment to suitable advantage.

Columbiana, Ohio.—The Salem Hardware Company has decided to discontinue the branch store at Columbiana.

The **4** Big Lawn Mowers

Our Style A Is the Only ALL STEEL MOWER MADE

It has 10 inch wheel, 4-blade cylinder, train of 3 gears, double ratchet, making both wheels drivers. Three others—Style E, K and C—belong to the same combination.

STYLE A

In each, the revolving cutters are without bar in centre have large, long bearings, and are the most satisfactory Lawn Mowers to sell. We have others shown in 1906 Catalogue. You ought to have a copy and see how complete our line is!

The Philadelphia Lawn Mower Co.

3101-09 Chestnut St., Philadelphia, Pa., U. S. A.

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

THE EBBING MANUFACTURING CO.

400 N. 8th St.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured and Sold 41,420 MAJESTICS in 1905 beside many other makes.

Does that tell the story?

We will verify these figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub

of the Majestic is made of selected Virginia White Cedar, and will stand the action of water a life time. It is bound with our celebrated Electric-Welded Wire Hoops, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the Snow Ball Freezer. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of Virginia White Cedar, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are JOBBER or DEALER write us to-day for particulars and prices which will surprise you.

The Simplex Riveter

Price with 12 boxes of Rivets **\$1.50 per doz.**

This is the simplest possible form of tool for setting tubular and split rivets and is also the easiest and simplest to use; all that is necessary being a wagon tire or other convenient hard surface to rest the head of the rivet against and a hammer or wrench to drive with. The illustration explains the method of using.

This is new and sells like hot-cakes at 25 cts., with a box of 50 rivets included.

For sale by leading jobbers, or we will send one dozen prepaid with 12 boxes of rivets on receipt of the price.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

J. E. Bolles Iron & Wire Works, Detroit, Mich.

Oilers

American Tube & Stamping Co., Bridgeport, Conn.
Cushman & Denison, New York.

Oil Stones

Pike Mfg. Co., Pike, N. H.

Oil Stoves

Taylor & Boggis Foundry Co., Cleveland, Ohio

Ornamental Iron Work

J. E. Bolles Iron & Steel Works, Detroit, Mich.
Enterprise Foundry & Fence Co., Indianapolis, Ind.
Van Dorn Iron Works Co., Cleveland, O.

Ox Yoke and Bows

Am. Fork & Hoe Co., Cleveland, O.

Packing Rubber

Voorhees Rubber Mfg. Co., Jersey City, N. J.

Padlocks

Ames Sword Co., Chicopee, Mass.
Alfred Field & Co., New York
John H. Graham & Co., New York
Smith & Egge Mfg. Co., Bridgeport, Conn.

Paints

Jos. Dixon Crucible Co., Jersey City, N. J.
E. E. Nice, Philadelphia, Pa.

Paint Specialties

Adams & Elting Co., Chicago, Ill.
Eugene E. Nice, Philadelphia, Pa.

Paper Boxes

National Metal Edge Box Co., Philadelphia, Pa.

Paper Clips

Cushman & Denison, New York

Paving Tools

John Stortz & Sons, Phila., Pa.

Patents

Davis & Davis, New York

Pencils

Jos. Dixon Crucible Co., Jersey City, N. J.

Pipe Cutters

Armstrong Mfg. Co., Bridgeport, Conn.
Barnes Tool Co., New Haven, Conn.
Alfred Field & Co., New York
Walworth Mfg. Co., Boston, Mass.

Pipe Fittings

Walworth Mfg. Co., Boston, Mass.

Pipe Straps

Berger Bros. Co., Philadelphia
Walworth Mfg. Co., Boston, Mass.

Pipe Threading Machines

Armstrong Mfg. Co., Bridgeport, Conn.
Walworth Mfg. Co., Boston, Mass.

Pipe Vises

Armstrong Mfg. Co., Bridgeport, Conn.
Walworth Mfg. Co., Boston, Mass.

Pipe, Wrought

Walworth Mfg. Co., Boston, Mass.

Pistols

Harrington & Richardson Arms Co., Worcester, Mass.
J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Planes

C. E. Jennings & Co., New York
Stanley Rule & Level Co., New York

Planters' Hoes

Geneva Tool Co., Geneva, O.

Plated Ware

Alfred Field & Co., New York

Plates, Machinery

Schwerdtle Stamp Co., Bridgeport, Conn.

Pliers, Fencing

Cronk & Carrier Mfg. Co., Elmira, N. Y.
Alfred Field & Co., New York

Plumbers' Supplies

Berger Bros. Co., Phila., Pa.
Smith & Egge Mfg. Co., Bridgeport, Conn.

Pocket Cutlery

John Chatillon & Sons, New York
Alfred Field & Co., New York

Pocket Knife Tool Kit

U. J. Ulery, New York, N. Y.

Pokes (Horse)

Theo. J. Ely Mfg. Co., Girard, Pa.

Pokes (Metallic Adjustable)

Theo. J. Ely Mfg. Co., Girard, Pa.

Polish, Stove

Jos. Dixon Crucible Co., Jersey City, N. J.
Nickel Plate Stove Polish Co., Chicago, Ill.

Polishes, Liquid

Geo. W. Hoffman, Indianapolis, Ind.
and New York

Polishes, Paste

Geo. W. Hoffman, Indianapolis, Ind.
and New York

Postal Scales

Pelouze Scale & Mfg. Co., Chicago, Ill.

Post Hole Augers

Iwan Bros., Streator, Ill.

Post Hole Diggers

John H. Graham & Co., New York
Iwan Bros., Streator, Ill.

Potato Hooks

Am. Fork & Hoe Co., Cleveland, O.
Geneva Tool Co., Geneva, O.

Poultry Netting

New Jersey Wire Cloth Co., New York,
Trenton, Chicago, San Francisco.

Printers' Trucks

Geo. P. Clark Co., Windsor Locks, Conn.

Pruning Shears

Cronk & Carrier Mfg. Co., Elmira, N. Y.

Pulleys, Hoisting

F. E. Myers & Bro., Ashland, Ohio

Pulleys (Norris)

Frank B. Sloan & Co., Baltimore, Md.

Pulleys (Sash)

Frank B. Sloan & Co., Baltimore, Md.

Pumps

F. E. Myers & Bro., Ashland, Ohio.

Punches

Chandler & Farquhar, Boston
The H. H. Mayhew Co., Shelburne Falls, Mass.

Punches, Spring

Alfred Field & Co., New York
Smith & Egge Mfg. Co., Bridgeport, Conn.

Push Plates

Champion Safety Lock Co., Geneva, O.

Railings, Wire and Iron

J. E. Bolles Iron & Wire Works, Detroit, Mich.

Rail, Barn Door

Cronk & Carrier Mfg. Co., Elmira, N. Y.
McKinney Mfg. Co., Allegheny, Pa.

Railroad Brasses

Magnolia Metal Co., New York

Railroad Trucks

Geo. P. Clark Co., Windsor Locks, Conn.

Raisin Seeders

Enterprise Mfg. Co. of Pa., Phila.

Rakes

American Fork & Hoe Co., Cleveland, O.
Geneva Tool Co., Geneva, O.
John H. Graham & Co., New York

Razors

Alfred Field & Co., New York
National Cutlery Co., Detroit, Mich.
Jos. Rodgers & Sons, New York and
Sheffield, England

Razor Grindstones

Pike Mfg. Co., Pike, N. H.

Razors, Safety

Gillette Sales Co., New York, N. Y.
Kampfe Brothers, New York
Gem Cutlery Co., New York
Reichard & Schueber Mfg. Co., New York, N. Y.

Reamers

C. E. Jennings & Co., New York
Wiley & Russell Mfg. Co., Greenfield, Mass.

Reels, Wood

John Sommer's Son, Newark, N. J.

Reels, Rope

Udell Works, Indianapolis, Ind.

Refrigerators (Iceless)

The Dana Mfg. Co., Cincinnati, O.

Registers, Warm Air

Berger Bros. Co., Philadelphia

Reversible Nippers

The Nettleton Mfg. Co., Middletown, Conn.

Revolvers

Harrington & Richardson Arms Co., Worcester, Mass.

Revolving Chimney-Tops

Iwan Bros., Streator, Ill.

Revolving Horse Hay Rakes

Geneva Tool Co., Geneva, O.

Rifles

Hamilton Rifle Co., Plymouth, Mich.
Harrington & Richardson Arms Co., Worcester, Mass.
J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Riveters

F. H. Smith Mfg. Co., Chicago, Ill.

Rivets

Berger Bros. Co., Philadelphia
C. C. & E. P. Townsend, New Brighton, Pa.

Roasters and Bakers

The Bronson Walton Co., Cleveland, O.

Roof Bolts

Columbus Bolt Works, Columbus, O.

Roofing, Asbestos

Stowell Mfg. Co., Jersey City, N. J.

Roofing, Gravel

Stowell Mfg. Co., Jersey City, N. J.

Roofing and Roofers' Supplies

Am. Steel Roofing Co., Middletown, O.
Berger Bros. Co., Philadelphia
Stowell Mfg. Co., Jersey City, N. J.

Roof Rods

Columbus Bolt Works, Columbus, O.

Rubber Cement, Elastic

Stowell Mfg. Co., Jersey City, N. J.

Rubber and Iron Wheels

Geo. P. Clark Co., Windsor Locks, Conn.

Rules

Alfred Field & Co., New York

Rules, Steel

Kenfel & Esser, New York, N. Y.
Sawyer Tool Mfg. Co., Fitchburg, Mass.
L. S. Starrett Co., Athol, Mass.

Sad Irons

Blacklock Foundry, South Pittsburgh, Tenn.
Dover Mfg. Co., Canal Dover, Ohio.
Enterprise Mfg. Co. of Pa., Phila.

Sad Iron Handles

Enterprise Mfg. Co. of Pa., Phila., Pa.
Fanner Mfg. Co., Cleveland, Ohio

Sand and Emery Paper

Baeder, Adamson & Co., New York,
Philadelphia, Boston and Chicago

Sash Balances, (Spring)

Pullman Mfg. Co., Rochester, N. Y.

Sash Chain and Attachments

Pullman Mfg. Co., Rochester, N. Y.

Sash Chains

Smith & Egge Mfg. Co., Bridgeport, Conn.

Sash Fasteners

Champion Safety Lock Co., Geneva, O.

Sash Fixtures

Smith & Egge Mfg. Co., Bridgeport, Conn.

Sash Lifts

Champion Safety Lock Co., Geneva, O.

Sash Locks

Champion Safety Lock Co., Geneva, O.
H. B. Ives Co., New Haven, Conn.

Sash Locks, (Ventilating)

Pullman Mfg. Co., Rochester, N. Y.

Sash Pulleys (Norris)

Frank B. Sloan & Co., Baltimore, Md.

Sash Ribbon and Attachments

Pullman Mfg. Co., Rochester, N. Y.

Sausage Stuffers

Enterprise Mfg. Co. of Pa., Phila.

Saws

E. C. Atkins & Co., Cincinnati, Ohio.
Henry Diston & Sons, Phila., Pa.
C. E. Jennings & Co., New York

Saws, Butchers'

John Chatillon & Sons, New York

Saw Gummars

Ajax Mfg. Co., Pittsburgh, Pa.

Saw Sets

Alfred Field & Co., New York

Saw Tools

C. E. Jennings & Co., New York

Scales

American Cutlery Co., Chicago, Ill.
John Chatillon & Sons, New York
Osgood Scale Co., Binghamton, N. Y.
Pelouze Scale & Mfg. Co., Chicago

Screen Doors

The Continental Co., Detroit, Mich.
A. J. Phillips Co., Fenton, Mich.

Screen Door Catches

Caldwell Mfg. Co., Rochester, N. Y.

Screen Door Pulls

Champion Safety Lock Co., Geneva, O.

Screws

Robert Murray, New York

Screw Cases

J. D. Warren Mfg. Co., Chicago, Ill.

Screw Drivers

The Ducharmes Co., Shelburne Falls, Mass.
John H. Graham & Co., New York
C. E. Jennings & Co., New York
H. H. Mayhew Co., Shelburne Falls, Mass.
North Bros. Mfg. Co., Philadelphia
Stanley Rule & Level Co., New York

Screw Plates

Alfred Field & Co., New York
Walworth Mfg. Co., Boston Mass.
Wiley & Russell Mfg. Co., Greenfield, Mass.

Screw Wrenches

Bemis & Call, Hardware & Tool Co., Springfield, Mass.

Scythes and Grass Hooks

Alfred Field & Co., New York
National Cutlery Co., Detroit, Mich.

Scythe Rifles

Pike Mfg. Co., Pike, N. H.

Scythe Snaths, Grass and Bush

American Fork & Hoe Co., Cleveland, O.
Geneva Tool Co., Geneva, O.

Scythe Stones

Geneva Tool Co., Geneva, O.
Pike Mfg. Co., Pike, N. H.

**American Automatic
Lighting Systems**

Cost for cost the "Automatic" will give better re-
sults than any other system on the market. Why?
Because they consume less fuel per candle power.
They require no hand regulating and will not flicker,
buzz, smoke nor smell. All parts are interchange-
able, so repairs may be quickly made if necessary.

Before you purchase a lighting system write us
for estimates.

REED'S Flintstone Enameled Steel Ware

Has Trebled Its Sales

within a year. Its sale has been so phenomenal because it is just what every thrifty housewife wants and needs.

Flintstone is light, artistic, seamless, sanitary and durable.

It is the best moderate priced Enameled Steel Ware on the market.

The chemicals used in its manufacture are imported from Germany and Austria in a raw state, which gives Flintstone the advantage over imported wares.

Ten Years' Guarantee

is given with every piece of Flintstone. It is such an attractive seller that one pleased customer begets another.

If you "want to be near the band-wagon" to hear the music—the jingle of profits from Flintstone, write to-day to

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

BLACKSTONE MFG. CO.
JAMESTOWN, N. Y.
Established 1871.

Every Hardware Dealer

recognizes that an advertised article is four times easier to sell than an unadvertised one.

We have appropriated this season a good many thousand dollars for advertising our products in the large papers and magazines of national reputation. You are certain to have calls for:

The Hartmann Stockade Wire Fence
The Hartmann Steel Picket Fence
The Glen Steel Folding Mat

If your stock on these goods is low just drop us a line. You can't help selling them and run no risk in stocking up.

Copenhagen (Freeport).

Remember!

The point for you
to remember about the

FAULTLESS Pivot Bearing CASTER

is the turning point—

HERE—

NOT

THERE

"The Faultless" never refuses to turn, because it is supplied with Faultless Patent Steel Spring Sockets.

The Faultless is interchangeable; will fit six different sizes of wood bed sockets.

The Faultless received the highest award at the World's Fair, 1904, over all other casters.

It never refuses to turn itself into dollars and cents. Try a sample lot.

The Faultless Caster Mfg. Co.,
Nebraska City, Neb.

Iwan Post Holo and Well Auger

Best in the world for all kinds of earth boring. Sizes 3, 4, 5, 6, 7, 8, 9, 10, 12 and 14 inch. Makes a hole smoothly and quickly; empties easily; is very durable. No suction when removed from the hole.

Gives you more profit than any two other augers or diggers and satisfies your customers better.

The most largely sold and most prominently advertised auger on the market.

All prominent jobbers handle these augers and our other goods.

Iwan Brothers
STREATOR, ILL.

Makers also of Post Hole Diggers, Sickle Edge Hay Knives, Tile Drain Cleaners, Excelsior Open-back Tiling Spades, Revolving Chimney-Tops and Wire Conductor Pipe Hangers.

They are excellent sellers. Send for descriptive circular and discounts.

MENTION HARDWARE

Our Hammers

Have an enduring reputation for stubborn endurance in roughest usage.

5/8 HENRY CHENEY HAMMER CO., Little Falls, N.Y., U.S.A.

ONCE USED, ALWAYS USED.

The IDEAL LAWNMOWER GRINDER

is a machine that within three years has, to a great extent, revolutionized the methods of sharpening Lawnmowers. It is practically impossible to sharpen a Lawnmower accurately with a file, especially as so many Mowers have hardened blades which require very hard work to file at all and at best it is a thankless task. But with our

IDEAL LAWNMOWER GRINDER

any person with ordinary intelligence can sharpen a Lawnmower with accuracy in one-half the time required by the old method. The "Ideal" Grinder will grind any desired clearance behind the cutting edge, and the blades will all be ground the same distance from the center, or straight across, so that each blade touches the steel cutting bar along its entire length.

Write for further particulars, prices, etc.

ROOT BROTHERS CO., Plymouth, Ohio

The Simplex Riveter

Price with 12 boxes of Rivets **\$1.50 per doz.**

This is the simplest possible form of tool for setting tubular and split rivets and is also the easiest and simplest to use; all that is necessary being a wagon tire or other convenient hard surface to rest the head of the rivet against and a hammer or wrench to drive with. The illustration explains the method of using.

This is new and sells like hot cakes at 25 cts., with a box of 50 rivets included.

For sale by leading jobbers, or we will send one dozen prepaid with 12 boxes of rivets on receipt of the price.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

The Gem Mop Head.

THE CRYSTAL COFFEE MILL
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL
with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET
is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest seller
and commands the
biggest profit to you of
any Washing Machine
made. That is why you
should sell it. The tub

of the Majestic is made of selected **Virginia White Cedar**, and will stand the action of water a life time. It is bound with our celebrated **Electric-Welded Wire Hoops**, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

Whether you are JOBBER or DEALER write us to-day for particulars and prices which will surprise you.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the **Snow Ball Freezer**. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of **Virginia White Cedar**, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

RICHMOND CEDAR WORKS,

HARDWARE

Butler Bros., Chicago, Ill., have leased from Sears, Roebuck & Co., about 250,000 square feet of floor space in the building formerly occupied by the latter firm at Fulton and Desplaines Streets. The space leased comprises the entire ten-story building at this location, which is 150 by 170 feet. The lease runs for one year, the lessee having an option on a five-year extension.

The Manhattan Electrical Supply Co., at present located at 32 Cortlandt Street, New York, will, on or about May 1 next, move to No. 17 Park Place, where they will occupy the entire building, consisting of five floors above the street, and accompanying cellar room. The building is being thoroughly renovated and entirely remodeled both inside and out, in order to adapt it to the company's requirements and accommodate their growing business.

The Masbach Hardware Co., which is now in occupancy of their new building at 84 Warren Street, New York, have just issued a new supplement and discount sheet of 27 pages. This pamphlet has been condensed from the company's complete catalogue, and contains also many additional items of interest concerning the goods they deal in and of which they carry a full stock.

NORWALK LOCK CO.'S NEW SALES MANAGER.

At a regular meeting of the directors of the Norwalk Lock Co., South Norwalk, Conn., held April 11, M. R. McCausland was made general sales manager. He will supervise the methods of handling the finished product of the company, which consists of a full line of excellent Builders' Hardware made in all the latest styles of patterns and finishes. Mr. McCausland has been eighteen years with Sargent & Co., which amply qualifies him for the important position to which he has been appointed.

BROADSIDE ADVERTISING.

We have received a broadside sheet 21 by 25 from E. M. Austin, owner of Austin's Department Store, Litchfield, Ill., which is certainly chock full of detailed information regarding the assorted stock he carries. He heads the sheet "A Visit from the Price Cutter" and while doing its mission in a businesslike way, it is filled with paragraphs that are written in a style that is convincing and plausible, and possesses a drawing quality that interests a customer, like the following:

SPECIAL TO WAGE EARNERS EVERYWHERE.

No one in the thirty towns where Austin's Furniture, Stoves and Carpets are shipped need live in a room poorly furnished because you do not feel like paying cash for your needs. Hundreds of clerks, salesladies and wage earners of all kinds are enjoying cozily furnished homes on payments so small they scarcely miss the amount. Spend an hour in the Largest Housefurnishing Emporium in Central Illinois and note our low prices and easy terms on the articles you desire. Select what you wish, furnish reference, and make a small payment down. We will ship the goods at once, freight prepaid and safe delivery guaranteed. The other payments can be arranged to suit. There's nothing for the home we cannot furnish. Furniture, Stoves, Carpets, Dishes, Oil Cloth and Linoleum, Sewing Machines, Window Shades, Lace Curtains, Matting, etc. Remember, "It's yours to-day the Austin way."

As the circular is printed in two colors, red and black, these paragraphs look more readable in red, and occupy the centre of what must be considered a very taking style of advertising. Mr. Austin says: "Under separate cover we send copy of our circular issued every month. Every house in a dozen towns within twenty-five miles receives one of these circulars. These with extensive newspaper advertising enables us to ship to twenty surrounding towns in nineteen counties."

BOSS TILE SPADE CO.

The Boss Tile Spade Company has succeeded Belknap Bros., who were manufacturers of Old Style Boss tile and garden spades at Anamosa, Iowa, and will hereafter conduct the large plant there. The Boss tile spades are forged from genuine crucible fork steel and have been on the market for the past twenty years. They are known among the trade as staple articles which are ready sellers.

THE JOINT CATALOGUE HOUSE COMMITTEE.

The continued illness of T. Frank Ireland has caused his resignation from the Joint Committee, and A. H. Abbe, New Britain Conn., has been offered and has accepted the vacancy. His acceptance of the position will give the retail interests of the East an able representative, as Mr. Abbe has been an executive officer of the National Retail Hardware Association for two years, and is fully conversant with the duties appertaining to the busy position which he has accepted. He is president of the New Britain Business Men's Association, and ex-president of the Connecticut Retail Hardware Association, which amply qualifies him for the work.

GILBERT & BENNETT MANUFACTURING CO.

At a meeting of the directorate of the Gilbert & Bennett Manufacturing Co. at their offices in Georgetown, Conn., recently, a number of vacancies in the executive staff, caused by the recent death of Edwin Gilbert, were filled. Major David H. Miller, who has been with the company over fifty years and for some years its vice-president and treasurer, was chosen president to succeed Mr. Gilbert. Samuel H. Miller was elected vice-president and William H. Hunter, who has been connected with the company for over ten years, was selected to fill a vacancy in the Board of Directors.

THE NATIONAL HARDWARE ASSOCIATION.

The executive committee of the National Hardware Association will meet at the Hollenden Hotel, Cleveland, Ohio, on May 7, 8 and 9. A meeting of the Wholesale and Retail Joint Committee will follow at the same hotel on Thursday and Friday, May 10 and 11.

DECISION IN FAVOR OF SAVAGE ARMS CO.

Under date of April 18, the Savage Arms Co., Utica, N. Y., is sending to all their customers and dealers in firearms the following letter, which, referring as it does, to an important decision of the Circuit Court of Appeals, is self-explanatory:

To Our Customers and Dealers in Fire Arms:

GENTLEMEN:

Last summer we sent letters to you replying to a misleading circular, issued by the Marlin Fire Arms Co., of New Haven, Conn., to the effect that our rifles had been adjudged infringements upon patents owned by the Marlin Company. In our reply we told you that Marlin had instituted suits against two of our customers in his home town (New Haven); that these alleged infringements covered only our .22 calibre 1903 rifle and that we had undertaken the defense of these suits and would protect all dealers, purchasers and users of Savage Rifles against all claims for infringement. The United States Circuit Court of Appeals, sitting in New York City, has handed down decisions in each of these cases dismissing the suits of the Marlin Company, with costs against them and holding that our .22 Repeater does not infringe any of Marlin's patents in any particular. In spite of the misleading circular sent out by our competitor, the business of the Savage Arms Company continues to grow rapidly and the trade continues to buy our product. We wish, at this time, to inform our customers and friends of the decision of the Appellate Court, and take this occasion to thank them for their confidence in us and to assure them that it was not misplaced. In the future, as in the past, the Savage Arms Company will be the synonym for good rifles, honest workmanship, fair dealings, and "Savage Quality" will be a constant factor in our goods.

SAVAGE ARMS COMPANY.

DEATH OF RICHARD KAMPFE.

Richard Kampfe died at his home 184 Euclid Avenue, Brooklyn, N. Y., April 21st. He was a member of the firm of Kampfe Brothers, manufacturers of Star Safety Razors at No. 8-10-12 Reade Street, New York. Mr. Kampfe was born in Dresden, Germany, August 22, 1853. After learning the machinist trade in his native country, he, with his brothers, Frederick and Otto, all young men, immigrated to the United States where they laid the foundation of the extensive plant now operated under the firm name of Kampfe Brothers. For the past year Mr. Kampfe's health has been impaired and his death came suddenly at the last from heart failure. Mr. Kampfe was possessed of a wholesome, straightforward dignity. He was genial and hospitable and respected for integrity and sense of honor by both business and social acquaintances. He is survived by a widow, two sons and three daughters. The business will be continued by Frederick and Otto under the same name, Kampfe Brothers.

APRIL 25, 1906

Editorial Trade Review

While the great volume of trade is unusually good during April, so far, it is noticeable there is a modified trade being done in a few lines that does not reach up to the standard expected. Great activity was developed in building throughout the country, so that in all that could affect that particular branch of the trade in builders' Hardware and supplies of all kinds there was a good demand and improved tools especially are in remarkably good request. The year 1906 will be a record year for anything in the line of builders' Hardware, the medium and better classes of it especially. In house trimmings and analogous goods there was never such an interesting and attractive assortment as at this time, and they are freely bought to supply the current wants. Heavy Hardware is reported excellent, there being an undoubted confidence expressed on several lines, so much so that a positive scarcity is felt in some of them.

The North and Northwest have had favorable weather during the past fortnight, which has stimulated trade to the utmost. The frequent urgency to make shipments is quite noticeable among manufacturers, especially on orders that have been given recently. Jobbers' stocks are kept comparatively light on such seasonable articles as Steel goods, etc., the demand for which has been unprecedented. Mechanics' tools of the better sort, that reflect in their purchase improved conditions of the labor market in all branches of trade, have known an excellent distribution this season, while revised quotations on Axes have enabled the jobbers, or at any rate most of them, to purchase for their wants in the Fall large orders at the prices prevailing. The manufacturers are full of orders for months ahead and are now withdrawing the lowest quotations, and agreeing upon prices that will prove more remunerative, thus giving the jobbers a chance to obtain an extra profit on a close line.

Wire and Cut nails are in full swing, the large building operations planned on all sides making a busy season, the requirements of the retail trade being well kept up, and the stock of nails kept fully assorted for immediate delivery. In a general way there is little attempt at speculation. Stocks are not bought in excess on the season's wants, and all dealers in special lines can be considered as conservative, when studying the wants of their respective trades. Price cutting is by no means the feature it has been in the past, having actually become a custom

"more honored in the breach than in the observance." Should we again be blest with good crops, and not meet with misfortunes that will affect crop conditions, we can look forward to another year of exceptional prosperity. Another calamity such as has befallen San Francisco, with a loss of \$200,000,000 of material wealth, would have a tendency to demoralize us and affect our national importance.

Retailers are all getting ready in the West for Spring business, but cautious buying is the rule, preferring to take the chances of the future than attempt to make any mistake. If these conditions are followed up carefully, they will affect the summer trade favorably, and prove even more favorable as the season advances.

The San Francisco Calamity

The appalling calamity which stunned San Francisco, one of the most delightful cities of the continent, on Wednesday of last week, has been heard and felt to the remotest corners of the earth. To be aroused from peaceful slumber at an hour of the morning when few are awake, and from an earthquake shock unequaled in its destruction, that most terrible form of unexpected death and desolation which could be inflicted; the inhabitants were fated to meet conditions which in the course of a few hours made insanity prevalent. Such fearful conditions following such a terrible and unexpected outcome remind us how near we ever are to death; with all the horrors of such an appalling disaster affecting us and bringing in its train no shelter for days to countless thousands, no food for the hungry mouths that were doomed to suffer untold privations, and direst of all fates, the absence of water for parched throats, which the breaking of the water mains deprived them of. It must be accepted as a fortunate circumstance that with a loss of material wealth of such great proportions as to count hundreds of millions, there will be a loss of life much less than the first rough estimate as to create a feeling of satisfaction. Knowing that business of all kinds will slowly recover its accustomed vigor, the city will arise from the ashes of its obliteration finer, better and greater than ever before, proving the indomitable will of the American people can always be relied upon to reap the best results in the face of dire disaster.

SELLING PAINT.

The Hardware dealer who has failed to get chummy with a number of men who ought to be in the paint market this season has missed a big slice of the season's opportunities. Other needs and opportunities may take a little shrewdness to discover; the needed paint tells its own story to all who pass, including all of the dealer's competitors, and it is telling it in a less visible manner to the pocket-book of the neglectful property owner.

Herein lies an added inducement to the dealer to land an order; the customer will himself be the most important beneficiary in the deal. He is losing money by delay through damage to his property, and the man who shows the matter up to him in its proper light will be his good friend, for he is simply taking as his commission a part of what Dame Fortune would otherwise take out of him as a forfeit fee for his neglect.

Remember though that telling some men their house needs painting is like telling a boy his face is dirty. It is well to size up the boy first and approach him diplomatically.

THE PROFITABLE ORDER.

It is the kind of orders that would not come of themselves that tell the hustle story; not the pound of nails or granite kettle that has to be purchased anyway but the much needed coat of paint that might be allowed to run till another season but for the right word from the dealer; the farm implement that would so greatly increase the efficiency of its owner's work but that would

be gotten along without somehow; the new lawn fence; the incubator or washing machine.

Here, too, the conscientiousness and good judgment of the dealer is on trial, as well as his skill in selling goods. It seldom pays in the end to talk a man into buying something that we know he really cannot afford and that will never pay him to own just because we happen to have something of that sort for sale. Rather let us look up the man who really ought to buy it, and then we can afford to sell it to him; for in selling goods we are buying a reputation that will be either good or bad as the purchase of our customers turns out in their hands. It might be an evidence of good salesmanship to sell the minister a machine for making brick but it would not be good business policy. On the other hand, to show him how he can really afford to buy the carriage that he needs may make of him a lasting friend as well as a customer. To sell the farmer a new wagon or a piece of machinery that will add to the productivity of his fields either by a saving of time or increased efficiency in cultivation will only add to his appreciation when he sees the wisdom of his purchase later on.

The man who has a faculty of seeing just what his customers really will do well to buy and has the additional faculty of talking them into buying it will not in the long run be regarded as a public nuisance, however much his patrons may chaff him about his propensity for "hanging on."

DEATH OF ROBERT SICKELS.

Robert Sickels died at his home, No. 735 St. Nicholas Avenue, New York, April 11. He was born in Albion, N. Y., April 15, 1833. He was president of both the Sickels & Nutting Co., New York, and the Sickels, Preston & Nutting Co., of Davenport, Iowa. Mr. Sickels' identification with the Hardware business in Davenport as a principal dates from 1863, when the firm name was Sickels & Preston, his partner being Andrew J. Preston, formerly of R. W. Booth & Co., Cincinnati. In 1864 Col. James R. Nutting, now in charge of the Davenport house, entered the firm's employ, becoming a member of the concern about 1881.

In 1886 Mr. Sickels' health becoming impaired, he spent a year in Europe, after which on returning to the United States he concluded to establish himself in the wholesale Hardware field in New York, which he did in January, 1890, the firm being first known after his identification with it as Sickels, Sweet & Lyon. Previous to this time the house was a well-known jobbing concern, which originated in 1848 as Widdifield, Cohu & Co., becoming Mooney, Cohu & Co. in 1859 and Lauderback, Gilbert & Co. in 1863; Gilbert, Sweet & Lyon in 1888 and Sickels, Sweet & Lyon 1890 to 1897, when the business was incorporated as the Sickels & Nutting Co., as it is now known.

Mr. Sickels was of quiet, unostentatious habits, having positive convictions and great reserve power, being dignified to a degree. Was very domestic in his home life, into the nature of which he entered fully. He was filled with Christian fortitude for any trouble, of which outside of his illness he had very little, and his many acts of kindness and alleviation of distress were so quietly accomplished as to be unobtrusive. Of the highest standard of honor and integrity he was a man to command the respect of all with whom he came in contact, in his religious, social and commercial life.

He was a member of the Hardware Club and one of its board of governors, president of the Hardware Board of Trade of New York, a member of the Holland Society, a Free and Accepted Mason and a vestryman of St. Luke's Church, New York. He is survived by a widow and one married daughter, Mrs. Fred. I. Simpson, whose husband is identified with the Sickels & Nutting Co.

DEATH OF FRANK CHANDLER.

Frank Chandler, president of the Chandler & Farquhar Co., Hardware and machine tools, Boston, Mass., died at his home, Waverly, Mass., April 4, of pneumonia, aged 54 years. Mr. Chandler was one of the most prominent men in the trade in Boston. He was born at Augusta, Maine, in 1852, the son of Commodore Benjamin F. Chandler, U. S. N., and passed most of his boyhood at Portsmouth, N. H., where his father was attached to the navy yard. As a young man he entered the employ of A. J. Wilkinson of Boston, and thoroughly mastered the Hardware business in the fifteen years of this connection, after which in 1882, he formed a partnership with Charles S. Farquhar as Chandler & Farquhar, which relation existed until 1904, when the business was incorporated with Mr. Chandler as president and Mr. Farquhar as treasurer. Mr. Chandler was a prominent Mason and Odd Fellow. He was a member of the New England Hardware Dealers' Association and of the Boston Merchants' Association. He leaves a widow, an aged mother and one son, F. Alexander Chandler, secretary of the Chandler & Farquhar Company and also secretary of the New England Hardware Dealers' Association.

THE ETHICS OF SPRING ADVERTISING.

To the Hardware merchant Spring is really the beginning of a new fiscal year. Inventory has been finished, Stoves, Skates, Snow Shovels and Oil Heaters have either been closed out or stored away, and in their places we find a bright fresh stock of Spring and Summer goods, ready for a busy season.

With the opening of Spring, Hardware Advertising should take on new life. The cob-webs of Winter should be brushed aside one or two good coats of paint applied, and an effort made to move your Spring stock faster than in former years. Every Spring Nature infuses new blood and new life into growing things, and it's up to the Hardware dealer to infuse new blood and new energy into his store and store methods.

AFTER YOU HAVE RECEIVED YOUR NEW SPRING STOCKS OF HARDWARE, it is well to spend an evening or two in laying out a thorough campaign for selling to the best advantage.

Too many Hardwaremen give little thought to the selling end of their business. Their attention is fully taken in buying, managing the store, and if there is a jobbing department, the Timmers and Plumbers must have their work laid out and followed up.

THE VITAL SPARK IN RETAILING HARDWARE

is the right kind of advertising. Prestige and good will will hold trade for a year or two; but if there is more than one Hardware store in town, the trade is as certain to go to the more progressive store as a duck will take to water. Good Will is a fickle quantity in these modern days of retailing. One day you have all the Good Will you can use to advantage, the next day you're laying off a clerk or two because business is growing duller and duller, and you wonder why that competitor who is always spending money foolishly for advertising is getting so much more business and enlarging his store.

Now, Advertising isn't the unknown, indefinite quantity it used to be. Ten or fifteen years ago, "Henry Watkins, Hardware and Builders' Tools" told the story. But.

WE HAVE LEARNED A LOT OF THINGS IN THE PAST FEW YEARS.

We have seen it demonstrated in a thousand cases that newspaper advertising is a tangible, real quantity just as much as any commodity in your store. And we have seen it demonstrated in countless cases that newspaper advertising of the right kind is the best investment the Hardwareman can make. This fact has been proven so many times, we don't argue over the matter any more.

But the question that needs more agitation is frequent change of copy, and the proper use of space. I saw an advertisement the other day of a dealer down in Massachusetts who was advertising "Carving Sets for the Holidays." That same copy has been running since last November. Another Hardware merchant in Ohio was still advertising in March "A special reduction of Oil Heaters. Must be closed out before we take our January Inventory." These are not rare occurrences.

YOU PAY A CERTAIN PRICE FOR SPACE IN YOUR NEWSPAPER.

Unless you get every cent of value out of that space, you're losing money, throwing it away. You wouldn't think of giving an order to your Jobber for ten dozen Lanterns, pay for ten dozen Lanterns, and still let the Jobber ship you only five or six dozen. You would put up a mighty tall kick for the balance of the order. Yet, how often a Hardware Dealer, with the best intentions in the world, contracts for advertising in a newspaper, and is content to fill up that valuable space, for which he is paying good cold cash, with meaningless words and unseasonable goods!

It isn't a difficult matter to get satisfactory results from newspaper advertising, nor to write really good advertising "copy"—but it takes time and plenty of thought and study. If you want to increase the size of our store, if you want to build an addition, you give it careful thought. Then you lay out a definite plan in your mind of just what you want.

It's the same with Advertising. If you want to increase your business, lay out a definite, well-planned campaign of advertising. Make up your mind just what you want to advertise, and just what you want to say. The most satisfactory way for the Hardwareman to care for his advertising properly is to give it a few minutes' attention each day. Go about it calmly, don't try to hurry.

GIVE YOUR BRAINS A CHANCE TO TAKE AN INVENTORY

of your stock and store conditions. Think what lines are overstocked, or what goods are seasonable. Go over those lines carefully. See wherein they are good. Why did you select them in preference to other competing lines? What advantages have they, what inducement can you offer in price or otherwise to interest the public?

As an illustration, suppose we take up Spring Hardware. Just now there is a seasonable demand for Paints, Woven Wire Fencing, Builders' Hardware, Poultry Netting, Fishing Tackle, Seeds for the field and garden, Plows and Harrows, Garden Tools, etc. Soon there'll be a demand for Garden hose, Refrigerators, Water Coolers, Screen Doors, Blue Flame Oil and Gasoline stoves, etc. As an experiment, confine your Advertising for the next two or three months to these Seasonable lines.

When you advertise Paints, advertise Paints, and Painting supplies. Don't mix in other totally different lines, thinking you've got to fill up your space with something about every line in your store. If a customer came into your store to buy Paints, you wouldn't say a few words about Paints and then give him a lecture and verbal inventory of everything in your place of business. Stick to the one line. That means much greater effectiveness. Don't say your Paints are "the best on the market" unless you tell why and can prove it.

THESE METHODS PAID YEARS AGO BUT THEY DON'T NOW.

Instead, tell how and of what your Paints are made, how they are mixed, the size cans you can furnish and the price. Tell why your Paints will cover more surface, why they will last longer and why they will retain their brilliancy longer. Above all quote the price. That's what the public wants, that's what interests the public. Give them what they want.

Most paints—those that have the largest sale through the Hardware store—are sold ready-mixed, ready for use. Yet there are some people who still think, if they want to paint their barn or front fence it will be necessary to buy the dry colors and mix the paint themselves. It's up to you to point out how you can save them all this trouble, and in the bargain give them a paint that is mixed by machinery and is always uniform in consistency and color. If you handle Paints, you probably handle the accessories. A man can't paint without a brush—and it's a good plan to say that you can furnish everything for that Painting job—whether you do it yourself or hire it done.

To prepare the advertisement that really brings good results it's only necessary to go about it systematically and tell your story just as you would tell it to your customer, face to face. Don't use high-sounding words or "stiff English."

TALK PLAIN EVERY DAY AMERICAN.

It's much easier to understand, much easier to comprehend, and carries much greater force. Don't make your advertisements too lengthy, and don't make them too brief. The best way is to tell your story—then stop. A six-inch double-column space is plenty large enough for the average Hardware advertisement, and in it the right kind of a story will always attract and hold attention. Big space costs money, and is seldom worth this additional cost.

You can make your advertisements more attractive if you have a trite or catchy heading. Instead of saying "Fishing Tackle," use some phrase, such as "Going Fishing?" "When the Fishing Season Opens—" or "Don't Blame the Fish if the Tackle isn't right." Follow up a heading of this kind with a short, right-to-the-point story about your line of Fishing Tackle. Tell what kind of rods you have and why you consider them better than other rods. Tell about your Bait Boxes, Trolling Spoons, Luminous Baits, the big assortment of hooks and flies you carry, and quote the range of prices.

A clever scheme that has been worked for three or four seasons by a retailer in New York State has been a competition open to Fishermen. With every purchase, regardless of amount, a coupon is given. This coupon

ENTITLES EVERY FISHERMAN TO COMPETE

for an expensive steel rod which at the end of the Fishing Season is given to the man who catches the largest fish during the Season. As the large catches are made and reported to the store, they are entered on a "Record Sheet" which is displayed in one of the show windows. This is a constant attraction, and daily people come to look at the Record Sheet to see who has been fishing and the size of the fish they caught. At the end of the Season liberal advertising is used when the Rod is given away, and the Record Sheet is published. It's an ingenious way to draw trade on fishing tackle, and there are few lines that offer a larger percentage of profit than Fishing Tackle, if properly pushed and advertised.

A NEW DEPARTURE IN SELLING SHARPENING STONES.

As will be noticed in our advertising columns, the Pike Mfg. Co., of Pike, N. H., have made an entirely new departure in packing and pricing sharpening stones. They have addressed a letter to all the retail Hardware dealers in the United States and Canada, together with price list showing list prices and discounts on oilstones, scythe stones and razor hone stock, and they have also addressed the jobbing trade of the United States and Canada with price list and attached discount sheet. Particularly do they point out the fact that they have listed oilstone stock at dozen prices instead of by the pound, as heretofore, calling attention to the manner in which each stock item is made ready for the trade, on the oilstone stock particularly. The different stones are put up in cartons, which bear revised and up-to-date descriptive matter. Then these cartons are put in dozen lots into lock-corner, slide-cover wooden boxes, which are suitably marked as to contents and prices. This list covers all the items sold in their special selling assortments, and covers the sharpen-

ing stone line as handled by most jobbers. The object of this is to enable the jobber to handle refilling orders for the selling of assortments and at the same time to fill multitudinous orders from the same stock. Beyond this, the convenience of packing and selling oilstones by the dozen instead of by the pound will

SCYTHE STONE ASSORTMENT A.

be instantly recognized by the trade. This saves breaking packages and marking up prices on each stone, and the time and expense of repacking. On each carton or stone will be found information as to the purpose for which each stone is best adapted; concise instructions regarding usage, and consumers' prices. This

OILSTONE ASSORTMENT NO. 1.

method of offering their line will enable both the jobber and retailer to carry a much better assorted stock with considerably less expense, and to supply the wants of the consumer more intelligently and with a larger profit. In sending this correspondence to the trade, they have added the following unique in-

RAZOR HONE ASSORTMENT NO. 1.

formation: "Upon receiving acknowledgment of this letter, we will take pleasure in sending you one of our souvenir paper-weight desk stones. During the early Spring season the sweet sap of the sugar-maple courses from the root to the maple-bud here in the New England country. As a token of our appreciation of a more substantial acknowledgment we will enclose a jar of new maple syrup or sugar with your order, if received within a month." A sweeter way of introducing a radical change in the methods of distribution it would be difficult to find, and it is hoped that it will prove unusually successful.

Two evils, ignorance and want of taste, have produced a third. I mean the continual corruption of our English tongue; which, without some timely remedy, will suffer more by the false refinement of twenty years past than it has been improved in the foregoing hundred.—SWIFT.

MYERS BRANCH PIPE DOUBLE ACTING FORCE PUMP.

F. E. Myers & Bro., Ashland, Ohio, have recently greatly improved their Branch Pipe Double Acting Force Pump, an illustration of which is shown herewith. Fig 1160 represents the pump fitted with cog gear or ratchet handle, especially adapted for deep wells. The upper cylinder is seamless drawn brass fitted with their expansion plunger bucket. The lower cylinder is brass lined iron, fitted with their latest improved patent glass valve seat.

MYERS BRANCH PIPE DOUBLE ACTING FORCE PUMP.

The special advantage of the Ratchet Handle is that it has a three inch fulcrum and 6 inch stroke pumps. The piston rod fulcrum on all other 6 inch stroke pumps. The piston rod moves perpendicularly, without a side motion, and is held in position by means of roller bearing opposite the handle, which reduces the friction to the minimum. The pump is made, and can be furnished with three way discharge and windmill head. The firm of F. E. Myers & Bro. make the claim that the working parts of their pumps, viz. the Valve Seat, the Buckets, and the Expansive Plunger, as superior to anything made in that line, a claim which has been verified and recognized by the trade, as shown by the immense volume of their business. The working parts of pump which lift the water have been developed to the highest efficiency so as to lift the full amount of water with the less effort. The next important step was to apply some method whereby these parts could be operated with greater ease. This has been accomplished by the cog gear or ratchet handle.

MAYDOLE'S NEW HAMMERS.

The David Maydole Hammer Co., Norwich, N. Y., are adding to their already extensive line of Hammers a few styles which they are introducing to the trade in oil finish. They create a sufficiency of new numbers in so doing to make a supplementary price list necessary, and increasing the number of styles, sizes and finishes in their entire lines of Hammers to 380. Some of the styles are well known to the trade in all their sizes. We

MAYDOLE'S CORNICE HAMMER.

present an illustration of the Cornice Hammer, which is made in five sizes, ranging from $\frac{1}{2}$ pound to $1\frac{1}{2}$ pounds each; and also the Tile Setters' Hammers, which are made in two sizes, 3 and

...MAYDOLE'S TILE SETTERS' HAMMER.

4 ounces each, exclusive of weight of handle. The Bricklayers' Hammer, of which the illustration shown is a new pattern, ranges in weight, exclusive of handle, from 1 pound to $2\frac{1}{4}$

MAYDOLE'S IMPROVED BRICKLAYERS' HAMMER.

pounds and is made in four sizes. This entire supplementary line of these goods are all press-forged from Crucible Cast Steel, oil finish and fitted with second growth hickory handles.

A CANADIAN RETAIL HARDWARE ASSOCIATION.

About twenty Hardware merchants from different parts of Ontario have formed an organization to be known as the Retail Hardware and Stove Dealers' Association of Ontario, with the following officers: President, A. W. Humphreys, Parkhill; vice-presidents, W. G. Scott, Mount Forest, and J. R. Hambly, Barrie; secretary, Weston Wrigley, Toronto; treasurer, John Caslor, Toronto. Mr. A. W. Humphreys, the chairman, in reviewing the existing condition of affairs in the trade throughout Ontario, pointed out the necessity for organization, and the value it would be to the retailers in the maintenance of prices and the collection of debts. Mr. E. M. Trowern, secretary of the Retail Merchants' Association, suggested that the new association, become a branch of the Retail Merchants' Association of Canada. The matter was discussed but definite action was deferred until May 15, when a convention of the newly formed association will be held there.

CATERING TO THE WANTS OF THE ANGLER.

Among the many profit-making lines which can safely be added to the stock of a Hardware store, very few present such promising possibilities in that way as the addition of a line of Anglers' Supplies in the way of fishing tackle generally. Outdoor sports are annually on the increase, and few individual indulgences need such a line of tackle as is made necessary by a love for catching the finny game which is within reach wherever there is a sheet of water that can be placed under tribute. "Hammer-nail" in *The Iron Age*, has this to say on the subject:

With profits on staple Hardware constantly being cut down and general store expenses continually increasing, the wise Hardwaremen are those who are adding to their business such lines of merchandise as will sell, and sell at a good profit.

SUCH A LINE IS FISHING TACKLE.

During the past three or four years many Hardwaremen have taken up the sale of this line, and all such are united in the opinion that it is one of the best side lines procurable. When the subject is seriously considered it is difficult to find a good reason why the Hardware store has not always been the store where the fisherman could have his wants supplied. For some years in many parts of the country the drug and fancy goods trade about evenly divided this business with the stationery stores. The line may have appealed to the druggist because of the large profits—100 Fish Hooks costing from five to ten cents sell for from five to ten cents a dozen. And the Hardwareman may have feared the details of the Fishing Tackle trade, but any man who has been able to learn and successfully handle such a complicated stock as Hardware will find Fishing Tackle simple and easy. There is no better time than the present to put in a stock of Tackle. As a general thing the largest sales are in late spring or summer and the business begins just as soon as spring comes. Throughout the entire United States the year 1905 was the biggest ever known in Fishing Tackle.

THE SPORT IS GAINING IN POPULARITY EVERY SEASON.

and, unlike many outdoor sports, is not a fad. It's a rare thing for a fisherman to tire of fishing; it's not confined to any class or any age. The gray-haired clubman of the city looks with as much eagerness to the coming of spring, when he can take his tackle and spend a few days on river or lake, as did the country boy fifty years ago long for the days of May, when with bare feet he could wade down the stream a-fishing. And each year many new members are being initiated into the fraternity of fishermen. And a person who once becomes an enthusiastic fisherman never seems to lose fondness for the sport. It's not the number of fish one gets, it's the going after them that gives the pleasure. It is evident that

THE BUSINESS IS AS PERMANENT AS IT IS PROFITABLE.

In many parts of the country, in spite of the increased number of fishermen, the chances of "good luck" are constantly becoming better. The Federal and the various State governments are doing much in this matter by enforcing more rigid game laws; by protecting the streams and lakes from pollution, and each year by planting hundreds of millions of game fish hatched in an artificial way. And the business of supplying the fisherman belongs just as truly to the Hardware dealer as does that of supplying the carpenter or the builder.

In putting in a line of Fishing Tackle the same care should be taken in getting goods suited to the store's trade or to local conditions as in any other line of merchandise. Tackle is one of the easiest lines in which to overstock. Like all seasonable goods, it is best fresh and new. But, on the other hand, the assortment must be large enough to make a favorable impression. It is well to remember that much in Fishing Tackle is sold because the fisherman may take a fancy to it—not because he actually needs the goods. It is surprising to see with what a small outfit it is possible to get a good catch of fish, and just as surprising, at least to the uninitiated, to find how many outfits an enthusiast may have. These are

FACTS THAT ARE WELL WORTH REMEMBERING.

and the dealer who acts in accord with them will find his trade growing and his store becoming still more the center of the Fishing Tackle business.

Referring to the sale of Fishing Tackle, which was stocked for the first time in 1905, I heard a Hardwareman thus express himself the other day: "Do you know for more than ten years I've been thinking about adding this line, but there has always been some two or three other stores carrying a pretty good stock here in my town, and I felt that there would not be business enough to warrant another stock. However, last year I bought a little line, first order amounting to about \$185. I put on a good stiff profit, but did some advertising and made an attractive show of the goods. I sold completely out on a number of things, and the

stock was so well sorted that it sold down pretty evenly. The concern who made up the order for me used such good judgment that the business was most satisfactory.

"But," continued the merchant, "the point I am making is this: That my entering the field seemed to make no difference in the volume of trade done by the other dealers in Fishing Tackle, and it would seem to be true that the more dealers handling this line, the more tackle goods will be sold. It certainly is true that

FISHING TACKLE IS A LINE THAT SELLS

in much the same proportion to the manner in which it is displayed, always starting with the fundamental principle that there is some demand in the locality for the goods."

Of course, in the case of this merchant, no small amount of energy was put into the business. But it was profitable and his is not a large store nor especially well located in his city. Fishing Tackle is one of those lines that will help the Hardware dealer when he has to sell some things on a 10 or 20 per cent. margin. A few hundred dollars of cash business on a 100 per cent. basis of profit is better than some thousands on a 10 per cent. profit.

SPRING THE ANNUAL RENEWAL SALE OF NATURE.

The dead grays and browns of the winter months of rain, ice and snow, give place each spring, by wise provision of nature, to the bright and refreshing dress of green, so in harmony with bright sunshine and smiling skies.

Man's work has erected on the earth varied and costly structures of materials subject to rapid decay from the great heat of the sun, the moisture of rains and snows, combined with the gases of combustion incident to manufacturing and transportation enterprises. Of the materials of construction, metal and wood deteriorate most rapidly, but their lives are prolonged permanently by the intelligent use of a preservative consisting of nature's pigments and oils.

When this preservative coating has been neglected, as it too often is, the structure takes on that air of decay which is as much out of keeping in its surroundings as the dead tree in the forest. Wisely emulate nature this spring and renew the faded and broken coatings on your metal and wood work.

Among the marvelous provisions of nature for the benefit of mankind, none is more wonderful than a silvery gray ore found in the earth at Ticonderoga, N. Y. This graphite ore is a form of carbon, of which diamonds are a class, and like unto them, practically indifferent to chemical influences.

The Joseph Dixon Crucible Company of Jersey City, N. J., exclusive owners of this Ticonderoga Graphite mine, discovered some forty years ago the superior advantages of the flake graphite as a pigment for a protective paint film. The laminated, crystalline form of this natural ore, refined to a remarkable degree of fineness, adapts itself perfectly, under the sweeping pressure of a paint brush, into a shield protecting and prolonging the life of linseed oil, the unrivalled binding material of all standard protective coatings.

Dixon's Ticonderoga Flake Graphite is inert, exerting on the oil none of the harmful chemical influences found in many pigments used for paint purposes, and which reduces the natural life of the linseed oil vehicle. The silica is a competent part of the flake graphite pigment, and oil like formation, being unchangeable by the gases and atmospheric conditions encountered.

Efforts are made to imitate this wonderful product of nature, but no paint pigment has ever been mined or manufactured that equals the preservative form and wearing strength of Dixon's Ticonderoga Flake Graphite.

Nature's own product—Dixon's Silica-Graphite Paint, has been successfully used in all climates for over forty years in resisting the destructive chemical action between metal and oxygen. For the protection of specifiers and users, the pigment is never sold dry, as best results are produced by thoroughly grinding and mixing this smooth pigment and guaranteed best linseed oil into a uniform paint consistency, by specially adapted machinery.

Dixon's Silica-Graphite Paint is manufactured in but one quality—the highest standard. No lighter shades are made than Dixon's Olive Green, Natural, Dark Red and Black, as the natural graphite pigment is a silvery gray, and coloring pigments other than those we use shorten the life of the paint.

The natural smoothness of the Ticonderoga Flake Graphite permits of the use of the greatest possible volume of pigment, and a material saving in cost of labor and brushes in application. Under average conditions for good coatings on metal surfaces, one gallon covers about 500 square feet for first coat, and about 550 square feet for second coat. Ease of application, good covering power and effective protection for a long period of time, indicate Dixon's Silica-Graphite Paint as the most desirable and economical preservative coating for metal and wood that has ever been produced.

OUR BRITISH LETTER.

(From our own Correspondent.)

LONDON, April 14th.

SPRING TRADE.

The bright spring weather of the last few weeks has done much to alter the appearance of shops and has given renewed life and energy to traders and their assistants, who are getting somewhat weary of winter weather, and possibly, of winter goods. There is less monotony in the sale of spring and summer articles, and in handling sporting requisites, fishing tackle, horticultural supplies and garden furniture, glimpses of holidays and out-door recreation loom bright in the imagination of those accustomed to shop routine, which after all is a little dull. Improvement in window dressing is very apparent everywhere, and some very nice windows are now on view where spring appliances are conspicuous. Lawn mowers, including many made in the States, are apparent; and here and there American hammocks and awnings are making their appearance. Trade prospects are good; the exports during the last few months have increased rapidly, and an upward move in prices is going on in every direction, indicating increased trade and a good out-look for the coming season.

THE FORTHCOMING CONFERENCE.

Early in May the Annual Conference of the I. F. A. is to be held, and in my next letter I hope to give your readers some of the points brought out and an account of the Conference meetings, as well as my impressions culled from personal observation at those gatherings. The London Ironmongers Association are making great preparation to welcome their Provincial brethren and as this is the first time the Annual Conference has been held in London a strong gathering is expected. The program mapped out includes important meetings and discussion of all the prominent questions of the day affecting the Hardware trade in this country. There will be the usual lunches and dinners, when social converse and friendly intercourse between fellow traders in all parts of England will tend to rub off the knots which long isolation in past years has made "hard." The functions will also include a river excursion down the Thames to Woolwich Arsenal, where several hours will be spent in examining the interesting processes of producing the great guns needed in the protection of British commerce as well as in the weightier matters of State. The Conference meetings are to be held in Ironmongers' Hall, the beautiful historic building the headquarters of the ancient Guild founded so many centuries ago for the protection of craftsmen engaged in the making and selling of Hardware.

PRICE MAINTENANCE AND THE STORES.

Among the principles firmly adhered to by the Ironmongers Federated Association none has given rise to so many discussions as that of price maintenance. It has all along been treading on dangerous ground to insist on its acceptance; difficulties have cropped up, and many of the nuts have been hard to crack. Other traders besides Hardwaremen find it difficult to stick to their guns, and still more so to keep makers firm in their allegiance to the principle. So far the scheme of price maintenance, once agreed to, has worked satisfactorily, and has been adhered to by the great stores, who are large buyers of proprietary articles in many branches, and especially in the drug trade where price maintenance extends to a very large number of small articles. For a long time now the dividends returned to the members out of the profits have been winked at, but retail traders are now satisfied that many persons recognize that there is a gain in buying from the stores even price maintenance goods, and that consequently the principle agreed to by such traders is indirectly contravened. The Proprietary Articles Trade Association organized for the purpose of protecting small traders is a powerful body, and they recently called a meeting of representative retailers, the President of the I. F. A. (Ironmongers' Federated Association) among others being present. The meeting passed stringent resolutions, affirming that no industrial co-operative society should be supplied with any article on the P. A. T. A. list unless the bonus on such goods was withdrawn or the prices raised proportionately. The Co-operative Wholesale Society, the largest buyers in the trade, protest and threaten to close accounts, intimating that unless this new condition be withdrawn, they will manufacture similar goods as substitutes. Some of the makers have stood firm, others cannot afford to lose such powerful support, and prefer to run the risk of losing a number of small accounts rather than the one large order. Ironmongers are not interested in the matter to the same extent as chemists, but price maintenance is a principle their associations laid down

as vital to their prosperity. Price cutting has caused the ruin of many in the past, and the keenness of competition is especially severe in districts where co-operative societies are strong. In Lancashire and some of the larger industrial centres, the co-operative societies have all their own way, and supply nearly all the wants of the community. The retail traders are consequently miserably poor and bear a much larger share of the local rates and taxes than is either fair or just. A few ironmongers whose trade is heavy and consists chiefly in supplying builders, exist and even flourish, but the cream of their trade is gone, and they rarely sell the profitable lines which make the retail counter business worth having.

APPRENTICESHIP PAST, PRESENT AND FUTURE.

During the past few years the question of apprenticeship has been brought forward owing to the difficulty of obtaining eligible candidates for Hardwaremen under the old fashioned terms of apprenticeship. A gradual shortening of time has been going on and terms of 3 and 4 years have frequently been accepted instead of the longer period formerly thought needful to complete the embryo ironmongers' knowledge of the Hardware trade. The fact is that the ironmongery business is never learned, it is constantly changing and the methods of conducting it are ever undergoing a process of evolution.

The hustle of business is now quite different from that of a few decades ago, and the experience gained by a smart lad is greater than formerly in the same length of time. Time does not give knowledge nor yet does it always add ripe experience, for there are many instances on record of ironmongers who have spent the whole of their lives amidst Hardware surroundings who possess neither business experience or trade knowledge. The leaders of the ironmongery trade recognize the altered condition of retail trading, and are now considering how the ironmongers of the future can best be trained and how that knowledge which alone can make strong business men may be acquired. Many of the present day ironmongers have been sons of ironmongers, and instead of spending some years "with their noses to the grindstone" have had an easy time of it for a year or two at home, afterwards going away to other towns for short spells of "improvement." Some educative schemes are by no means the best, and do not produce the ideal ironmonger. The examination instituted by the Ironmongers' Federated Association have induced some few assistants to study; and, although the number who have so far availed themselves of the opportunity to obtain certificates of proficiency is not great, the questions set by the examiners show the line of conduct mapped out as the best groove in which proficiency may be secured. Whatever plans may be ultimately adopted in order to secure the best results it is evident that technical knowledge as well as practical must be combined in the course of education to be pursued. It is agreed that some term of apprenticeship is desirable, but there is no doubt that employers should realize their responsibility. It is not enough to find employment; the old clause in which the employer covenants "teach or cause to be taught the mysteries of the trade" must be observed and applied in its modern sense. The education necessary to fit a man for every station in life has advanced by leaps and bounds during recent years, and the education needed to make a good Hardwareman cannot be "picked up", it must be taught, and the instruction given in the higher branches of commercial procedure, in trade knowledge including the making of things and their uses, and in true salesmanship. The answer of too many of the weak kneed ironmongers of to-day, if asked how they became ironmongers would be like that of Topsy, "I growed;" for in the past years there has been a lamentable absence of instruction. This, however, is now being remedied, and a better race of British ironmongers in the near future may be anticipated.

HARDWAREMEN QUICKEN THEIR PACE.

In confirmation of some of the foregoing remarks it may be mentioned that one of the leading Hardware journals in this country recently published an article on "Stock-keeping a century ago," in which the writer mentioned many curious obsolete objects, and quoted from an old stock book giving lines once familiar but now forgotten. When old stocks are sold valuers often came across a few obsolete articles such as flint-strikers, snuffers, buckles and the like, and still oftener find upon parcels old names which indicate the change that has been made in trade nomenclature. Yes, trade changes in every department, and in a decade now there is more that difference than in twice that period half a century ago. The pace quickens and ironmongers are

realizing it here as in America. The change too in seasons' business becomes more apparent year by year; possibly this is because traders are more alert, and are alive to the need for prompt measures of display. Passing down one of the thoroughfares of London a few days ago I came across a window in which were several out of date tickets; on a small clock a large ticket was hung inscribed "A suitable Christmas present." That man was behind the times—or else he was a long way ahead—but the dust on other articles confirmed the first impression that he was hopelessly lost and crowded out by modern traders. Despite this conspicuous exception the ironmongers of London are advancing and there is a brighter look about the emporiums of suburban ironmongers; especially is this the case among associated Hardwaremen.

INCREASING DEMAND FOR IMPLEMENTS AND FARMING APPLIANCES IN SOUTH AFRICA.

Mr. Hannan, who was recently appointed to undertake the scheme of visitation of the different farming localities in South Africa, has returned to London, after having vigorously canvassed the agents and farmers, and held meetings in different parts of the Cape and Natal, his chief object being to promote agricultural co-operation, in order that the farmers might obtain lower rates and secure on adequate schemes of deferred payment improved implements and machines. His report is interesting inasmuch as he has had exceptional opportunity of judging of the openings for new machinery and the prospects of trade. It will be interesting to your readers to know that Mr. Hannan is of the opinion that harvesting machinery and other agricultural appliances manufactured in the States are well received by South African agriculturists. There is undoubtedly a forward movement going on, and the prospects of further development in the agricultural industries in the near future are very apparent, consequently, the demand for implements and machines is on the up-grade. Doubtless the manufacturers in the States with their usual enterprise, will receive a full share of the benefits accruing, and I have no doubt that many agents of American manufacturers will be enabled to report to their superiors improvement in trade in the near future. Not only is the increased demand connected with stock-rearing and cultivation but the benefits of irrigation which have been so successfully carried out in Northern Africa are now being applied to the Cape and Natal, and there is an increased use of pumping machinery, turbines and irrigation plant much of which is made in the States. Although there is no prospect of any great boom in South African trade such as was once anticipated, there is undoubtedly a steady increase in general business going forward, and a more settled state of things in the outlying districts which will bring about an improved condition of farming and the adoption of up-to-date implements and machines. In a similar way there is improvement in the type of machinery used for commercial purposes, and those who are in close touch with the British South African Colonies are forced to realize that a considerable share of the business that is going falls to the lot of the enterprising representatives of the manufacturers of the United States.

MUSINGS OF AN OLD MAN.

By D. C. WASHINGTON.

Now is the time to tackle the vacation question. Don't wait until every man in your place has made up his mind just where he wants to go and just when he wants to get off but get in your work first and let him make his plans to suit your arrangements. The easiest way to settle this ever perplexing question is to get your employees in a bunch some rainy day and let them draw lots for choice of dates, and in my opinion the best way to convince them of the justice of the plan is to go in with them and draw your lot the same as they do. I have for several years taken as many slips of paper (all of the same size) as I have people working in my place and numbered them consecutively and placed them in a hat which I held high enough over my head so that no one could peep and let the boys come up in turn and draw a number while I took the slip that was left for my own. The man that draws number one has first choice as to when he shall take his two weeks vacation and has a week in which to make up his mind and then number two gets his choice of the time that is left and so on until the vacations are all arranged. Of course as time goes on there will be much swapping of times between the boys, but when the allotment takes place I make memorandums of the time selected by each and insist on being notified about all trades so as to avoid discussions later.

If there is still a dealer in the country who is so far behind the times as not to give a vacation to every man in his employ I want to plead with him to start in this year. Not for reasons of common decency to the people who work for him, for if he can be reached from that stand-point he is already allowing his people vacations, but from the stand-point of money in his own pocket. No matter how small or how large your place is it will pay you to

let your people off for two weeks in the summer. If you could see once the renewed energy with which a man back from two weeks at the sea shore or mountains goes at his work and hear him whistle and step lively around the place, you would understand that the human machine now and then needs a chance to stop and oil up.

* * *

Another thing that seems to me bad policy, and that is that of allowing your head salesman a vacation and making the porter stick at his work all the year round. The colored porter in my place has the same chance at the hat as the highest priced man in the place has, and I find that putting his name in the hat and my own rather encourages the idea that the whole place is a happy family all working together for one common cause, which is to make this place the best managed store in Oortown. This idea which I think the French call the *esprit de corps* is the idea that makes a winner out of any establishment. It's the long pull and the strong pull and the pull altogether that drags any load up any hill and I find that this idea instilled into my people makes them take up the extra work caused by the absence of some of the others on vacation with a cheerfulness that is surprising.

* * *

This putting another man at some fellow's work for two weeks has on several occasions put me on to some good little stunts here in the store too, for when a man has done one piece of work for some time he gets into a rut and when a new man drops into the place he can often see little places where improvements can be made in the detail of it, or sometimes in the whole plan of it, but no matter how good these suggestions may be I never adopt them until the man who is away returns and has a chance to prove his way the best. You cannot afford to hurt the pride of any man working for you, and any alteration of his method should come only after consultation with him. Of course you own the store. I know that, but you take a tip from me, my boy, and don't ever say so in it. Let the boys think you are simply there to suggest things to them and not to order them about. It pays better.

While on the subject of vacations let me ask you if you close your store at five o'clock, and at noon on Saturday during June, July and August? If you don't do it there is only one good excuse for you not doing so and that is because the other fellows in your city do not do so, and that is a matter that is easily remedied. Don't you realize that the reason they don't do it is because you stay open? There are two ways of accomplishing the early closing movement in every city. The first and easiest way is to go to each man in your city with a list of the other dealers and say to him, "Will you close your store at five o'clock week days and at one o'clock Saturdays if all the others on this list will?" and you will find there won't be a man hold back. The other way is to say nothing and shut up your shop. Your boys will tell them and they will jump their employers quicker than a hen will pounce upon a worm, and raise such an infernal din that every man in the town will be with you in a week. Don't ask me what's the use, for I am tired of telling you that every favor you do for the people working for you pays you. Not in love and dog-like devotion, but in cold hard cash in the money drawer. I am now and always will be a firm believer in the theory that people as a whole are appreciative.

* * *

When you once get the idea into the heads of the people whom you employ that you are a just man and one who wants to ease the task of making a living for them as much as you possibly can without injury to yourself or those having prior claims upon you, and when you once get the idea out of their heads that you are a close-fisted old skinflint of a task-master who is there to drive them, you have established a friendly relation with them that will be worth money to you. Talk to them about the things they are interested in. If you have a boy that is interested in canoeing and you run across a story in a magazine that has a canoe in it take it to him to read. Jolly them. You jolly your customers, don't you? If it pays to throw what Jimmy Fadden calls the "con" into a man that comes into your store two or three times a year to spend five dollars with you, how much better will it pay you to throw the same "con" into a fellow who is making your living for you, handling your customers, and fingerling thousands of dollars of your money. Don't you lose sight for a moment of the fact that they are stringing you half the time when they laugh loud and long at your stories and when you give them long lectures about how to do things that they can do better than you can, don't you think for a minute that they are not giving you a merry hoot behind your back. It hasn't been a week since I was spouting hot air on the subject of the chances of our ball team this year and a casual glance into the mirror showed me one of the boys winking at another. Just because we own the store we mustn't think we are the only hole in this particular slice of Switzer.

—The Optical Journal.

RECENT TRADE PUBLICATIONS.

FOND DU LAC AWNING & TENT Co., Main and Eighth Streets, Fond du Lac, Wis., are distributing a very interesting catalogue and price list, with discount sheet, of the lines of goods of their manufacture. They are makers of awnings, tents, flags, hammocks, canvas covers of all descriptions, camp furniture, and Cooper horse blankets. Numerous illustrations are given of their wedge, wall, lumbermens', herders', camping, oblong, round end, refreshment, family compartment, square hip roof, Amazon, palmetto, photographers' garden, miners' beach or canopy, and staple tents, as well as of binder and hay cock covers, and camp furniture of all descriptions, such as folding chairs, camp and lawn stools, lawn settees, camp beds, house cots, tables etc. They are also makers of yacht sails and a line of rubber bath tubs for infants and adults. This is a very timely little book, and can be had upon application.

A. GEISEL MFG. Co., St. Louis, Mo., have favored us with their 1906 booklet illustrating their "Ideal" Knock Down Ovens, "New Century" and "Victor" Ovens and trimmings for gasoline, oil and gas stoves. Full descriptions and prices are given.

SILVER LAKE CO., for whom the Henry W. Wellington Co., 78 Chauncey Street, Boston, Mass., are agents, have sent out their catalogue and price list for 1906 of solid braided rope, sash cord, railroad bell cord, trolley cord, masons' lines, chalk lines, clothes lines, etc., of which full descriptions and illustrations are given, and this will be found a very useful pamphlet to those intending to purchase goods of this character. The company have been established since 1869, and their goods have been in continued general use, until they have become recognized as standard.

THE WIRE GOODS Co., Worcester, Mass., have distributed a series of circulars illustrating their leading lines, such as hammock hooks, garment hangers and wood screws, each line being shown on a separate sheet, and calling attention to their line of seasonable goods to be found in their Catalogue No. 5, including bird cage springs and hooks, fly traps, dish covers, screen door pulls, window screen lifts, Perfection door springs, blind awning fixtures, carpet whips, door mats, etc. The dealer interested should send for these circulars.

IWAN BROS., manufacturers of Hardware specialties, Streator, Ill., have issued a pamphlet illustrating and describing their Patent Improved Post Hole and Well Auger, which they claim to be "the best in the world for all kinds of earth boring." A full description of the various uses to which it may be applied will be found, as well as a description of its construction and operation, with explicit directions for using. They also give a number of commendatory letters received by them. A price list is included as well. They are also manufacturers of other tools useful on the farm for various purposes, such as tile drain cleaners, open-back tiling spades, sickle-edge and serrated-edge hay knives.

BROWN & SHARPE MFG. Co., Providence, R. I., with branches in New York, Philadelphia and Chicago, have recently distributed to the trade copies of the 1906 edition of their general catalogue of Machinery and Tools, which, they state, has been thoroughly revised, and now contains 514 pages. The new matter, together with the changes in the old, make it especially desirable that this should replace former editions. The larger number of tables it contains, together with the other general information, make it very valuable to the workman as a book of reference. The principal additions this year to the various lines of machines and tools are given on a colored insert. This catalogue will be mailed upon application to any address without charge, or will be furnished by Hardware and Supply dealers. The Brown & Sharpe Mfg. Co. are manufacturers of milling machines, grinding machines, automatic gear cutting machines, screw machines, cutters, accurate test tools and machinists' tools.

FENTON LABEL Co., Forty-first and Filbert Streets, Philadelphia, Pa., have issued a very useful pamphlet devoted to their Gummed Labels and Advertising Stickers. This is a line of goods which is a necessary part of every Hardware store, and the dealer will do well to investigate the advantages and merits of this particular make. A price list is contained in the booklet,

and varieties of every kind of label imaginable will be found included in the contents.

SIMMONS HARDWARE Co., manufacturers and distributors, St. Louis, Mo., as is their annual custom at this time, are sending out their catalogue devoted to Fishing Tackle, Base Ball, Tennis, Athletic Goods, etc. This is known as their No. 505. Everything that can be thought of as belonging to a fisherman's outfit will be found in its pages, such as bamboo and steel rods, nets, poles, net rings, reels, lines, seines, baits, flies, hooks, floats, sinkers, traps, creels, etc. A full line of Sporting Goods is also illustrated, including lawn tennis rackets and balls, base balls, catchers' mittens, bats, masks and uniforms. Several styles of hammocks and lawn swings are also shown, and a full line of camp furniture, such as beds, chairs, ranges and lanterns. They also illustrate a line of boats, oars and oar locks, anchors, and, in fact, everything which the up-to-date sportsman considers a necessity for the completeness of his outfit. Another catalogue, No. 508, has come to hand, illustrating their line of Laclede Bicycles for 1906. All the various patterns of this particular make are shown, including a full line of bicycle accessories, such as coaster brakes, handle bars, saddles, pedals, tires, valves, toe clips, lamps, bells, pumps, luggage carriers and child's seats, stands, oilers, repair outfits, etc. These will be found very interesting catalogues.

BUCK'S STOVE AND RANGE Co., St. Louis, Mo., have favored us with a copy of their Catalogue No. 104 of Stoves and Ranges. This is one of the most artistic publications that has been brought to our attention, being printed on fine coated paper and containing 184 pages, on each of which is displayed handsome half-tones of their various patterns. The cover is of dull black finish, embossed. The frontispiece contains a view of their immense plant, which covers several city blocks, and contains nearly a quarter of a million feet of storage and mounting room. The contents include Special, Empress, Electric, Chief, Century and Pilot Steel Ranges; also a line of Hotel Steel Ranges under the names of the Regent and Mystic; a series of steel and cast cooks, made under a variety of names, such as the Flora, Regent, Pride, Pearl, Elk, Century and Pilot; and a series of cast wood cooks of various styles. A number of pages are devoted to their "Advertising Plan," giving views of several of their office and departments of advertising and illustration. They are also manufacturers of a full line of base burners, wood heaters, laundry stoves, stove drums, high shelves and closets for steel ranges, water backs and fronts, reservoir and gas attachments, etc. This is a catalogue that should be in the hands of every dealer in the above lines of goods.

SARGENT & Co., New Haven, Conn., and Nos. 149-153 Leonard Street, New York, have published their catalogue of Spring Balances and Scales for the season of 1906, accompanying the same by their discount sheet. They state: "This catalogue takes the place of pages 928, 930, 930A and 931 of our general catalogue of 1901. We have greatly enlarged our line and have made many improvements in our Balances each of which is particularly adapted to the use for which it is intended." The contents include a line of round, light and heavy straight spring balances; extra heavy, ice, circular family and circular spring balances; scale beams or patent balances. Their lines of "Old Glory" family scales, Hatch tea and counter scales, even balance, grocers' and platform scales, both stationary and portable, are also shown. The cuts are excellent ones, and full descriptions accompany each illustration. Sargent & Co. also furnish these balances and scales marked with the metric system, or in Spanish pounds, if so desired.

THEO. J. ELY MANUFACTURING Co., Girard, Pa., manufacturers of Hardware and Woodenware Specialties, have favored us with their new catalogue describing and illustrating their goods, which include Mop Heads, Mop and Brush Holders, Mops and Wringers, Dandy Janitor Mop Sticks, Rattan Carpet Beaters, Towel Racks, Toilet Paper Holders, Bait Traps, Broom Holders, Clothes Lifters and Drainers, Waffle Irons, Horse Pokes, Hay Knives, Saw Handles, Carriage Top Dressing, Anti-Rattlers, etc. This is a very handy little catalogue, and should be sent for by the Hardwareman not already in possession of the same.

NEW GOODS AND SPECIALTIES.

"SOLIDHED" DISPLAY CASE NO. 4.

Hawkes-Jackson Co., 82 Duane Street, New York, are the makers of "Solidhed" Thumb Tacks of which we show a display case, which is their Octagon No. 4. This is a new case that

has been added to their assortment already on the market, and holds one gross each red, white and blue celluloid; one gross of German silver, $\frac{1}{2}$ inch; one gross each $\frac{3}{8}$, $\frac{1}{2}$ and $\frac{5}{8}$ inch brass, and one gross of 7-16 inch steel. The retail prices run from 7 cents to 25 cents per dozen, making the contents of this Octagon case No. 4 retail for \$14.64, while the cost is \$7 net. Any special

"SOLIDHED" DISPLAY CASE NO. 4.

assortments will be furnished in the case at the same rate. This exceedingly attractive case has done much to make the "Solidhed" Thumb Tacks popular for home and office decoration and they can be used in making possible many clever and original effects. Convenient and inexpensive, they are used in the office for attaching blotters to the desk; photographs, calendars, pictures, posters, notices, etc., to the wall, without injury to either. Draughtsmen and artists employ them on the drawing board, and advertisers for displaying show cards in stores and public places. For household draping, for dressmakers' cutting boards, for fastening shelf-paper, covers to either tables or ironing-boards, for numbering window screens and decorative purposes in general the "Solidhed" Thumb Tacks are claimed to be by far the handiest device in use. They can be pushed in by the thumb, and may be easily removed by the fingers. They have a perfectly solid head. The head of the pin is firmly and securely imbedded in the top, does not penetrate it, making a perfectly solid joint. This method eliminates the danger of injury to the thumb, and prolongs the usefulness of the tack.

FOX IMPROVED SQUARE AND MITER.

Philo L. Fox, 432 William Street, Bridgeport, Conn., is the manufacturer of the Fox Adjustable Square and Miter, which we illustrate herewith in its present greatly improved condition. The stock or handle is made of the best gray iron, japanned; the blade of polished steel, so that the tool when complete is quite

light yet durable, and warranted in every particular. The great advantage claimed for it is that the miter blade is so placed at one end of the handle that it forms a complete square and bench square, as shown in Fig. 1, without a single change. The ad-

FIG. 1. SQUARE MITER AND BENCH SQUARE.

justment of the sliding blade, as indicated in Fig. 2, runs from five to eight inches, making a full set of squares in one. The

FIG. 2. SQUARE AND MITER ADJUSTED TO 8 INCHES.

long or square blade can also be adjusted in place of the short blade, thereby constituting a miter square with sliding blade, as

FIG. 3. MITER SQUARE WITH SLIDING BLADE.

shown in Fig. 3. The tool can be used for laying off miters up to ten inches, as well as for outside and inside miters and will be found an extremely serviceable tool of its kind.

SMITH'S SNAG HOOK.

John P. Smith & Co., New Haven, Conn., are placing upon the market an anglers' device, which is claimed to be a quick seller, taking up no more room when closed than a cigar. We illustrate the device both open and closed. The Hook when open has eight arms. You fasten eight hooks to the eight arms. The

hooks are attached by a very clever device, which takes but a minute, and when once accomplished they are there to stay until you take them off. Fasten your sinker inside the arms in the eye provided for it; hitch on your line and attach the bait. The bait is not to be placed on the hooks themselves, but on a spiral hook at the top, as shown in the cut. The idea is, the fish has eight hooks under him, and a nibble at the bait, followed by a twitch on the line, and the hooks will do the rest. These Snag Hooks are strong, well made and full nickeled, and will catch fish without losing the bait, like the old-fashioned hook.

COLT AUTOMATIC PISTOL WITH COMBINATION HOLSTER AND STOCK.

The Colt's Patent Firearms Manufacturing Co., Hartford, Conn., have just put on the market the Automatic Colt Pistol .45 caliber with combination holster and stock. The pistol proper is similar to the one previously on the market in calibers .32, .38 and .45, the new feature in the latest model being the quick and convenient method of attaching the pistol to the holster in which it is carried in belt at the waist, thus instantly converting the

FIG. 1—COLT AUTOMATIC PISTOL WITH COMBINATION HOLSTER AND STOCK.

firearm into a shoulder piece. The ammunition used is said to be of sufficient stopping power to bring down large game. It also adds to the efficiency of a side arm without the inconvenience of carrying extra bulk or weight. The recoil being absorbed in

FIG. 2—PISTOL ATTACHED TO HOLSTER AND STOCK.

producing the automatic operation, the usual disturbing effect or unpleasant jar is largely eliminated in this arm. The combination stock and holster are made of extra quality black leather, well seasoned, lined with buckskin and hand-stitched over a light but strong and rigid steel frame. The device for attaching the

pistol to the stock, as seen in Fig. 2, is so arranged that it is perfectly secure when in place. Loaded with smokeless powder only, the cartridge has a full metal cased bullet, giving a velocity of 900 feet per second and a penetration in $\frac{7}{8}$ inch pine boards of seven boards at 225 feet and six boards at 325 feet. The specifications of this pistol are: Weight, $32\frac{1}{2}$ ounces; length over all, 8 inches; length of barrel, 5 inches; capacity of magazine, 7 shots, the finish being full blued with checked walnut stocks. Stock and holster only weigh 21 ounces, and are 11 inches long over all. The pistol with stock attached weighs $53\frac{1}{2}$ ounces, and is 19 inches long over all.

ELECTRICIAN'S NEW HAND TOOL CASE NO. 1003.

Among the new and greatly improved conveniences marketed by C. E. Jennings & Co., 42 Murray Street, New York, is an Electrician's New Hand Tool Case No. 1003, for which they have

ELECTRICIAN'S NEW HAND TOOL CASE NO. 1003.—OPEN.

applied for a patent, and which we illustrate herewith, showing it opened and closed. It is made of hard wood, handsomely finished, furnished with brass lock and leather handle with rings, for strap to pass over shoulder; metal clasps and corners, and

ELECTRICIAN'S NEW HAND TOOL CASE NO. 1003.—CLOSED.

having a removable tray. It is designed to hold 24-inch Electrician's Bits and a 24-inch bit extension. Its dimensions are as follows: Outside, $25\frac{5}{8}$ inches long, $9\frac{1}{8}$ inches high, $5\frac{1}{4}$ inches wide; inside, $24\frac{5}{8}$ inches long, $8\frac{1}{8}$ inches high, $4\frac{1}{4}$ inches wide; inside of tray, $23\frac{7}{8}$ inches long, 2 inches deep, 2 inches wide. Packed six in a crate. Weight $7\frac{1}{4}$ pounds.

KNAPP'S "GRAVITY" BROOM HOLDER.

George S. Knapp, Bridgeport, Conn., among the numerous specialties manufactured by him, is introducing to the Hardware trade Knapp's "Gravity" Broom Holder, of which we show an

KNAPP'S "GRAVITY" BROOM HOLDER.

illustration. Nothing better for house or factory use is made. Slip handle of broom in holder, and in removing the hand the weight of the broom holds it in position. When it is necessary to

remove the broom, lift the end of the holder with the thumb-nail, and catch the broom when it drops. It is intended to screw on the inside of cellar or closet door, or, in fact, in any convenient woodwork. It is a simple, practical and useful device, and is claimed to pay for itself many times in saving the life of the broom.

THE LOVELL WINDOW APPARATUS.

The G. Drouve Co., Bridgeport, Conn., and New York office at 1135 Broadway, are equipping large shops and mills throughout the country with the Lovell Window Apparatus, the operation of which window and shutter device is best shown by the accompanying illustration, which illustrates a section 320 feet in length, giving a perspective view of the device operating a line of win-

THE LOVELL WINDOW APPARATUS.

dows with window partly opened. With this device, a line of sash 500 feet long can be operated from one station if desired. As the operating station for an entire building is, unless otherwise ordered, always placed on the wall at end or side of building, in case of fire the windows can be quickly closed, while the people are leaving the building. This feature appeals to the owners of large factories or mills. The arms operate by a straight push and pull, instead of the twist used in other devices. The advantage of this is apparent. The manufacturers state if drawings or blue prints are sent them, or the length of runs and number of sash to be operated and the height of sash from floor, they will cheerfully furnish estimate for the apparatus, f.o.b. cars, or erected complete.

C. L. HATHAWAY & SONS HARNESS SPECIALTIES.

C. L. Hathaway & Sons, 346 Congress Street, Boston, Mass., manufacture a special line of goods which should be in every Hardware store in the country, where they can be looked upon and considered as being each and all of them of good selling merits and catering to a class of trade—that of horse owners—who are good buyers for what they want and do not usually waste their time in haggling over the prices at which they are sold.

STAR HARNESS DRESSING.

STAR HARNESS OIL BLACKING.

Their Star Harness Dressing is one of their most salable specialties. It may be relied upon to produce a beautiful polish, making any new or old harness look fresh, clean and handsome, and it will always give satisfaction with the use thereof without the

fear of the leather cracking or the dressing producing a smut.

The Star Harness Oil Blacking is excellent in the way it is able to impart new life and looks into any harness. It both cleans and blackens, and may be relied upon to do its work every time.

Hathaway's Axle Oil is another salable specialty that is calculated to do away with all hot boxes and any excess friction. It is not a greasy body, but a full frictionless body; in fact, a

STAR AXLE OIL.

Hathaway body that always resists wear. The dealer would find it extremely difficult to procure as good an axle grease. It is one of the best claims that one certainly could not find a better.

THE EDWARDS NEW GOTHIC CEILING PLATE.

The term Gothic at first applied simply as a mockery by the architects of the Renaissance Period is now accepted as the name of the style of architecture that flourished in western Europe from the middle of the twelfth to the end of the fourteenth century. It varied under local influence in different countries, but its distinguishing characteristics were everywhere the same.

In Yorkshire, England, however, there was a steady progressive development uninfluenced by any classic tradition and therefore it reached a very marked character. English-Gothic architecture may be divided into three distinct periods; namely the early English from 1175 to 1272, A. D.; the Decorated, from 1272 to 1377 and the Perpendicular from 1377 to 1483; each period being about 100 years in extent, though the transition from one style to the next succeeding was so gradual that no exact dividing date can be set. The early English style includes the transition from the Romanesque to the Gothic. The Decorated style is distinguished by wider arches, divided by narrow mullions and the perpendicular becomes more and more complexed.

THE EDWARDS NEW GOTHIC CEILING PLATE.

We show here a Gothic Ceiling Plate, No. 1666, one of the many handsome and artistic modelings being brought out by the Edwards Manufacturing Co., "The Sheet Metal Folks," with offices and factory in their new location, 518 to 538 Eggleston Ave., Cincinnati, O. The company advises us that they have in press now a new catalogue of Metal Ceilings and Side Wall Designs, of the different periods and which they will be pleased to forward to parties interested.

THOUGHTS ON SALESMANSHIP.

Much has been written of late upon the subject of salesmanship. These discussions find their source in a realization of the fact that steadily increasing competition, with the consequent narrowing margins of profit, demands from the concern or the individual hoping to acquire or hold a conspicuous place in the commercial world an ever-increasing efficiency. Men and business institutions have come to realize that salesmanship is a science, concerning which much may be learned from a careful consideration of the principles which underlie it. In a recent issue of *The Valve World* the subject of salesmanship is dealt with in an illuminating manner and while the principles there advanced are intended to apply principally to the traveling salesman, the same principles may be wisely adhered to by the salesman in the retail store. The article says:

Nowadays we know that the old idea, that either the seller or the buyer must lose on every transaction is false. We expect the seller to make a fair profit, and we know that unless the buyer gains through the transaction, he will not again be a purchaser. If the seller is obviously disposing of his goods at a loss, the suspicions of the buyer are at once aroused. Anybody can give things away; a salesman is one who can not only sell goods at a fair profit, but who can make regular customers for his house.

The day of the torrent-of-words salesman, of the intemperate or licentious salesman, whose life and talk smack of the frontier, is gone. Occasionally a survivor of the old type is found who is unquestionably successful. He succeeds, not because of his uncouth methods, but in spite of them. We pity him, and wonder how much more he could accomplish were he to adopt modern methods. He is like the peasant who still uses a crooked stick for a plow.

The successful salesman of to-day is a man whose methods and point of view are in accord with the high requirements placed upon him by the community with whom he deals. He must be a man of judgment and intelligence. He must be a man of decency, for he deals with decent people. He must be honest and frank, for these are qualities which men of character demand of those with whom they associate. The salesman must have good health, without which his mind will not be alert, and the man himself will be nervous and crabbed.

MUST BE AN ENTHUSIAST.

The salesman must be an enthusiast, not in the emotional sense, but he must know he has a meritorious article, and be eager for others to appreciate its excellence. This is the enthusiasm of conviction. Then the salesman must be aggressive, looking upon obstacles and rebuffs as opportunities given him to show the stuff he is made of; in other words, he must be a man of mental vigor and courage. He must keep awake. This is not a time for Rip Van Winkles. This is an age of hustle, but hustle does not mean merely high speed. Hustle means constantly keeping going towards a definite object, saving minutes and words. Mere bustling around accomplishes nothing and brings ridicule.

"No knocking of competitors' goods," should be the motto of every salesman who hopes to succeed, for the world despises a knocker and it is at once disposed to be unfriendly to him. This does not mean that a salesman should not compare his goods, as to quality, price, etc., with those of his competitors, but it does mean that he will do so, if at all, fairly and squarely. One of the fine things that comes into the life of a salesman who is not only a man of character, but a man of pleasing address and an attractive personality, is the friendships he forms with the best men with whom in his work he comes in contact. Many are the profitable and pleasant hours he spends with such companions. And it is out of such friendships that business is gained, for it is human nature for us to assist our friends.

MUST KNOW MEN.

The salesman can never meet with a large measure of success until he knows men—until he can read character, understand and sympathize with men. No two men can be approached in exactly the same way. It is certainly a wise provision of nature that we intuitively adapt our speech and manner to those with whom we are brought in contact, unless we deliberately make an effort to treat all comers alike. Here arises the question of the value of set speeches in presenting goods, a method of salesmanship which probably had its origin in the subscription-book business. The average book salesman memorizes a little story and recites it to any one who will listen. Yet in presenting a complicated article this method has the merit of affording a means of concisely and succinctly given full information. But it does not in any way relieve the salesman of the necessity of having an intimate knowledge of the goods he is pushing.

That the salesman should be able to present reasons as to cost, durability, utility, etc., why his article should be bought, goes without saying, yet the relative importance of these reasons depends entirely upon the customer and his object in making a purchase. To one man price is of no object. To another price is the prime object, quality being of secondary consideration. As a general statement the world wants reasons, and wants them presented logically and pointedly. Many salesmen are much more familiar with the intrinsic merits of the article they are pushing than with the uses to which it may be put—a decidedly important feature in that such a knowledge frequently enables the salesman to suggest economies which would be made possible through the use of his article.

That these requirements are more or less ideal is freely admitted, but they are the direction in which the salesman should endeavor to grow; and there is just the pith of the matter, for by intelligent endeavor a man can make himself almost what he wills. Of course he cannot make himself grow tall or short, or have black instead of blue eyes, but our physical appearance, which is largely beyond our control, unless bearing the tell-tale marks of dissipation, plays a small part in our life compared with the leading roles taken by those qualities over which our will has dominion.

There are four steps through which the mind of the purchaser must be led. First, his attention must be gained. There is no use talking to a man who is intent on something across the street or who is in the midst of a newspaper article which he goes on reading. The attention accorded depends largely upon the personal appearance and manner in which the salesman presents himself. Here is where character, the ability to look a man square in the face and gain his recognition play an important part. After the attention is gained, the customer must be interested in the subject matter of the proposed sale. Usually a man is most interested when shown that he can profit by making a purchase. After his interest is aroused, the next step is by arguments adapted to the particular case to lead him to desire to possess the article, the merits of which are being presented. Then he must be able to make up his own mind, to decide and to say that he will purchase.

Now, advertising, or "salesmanship-on-paper," may be used with the idea of carrying the mind of a prospective customer through all these four stages. Above all, the salesman should know what articles are being advertised by his house, and what statements are being made in regard to them, for ignorance in regard to such matters puts the salesman in a bad light and tends to weaken the respect which a customer should have for him and his firm.

These are sound principles and should be of much value to anyone who sells goods, be he a traveling salesman selling the retailer, or a clerk in a retail store. In this day and age the salesman must know his business.

HOW TO SELL WASHING MACHINES.

An excellent paper, entitled "How to Sell Washing Machines," was read by C. W. Magill, representing the Boss Washing Machine Co., Cincinnati, Ohio, at the recent convention of the Missouri Retail Hardware Association. The following extracts will demonstrate its quality.

In selling Washing Machines to the consumer I would advise the dealer to be very attentive to the specialty man, if one presents himself, for it is his business to know his competitors' goods as well as he does his own, for from him oftentimes one can learn much about the goods he may have in stock that makes good pointers in selling. I have frequently found the retail merchant with rotary Washers in his store who

COULD NOT MAKE ANY COMPARISON

between what he had for sale with what his competitor had. I have seen young men who were showing Washers who said, "This machine is the best; we sell more of this Washer than our competitor does of the kind he has," and relies upon a statement which he is not sure is correct to influence the sale.

He must be able to tell his customer and show him that every statement he makes is the truth. If it is a Rotary Washer tell him the size of the tub, because all Washers have not the same size tub; next call his attention to the finish and the kind of lumber. If he has a quality of lumber in the tub he is selling that is less liable to shrink and swell than some other woods it is a good point to make. If the hoops are strong and good, attention should be called to this.

IF THE MACHINE CAN BE TAKEN APART

and put together easily dwell on that point, too.

Show how easy it is to insert repairs that may be needed, for

anything will wear out in time. Cover the general construction. Make your customer familiar with all the minutiae and then show him that the dasher makes so much of a revolution before reversal takes place, for that indicates one of the features of the Washer just as much as anything else, and be sure to call attention to the number of reversals the dasher makes to, say fifty turns of the hand wheel, because then you show the speed, and the more speed you have the less number of times you have to turn the hand wheel to produce the same result, or to do better work in the same time or as

GOOD WORK IN LESS TIME.

If you happen to have a larger dasher it only shows more agitation because it describes the large circle in the same time a smaller one does. If the tubs happen to be larger there is an advantage because it brings the clothes nearer to the rubbing surface on the side of tub. Especially call attention to the dasher if it happens to be constructed so that the shaft does not come through the dasher to entangle the clothes or pinch holes in the garments. You must

GET INTO THE DETAILS.

The little things count in showing up goods as much as the greater ones. If you have shields over the gears to prevent children from pinching their fingers, show the advantage, or if your machine is not made that way show why it is not needed. Quality and durability count as much as ease of operation. Always advise your customers never to load the Washer so heavy that it works hard, and always use soap plentifully because it is a chemical action this washing of clothes. The dirt must be loosened and the soap does it. Boiling hot water in which a large portion of soap has been dissolved loosens the fibers and permits the water to pass through, carrying the dirt with it. If it is a double-acting machine, one of the kinds that the Germans and Swedes prefer because of its rubbing propensity in opening up the meshes of the garment, then show its ease of operation. If you happen to have one that can be put together without the use of nuts or bolts or the Hardware is interlocking and automatic in its action, call attention to this;

SHOW UP ALL GOOD POINTS.

The surest way to clinch a sale is to say, "Take it home and if, after using it for three or four times, you find it is not as I represent it, or does not do the work, bring it back and we will give you your money back." You know that if it was not satisfactory it would come back anyhow, and you are safe.

NEVER RUN DOWN YOUR COMPETITOR'S GOODS.

Rather tell your customer if he asks anything about them, all their good points and show what way yours is superior.

Bear in mind that the water must get through the clothes, that soap loosens the dirt and that a machine that squeezes by any process the water through the garments is much better than one that forces the clothes through the water.

You all know that it is always best to get the money for your goods and you can refund if returned, but

GOODS ARE NOT NEAR SO LIABLE TO BE RETURNED

if they are paid for as they are when given for trial.

Some dealers in small towns have been very successful with washing machines by allowing a clerk or two to take a wagon in the dull harvest time loaded with washers and leave one at every farmer's house who has not a washer, telling him to try the machine for a month and it has been almost a certainty that the sale was made right then because it showed confidence.

THE AMERICAN COMBINED LEVEL AND GRADE FINDER.

This instrument manufactured by Edward Helb, Railroad, Pa., is most complete in all its arrangements, and is the only one of its kind on the market. In size and appearance it is like the ordinary spirit level, being two feet long, three and a half inches wide and one and five-eighths inches thick. As illustrated in Fig. 1, it serves every purpose of the ordinary level. However, on account of the longitudinal recess formed in the bottom, by

THE AMERICAN COMBINED LEVEL AND GRADE FINDER.

means of which it is possible at first sight to find the true bottom level of any grade or surface at any distance, the instrument far surpasses the common level even for ordinary leveling purposes. It will at once show the exact height in inches and degrees needed to block up to a true level. The chief distinguishing feature of the Combined Level and Grade Finder, however, and that which gives it its great value, is the graduated dial with the pointer on the side of the level. This dial makes the instrument serviceable for all forms of carpenters' and mechanical

work, and for all forms of grading, landscape gardening, excavating, etc., it enables the ordinary laborer to do work which otherwise often requires the expense of a civil engineer. Moreover, the dial in connection with the spirit level makes the instrument a double proof of accuracy, both for horizontal and

TOP VIEW.

vertical positions. A booklet of 24 pages, thoroughly indexed, is sent with every instrument. This booklet contains a number of cuts illustrating the use of the instrument in carpenters' work; in plumbing, drainage, getting the heights of objects, finding length of base and slant lines, where the perpendicular is known; also the perpendicular when either the base or slant is known, and a number of other uses. It is simple in construction, not liable to get out of order and in case any part should be broken it can readily be replaced. The low price at which it is marketed brings it within the reach of all mechanics and workmen who would be equipped with up-to-date instruments.

HOW TO FIGHT CATALOGUE HOUSES.

It was about thirty years ago that the retailing of goods through the mail order system was first started—small at first but now amounting to many millions of dollars annually. That the mail order system and the catalogue business, says the *Implement & Vehicle Journal*, is growing and spreading each year, and being felt more and more by the local retail dealers is evidenced by the much talk that is made about the catalogue house system when the retail dealers hold their annual conventions. Much thought and study has been given to the catalogue house problem, as to how the retail merchants can checkmate and circumvent the business of catalogue-mail-order houses and without having reached or discovered any successful plan. The thing to do, and about all that can be done, as it appears to the mind of the writer, is for each and every retail dealer to carry a few articles in stock of the grade and quality that are being sold by catalogue houses and sell them, and rather offer to sell them at catalogue house prices, remembering to add to the mail-order house prices the transportation charges the buyer would have to pay if he ordered the article by mail from a cat. house. But, before the prospective customer makes up his mind which to buy of the articles shown him, call his attention to the difference in quality between the cat. house article and the other better grade goods, guarantee the better articles to be all that you claim for them as to material and workmanship, and say to the customer if he buys the mail order house article, he must be guided by his own judgment, that you would not guarantee the article to be even what it appears to be, and if he takes it he must take it without a warranty and make no kick about it after he buys it. And another suggestion we have to offer is that the dealers make more of an effort to advertise the lines of goods they carry and notice to the consumers that they are prepared to meet all competition; keep their storerooms in a more orderly condition, than many do, their goods clean and attractively arranged and greet their customers in a spirit of friendliness and be ready to serve them to the best of their ability. The writer has witnessed a farmer enter a dealer's store and the dealer remain seated, seemingly indifferent as to the purpose of the farmer's call. It is active work, close attention to one's business and advertising and circularizing that has more to do with the success of a business than anything else. To sit in a disordered store, goods covered with dust, and not get up to wait on a customer when he comes in, but remain seated, cussing about the inroads the catalogue houses are making for trade all over the country is not the way to keep the consumers from buying from mail order houses.

LEASE—OPTION—SALE—PERFORMANCE.

In the case of Thomas vs. The Bauern-Schmidt-Straus Brewing Company, recently decided by the Court of Appeals of Maryland, it appeared that a lease for one year contained a proviso "that this agreement with all its provisions and covenants shall continue in force from term to term after the expiration of the term above mentioned or of any term thereafter by giving at least thirty days' previous notice thereof in writing." The lease also contained a subsequent stipulation "that the said tenants shall have the right to purchase said property at the end of said term for the sum of two thousand dollars." A little over fifteen months after the lease was executed, but while it was still in force, the appellee notified the appellant that it desired to avail itself of the option to purchase the property and tendered the amount above mentioned, which the appellant declined to receive. The court held that the option was a continual obligation running with the lease; that the contract was not lacking in mutuality, and that the decree of the lower court requiring the specific performance of the contract for a sale of the property should be affirmed.

REVIEW OF THE MARKETS.

WIRE NAILS: There has been a large trade done in Wire Nails this month, so much so that jobbers' stocks have become low by comparison. They have prepared to replenish, and have been placing new contracts so as to do so, although of course not to the extent they did six months ago. Shipments have been made in large quantities to the West and Northwest. Prices are firm and quotations are as follows: f.o.b. Pittsburg, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------------------|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants..... | 1.90 |

New York.—While the jobbers' prices are referred to as being well maintained, there has not been a very heavy local trade. Small lots from store are quoted on a basis of \$2.15 per keg.

CUT NAILS: New business has been comparatively light, though the delivery on contract orders has been remarkably generous at the mills, the business being largely confined to these deliveries. Quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburg; \$1.85 for less than carloads, f.o.b. Pittsburg; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock, New York. Iron Cut Nails at points west of Buffalo and Pittsburg are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—Jobbers' prices for small lots from store are well maintained. The local demand has been normal. The demand for small lots from store is about the relative proportion of Wire Nails. Small lots from store are quoted on a basis of \$2.05 per keg.

BARB WIRE: The mills are shipping heavily, although new business is scarcely considered as being prominent enough to mention. Quotations are as follows: f.o.b. Pittsburg, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|--|----------|--------|
| Jobbers, carload lots..... | \$2.00 | \$2.30 |
| Retailers, carload lots..... | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: The demand on Woven Wire Fence manufacturers has been quite large all the season, but it now approaches the end, decreased quantities being noted. It is reported that large orders are being received from the Telephone companies and the demand for Bale Ties is keeping up wonderfully. Quotations are as follows, f.o.b. Pittsburg, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 10. The other numbers of Plain and Galvanized Wire take the usual advances.

SANDPAPER, EMERY CLOTH, ETC.: New list prices on Sand, Garnet and Emery Paper and Cloth have been adopted by manufacturers, going into effect April 10. It is understood that no changes in terms and discounts have been made. Following is the new list on Flint Paper in reams, which is subject to a discount of from 60 to 60 and 10 per cent. to average retail trade:

Flint Paper, in Reams.

| Nos. | 9 x 11 | 9 x 12 | Nos. | 8 1/4 x 10 1/2 |
|-----------------------|--------|--------|---------------|----------------|
| 1-0 | \$6.25 | \$8.25 | 00 | \$1.25 |
| 3-0 | 6.25 | 8.25 | 0 | 4.25 |
| 00 | 6.25 | 8.25 | 1/2 | 4.25 |
| 0 | 6.25 | 8.25 | 1 | 4.75 |
| 1/4 | 6.25 | 8.25 | 1 1/2 | 4.75 |
| 1 | 6.75 | 8.75 | 2 | 4.75 |
| 1 1/4 | 7.25 | 9.25 | 2 1/2 | 5.25 |
| 2 | 7.75 | 9.75 | 3 | 5.25 |
| 2 1/4 | 8.25 | 10.25 | Assorted..... | \$4.75 |
| 3 | 9.50 | 12.25 | | |
| 3 1/4 | 10.75 | 13.75 | | |
| 4 | 11.75 | 15.25 | | |
| Assorted 9 x 11 | \$7.25 | | | |

TIN AND GALVANIZED WARE: The advanced quotations at which Tin Plates and Pig Tin are held have affected the manufactured articles to an extent that the manufacturers of Stamped and Pieced Tinware have advanced prices about 5 per cent. Galvanized Ware already selling near the cost of manufacture at prices that are unchanged. An attempt was made at a recent meeting in Pittsburg to agree on more remunerative prices, but beyond a slight stiffening in quotations by one or two manufacturers no understanding was reached.

ROPE: The following prices may be said to represent the market:

| | Cents per Pound. |
|-----------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12 1/2 @ 13 |
| B Quality Manila | 11 1/2 @ 12 |
| Pure Sisal, 7-16 and larger..... | 9 1/2 @ 10 |
| No. 2 Sisal, 7-16 and larger..... | 8 @ 8 1/4 |

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

| | |
|--|-----------------|
| White Sisal (500 feet to the pound)..... | 9 1/4 @ 9 1/2 |
| Standard (500 feet to the pound)..... | 9 1/4 @ 9 1/2 |
| Standard Manila (550 feet to the pound)..... | 10 1/2 @ 10 3/4 |
| Manila (600 feet to the pound)..... | 11 1/2 @ 12 |
| Pure Manila (650 feet to the pound)..... | 12 1/2 @ 13 |
| Less than car lots 1/4 cent advance. | |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels..... | 43 cents per gallon. |
| In lots of 5 barrels or more..... | 42 cents per gallon. |

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

| |
|--|
| Double Boiled Linseed Oil, 2 cents per gallon higher than Raw. |
| Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw. |
| Calcutta Oil65 cents per gallon. |

THE PHILADELPHIA TRADE.

Spring trade is fully up to the average, and now that the farmer is again out in the fields, there is the usual cry for agricultural tools, and as happens almost every year the supply is apt to be short on certain lines of goods. In fact the variety of farming tools is now so great, that it is practically an impossible task to keep an unbroken stock, and while the careful jobber does his best to keep his lines intact, he must sometimes ask for the indulgence of his customers.

When pressed for forks, hoes and rakes, the manufacturer of steel goods is very apt to throw the blame back on the handle maker, and say that he cannot get handles fast enough to fill his orders, and so the blame is passed on from one to another.

Probably, one of the most surprising things in this year's trade is the unusual demand for Window and Door Screens. Owing to the high price of lumber, the manufacturers have advanced the price of these goods almost fifty per cent., claiming that this advance was simply forced upon them. Usually such an advance has the effect of retarding trade, but it seems this year, as if it had precisely the opposite effect, in stimulating trade, as orders have been unusually large. Reports from country dealers indicate a fair volume of trade, which a few days of warm weather will, probably, increase greatly. This year dealers have been prompt in ordering their supplies early, and as a rule are now well supplied with goods to satisfy the needs of their customers.

Prices are still firm, and in many lines advancing. Strap Hinges and Wrought Butts have scored an advance of about ten per cent., and one of the Axe manufacturers has notified the trade of an advance of fifty cents per dozen, and practically all Axe makers having oversold their production are now withdrawing from the market. Perhaps, there has never been such a demand for Axes, as there has been this year, and dealers have been quick to take advantage of the low prices. The great event of the week is the appalling news from San Francisco, and at the date of this writing our thoughts are more with our fellow Hardwaremen in that great city than with our own business. It does not take a very long life to recall such enormous disasters, that it is evident that we can never tell when we are safe. Johnstown, Martinique, Galveston and the Baltimore fire are still fresh in our memory, and now within the last ten days Vesuvius and San Francisco have been added to the list. Fire, flood and earthquake still show how terrible nature may be in her manifestations, and our sympathy goes out strongly to the sufferers on the Pacific Coast.

BIDDLE HARDWARE CO.,

JAMES H. RITTER,

THE MINNEAPOLIS TRADE.

Business conditions here generally are bright and prosperous. In the retail Hardware trade they are not quite in good condition as they have been for the past three years or more, as some of the dealers in the retailer's association have gotten a little

restless in the way some quiet price cutting has been done by the smaller dealers, who have taken advantage of the situation and it seems quite likely that we will have a year of open prices, sharp competition and to a certain extent unprofitable business.

The jobbers are exceedingly busy. We are all having difficulty in getting goods and in some instances it has been very serious with us, as on account of our fire and the sale of our goods in a damaged condition, the uncertainty as to whether they would all be disposed of readily or not, made delays in placing many of our stock orders and it is almost impossible to get certain staple goods so necessary to a well regulated Hardware store. However factories generally appreciate our position and treat us quite well in that respect.

As to the outlook for the future, while there is money enough in the Northwest, so if there was a complete crop failure, people need not stop buying only to a limited extent, a failure of the crops would have that effect, but that need hardly be considered, for during the eighteen years the writer has been here; that has never happened and only occasionally has it been spotted, where hail, floods and rust have got in their deadly work. In certain sections this year the seeding is a little late. We quote from circular letter sent out by one of the largest grain concerns here, who operate throughout the entire Northwest.

They state in the Southeast of South Dakota wheat seeding is complete, in Southern Minnesota fifty per cent. complete, about thirty-five per cent. of seeding has been done through the center of Minnesota and North half of South Dakota and twenty per cent. in North Dakota, outside of the Red River Valley. In the valley proper a strip twenty to twenty-five miles wide and about 200 miles long little seeding has been done and some fields near the river are still under water, but they think by the 23d, seeding will be completed. They estimate there is an increase in acreage of wheat of about ten per cent., same of barley and oats. That the soil condition is excellent and more Fall plowing was accomplished than heretofore. In the Canadian Northwest conditions are more favorable than in North Dakota and fifty per cent. of the seeding is completed there.

Covering a period of five years, the seeding condition of today, although a little late is more favorable than the average. The weather at this time is excellent, clear, bright and just about warm enough.

Naturally at this time the all absorbing topic is the disaster at San Francisco. It is a terrible calamity.

W. K. MORISON & Co.

CHICAGO'S HARDWARE SHOW.

In connection with the annual meeting of the Illinois Retail Hardware Association, which will be held in the Coliseum, Chicago, on February 13, 14 and 15, 1907, it is intended that the exhibits shown by the Hardware manufacturers on that occasion will make a separate and distinct Hardware Show, so called, and

the same will be under the management of Gustav R. Lott, of No. 1002 West Lake Street, Chicago. Mr. Lott is the president of the Chicago Retail Hardware Association, and is, of course, sufficiently familiar with all the details covering an exhibition of this character.

Goods will be received at the Coliseum Building, on Monday, February 11, at 10 A. M., and it is expected that all exhibitors will arrange their stands on Monday and Tuesday, February 11 and 12, and have the exhibits ready for the public by Wednesday, February 13, at 10 A. M. No work that will create a disturbance will be permitted after that hour.

The Show opens on Wednesday, February 13 at 10 A. M. and each and every day thereafter from 10 A. M. to 11 P. M., closing at 11 P. M. on Friday, February 15.

The annual meeting of the Illinois Retail Hardware Association will be held on the second floor of the Annex, during the three days of the Show. It is intended to furnish orchestra music afternoons and evenings. Tickets will be sold to exhibitors in lots of 50 or more for 10 cents each. All Hardwaremen who are affiliated with State Hardware Associations will be furnished with passes by the management upon their request. The Show will be thoroughly advertised in the local papers, and a large attendance of the public will be looked for during the evenings of the Show. As special rates will be obtained from all railroads in the Central and Western Passenger Association territory, the Hardware trade from the central and Western portion of the United States will attend this Show in large numbers.

Mr. Lott says that he has a total of 270 spaces to let in all, and he rented 88 spaces the first five days after sending his circular. He intends to give the exhibitors the benefit of his advertising and will run lists of them occasionally. Some exhibitors have taken as much as six spaces, the average being about three.

HARDWAREMEN ORGANIZE.

Organization of the Oregon Retail Hardware and Implement Dealers' Association was effected recently in the office of the Portland Retail Hardware Association. The following officers were elected for the first term ending the second Wednesday in February next: President, John H. Simpson, of Corvallis; vice-president, H. J. Altnow, of Woodburn; treasurer, Frank Dayton, of Portland; secretary, H. J. Goff, Forest Grove; executive committee—E. F. Willis, Banks; F. E. Chambers, Eugene, and Frank Spencer, Salem. The object of the new association is to promote the welfare of the retail Hardware and implement trade in the State of Oregon. Thirty charter members signed the constitution and by-laws, but it is expected that many more will join, as there are fully 300 retail dealers throughout the State. The executive committee will meet at the call of the president from time to time whenever anything of importance arises demanding consideration at their hands.

CLEVELAND'S ADVANCED VIEWS ON LABOR.

The business of the country is under such headway that the fear of a coal strike has had little effect. Even call money at 25 per cent. in Wall Street fails to scare the farmer who needs a new wagon and has money to pay for it. Panics in Wall Street, riots in Missouri, or strikes in Pennsylvania, no longer paralyze the entire country, because sections have become self-sustaining business centres, which when united make a nation powerful enough to defend the flag, that guarantees the sectional privileges, against the assaults of its enemies. A nation that can easily furnish, equip and maintain a million men in the field, can command peace by fighting for it. If organized labor, as it threatens to do, abandons the advantages it has in the sympathy of its friends, by appealing to politics, to gain its purpose, its enemies may well be pleased. The influence it has in legislation has always been largely out of proportion to the number of its votes. The Chinese exclusion acts, the contract labor law, the eight hour law, were enacted at their suggestion, and in their interest without their having any special representative in Congress. In their zeal to promote their interest, they have not always been careful of the interest of others, and since their organization is a combination to advance the price of their product, in the sensitive condition of the popular mind against combinations of this kind, the enemies of organized labor, will not be slow in accepting the challenge to discuss the issues before the public. The leaders of organized labor must defend its actions which may not meet the approval of all those who are in sympathy with its purpose. The position they occupy is not likely to be improved by political contention. The public is a third party in these conflicts and its patience may become exhausted. Business of the country is menaced by them and there is a limit to endurance, that in a political test might find expression. There are times when it is better to endure the ills we have than fly to others, the result of which may be questionable.

THE LOCKWOOD-TAYLOR HARDWARE CO.

C. B. LOCKWOOD, Pres

THE DAVENPORT TRADE.

There has been a decided improvement in trade since the weather became pleasant and the country roads passable. The difficulty now is that everybody is in a hurry for goods and nearly all send rush orders. The market seems steady; there is very little complaint of price cutting and it begins to look as if people were trying to be more conservative and cultivating the idea of more consideration for the other fellow. Farmers are planting seeds under favorable circumstances and they also report that fruit prospects were never better. Trees are leafing out; boys are playing marbles; baseball has commenced; the golf links are open; all of which suggests the near return of the good old summer time.

SICKELS, PRESTON & NUTTING CO.

THE CHICAGO TRADE.

Matters with us are very satisfactory as we are extremely busy. In fact our trade has increased largely each month this year and is still on the increase. General trade conditions are entirely satisfactory with our customers and with us. We are receiving usual Spring orders for the general line both through our travelers and by mail, which is very encouraging to us, in view of our new illustrated catalogue which is now in the hands of the trade, being used in all ordering for the goods sold by us and carried in stock. We feel congratulated upon the success of our catalogue which we know is helping us a great deal with new customers, as well as old, in securing more business from them than we have ever had before. In fact our trade has increased so within the last thirty days that we have been obliged to work our entire force two evenings a week in order to keep up with our usual prompt deliveries. We see no reason why trade should not continue to be good during the year. The weather is favorable; prospects for good Summer crops are favorable, and with no clouds in sight we feel that the country will have prosperity throughout the coming year.

WELLS & NELLEGAR CO.

THE SAN FRANCISCO TRADE.

(Written Before the Fire.)

There was not much feature to trade last week. The religious holidays practically reduced the number of business days to four, and there is never much disposition to do any extra business just before a holiday period. Most of the farm and orchard products of California are rapidly cleaning up, some are already completely so, and from present indications we shall have no particular stock of anything left on hand when the new crops come in. The grain crops continue in brilliant condition all over the coast, but several kinds of fruit bid fair to turn out short, owing to unfavorable weather during the winter. But on the whole the agricultural outlook is excellent, and at this date promises this territory still another year of the wonderful prosperity we have

enjoyed for the past eight or nine years.

At the recent fourth annual banquet of the employees of Baker & Hamilton at the California Hotel, George Hood was master of ceremonies, and after a royal feast toasts, music and song kept the crowd of guests in tip-top humor. The committee of arrangements were J. C. Beatty, A. Bird, H. Bultmann, Charles Crawford, William Worden, B. P. Walls, C. R. Johnson, William J. Carlisle, L. Fox, J. O. Greenwell, William Lee and C. Jeffress.

Last week a fire of unknown origin caused a loss of \$11,000 in the Los Angeles plant of the Pacific Copper Company. The first floor was occupied with the plant of the copper works and the second floor was utilized by Edward Burns, ornamental glass factory.

Work was commenced last week by the Monterey Glass Company on its establishment at Seaside, which it expects to make the largest producer in the world of window glass, for which Monterey sand is especially adapted and for which it has long been favorably known. The company has acquired 143 acres of land and sand and has a capitalization of \$500,000. The furnaces are to be lighted next Fourth of July.

Leases made and published this week show that Baker & Hamilton have leased for a term of years to the American Steel & Wire Company, the entire five-story and basement brick building, 8 and 10 Pine Street, and for a term of ten years the Pacific Hardware and Steel Company has leased its steel and store building, corner of Fremont and Mission Streets, to the Union Lithograph Company.

The Alexander-Yost Hardware Co. of this city is taking advantage of the remodeling of their building at Fremont and Market Streets into a modern office building, and is making needed improvements that will surprise the trade. Mr. Jones, president and manager of the Alexander-Yost Company, says the new store will be Twentieth Century in every respect.

The Golden West Hardware & Manufacturing Co. is the latest trade formation in San Francisco. It is capitalized at \$10,000 and W. E. Rickman, Samuel Batten and Samuel Jackson are at its head.

A large farm implement manufacturing firm in the East has written F. E. Jones, president of the Alexander-Yost Hardware Co., that they will move their plant to Aberdeen, Wash., if the local people will subscribe \$10,000 to the stock of the company. The matter will be taken up by the chamber of commerce.

The Northern Pacific Railway has announced a new schedule of freight rates between Tacoma and Portland on freight destined to and from San Francisco. Heretofore rates on through San Francisco freight have been higher than on local tonnage between Puget Sound and Portland. The steamship lines have been cutting into the freight traffic between the Sound and San Francisco, carrying some classes of freight that formerly went by rail. This fact is believed to have influenced the railroad in promulgating the new schedule. Reductions on the San Francisco freight amount to 25 per cent. and more. First-class freight is reduced from 30 to 45 cents a hundred pounds.

The J. H. Stevens Hardware Company of St. Helena, Cal., has incorporated. J. H. Stevens is president and manager.

Business friends and acquaintances of Charles Holbrook, the president of the firm of Holbrook, Merrill & Stetson, are congratulating him over his narrow escape from a bullet. The leaden missile entered the large plate glass window of Mr. Holbrook's office at 2 p. m. and the cause of the shooting is a mystery and whoever did the shooting has not been ascertained.

The J. C. Mailer Hardware Company of Santa Rosa has filed articles of incorporation. J. C. Mailer, who has conducted a Hardware business in Santa Rosa the last fifteen years, and his two sons, John R. and James T., who have been associated with him, are the principal stockholders. The senior Mailer has been a resident of Santa Rosa thirty years, and is president of the Northwestern California Hardwaremen's Association.

The Expo Camera Co. of New York, through Dunham, Carigan & Hayden Co. of this city, are offering to the trade of the coast the camera wonder of the age, in the shape of a camera exactly like a watch. It sells at \$2.50, and is proving a rapid seller. In speaking of the article the San Francisco company says: "The Expo Watch Camera is positively guaranteed a practical vest-pocket camera, doing clean cut work and having nearly all the merits of a much larger and more expensive camera, while easily excelling all other cameras in compactness, number of exposures to a loading, simplicity of manipulation, and cheapness of operation. As it is no larger nor heavier than a fair-sized watch it can be carried with you always, and as an exposure may be made in the twinkling of an eye, unknown to anyone, save the operator, it is no exaggeration to say that this wonderful little camera is 'The greatest detective of them all.'"

POPULAR TALKS ON LAW

Copyrighted 1906, by William C. Sprague, President The Sprague Correspondence School of Law.

LANDLORD AND TENANT.

No. 12. Inquire into the Right of the Landlord to Make His Lease. Inquire into the Agent's Authority. See that the Lease is Properly Executed.

A tenant should see to it that his landlord's title is not defective, for he can get from his landlord no better title than the landlord himself possesses. One does not think for a moment of buying real estate without investigating as to the title, well knowing that he can buy no better title than the owner has to sell; and yet persons will take leases without any such inquiry. How does the lessee know but that the landlord's title is a mere life interest, and that the lease is liable to expire at any moment by the death of the landlord? How does he know but how the landlord's title is encumbered by a mortgage, the foreclosure of which will put an end to the lease? How does he know but that the landlord is himself a lessee with no right to sublet, or that he holds under conditions that lay the estate liable to a forfeiture for some breach? Indeed, how does he know that the landlord has any title at all?

Suppose that a lease should be made by one having no right to make the lease and the lessee went on the property and made improvements, at the same time paying rent, it might be very uncomfortable for him to find later that he was holding his lease of one who had no right to make it, that all his improvements must be forfeited to the rightful landlord, and that he was liable to the real owner for the use of the property. One taking real estate on a lease and intending to make valuable improvements should be as careful in the matter of investigating his landlord's title and right to make the lease in question as if he were buying the property. Of course this is not so necessary if a sudden eviction from the premises would do him no special harm.

It is of some advantage to know that a lessee dispossessed by reason of the defective title of his landlord has a legal claim for damages against the landlord, but this right may be of no value, as the landlord himself may not be responsible, or the lessee may not be able to prove damages that are adequate.

If it is desirable to make inquiry as to the right of the landlord to make a lease of the kind proposed, it is more desirable that an inquiry should be made when renting of one who does not claim to be the owner, but to be the agent of the owner. Not only does the lessee want to know in that case what right the landlord has to make the lease, but also what authority the agent has for making it for the landlord.

There is no room here for an extended lecture or agency, but as these talks are to serve practical purposes, something should be said to enable the intending lessee to learn the extent of an agent's authority.

In the first place, the agent must get his authority from the owner or holder of the title. It is very unsafe to take a lease from one who is the agent of an agent. In such a case it is well to know whether the first agent has the right to appoint a sub-agent with authority to make a lease. In dealing with agents in matters of real estate be careful to know either that the person making the lease or selling the property has authority direct from the owner of the title, or that the one making the lease, if not the first agent, is authorized to do so by the terms of the agreement between the first agent and the landlord.

It is important to know whether the agent making the lease is a general agent or a special agent. A general agent is one who has a general authority to transact all his principal's business, or all of his principal's business of a certain kind; as, for instance, one who is authorized to lease any of the principal's real estate as it becomes vacant. A special agent is one who has authority to do a certain act, as to lease a certain house. The distinction between a general agent and a special agent has a right to assume that he has authority to make any usual and reasonable contract in the matters intrusted to him; if he does make such a contract the principal will be bound, even though the agent in making the contract exceeds his actual authority in the particular case. In the case of a special agent's making a contract the person dealing with him does so at his peril; that is, there can be no assumption as to the extent of the agent's powers. The party dealing with him must inquire as to the scope of his authority, for if he exceeds his authority the principal is not bound. In the majority of cases, probably, agents to lease real estate are special agents, so that it is necessary for

one dealing with such an agent to inquire as to the extent of his authority.

If an agent makes a lease that he has no authority to make, he is personally liable, unless when the contract was made the agent showed his authority and the tenant took his chances on the proposed contract's falling within the right of the agent to make it. In such case the tenant is presumed to have made his own mistake.

It goes without saying that the landlord is responsible for his agent's frauds or misrepresentations.

As to the way in which the landlord must give his agent authority to deal for him it is held generally that the authority must be conferred in the same way in which the lease is required to be executed. In other words, if the agent is going to make a verbal lease, verbal authority is enough; but if he is to make a lease under seal, his authority must be under seal.

To sum up: If one takes a lease from an agent, he should know that the agent gets his authority from the proper person, that the authority is broad enough to include the proposed lease in all its terms, and that the authority has been given to the agent in such a way as to bind the principal.

The agent in making a lease for his principal should sign the name of the principal and not his own name. It is not necessary that the name of the agent should appear in the body of the lease at all. The lease is the principal's lease and not the agent's. If it is required that there be a seal, the seal must be opposite the principal's name and writes thereunder "Per John Smith, Agent," he need not put the seal opposite his own name. The agent should never sign his own name and follow it with the expression "Agent for," naming the principal. A lease so signed is a lease by the agent and not a lease by the principal.

To be continued.

TRY TO FORGET YOURSELF.

Forget yourself. You will never do anything great until you do. Self-consciousness is a disease with many. No matter what they do, they can never get away from themselves. They become warped upon the subject of self-analysis, wondering how they, look, how they appear, what others think of them, how they can enhance their own interest. In other words, every thought and every effort seems to focus upon self; nothing radiates from them.

No one can grow while his thoughts are self-centered. The sympathies of the man who thinks only of himself are soon dried up. Self-consciousness acts as a paralysis to all expansion, strangles enlargement, kills aspiration, cripples executive ability. The mind which accomplishes things looks out, not in; it is focused upon its object, not upon itself.

The immortal acts have been unconsciously performed. The greatest prayers have been the silent longings, the secret yearnings of the heart, not those which have been delivered facing a critical audience. The daily desire is the perpetual prayer, the prayer that is heard and answered—*Success*.

CHINESE PREFER ANCIENT FARM IMPLEMENTS.

Consul-General Rodgers, of Shanghai, responds to a request from New York for the names of firms in China who import or are interested in the sale of agricultural implements. He writes:

In the agricultural sections of the entire Yangtse valley there is practically no use whatever for foreign agricultural implements. The Chinese laborers in the rice and cotton fields, in the mulberry groves, and in the gardens find the Chinese implements of greater utility than any of the foreign, and adhere to them. The Chinese hoe, which contains a much greater weight of metal than the foreign one, being practically a mattock, is, according to their ideas, more serviceable in this heavy soil than the foreign implement. All the ordinary hand implements of agriculture are shaped and constructed according to Chinese taste. Agricultural machinery is not used in this section, even the plow being a great rarity. The Chinese turn over the ground usually with their mattocks. It is harrowed in a primitive way, and when the crop is gathered hand labor does all the work.

Under these conditions it is not strange that the importing firms of Shanghai do not consider it worth while to carry a line of agricultural implements. It is difficult even to obtain a foreign implement for use in the garden of a foreigner in Shanghai. This is the present condition, and to all appearances it bids fair to continue for an indefinite period. In the north, and especially in Manchuria, some agricultural implements are being used; but these are rather the result of Russian introduction than of Chinese desire. The statement was made recently in one of the northern papers that the introduction of modern agricultural implements seemed practically as far off as ever.

RETAIL DEALERS' RECORD—Cont.

Colusa, Cal.—Mitchum & Messick have purchased Owen Sullivan's Hardware store.

Cortland, N. Y.—Addison E. Buck has sold his Hardware business in Main Street to Frank L. Gallup and Ray Sherman of this city and Donald H. Lovell of Horseheads. The new firm will assume possession at once.

Edmond, Kan.—H. F. Bashford has sold his business to the Edmond Hardware & Furniture Company.

Greensboro, N. C.—Z. V. Crutchfield has bought an interest in the Wakefield Hardware Company of this city.

Henderson, Ky.—Robert W. Hickman, senior member of the Hardware firm of Alves & Hickman, has purchased the interest of his partners, and will conduct the business in his own name.

Houlton, Me.—James Cagun, who for a number of years has been engaged in the Hardware business on Bangor Street, has sold his business to John Dasey, a young man who has been Mr. Cagun's manager for the last four years.

Hudson, Wis.—The Foss-Armstrong Wholesale and Retail Hardware Company has purchased the Central Hotel.

Johnson City, Tenn.—An amendment to the charter of the Barton-Nuckolls Hardware Company has been filed changing the name of the corporation to the Barton-Mountcastle Hardware Company.

La Grange, Ind.—Harry Kerr has purchased the interest of A. E. Yoder in the Hardware firm of Moon & Yoder.

Lake Park, Iowa.—J. W. Brandom has disposed of his Hardware business to J. J. Hoffert.

Le Roy, N. Y.—The co-partnership existing between Eben H. Buell and Thomas D. Greenham, under the firm name of The

Buell Hardware Company has been dissolved by mutual consent, Mr. Greenham retiring. The business will be conducted by Mr. Buell, who has acquired all the assets of the firm and assumed all of its liabilities.

Manlius, N. Y.—F. P. Emmons is selling out his merchandise business and will go into the Hardware business with Henry Peters.

Marion, Ind.—A deal has been consummated whereby the Hogin-McKinney Hardware Company become the owners of the L. K. Price Hardware store, near the corner of Fourth and Washington Streets.

Marion, Ohio.—The firm of Kling & Wilson, the North Main Street Hardware firm, has been dissolved by mutual consent, E. R. Wilson, the junior partner, retiring. The business will be conducted by C. B. Kling under the name of the Kling Hardware Company.

Marysville, Ohio.—Charles C. Webb, of Decatur, Ill., has closed a deal to buy the Hardware store of O. M. Scott & Brother, of Marysville.

Morrisville, N. J.—James Cox will move his plant and Hardware store from the old Purvis building on Smith Street to Bridge and Smith Streets.

Mt. Pleasant, Iowa.—J. A. Sinclair has sold Bailey Bros.' Hardware store on North Jefferson Street to A. V. Beaman of Batavia. The latter has placed William Sinclair, son of J. A. Sinclair, in charge.

Olean, N. Y.—The Robeson Hardware store on West State Street has been purchased by the C. V. B. Barse Company. Mr. Robeson retiring from business.

Oswego, N. Y.—George W. Pierce, corner of West Bridge and Third Streets, who has been in the Hardware business for a

number of years, has sold out to George J. Schaffer.

Parkerville, Kan.—N. Shaw has sold his Hardware business to William Rynearson.

Pittsburgh, Pa.—After being in the Hardware business continuously since 1877, John D. Kaercher will, in a few days, retire from business.

Storm Lake, Iowa.—Mattress, Egy & Son have sold their stock of Hardware to Robert Bleakly, and an associate, a Mr. Goodrich. The new proprietors have taken possession.

Tracy, Minn.—H. E. McKenzie has completed the purchase of a Hardware store.

Vermillion, Mo.—J. M. Coheen has sold his Hardware business to W. E. Stewart.

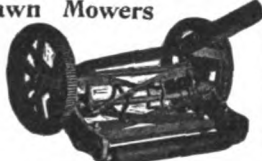

Youngstown, Ohio.—The firm of C. O. Mayberry & Company, Hardware dealers, has decided to increase its capital stock to \$100,000. The firm will enlarge their retail department and also engage in the wholesale business.

Wichita, Kans.—The stockholders of the Hockaday Hardware Co. have held a meeting and changed the name of the company to the Horton-Simmons Hardware Co. and chosen a president, vice-president, secretary, treasurer and board of directors. The business of the company has been run by the Simmons Hardware Co. and I. N. Hockaday has had nothing to do with the firm for two months. The following stockholders were chosen for a board of directors: W. D. Simmons, E. H. Simmons, G. W. Simmons, L. S. Haslam, O. F. Richards, F. J. Semple, F. E. Allyn, H. E. Gee and F. W. Martin. The officers chosen were: President, W. D. Simmons; vice-president, F. E. Allyn; treasurer, H. E. Gee and secretary, F. M. Martin. Mr. Allyn will have full charge of the house here.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 2, 1906.

- 400,425. WASH BOILER TANK. J. W. Anderson, Lancaster, Pa.
- 400,455. SELF HEATING SOLDERING IRON. G. Heidel and G. Frey, St. Louis, Mo.
- 400,466. WELL BORING APPARATUS. A. L. Lowery and J. N. Wyant, Francis, Neb.
- 400,468. PLOW. E. F. Lynch, Davenport, Iowa.
- 400,509. SOLDERING IRON. A. Sundeen and S. B. Molander, Mora, Minn.
- 400,512. PLIERS FOR APPLYING COUPLINGS OF WIRE. H. D. Taylor, Keeseville, N. Y.
- 400,540. LOCK HINGE. B. F. Boughn, Randolph, Neb.
- 400,546. CLAMP FOR CLOTHES LINES, TENT ROPES, ETC. S. W. Conklin, Yonkers, N. Y.
- 400,659. AUGER. F. C. Gerard, Seymour, Conn.
- 400,702. WASHING MACHINE. R. Nash, North LaCrosse, Wis.
- 400,722. RATCHET WRENCH. W. H. Whitmore, Cleveland, Ohio.
- 400,741. WASHING MACHINE. B. Brobst, Columbus, Ohio.
- 400,799. IRONING BOARD. J. M. Sebold, Philadelphia, Pa.
- 400,815. DOOR CHECK. G. W. Wright, New Haven, Conn.
- 400,823. WASH BOARD. S. Bingham, Conklingville, N. Y.
- 400,858. LOCK. F. Krupp, New Orleans, La.

PATENTS ISSUED APRIL 3, 1906.

- 816,556. SPRING FOR DOORS, GATES AND THE LIKE. G. M. Bott, Ashland, Ohio.

- 817,713. DOOR LOCK AND LATCH. W. H. Hope, Providence, R. I.

PHILIP CORBIN'S GRAY SQUIRRELS.

Hon. Philip Corbin, president of the American Hardware Corporation, spends some of the spare time for recreation from his great and pressing business cares as head of the giant Hardware industry, in watching the frolics of some pet gray squirrels. He has a place rigged up for them in the cellar at his home in Maple Street, and he takes keen amusement in following their pranks. He secured the squirrels from Virginia where they were raised in some of the parks. There are twenty six of them in all, and two of them are very tame. The rest are all wild. Mr. Corbin has had the pets since February. He lets the two tame young ones out of their cage, when he is around to watch them, and they will sport all around the house. They will feed out of his hand, and climb up on his shoulder. They love to be petted, and they don't particularly relish it when it comes time to catch them to put them back in their cage. Mr. Corbin says that they are very bright. One of them ran upon him one day and hid a walnut in the small watch pocket of his trousers. When the little fellow wanted the nut again he knew just where he had tucked it away, and pulled it out. Another time one of the pair left a peanut hidden somewhere about the house. A week later when released from the cage, he went and took the nut away. Mr. Corbin says that the others will remain wild. He was informed by the people from whom he secured them it was impossible to tame them. The only way to make them tame is to raise them by hand when young. Mr. Corbin says a few of them have grown tame enough to come up to the bars of the cage, when he goes to see them, and one of them will take food out of his hand.

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Antigo, Wis. — The Lendved-Hoefer Hardware Company has been incorporated. Capital stock, \$6,000; incorporators, W. H. Brown, M. B. Lendved and Joseph Hoefer.

HAGGARD & MARCUSSON COMPANY
Manufacturers

425 South Canal St., Chicago

COMFORT SWING CHAIR

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelvings and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

Incorporators—Leopold Schiller, No. 872 Third Avenue; Isaak Brown, No. 144 Fourth Street; Aaron Billchik, No. 146 East Houston Street, New York; Arnold Schoeman, No. 89 Johnson Avenue, Brooklyn.

New York, N. Y.—The Monarch Tool Co. has been incorporated. Capital, \$100,000, and directors: J. E. Alcott, Sound Beach, Conn.; P. I. Hoffman, C. G. Macy, Jr., New York.

New York, N. Y.—The Royal Silver Co. has been incorporated to manufacture and deal in silverplated Hardware; capital, \$50,000. Incorporators—Henry E. Taylor, No. 10 East 160th street; Benjamin O. Vanderlin and Arthur M. Nunn, No. 77 West 68th street, New York, and others.

New York, N. Y.—The Standard Cordage Co., to manufacture rope and twine; capital, \$2,800. Incorporators: J. B. Clews, C. E. Onis, L. L. Gillispie, E. D. Genung, L. A. De Kerray, New York City.

Peoria, Ill.—The Peoria Lawn Mower Grinder Co. has been incorporated with a capital of \$10,000. Incorporators—Charles W. La Porto, Albert C. Warner and Herschel V. Gibson.

Pittsburgh, Pa.—The Alternating Lock Nut & Bolt Co. has been incorporated Capital, \$600,000; directors, George K. Anderson, Lewis Walker, Jr., B. C. Youngman, Jr., Pittsburgh.

Quincy, Ill.—The Quincy Enameling & Foundry Co. has been incorporated with a capital of \$1,000 to do a general foundry business. The incorporators are: John M. Mintro, Louis H. Menne and William H. Covert.

St. Louis, Mo.—The Wilson Stove & Manufacturing Co. has been incorporated; capital stock, \$500,000. Incorporators—James Wilson, B. Wilson and S. L. Lung.

Changes and Improvements.

Attleboro, Mass.—The Frank Mossberg Co. has recently been organized, the secretary J. Burdis White, and the treasurer,

Charles N. Polsey, retiring after long service with the concern. Walter I. Tuttle of New York, whose father was the founder of the Tuttle & Bailey Manufacturing Co., has taken up the interest owned by Mr. White and Mr. Polsey, and is now secretary and treasurer of the company.

Baltimore, Md.—A lot 65 by 135 feet on the east side of North street, near Eager, has been transferred by Francis A. White to Frank Schlutter of the Dix Manufacturing Co. This property is to be used for the new factory to be erected by the company, which manufactures Hardware.

Bayonne, N. J.—J. Edward Ogden is planning the erection of a Hardware factory on the old Robinson plot on First street.

Bellaire, O.—Ground has been broken for the new addition to the Bellaire Stove Works, and the work on the concrete foundation is well under way. The new addition will be a large one and is one of the most important improvements undertaken for some time.

Chicago, Ill.—The Smith Improved Lock Nut Co., capital increased \$20,000 to \$30,000.

Cleveland, O.—The Bishop & Babcock Co., proprietors of the Cleveland Manufacturing Co., has been authorized recently to increase capitalization from \$600,000 to \$4,500,000. The company manufactures pumps, faucets, nails and brass goods, and expects to enlarge its business.

Cleveland, O.—The Cleveland Twist Drill Co., Cleveland, O., has begun work on an extension of its factory which will materially increase its capacity. The new structure will be 40 x 210 feet, five stories, of mill construction. Practically all additional equipment required has been contracted for.

Danville, Pa.—The Danville Stove and Manufacturing Co. has broken ground for the new fire proof building, in which are to be housed the patterns used at the plant.

Ellwood City, Pa.—The McCrory Wire Nail Co. has completed a wire nail and wire drawing plant at Ellwood City. The company is the successor to John McCrory, whose plant at Allegheny City was dismantled last fall, the machinery being removed to Ellwood City. He is president and manager of the new company, R. M. Jones is vice-president and J. A. McCrory, secretary and treasurer.

Erie, Pa.—At a meeting held by the directors of the Odin Stove Manufacturing Co. it was decided on account of the constant increase in their business to at once erect a foundry department. Adjoining property, additional to the 165 feet already possessed by the company, has been purchased.

Louisville, Ky.—The Kentucky Stove Co. has secured a permit to build a three-story addition to its factory at Fifteenth and Delaware streets. The addition will be of brick and will cost the company about \$5,000.

Sheffield, Ala.—Ground has been broken and work begun for the construction of the Sheffield Steel Range & Stove Company's big plant. This will be the largest steel range establishment south of St. Louis, and adds another branch to Sheffield's stove manufacturing industry.

LET ME DO YOUR COOKING

Why worry, watch and fret over a hot stove when you can put your meat, vegetables, custards—in short, the whole meal for the whole family—into my ample shelves and cook it, as food never was or can be cooked in any other way, over ONE BURNER of stove, range, gas gasoline or oil stove?

I come in both round and square shapes—both kind have whistles

Gives full details; letters from people all over the land who would not do without me for ten times what I cost.

Mr. Dealer

Do you know there's a demand for a GOOD steam cooker which you should supply? The profit on goods you are "out of" will never come back. We prefer to sell a progressive dealer rather than direct.

Our Advertising Helps You to Sell IDEAL Steam Cookers.

A reproduction of the advertisement shown herewith will be read in leading publications every month by

OVER TEN MILLION WOMEN

The thousands who answer this advertisement will be referred by us to local dealers carrying our line.

Your Customers Will Demand our Goods. Are You Prepared to Supply Them?

Take advantage of this opportunity to *profit by our expenditure.*

48 PAGE BOOK FREE—Write for it to-day, with confidential prices for dealers.

Our Catalogue fully describes 100 other household and kitchen specialties.

The TOLEDO COOKER CO. 1336 to 1342 West Bancroft St.
TOLEDO, OHIO.

Chicago's Hardware Show

will be held in connection with the annual meeting of the Illinois Retail Hardware Association, February 13, 14 and 15, 1907, at the Coliseum, Chicago, Ill.

Manufacturers of Hardware and Hardware Specialties will find this a splendid opportunity to exhibit their goods before the Hardware trade of the Central and Western portion of the United States that will attend this show in large numbers.

Exhibitors will receive the benefit of the Show's advertising, as lists of exhibitors will be published occasionally and widely circulated.

Special railroad rates from all the Railroads in the Central and Western Passenger Association territory.

Now is the time to contract for space.

FOR FULL PARTICULARS ADDRESS

Gustav R. Lott, 1002 W. LAKE STREET
CHICAGO, ILL.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Akron, Ohio.—Goodyear tire interests have, within the last month, incorporated two new companies—the Goodyear Rubber Tire Co., under New York laws, with \$1,000 capital, and the Goodyear Tire & Rubber Co., under Massachusetts laws, with \$10,000 capital. K. B. Harwood, manager of the Goodyear branch in New York, figures as one of the incorporators of the former, while C. W. Sieberling, of the Akron factory, is named as treasurer of the Massachusetts company.

Corning, N. Y.—The Corning Automobile Company has opened its new garage to the public. The garage is a two-story brick building, 42 by 70 feet, situated in Tioga Avenue just off Pine Street. The building is practically fire-proof and is suited in every way to the care, storage and repair of automobiles. George T. Wolcott, of the Crystal City Cycle store, is president of the company, but the duties of the business will be looked after by his brother, S. K. Wolcott, who is secretary and treasurer. The repair department will be in charge of Thomas Martin. Besides storing and repairing machines, the company will do a sales business.

Lincoln, Ill.—Cherry & Kates; new store and repair shop.

New York, N. Y.—M. Laufeld & Company has been incorporated to deal in sporting goods. Capital \$6,000, and directors: Max Laufeld, Brooklyn; J. F. Gerkin, Abraham Greenberg, New York.

Swanton, Vt.—Charles Bushor has opened new store.

Waterville, Me.—J. M. Blanchard of Augusta has opened a store for the sale of bicycles and phonographs at 151 Main Street.

Changes and Improvements.

Bangor, Me.—Purinton Cycle Shop, 124-130 Exchange Place, has been enlarged.

Burlington, Vt.—Smith Bros., sporting goods dealers, have added a bicycle department.

Cambridge, N. Y.—W. J. Shiland has sold out to H. G. Barton, who admitted Arthur Day to partnership; firm style, Barton & Day.

Chicago, Ill.—The three story structure at Nos. 1528-1531 Michigan Avenue, which is being built for the occupancy of the Chicago branch of the Diamond Rubber Co., is now so near to completion that the Diamond people will take possession on May 1st. The building, which has a wealth of glass front, occupies 100 feet on Michigan Avenue and has a floor space of 32,000 square feet.

Goshen, Ind.—Watterson & Momm, 228 South Main Street, have been succeeded by Fred E. Watterson.

New Orleans, La.—The Equitable Real Estate Company have signed a contract to erect for the use and occupation of the Abbott Cycle Company a garage and store building in Baronne, near Girod Street, river side. The term of lease is for five years.

North Adams, Mass.—The Berkshire Cycle & Automobile Company, formerly the Berkshire Cycle Co., has become incorporated, with \$5,000 capital. Anson Williams has been elected president; Walter Parker, treasurer, and Milton L. Ferro, secretary.

Paterson, N. J.—Andrew M. Kinloch has re-opened a bicycle store at 272 Straight Street. Snell and Hudson wheels will be carried.

Peekskill, N. Y.—C. H. Winn has enlarged his bicycle store.

Pine Bluff, Ark.—C. G. Schenck has enlarged his store and sold a half interest to R. A. Bird.

Pittsfield, Mass.—Mrs. H. W. Fenn has re-opened the bicycle store of her husband to close out the stock.

Rhineland, Wis.—A. E. Briggs has moved to 18 South Brown Street.

Toledo, Ohio.—W. E. McGuire has been appointed general manager of the Consolidated Manufacturing Co., makers of the Yale and Snell bicycles, and already has assumed the duties of the office. Mr. McGuire is a new man in the cycle trade who comes from Canada, where he was engaged in the metal stamping industry.

Topeka, Kan.—W. L. Taylor has sold out to M. W. Long.

Westfield, Mass.—The Pope Manufacturing Company is making ready to add to its bicycle plant, preparatory to an important change that shortly will be brought about and that will require the room. Contractors are now submitting estimates for the additions.

Miscellaneous.

Brooklyn, N. Y.—The Brooklyn Motorcycle Club has been incorporated, its objects being for social purposes, to defend the rights and privileges of motorcyclists and to maintain a clubhouse. No capital is named. The directors named in the articles of incorporation for the first year are: E. W. Carritt, Carroll Leroy Mosher, F. A. Baker, Henry J. Wehman and Charles L. Sammins.

Buffalo, N. Y.—W. Gibson was elected president of the Riverside Wheeling Club at the last meeting of that organization. The other officers chosen were as follows: Financial secretary, A. Holland; secretary, Ed. Woelfel, and treasurer, N. Tyler.

Kingston, N. Y.—As evidence of the return of cycling as a pastime in the State of New York, was the formation recently of the Pastime Cycle Club. The members elected S. D. Hornbeck, president; J. H. Myer, vice-president; W. F. Freer, secretary, and James H. Austin, treasurer.

Philadelphia, Pa.—These officers have been elected by the Associated Cycling Clubs of Philadelphia: President, Thomas Hare, Century Wheelmen; vice-president, H. C. Hochstader, Americus Wheelmen; secretary, Joseph Estoclet, Quaker City Wheelmen; treasurer, Joseph Gilbert, Quaker City Wheelmen; executive committee, the officers, J. N. Reeve, R. Herold and F. Ramsay.

Philadelphia, Pa.—To promote cycling generally in Philadelphia, the Northeast Wheelmen's Racing Association has been formed at Frankford, with W. S. Gibson as president and William Hagaman as secretary.

Toronto, Ont.—The Canada Cycle & Motor Co., Ltd., has arranged for space in the Canadian building at the New Zealand Exhibition, to be held in Christ Church this coming winter, for the display of their Russell cars and "Silver Ribbon Massey" bicycles. The company has already opened up business in their motor cars in New Zealand, and propose to follow it up with an exhibit at this important exhibition.

Fires.

Pittston, Pa.—C. C. Garrison. Loss, \$17,000; insurance, \$9,000.

Ukiah, Cal.—J. H. Waugh's cyclery has been destroyed by fire; damage, \$2,500.

Burglaries.

Brooklyn, N. Y.—John Cirrills, 202 Fourth Avenue. Loss \$29.50.

Miscellaneous.

New York, N. Y.—At the last meeting of the Akron Wheelmen, of 47 South Washington Square, these officers were elected for the ensuing club year: President, Paul Crescio; vice-president, L. Luppi; treasurer, A. Zerbarini; secretary, W. Berre; captain, G. Gariazzo; first lieutenant, Charles Cavagnaro; second lieutenant, P. Anthony.

HARDWARE DEALERS' RECORD

(Continued.)

Scranton, Pa.—James B. Gilhool has disposed of his Hardware store on South Main street to J. B. Cotter, plumbers, of Salem avenue, and John J. McNulty.

Skaneateles, N. Y.—The Bench Hardware Co. is a newly organized concern that will conduct the Hardware business carried on for the last eighteen years by J. Bench & Son. The members of the new firm are James Bench, George C. Bench and Edward B. Poole.

South Bend, Ind.—Shidler Bros., for many years proprietors of the Hardware store at 131 and 133 South Michigan street, have decided to go out of business. The ill health of members of the firm is the reason for the closing out sale. The stock is invoiced at about \$35,000.

So. Whitley, Ind.—M. W. Maston, who has been associated in the Hardware and farming implement business with J. W. Burwell here, has purchased the interest of Mr. Burwell and will conduct the business himself.

Stafford Springs, Conn.—Clarence E. Brown of North Brookfield, Mass., has bought a half interest in the Hardware business of N. Chapman & Co., and will come here in the near future.

Washington, Pa.—The Hardware store of Mitchell & Busbey, on West Chestnut street, has been sold. The store is now closed until the invoicing is finished. The business will be continued by the name of Cook & Gamble.

White Plains, N. Y.—The White Plains Hardware Co. will enlarge their plant in Spring street and will install a line of paints, Hardware, etc.

Rome, N. Y.—At the election of officers of the Wardwell Hardware Co. the following were chosen: President, John S. Wardwell; vice-president, William W. Wardwell; secretary and treasurer, Daniel W. Wardwell.

Our New Way of Selling Sharpening Stones

Price List Giving list prices of our best selling Oilstones, Scythestones and Hones **By the Dozen**, put up in single cartons or **Convenient Packages**. This list covers all the items sold in our Special Selling Assortments and covers the Sharpening Stone line as handled by most jobbers and retailers. The object of this is to enable the jobber to handle refilling orders for the Selling Assortments, and at the same time to fill miscellaneous orders from the same stock, and the retailer to purchase stock for refilling Selling Assortments or regular stock in **convenient packages** at **prices per dozen**.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

**IN THE COAL MINES OF PENNSYLVANIA CAPEWELL NAILS ARE
USED AND THEY STAND THE SEVERE TEST SUCCESSFULLY**

THE CAPEWELL HORSE NAIL CO.,

Gentlemen:—I have given Capewell horse nails a good test. I am using them these last eight years in the Anthra-
cite Coal Mines of Pennsylvania, where the roads are not the best by a long way. I am shoeing 130 mules in the mines
and ought to know what the nail is. Have been shoeing the last twenty years and have used all kinds of horse
nails, but the Capewell nail is the best I ever used.

EDWARDSDALE, PA.

Yours respectfully,
THOS. W. BLANDFORD.

Made By

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. 1,500,000

WAYNE WASHERS sold up to the present time
And increasing at the rate of 300 per day.

We make 23
different styles
of washing
machines, and
dealers can
supply their
entire wants
from our fac-
tory.

A complete
stock carried on
hand at all
times. Ask for
prices and cat-
alogue.

This machine combines the reciprocal pin wheel motion, with the oscillating movement of the whole suds box, by means of which we are enabled to double the capacity of the machine and wash clothes cleaner, quicker and with less labor than any other machine now on the market.

This machine is finished in the natural finish, or with mahogany stain finish, if so desired, with the outside iron parts finished in gold or silver bronze; the two finishes combined making it the most beautiful machine on the market. This machine is fitted with our new galvanized iron pin wheel, or with wood pin wheel, if so desired. The bearing of the machine works on sixteen steel rollers, which lightens the efforts of the person washing, one-half.

REED'S Flintstone Enameled Steel Ware

Has Trebled Its Sales

within a year. Its sale has been so phenomenal because it is just what every thrifty housewife wants and needs.

Flintstone is light, artistic, seamless, sanitary and durable.

It is the best moderate priced Enameled Steel Ware on the market.

The chemicals used in its manufacture are imported from Germany and Austria in a raw state, which gives Flintstone the advantage over imported wares.

Ten Years' Guarantee

is given with every piece of Flintstone. It is such an attractive seller that one pleased customer begets another.

If you "want to be near the band-wagon" to hear the music—the jingle of profits from Flintstone, write to-day to

A Step Ladder That Will Not Walk Is a New Addition to Udell Ladders

This "Unique" ladder is the latest and best ladder that has ever been offered to the trade. The enormous sales made each day prove that it is taking preference over all others on the market.

The New Udell Catalog for 1906 is just out. It shows very complete lines of step and extension ladders, house furnishings, medicine cabinets, woodenware, etc. Have you got it? It shows goods that are far ahead of the ordinary.

Just send a postal for this new Catalog.
YOU NEED IT.

THE SPIRIT OF DISCONTENT

Will rule within the breast of the Repair Man or Blacksmith who does not possess an

IDEAL LAWMOWER GRINDER

if he sees his rival operating one of the machines.

The IDEAL will pay for itself—has done so in many cases—within a fortnight, and then there is clear sailing, for the reward that will come will be in the shape of cash easily earned. And really a man would rather give a dollar to have his lawnmower sharpened right—every blade keen and at the right angle—than 50 cents and have it wrong, as it almost surely will be if sharpened by hand. Why remain a back number? Why not join the procession and obtain one of these machines THIS SEASON?

Send for our interesting catalogue, anyway.

HARDWARE

Virginia Implement & Hardware Co., South Boston, Va., have decided to add to their stock a full line of Hardware and kindred goods, and would be pleased to hear from our advertisers with catalogues and price lists of all goods pertaining to a general line of Hardware.

In the year 1905 the Bureau of Buildings in New York City authorized the construction of buildings aggregating in cost \$266,000,000, whereas the largest total in any previous year was \$166,000,000. The number of buildings completed in New York in 1905 was 18,400, as compared with 15,500 in 1904. Unusual activity prevailed in the building trades of the other large cities.

CHANGES IN TRADE LOCATIONS.

As usual at this time of the year a number of changes have taken place in the location of stores in the Hardware trade, among which we note the following, in addition to those already noticed in our columns: Hardware Board of Trade have removed from No. 4 Warren Street to the Graham Building, corner of Duane & Church Streets, they having taken quarters on the eighth floor. Columbian Hardware Co. have removed from No. 14 Warren Street to 168 Church Street, between Chambers & Reade Streets. They have taken the first, second and third lofts of that building. The offices will be located in the first, and the other floors will be used for storing stock. Arthur G. Sherman, who has always had his office with the Columbian Hardware Co., will likewise be with them at the above address. Mr. Sherman, it will be remembered, represents the Ames Shovel & Tool Co. (The Wright Shovel Co. plant at Richmond, Ind.) and the Pullman Mfg. Co., Rochester, N. Y. Charles J. Godfrey, fishing tackle and sporting goods, has removed from No. 4 Warren Street to No. 111 Chambers Street. J. Curley & Brother, cutlery, etc., No. 6 Warren Street, have removed to No. 318 Broadway, corner of Pearl Street. Empire Rubber Works, No. 88 Reade Street to No. 148 Chambers Street. Stanley & Patterson, electrical goods, from No. 40 Cortlandt Street to No. 23 Murray Street, and the Western Electric Co. from No. 22 Thames Street to No. 17 Murray Street.

THE IOWA RETAIL HARDWARE ASSOCIATION.

Secretary A. R. Sale urges the Hardware dealers of Iowa to fall into line and become members of the Iowa Retail Hardware Association, which by the time of the next State and National meetings he confidently expects to see outrank every other Hardware Association in numbers and strength of organization. What he wants now, he says, "is 400 new names on our list of membership to take up the work of our own and the National Association." He is making great advances in various lines of association work, but he says they need the backing of a larger number of loyal and earnest Hardware people. In calling attention to the Insurance Department, which is so rapidly developing in conjunction with the other Hardware Mutuals, he says that it is now able to carry the whole risk of the dealer, saving him from 25 to 45 per cent. of his insurance expenses, the Insurance Department now carrying over \$1,000,000 worth of insurance, which will be increased to \$2,000,000 by the time of another annual report. They have saved in cash more than \$5,000 to their policy holders, settled 14 claims for loss and damage, and have a cash balance on hand of more than \$10,000. The cash rebate for 1906 is 35 per cent. of the premium paid. This will undoubtedly be a strong Association, and two only of the older Associations now outrank it in numbers.

CHINESE IN FOREIGN COUNTRIES.

Recent statistics of Chinese emigration have been accorded considerable currency, without, however, the definite source of the figures being given. According to these statistics, the total of Chinese in foreign countries is 7,642,650, distributed as follows: Formosa, 2,000,000; Siam, 2,500,000; Malay Peninsula, 985,000; Sunda Islands, 600,000; Hong Kong, 274,534; all America, 272,829; Indo-China, 150,006; Philippines, 80,000; Macao, 84,568; Burmah, 40,000; Australia, 30,000; Asiatic Russia, 25,000; Japan, 7,000, and Korea, 3,713. It is not claimed that these figures are accurate, the admission being freely made that they are approximate, and that they are now subject to considerable revision. They are, however, being used to show that only about 2 per cent. of China's estimated population has emigrated, and that remote nations have no cause for complaint on the score of Chinese invasion. If the number given for "all America" were all in the United States, this country would have about 4 per cent. of the Chinese living abroad.

IOWA HARDWARE JOBBERS' ASSOCIATION.

The Iowa Hardware Jobbers' Association held a special meeting at Burlington, Iowa, April 18, for the discussion of important matters relating to the Hardware business. The meeting was called by President F. E. Cutler, of the Cutler Hardware Co., Waterloo. Representatives from the following jobbing houses in the State were in attendance: Drake Hardware Co., Burlington; Charles F. Schmidt Hardware Co., Burlington; C. E. Armstrong & Co., Clinton; Brown-Hurley Hardware Co., Des Moines; Luthé Hardware Co., Des Moines; A. Tredway & Son Hardware Co., Dubuque; Prusia Hardware Co., Fort Dodge; Huber & Kalbach Co., Oskaloosa; Harper & McIntire Co., Ottumwa; George Haw & Co., Ottumwa; Cutler Hardware Co., Waterloo.

DISSTON'S NEW METAL SIGN.

Henry Disston & Sons, Inc., Philadelphia, Pa., have issued to their customers a very handsome metal sign, calling attention to "the saw that made Henry Disston famous among the carpenters." It shows a carpenter in his working clothes holding up a No. 7 Saw and bragging about its superiority. The graphic illustration of the carpenter is very effective, and the whole metal sign attractive in colors, is of an excellence that will commend it for a prominent position in any well regulated store. Send and get one if you have been overlooked.

ARKANSAS RETAIL HARDWARE ASSOCIATION.

The executive committee of the Arkansas Retail Hardware Association has selected June 5, 6 and 7 as the time for the seventh annual convention at Little Rock. The headquarters will be at the Gleason Hotel. The membership of the association has been largely increased during the past year, much of the credit for which has been due to the efforts of the salesmen who travel the State, who at the last convention were admitted as associate members. Charles E. Taylor, of Little Rock, is secretary of the Arkansas Association.

WRIGHT & WILHELMY CO.

Wright & Wilhelmy Co., Omaha, Neb., are increasing the size of their main building by the erection of an L-shaped addition and a supplementary story, which brings the size of the building to 132x132 feet, six stories and basement. The old building was 66x100 feet, and the new building will provide over 40,000 additional square feet of floor space, which is an increase of over 63 per cent. compared with present quarters. In addition to this main building, the company occupies two separate warehouses, having a combined floor space of 34,800 square feet. But on the completion of the present extension, about May 15th, all goods will be transferred to the main building, enabling the company to do business under one roof.

MISTAKES AS TO NICOTINE.

There are probably few subjects about which more people are misinformed than nicotine. Nearly every one speaks of the dark brown substance which has about the consistency and color of molasses and accumulates in the stems of pipes as nicotine. It is not nicotine and it has no nicotine in it. It is nothing but tar—tobacco tar—distilled from the smoke, just as coal tar is distilled from coal and pine tar from pine wood. One might swallow all the tobacco tar that a rank clay pipe contains without serious harm. If he swallowed the same quantity of nicotine he would probably be dead in five minutes. It is the tar that stains the pipe and it is the same tar that stains the cigarette smoker's fingers. It is also found inside the nostrils of one who inhales smoke and it puts an indelible stain on mustaches.

In Wales there are about 450 tin-plate mills of which 95 per cent were in operation at the close of November. In the United States there are about 340 regularly operated mills, which have been at work at one time or another within the past year, the leading interest having some 242 independent interests. There are about thirty other mills not in regular work. It can be assumed that an average of not less than 400 mills were operated in Wales during 1905, while an average of scarcely more than 275 mills were worked in the United States. With substantially the same total production, says the *Iron Trade Review*, it appears that the output per mill has been between a third and a half greater in the United States than in Wales.

MAY 10, 1906

Editorial Trade Review

In the reports for the month of April the aggregate sales, although good in quantity as compared with the previous year, did not reach the volume that had been predicated on the business of the first three months; indicating that a normal condition of business is now reached, and the preliminary stocking up, so conscientiously invited by those having stock bought early in the season, has ceased to be a factor.

The terrible condition of things in San Francisco and other points in California affected by the earthquake and subsequent fire will create a large demand for supplies during the Summer and Fall that will be required for building up the city; and furnish sufficient employment for labor of every description. That this will be the means of giving an impetus to the makers of Builders' Hardware that will make this a busy community is not to be gainsaid. We hope the orders long delayed will be forwarded where they belong, before the fullness of the demand shall set in, because a natural sympathy for San Francisco will send any surplus stock in that direction. At present the demand from the Coast is for catalogues and manufacturers' quotations, in order to see where they stand. The larger houses are asking for memoranda of the orders given since January first, and the present state of such orders, the fire having made a clean sweep of all the data, which they wish duplicated with as little delay as possible. In very many cases this has already been promptly anticipated as fast as a base of supplies has been established and resumption as far as the preliminary work is concerned has already been commenced.

Throughout the West and Northwest business has been quite active. Conditions that have long been considered as favorable for the transaction of business have been excellent, and the weather has been desirable for seeding and crop preparations. To this fact may be attributed the slight difference in the volume of trade already referred to, although this feature always affects distribution to some extent at this period of the year.

Building plans have been quite largely interfered with by the higher prices demanded for lumber and labor.

The latter is extremely high on account of its evident scarcity where wanted, and it is feared that many plans for improvement may have to be deferred or modified somewhat by the use of other material than was at first proposed or by the use of iron and steel, which are low by comparison, wherever it can be made to take the place of lumber.

The amount of trade done by the Southern jobbers has been of a most satisfactory character, April showing large gains over April of last year, and closing the season to prepare for invoicing, which usually takes place about this time. Conditions throughout the South are of a most excellent character, and an acreage of immense proportions, especially of cotton, has been planted, which indicates to a certainty that the outlook for the Summer and Fall trade is, as may be supposed, the best on record.

The changes in prices that are taking place ever and anon seem always to be in the nature of advances, and this is likely to continue to be the fact, as abnormal demands are made on our manufacturers to supply the ravages caused by the destructive forces of Nature.

San Francisco.

Never have the hearts of the American people been so touched by the chords of sympathetic feeling nor responded more promptly than in this terrible calamity. It seems as though it created philanthropic impulses that awakened our sympathies in a tidal wave that spread over the country with an uncontrollable force. It does not seem to effect any timidity or shrinkage in large undertakings in other cities, many of which were ready to be estimated on when we first received the news from the Coast. The quick response in one form or another which so promptly was the means of feeding mouths numbered by the hundred thousands, made it possible that they never suffered for the want of food after the first twenty-four hours, and showed that the relief of our fellow creatures from distress and suffering is the first duty we owe in a crisis like this. The country is enjoying such prosperity that the reaction will be distributed over many institutions and individuals, which let us hope will come to the rescue, so that the large amount of insurance which tests the strength of a combination of disasters such as we have seen in San Francisco, will not be represented in failing companies by which only a receiver can declare dividends which appall by their insignificance. Let us not weary in well doing but continue in the good work until every hamlet or city in the United States has given of her plenty to cheer the heart of the sufferers, many of whom have left only a heritage of hope on which to found the creative impulses of the future.

DEATH OF T. FRANK IRELAND.

By the death of T. Frank Ireland, of Belding, Mich., on April 27, the Michigan Retail Hardware Association, the National Hardware Association and the Hardware fraternity at large has lost one of the most conscientious and faithful workers that has ever been connected with the labor of these organizations. In addition to Mr. Ireland's activity in connection with Hardware organization work, he was also an important factor in the Business Men's Association of his own city, being president of that organization. He was born in Sublette, Ill., on September 18, 1857, and lived in that town for thirty-two years, the last five years of which he was engaged in business for himself. In January, 1889, he moved to Belding, and embarked in the retail Hardware business, and by his honest and conscientious methods built up a flourishing business in that city. He was married in 1880 and is survived by a widow, two daughters and a son.

CO-OPERATION AND MAINTENANCE OF PRICES.

We have received from the Dover Mfg. Co., Canal Dover, Ohio, manufacturers of the Asbestos Sad Iron, two forcibly written and well printed booklets entitled "Co-operation" and "Price Maintaining," two subjects which are being actively discussed by that company. The booklets were carefully prepared by O. A. Keyser, the progressive advertising manager of the company, and in the composition of "Co-operation" Mr. Keyser gives his attention to methods by which full reciprocation can be participated in by the manufacturers, jobbers and dealers, to the advantage of all concerned. Stress is laid upon the fact that there is much to be learned from the intelligent traveling salesman for the company, who should be treated fairly by the dealer, with the view of having him facilitate business by all the means at his disposal. While it may be acknowledged there are a few of these representatives who may be unworthy of confidence or respect, they are but exceptional, and are rarely permitted to misrepresent the company very long, for it is necessary to a salesman's business that he should be a reservoir of information in his especial line. Catalogue competition is dwelt upon, and they acknowledge it as being instrumental in creating a demand for goods with which the dealer should be satisfied, and second it by knowing how important it was to create this demand from which all might benefit. The retail dealer is urged to use all means locally in the dealer's power by newspaper advertising, neat and well arranged stores, attractive window displays, etc., to create a market for the goods to be sold. Just as they may fail in this they forfeit the right to any help or protection from the manufacturer.

In the booklet on "Price Maintaining," in which the company has endeavored to increase the profits and improve the sale of their goods, they believe that dealers generally approve of established prices and are collectively in favor of action that will assure profit by continuing sales backed by the company's own efforts; especially when the courts have already decided that the manufacturer of a patented article has the right to insist upon prices that are arbitrary and make it an incentive to the dealer to handle them. All together, these little booklets are valuable additions to this class of literature, and the reader who has failed to receive them should write for them.

SAN FRANCISCO HARDWARE HOUSES.

The five large houses engaged in the selling of Hardware and metals have reported that as far as their buildings, stocks, etc., are concerned they have been totally destroyed, with one exception, that of the Pacific Hardware & Steel Company, who took possession of an immense new plant about the middle of last August. It is located about two miles from their previous location and escaped with but little damage comparatively, of \$10,000 to \$15,000. The company's buildings, filled with valuable stocks, were providentially spared.

Dunham, Carrigan & Hayden Co. have reported as follows:

"As all of our factory order books have been destroyed and we have no means of accurately knowing with whom we have orders outstanding, we request all manufacturers who have orders from us to hurry them forward with greatest possible dispatch and to send us by mail copies of all such orders. We also request that all manufacturers send us duplicate (2) copies of all invoices issued to us since the first of January 1906."

Yours truly,
DUNHAM, CARRIGAN & HAYDEN CO.
131 Kansas St., San Francisco.

Dunham, Carrigan & Hayden Co. also desire all manufacturers of Hardware and kindred lines to forward as soon as possible to their address as above catalogues and price lists in duplicate.

Baker & Hamilton, whose house in Sacramento, Cal., is unimpaired, ask that "manufacturers having unfilled orders from San Francisco mail copy of such to Baker & Hamilton, Sacramento. Address the 'Eastern Order Department.' Also to mail duplicate of invoices and manifests relating to all shipments made from January first last."

Holbrook, Merrill & Stetson have opened temporary quarters at Oakland, Cal., and are working hard to get things into shape.

W. W. Montague & Co. have also established themselves temporarily in Oakland, Cal., and are going ahead with their business plans as fast as present conditions warrant, the shipments to branch house in Los Angeles, which was uninjured, continuing the same as before the earthquake.

Bennett Bros., San Francisco, have started in business again at No. 541 Haight Street.

All these concerns make requests for trade literature in the way of catalogues and prices, which they would like to receive in duplicate from any of their correspondents.

NEAL-CHALLENGE-SCOTT CO.

Neal-Challen-Scott Co., temporarily at No. 48 Warren Street, New York, has been incorporated under New York State laws to deal in Hardware, supplies, tools, machinery, transmissions, specialties, etc. They have since secured the store floor at 81 Warren Street, 25 by 80 feet, where the business will be permanently established at once. The following are the officers of the new company:

Bernard B. Neal, president; Joseph W. Scott, vice-president, and Paul J. Challen, secretary and treasurer. Mr. Neal, founder of the Neal & Brinker Co., of New York, and its president for the past nine years, will give his entire time to the business of the new company. Mr. Scott, who has had extensive business in the tool manufacturers' supply line, will manage this department of the company. Mr. Challen, a mechanical engineer of ability, is conversant with mill requirements, and has had wide experience, being thoroughly familiar with quality and prices of transmission machinery, engines, boilers, etc. The new location will give the proprietors considerable space for carrying a stock of Hardware, tools, specialties and supplies in certain lines, which will in the immediate future be increased as the business develops. The company can now execute all orders, however large, and make shipment from New York stock or mill. The company will be glad to receive from manufacturers of lines in which they are interested catalogues in duplicate with full advices in regard to quotations and terms.

WINDOW DISPLAYS AND THE MANUFACTURER.

When a manufacturer begins to make an article of merit and has the money to back it, the degree of success he attains by its sale depends upon his ability to create a desire in the public mind for the purchase of his product. Then the question occurs: How can he get the greatest possible publicity for a given expenditure? Most valuable of all, to be sure, is advertising in trade papers and other publications, but this article has to deal especially with window display advertising. Four points are to be considered in obtaining favorable and successful publicity. First, the publicity of the location of the display; second, the proximity to the market of the article advertised; third, strength and attractiveness of the display, and fourth the cost. The very fact, says the *Sporting Goods Dealer*, that retail dealers in sporting goods must be located on prominent thoroughfares, where people pass and congregate, proves that window display advertising guarantees publicity. After the desire to purchase has been created, by any form of advertising, the sooner the prospective buyer has the opportunity to purchase the article, the more likely he is to make the investment. When a man sees an attractive window display advertising an article that he needs or even takes a sudden fancy to, the chances are that he will step into the store and buy it. Undoubtedly the window display is an ideal method of advertising anything sold in a retail store to the general public. The protection and space afforded by a window allows of an endless number of designs and ideas for attracting the attention of the public, from a ten-cent lithographic display to be pasted on the glass, to an electrical or moving figure, or a demonstrator who stands in the window and shows the public the advantages of the article advertised. An attractive and striking window display can be furnished by the manufacturer to the dealer for as little as ten cents per window. Some manufacturers have provided displays so compact that they can be sent in a mailing tube. A window display to be furnished by the manufacturer to his dealer must be of so compact a nature that it can be easily shipped. The manufacturer who decides to distribute window displays of this kind will not only get big returns, but will also make a hit with his customers for he likewise aids them in selling the goods. He should send a letter to the trade notifying them that he has secured a quantity of window displays and will take pleasure in sending one on request. In trimming a window—and this relates more to the sporting goods dealer—there are two different sorts of people to whom the display must appeal. The passers-by who are within a few feet of the window and who can take in the detail of the display, compose one set. The other set is composed of those who see the window from a distance, from across the street or even a half block away. On the latter class the average window display has no effect because the dresser never tries to reach the great number of buyers who are on the other side of the street, but is satisfied if his exhibit looks well from within four or five feet. The upper half of the window, the only portion that can be seen by the men across the street is usually neglected, and it is almost as valuable as the lower part. Borders, lithographs and transparencies are some effective methods by which the manufacturer may help his trade's window display with a very small expenditure. Next to advertising in newspapers and periodicals, which cannot be excelled because of the immense amount of people it reaches, window display advertising is probably the most profitable.

JAMES H. RITTER.

James H. Ritter, of Philadelphia, Pa., who has been numbered among the able correspondents of *HARDWARE* almost since its inception, resigned from the firm of the Biddle Hardware Co. on the third inst., in order to accept the position on September 1st of the presidency of the Cheltenham Trust Company of Germantown, Philadelphia, to which his undoubted ability and large acquaintance in Philadelphia entitle him. This is a new company, starting with a capital of \$200,000 and a surplus of \$100,000. The outlook for business is very bright, and as this position came to him without any solicitation or intimation on his part, the proposition seemed so attractive that he felt it his duty to accept.

JAMES H. RITTER.

Having been with the Biddle Hardware Co. for thirty years he feels the need of a long vacation, which he intends indulging in this Summer, and will recuperate his exhausted energies in order to amply fit himself for the less arduous duties of his new position. Starting as a boy with the Biddle Hardware Co. in January, 1876, in the intervening years he has covered all the individual parts of the business with the single exception of traveling salesman, and although he withdraws from active connection with the Hardware business he feels confident of retaining those friends whom he has had the pleasure of gaining in those thirty years.

ELECTED TO THE HARDWARE BOARD.

To fill the vacancy in the board of governors of the Hardware Club of New York, caused by the death of the late Robert Sicals, James H. Kennedy, editor of the *Hardware Dealers' Magazine*, was unanimously elected. Mr. Kennedy was a member of the board of governors during the first eleven years of the club's existence, but declined a renomination three years ago because of other duties.

KNOW YOUR OWN JOB.

There is a big place in the business world for the young man who knows as much about his own job as he thinks he knows about the one the "old man" is trying to hold down; and this demand exists all the way up the business ladder. It is in much the same spirit that the office boy dubs his employer as all kinds of a fool, and the one-horse retailer condemns at random all the methods of the big jobbing houses with which he deals. There may be germs of truth burrowing into both critics. Chances are the man farther up sees reasons for his methods that the little fellows do not notice; anyway their carping will not reach him until they climb a little nearer up to where he is to master the details of their own part of the business. It is the fellow who has so mastered his own position that he can stand erect on top of it without getting giddy that can poke brads into the legs of the next man above him most successfully.

Some men are always kicking about the mean advantage that some man above them in authority has taken. Others study how to make the most of the conditions as they find them. Needless to say which class supplies the greater number of successful men.

LEGAL CORRESPONDENCE

Any subscriber to "*HARDWARE*" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "*HARDWARE*," No. 309 Broadway, New York City.

LIABILITY OF OWNER OF VICIOUS DOG.

QUESTION: "A" keeps a dog which he has seen run out and attack people passing by his house and has several times been obliged to call the dog back. The dog has also snapped at one or two persons. Will "A" be liable in case some one is bitten by the dog?

REPLY: Yes. The mere keeping of a vicious dog is not in itself enough to make the owner liable, unless he has knowledge of its vicious propensities. We think the facts you state are enough to give the owner notice that the dog is likely to attack and bite persons. Where the owner has knowledge of its vicious propensity, he keeps the animal at his peril, and is liable for whatever injury it does.

SALE OF CORN SHREDDER—WARRANTY.

QUESTION: I bought a corn husker and shredder for \$230. The contract stated that the manufacturer "warrants this machine to do good work, to be well made, of good material and to be durable if used with proper care." This shredder was equipped with a safety lever, which got out of order without my knowledge, and seriously injured my hand while I was cleaning the machine. Can I sue the manufacturer?

REPLY: We think not. The warranty was that the machine would do good work, was well made, of good material and durable. Plainly this language related to the capacity of the machine to husk and shred corn. There was no warranty that the machine was safe; and it is not a natural conclusion to infer that the seller was guaranteeing the machine against accidents to a person operating it.

LIEN FOR REPAIRS—WHEN NOT ASSERTABLE AGAINST TRUE OWNER.

QUESTION: A party brought a wagon to my shop which was worth on a liberal estimate \$20. He had it re-upholstered, new wheels put on it and other repairs amounting to \$45. He went away without paying me anything, and the wagon is now claimed by another party who says my customer stole it from him. Who owns the wagon, and can I keep it until I have been paid for my repairs?

REPLY: By adding your materials to the wagon, they became the property of the true owner of the original wagon, although the value of your materials was greater than its original value. If the person who brought the wagon to you was a thief, he could not make any contract for its repair which would bind the true owner. Nor can you claim any lien by virtue of a contract with him. The true owner is not liable for the repairs because he never agreed to pay for them and they were done without his knowledge or consent. It follows that you have no lien on the wagon and that you cannot recover anything against the true owner for the work which you have done. Of course, you can recover against the thief, if you can find him.

PARTNERSHIP DEBT—PAYMENT—LIMITATIONS.

The Supreme Court of Minnesota held, in the case of The Robertson Lumber Company vs. Anderson et al., that a partial payment made upon a partnership debt after the dissolution of the firm, will suspend the operation of the statute of limitations as to other partners in favor of the creditor receiving such payment, who has had dealings with the partnership and had no notice of its dissolution; that notice to an agent of a corporation must, in order to be notice to such corporation, be to an agent, who is acting within the scope of his authority, and must concern some matter which it is his duty to communicate to his principal, and that no particular kind of notice, whether actual or constructive, is essential to charge the creditor with notice of a dissolution of partnership. In the case before the court, payment on a partnership debt was made by one partner to the traveling auditor of the creditor firm, whose authority to receive notice was disputed, had actual notice of the dissolution. Their books contained entries of sales to the firm and of sales to one partner as an individual after the dissolution. It was the admitted duty of the traveling auditor to examine these books, and he did so. The court held that the question of notice to the firm through all these agents was one of fact for the jury.

PAINTS NOT A SIDE LINE

Paint is one of the composite parts of the Hardware business instead of, what a great many people have thought and still think, merely a side line. We necessarily go after the house owner for his finishings in the line of Hardware throughout, and in doing this we necessarily have a splendid opportunity to sell, or at least try to, the paint.

Confidence is a very successful requisite in making a thorough success of the paint business as well as anything else; that is, confidence in the manufacturer from whom you purchase and in his ability to make good goods, and confidence in your own ability to instill into your customer your own thorough belief in the advantageous qualities of prepared paint over the much-mooted lead and oil.

Ability to thoroughly instill into your clerks your confidence in the product you purchase is a very important factor and, furthermore, they should be thoroughly competent to instill that same degree of confidence into the prospective customer. I fully realize that this is a pretty stiff problem for us all, yet we are very dependent on our clerks, and, as a matter of fact, from my own point of view, their thorough familiarity with the product is of even greater importance than my own.

A PERSONAL EXPERIENCE.

I do not know of any better way of demonstrating to you the advisability of paying attention to the paint end of the business than by giving you a brief outline of my own experience. I have been in business for a great many years, and up to 1898, although I had handled paint for a number of years previous to that time, my paint purchases, aside from lead and oil, were very small.

In 1898 my lead sales were probably from 12 to 14 tons per year. In 1904 I possibly sold four tons. From a profit point of view, without my entering into it, you will note that the returns from lead sales were extremely small and, in fact, it has been contended, and rightfully so, for a good many years that you practically roll 15 per cent. out of your store with each keg of lead, and oil and turpentine would appear in the same category.

In 1898 I had an opportunity to take the agency of a reputable paint manufacturer, a concern who not only manufactured first-class goods, but also firmly believe in effective advertising and system in following up. I first visited the factory and spent some time in satisfying myself that the paint was what they claimed it to be. Instead of using my own methods I adopted theirs to a very great extent, and with the advertising which I have always done have reaped the reward not only in increasing sales but in increased profits as well. From this concern I purchased in 1898 \$496 worth of goods, increasing my purchase year by year, until in 1904 I bought 842 per cent. more paint than in 1898, while there had been a decrease of 71 per cent. in my lead purchases.

Figuring my gross profit on lead in 1896 at 16 per cent., I made \$230, whereas, figuring 33 1/3 per cent. on paint, my net returns were \$1,560 in 1904. Therefore, you will readily see that attention to this important branch of our business pays.

ADVANTAGES OF PREPARED PAINT.

I have always made it a point to use a pencil to a very great extent in demonstrating to the prospective customer why we should use prepared paint instead of lead and oil, pointing out

very clearly the fact that he should acknowledge the ability of the manufacturer to take lead, zinc, turpentine, dryer and tinting colors and thoroughly assemble same by formula and machinery much better than the average painter could take the same ingredients and mix them together by the rub of thumb and paddle. Furthermore, it has always been my contention that a painter in buying several different articles has the corresponding number of concerns to contend with in case of difficulty, whereas in setting prepared paint, in case of any difficulty he has simply the dealer and the manufacturer to look to. In case of difficulty we find the reputable manufacturer ready to listen to his troubles through the dealer, whereas with lead and oil there is practically no redress and never has been.

I have also pointed out the fact that the painter is obliged to go to the manufacturer and buy the several ingredients contained in the paint, and such being the case, why is it not feasible that the manufacturer of the several ingredients should be in a better position than the painter to incorporate these ingredients by machinery? A paint mixed by the painter from lead and oil is more expensive than a good paint purchased from the dealer; for the reason that although it costs less per gallon it costs more per quantity. In other words, it will take one-third less prepared paint to paint a house than a paint made from lead and oil; consequently you have appealed to the man's pocket, and your reputation as a merchant backed up by the reputable manufacturer's goods handled by you should clinch the argument.

CARRY A COMPLETE LINE.

I carry the complete line manufactured by this concern, and when a customer mentions paint I try to find out first what is to be painted and then proceed to sell the customer a special paint that is made for that particular purpose, and by doing so I show the customer I am interested in giving him what is right. When he finds out on using the goods that I was right and the job is even better than he expected that man is sure to come again for paint or anything else he may need in my line. I also display in a prominent place in my store all the different kinds of paint I have, and keep my windows talking paint nine months out of twelve. In many other ways I keep reminding the public that I sell paint, and long before the painting season opens I have sold paint for several houses. I keep a record of each color of the house paint as it comes in, and it helps me to a great extent in ordering a new supply, as I can determine very quickly just how much of that particular kind I have sold in any given time.

KEEP A CARD RECORD.

I keep a card record, a card index, of all the paint sold for outside painting, entering the date, quantity, different shades, and weather conditions, and in that way am not only able to determine when the paint was applied and under what conditions, in case of difficulty, but also have a means of interesting the new customer, for by referring him to or showing him where I have sold paint to Bill Smith and John Brown, men with whom he, in the majority of cases, is well acquainted, I impress upon him the fact that there must be some virtue in it or these men would not use it, and in this way I am also able to refer him to houses which in many instances have been painted for a number of years.

MARKET MEANINGS OF WORDS.

When J. Stanley Cook, assistant secretary of the Montreal Board of Trade, and secretary of the Dominion Wholesale Grocers' Guild, was on the stand in the Hamilton police court recently as a witness in the preliminary investigation into the charge of conspiracy against the officers of the guild, the prosecuting attorney asked him if he knew the difference between a jobber and a wholesaler, says *Canadian Grocer*. He replied that he did not, and none of the eminent lawyers or wholesale grocers present seemed ready with an explanation.

As a matter of fact the words are used interchangeably. They are not, however, commercially synonymous. A correct classification of traders in strict terminology of commerce, indicating the several relations to the trade, seemed quite worth while. In Britain it is as follows:

Merchant—The original importer. It is immaterial whether or not he is foreign or where he lives. He is the man who puts the goods on the market.

Broker—The agent who acts for the merchant or for the buyer.

Dealer—The wholesale buyer who buys from the merchant through the broker.

Wholesaler—(General) for distribution to the retail trade.

In New York the classification is practically the same, except that the dealer is usually called a jobber.

Any one class of trader may, and sometimes does, conduct business in a dual and even triple capacity. But on the market when the word merchant, broker, dealer or wholesaler is used, the man of commerce knows what is meant.

The exact commercial significance of those words cannot be got from the dictionary. Chambers definitions are as follows:

Merchant—One who carries on trade, especially on a large scale; one who buys and sells goods; a trader.

Broker—One who transacts business for another.

Dealer—One who deals; a trader.

Jobber—One who buys and sells as a broker.

Webster gives these:

Merchant—A man who traffics or carries on trade with foreign countries, or who exports and imports goods and sells them by wholesale. In popular usage, any trader, or one who deals in the purchase and sale of goods.

Broker—An agent or negotiator who is employed by merchants to make and conclude bargains for them for a fee or rate per cent., or who transacts other business for his employers.

Dealer—A trader, a trafficker, a shop-keeper, a broker, a merchant, a word of very extensive use, as a dealer in dry goods, a dealer in Hardware, a dealer in stocks, a dealer in leather, a dealer in lumber, etc.

Jobber—A merchant who purchases goods from importers and sells to retailers.

FERNALD MFG. CO.'S NEW FACTORY.

The accompanying cut shows the new factory of the Fernald Mfg. Co., of North East, Pa. By the erection of this new building, and its up-to-date equipment, this company has more than doubled its capacity for manufacturing the Fernald Quick-Shift, so that they are now turning them out at the rate of 25 gross a day. This is the largest factory devoted exclusively to the

FERNALD MFG. CO.'S NEW FACTORY.

manufacture of Fernald Quick-Shifts and Anti-Rattlers. Besides manufacturing these two specialties, this company manufactures numerous other articles, like whip sockets, third seats,

DASH REIN HOLDER
PATENT APPLIED FOR

jacks, double trace holders, etc. The latest addition to their line is their Dash Rein Holder, which is a perfect article for holding the reins securely. It is attached in an instant, without screws or small bolts to make holes and mar the appearance of the dash. It is shaped to fit over rib of dash, so there is no possibility of it slipping either way. The length of the tongue permits the reins to be easily secured. It is a practical rein holder at a price that should make it a favorite. It is finished in black japan, furnished one dozen pair in a box; one to five gross in a case.

KIRK-LATTY MANUFACTURING CO.'S NEW CATALOGUE.

THE KIRK-LATTY MANUFACTURING CO., Cleveland, Ohio, are distributing to the trade their catalogue of Juvenile Automobiles, Children's All Steel Express Wagons, Velocipedes, Toy Garden Barrows, Cycle Wagons, Hand Cars, Coaster Wagons and Bob Sleds, Lamps, Horns, etc. They state: "Skill in manufacturing, acquired by long experience, exhaustive tests, the best of material and the closest attention to details, combine to make the above vehicles absolutely without equal. These machines must be seen to be appreciated. We shall constantly be adding new models and the line will always be up to date." These lines are illustrated in several patterns and are marketed under various taking names, including the Greyhound, Ajax, Rob Roy, Forest City, Napier, Pierce, Winton, Peerless, National, Franklin, Renault, Panhard, Locomobile and Packard types of automobiles. A full line of coaster wagons is also shown, such as the Buster Brown, Tige and Hot Tamale. These wagons are claimed to be full of original features. The catalogue may be had upon application.

H. ADLER CO., INC., Carnegie, Pa., with Western office and warehouse at No. 1210 West Tenth Street, Kansas City, Mo., have issued their catalogue No. 43 of Acme Gas Ranges and Cookers, Ovens and Hot Plates. The manufacturers claim these goods to be "accurate in construction, convenient in use, marvelous in design and economical in fuel." This catalogue illustrates and describes a very complete line of these seasonable goods, and will be found a very useful one.

PRODUCTION OF CUT AND WIRE NAILS IN 1905.

The statistics compiled under the auspices of the American Iron and Steel Association show that the production of Wire Nails in 1905 amounted to 10,854,892 kegs of 100 pounds, as compared with 11,926,661 kegs in 1904, a decrease of 1,071,769 kegs, or almost 9 per cent. Of the total production in 1905, 7,175,418 kegs were made by the United States Steel Corporation and 3,679,474 kegs by independent companies, as compared with 7,998,912 kegs by the corporation and 3,927,749 kegs by independent companies in 1904. The following table gives the production of Wire Nails by States in 1904 and 1905:

| STATES | Kegs of 100 pounds. 1904. | 1905 |
|--|------------------------------|------------|
| New Hampshire, Massachusetts, Rhode Island and Connecticut | 247,157 | 264,024 |
| New York, New Jersey and Pennsylvania | 4,869,401 | 4,504,376 |
| Maryland, Kentucky, Alabama and Ohio | 3,124,624 | 2,861,587 |
| Indiana and Illinois | 3,033,756 | 2,531,774 |
| Michigan, Wisconsin and Colorado | 551,725 | 693,131 |
| Totals | 11,926,661 | 10,854,892 |

The Wire Nails produced in 1905 were all made of steel and were turned out by 54 works in 16 States, as compared with 56 works in the same number of States in 1904.

The production of Cut Nails and Spikes cut from plates in 1905 was 1,357,549 kegs of 100 pounds each, against 1,283,362 kegs in 1904, an increase of 74,187 kegs. The following table gives the production of Cut Nails and Cut Spikes by States in 1904 and 1905, Iron Nails being separated from Steel Nails for the latter year. Of the total production in 1905 a little over 32 per cent. was cut from iron plate and almost 68 per cent. from steel plate:

| STATES | 1905.—Kegs of 100 pounds. | | | |
|--|---------------------------|---------|-----------|-----------|
| | Iron. | Steel. | Total. | 1904. |
| Pennsylvania | 345,076 | 412,331 | 757,407 | 608,326 |
| West Virginia and Indiana | | 210,345 | 210,345 | 245,997 |
| Massachusetts and Ohio | | 158,113 | 158,113 | 182,981 |
| Maryland, Virginia, Kentucky, Illinois, Wisconsin and California | 89,503 | 142,181 | 231,684 | 156,058 |
| Totals | 434,579 | 922,970 | 1,357,549 | 1,283,362 |

Ten States made Cut Nails in 1905, as compared with 11 in 1904. Pennsylvania, Virginia, Ohio and Illinois increased their production in 1905, compared with 1904, but Massachusetts, Maryland, West Virginia, Kentucky, Indiana and California decreased their production.

TEN YEARS' COMPARISON.

The following table gives the production of Iron and Steel Cut and Wire Nails in this country in the last ten years in kegs of 100 pounds. The excess of Wire Nails over Cut Nails in each of the ten years is also shown:

| Years | Cut nails. | Wire nails. | Total. | Wire nails over cut. |
|-------|------------|-------------|------------|----------------------|
| 1896 | 1,615,870 | 4,719,880 | 6,335,750 | 3,103,900 |
| 1897 | 2,106,799 | 8,997,245 | 11,104,044 | 6,890,446 |
| 1898 | 1,572,221 | 7,418,475 | 8,990,696 | 5,846,254 |
| 1899 | 1,904,340 | 7,618,130 | 9,522,470 | 5,713,790 |
| 1900 | 1,573,494 | 7,233,979 | 8,807,473 | 5,660,485 |
| 1901 | 1,542,240 | 9,803,822 | 11,346,062 | 8,261,582 |
| 1902 | 1,633,726 | 10,982,246 | 12,616,008 | 9,348,484 |
| 1903 | 1,435,893 | 9,631,661 | 11,067,554 | 8,195,768 |
| 1904 | 1,283,362 | 11,926,661 | 13,210,023 | 10,643,299 |
| 1905 | 1,357,549 | 10,854,892 | 12,212,441 | 9,497,343 |

EXPORTS AND IMPORTS.

In 1905 our exports of Cut Nails and Cut Spikes amounted to 17,674,099 pounds, equivalent to 176,741 kegs of 100 pounds, against 20,772,049 pounds, or 207,720 kegs in 1904. Our exports of Wire Nails in 1905 amounted to 80,273,411 pounds, or 802,734 kegs, against 73,455,365 pounds, or 734,554 kegs, in 1904. In 1905 the total imports of Cut Nails and Cut Spikes amounted to 27,272 pounds, or 273 kegs, against 70,125 pounds, or 701 kegs, in 1904. The imports of Wire Nails in 1905 amounted to 53,769 pounds, or 538 kegs, against 42,954 pounds, or 430 kegs, in 1904.—Iron Age.

IDENTIFYING THE BITE.

The house surgeon of a London hospital was attending to the injuries of a poor woman whose arm had been severely bitten. As he was dressing the wound he said:

"I cannot make out what sort of a creature bit you. This is too small for a horse's bite and too large for a dog's."

"Oh, sir," replied the patient, "it wasn't a hannimal; it was another lydy."

WAS STILL UP.

"Is your husband up yet?" inquired the early morning caller. "I guess he is," replied the stern-looking woman. "I'd like to say a few words to him." "So would I. He hasn't come home yet."—Catholic Standard and Times.

BOMMER SPRING BUTT HINGES.

Bommer Spring Butt Hinges are regarded as standard goods in their line. They are made of wrought steel in the strongest and most durable manner and in any finish desired. These hinges have wrought steel bearings, the springs are of best oil tempered steel wire, are of large diameter and unusual length, have great resilience and power, and never "go lame." They will wear a lifetime if the proper size is selected. The ball tips can be unscrewed to take the hinge apart but will not work loose of them-

SINGLE ACTING HINGE.

selves. The tension is adjustable, therefore the door can be made to close as softly or as quickly as may seem desirable. The tension can be entirely taken off when fixing these hinges to the door, and the raised edges of the flanges indicate the depth for the mortise, thereby saving time to the carpenter. Bronze and brass hinges have a steel interior constructed and steel bearings, which take the wear and friction, making them as durable as if they were made entirely of steel. They are characterized by elegance of appearance, and by durability of finish. Material and workmanship are the best obtainable and every hinge is guaranteed

DOUBLE ACTING HINGE.

against defects in either. All parts are interchangeable and duplicate parts can be furnished promptly, from stock. For doors in public buildings, theatres, schools, railway stations, churches, libraries, banks, department stores, etc., the use of the double acting spring butt hinges should be enforced, to avoid the disastrous consequences of doors opening the wrong way in case of panic. For doors between dining room and kitchen, double acting spring butt hinges will be found very convenient. To assure the selection of hinges of the correct size to swing a door properly the requirements are given in their catalogue. As doors vary in their proportions it must be kept in mind that regardless of height wide doors always require larger hinges than narrow doors. Bommer Brothers, 255-271 Classon Avenue, Brooklyn, N. Y., are the manufacturers.

Imaginary evils soon become real ones by indulging our reflections on them; as he who in a melancholy fancy sees something like a face on the wall or the wainscot, can, by two or three touches with a lead pencil, make it look visible, and agreeing with what he fancied.—SWIFT.

"IDEAL" COMBINATION STEAM COOKER AND BAKER.

The Toledo Cooker Co., No. 136 West Bancroft Street, Toledo, Ohio, are calling special attention to their "Ideal" Combination Steam Cooker and Baker, which is something entirely new. The "Ideal" costs no more than ordinary cookers. Space economy being important in a small kitchen, it is in favor of the "Ideal".

FIG. 1. ROUND STEAM COOKER.

Steam Cooker that it takes up very little room. All kinds of cooking can be done at one time. The food is cooked by the heat of steam under pressure. By this method all the nutriment is retained, and nothing can burn or dry up. By its use it cooks a whole meal over one burner on gasoline, oil, gas or common cook stove, and is claimed to be a perfect cooker. It is made of heavy tin or copper, with an all copper seamless top, having no sharp corners to catch the clothing or hands, or to retain grease and dirt. These are some of the advantages which are claimed

FIG. 2. SQUARE STEAM COOKER.

for the Ideal Square Steam Cooker as being unique and original with that cooker: It is the only practical square cooker made with a whistle. This whistle is made of brass, nicked, and will never rust out. It serves at the same time as a replenishing tube, when more water is needed, without removing it. A whistle on a steam cooker is absolutely essential to its perfect working, as it obviates entirely the necessity of watching it to see that the water does not run low. It is the only square steam cooker that has seamless round-corner door frames and drawn round-corner doors. It has a self-regulating valve that holds the steam under pressure, causing the food to cook quickly, and condensing the steam so that the water is replenished and will last twice as long as in the ordinary steam cooker or kettle. This valve needs no attention. It has a pressed seamless dome top, so constructed that the condensed steam will immediately run to the sides and down the bottom into the water. Steam cookers without this feature permit the water to condense and drip back on to the food in the cooker. The pressed seamless round-corner door frames and the pressed seamless doors are very important features. They are perfectly tight and make a handsome and neat appearance. One article will not flavor another, no matter how delicate or how strong, so long as they are cooked in separate dishes. A 44-page instruction book and 200 recipes are given with each cooker, and this book contains in detail everything connected with the cooker.

THE MAKING OF A HORSE NAIL

Among the many articles represented in the stock of Hardware dealers there are many which, though in constant daily use, they are not acquainted with the process of their manufacture. The number of those who have had an opportunity of seeing the interesting process by which horse nails are made is decidedly small, but these few have found it exceedingly interesting, and it has served to clear away many previous misconceptions regarding their manufacture.

Those who have been engaged in the Hardware trade for forty or more years, says *Hardware and Metal*, will not have forgotten how the farrier in those days used to purchase small bundles of nail rods, from which he had to forge singly the nails he required. This crude method was in common use in Great Britain for many years, and these hand-made nails were the only ones exported to this country, being packed in jute bags at 56 pounds each or in kegs of 112 pounds.

The inventive genius of man sought a relief from the drudgery of forging out one by one nails by hand, and in due course there were machines invented, which not only did the work more quickly, but much more accurately, than could by any possibility be done by any hand-forged process. While the machines which replaced the hand-forging methods at the date of their introduction produced results which were a vast improvement on the nails then made, yet these have been in their turn replaced by improved mechanism, which are as great an advance over the earlier ones.

While there is a choice of sources from which nail rods may be obtained (both domestic and foreign) suitable for the manufacture of horse nails, there is one in particular which deservedly enjoys the reputation of affording the best material known or used in the world for this purpose, or in fact any purpose where the best iron and steel products are sought for. The iron ores of Sweden are of the highest class known in the world for the production of iron or steel. These ores are smelted with charcoal as a fuel, the forests of that country affording an abundant supply, and on which they are almost wholly dependent, as coal is not found except in small quantities in a limited area, and then not of a quality which is conducive to producing the best results. We will follow, then, the production of the Swedish material, which is the basis of the best horse nails, taking as our standard the well-known "C" brand, whose process for the manufacture of horse nails we shall give in more detail.

The iron ores are blended and mixed in due proportion in the furnaces, according to the class of material which it is desired to make, the type of furnace used in Sweden for the best material being the well-known Siemens-Martin process. In general formation the furnace strongly resembles a baker's brick oven, the ores being placed in the centre of the furnace and the fuel towards the front. The flame and heat is deflected by an intercepting arch against the furnace roof on the ores lying on the bed of the furnace, the ores being thereby melted without coming in direct contact with the fuel. This process takes from ten to twelve hours, and affords ample opportunity for examining and testing the product at its several stages. When it has reached the point required, the fluid steel is poured into a ladle and transferred immediately into iron moulds, which form an ingot. These ingots are withdrawn and placed in "soaking pits" in order to retain the initial heat of the ingot as long as possible. The ingots are then reduced to a smaller size, which are called billets. These in turn are reheated and passed through rolls having grooves of the desired size and shape, which finally reduces the billet to the size required for the nail rods, the average size of which is about $\frac{3}{8}$ to $\frac{1}{4}$ inches.

These rods are now either bundled into coils or cut into uniform lengths of from ten to twelve feet and packed in uniform bundles of about 100 pounds for convenience of shipment.

We have dealt with nail rods only as produced in Sweden; but it is not necessary to go to that country for this article, as large quantities are made elsewhere. The domestic rods produced by the United States makers are, however, more largely used for lower-priced classes of nails, but the best makers who aim to make the highest grade find it necessary to go to Sweden for the best quality of rods, in spite of the handicap of a heavy duty on their import.

The works in Sweden are situated well inland, and the bundles

of rods ready for shipment are conveyed by canal or rail to one of the leading seaport points, which are Gothenburg on the west coast and Gelfe and Stockholm on the east coast. If the rods are destined for Canada they are usually despatched from one of these Swedish ports by one of the small coasting steamers to either Antwerp or Hamburg or to one of the leading shipping ports in Great Britain, where connections can be made and sailings thence for Canada obtained. These rods are conveyed for the most part during the season of navigation via the river St. Lawrence.

Having brought them to the point of manufacture, let us deal with the further process required for transforming them into the horse nails of commerce.

There are several mechanical processes for the manufacture of horse nails, but these may be broadly divided into two divisions, namely, the "cold process" and the "hot-forged process," each claiming superiority for their own. Those using the former are conceded to have a process which enables them to produce nails more cheaply, and those using the latter seem to have the advantage in their favor in the most natural process, the nail being forged from the rod while at a white heat, and therefore in a thoroughly malleable condition and more readily susceptible to being consolidated. It is with the latter that we have to deal in this description, that being the process exclusively used by the makers of "C" brand for the last forty years.

The nail rods described above are placed (about a dozen at a time) in a small heating furnace, which is supplied with the highest obtainable grade of anthracite coal, the heat of which is maintained at the desired point by air delivered through pipes by a fan blower revolving at a high rate of speed, and with the aid of check valves permitting any desired force or amount to be used according to requirements. About eighteen inches of each rod is heated at a time, the heated end of which is placed in a forging machine between a pair of dies, one of which delivers with great rapidity and force several blows which forge the nail into the desired shape. When done, the nail is in steel cylinders about six feet long and thirty inches in diameter, in which they revolve for several hours, which polishes them. From this they are passed through rolling machines which draws the blank down to a graduated taper. Next they are passed on to another set of machines called the "pointing and finishing" machines, it being here that the point and bevel of the nail is made. They are again subjected for a short time to the tumbling process in sawdust, which removes any ragged edges, this completing the process of manufacturing. Before being packed in boxes, however, the nails are placed on zinc tables and passed under review by experienced sorters, who make an examination of every nail. The imperfect ones are discarded, and those passing this rigid examination are allowed to be placed in boxes.

When all the above particulars are contrasted, from the initial point of the ore in Sweden to the finished nail in Canada, with all the intermediate costs of labor, transportation and waste, with a small profit for the manufacturer, it will be readily seen that present prices are extremely low. The average size of nails sold in Canada is No. 8, which is sold at \$3 per box of twenty-five pounds, or twelve cents per pound, for which the buyer will receive on the average about one hundred nails. As it requires thirty-two nails to shoe a horse, or practically one-third of a pound, it therefore follows that the average cost of the nails required in the shoeing of a horse may be taken as about four cents, or one cent per shoe.

The relation of the cost of the nails, therefore, to the cost of the work done is very small, and if these facts were presented to any intelligent farrier, he would not require anything further to clinch the argument for the use of the best nails, made from the highest obtainable material known, as we have endeavored to describe above.

THE NEXT STEP.

"At that point, he was afraid he wouldn't be in a condition to go home."

"Ha! ha! What did he do then?"

"Why, he took a few more highballs and stopped worrying about it."—Puck.

HARDWARE OF A CENTURY AGO

"Georgie" Dean handled hammers and nails from England, sugar basins and cream pots, files, rasps and sad irons, clock balls and bed caps, a great variety of pen knives, smelling bottles, ivory tooth picks and other wares little known in the practical Hardware business of to-day. Dean was a successful Hardware dealer in his day, but his day was 100 years ago. He ran the leading Hardware store in Salem, Mass., then a flourishing shipping port, bigger than Boston in foreign trade, and better known in Bengal and Calcutta than New York.

Dean got practically all his Hardware in England. American factories were then few. Fleet sailing vessels from England docked at the pier, which ran from his store down to the harbor, and he unloaded huge cases from the vessel and pushed them on trucks up to the basement of his store. When he shipped a big order to Boston, or even more remote points, he freighted it on a coasting schooner; railroads were not dreamed of in "Georgie" Dean's day, and a location on a good wharf was as much to be desired than is a site close by the freight yard and railroad station today.

Dean was a successful Hardwaremen, as before stated, but he failed to measure progress, and foresee the changes in fashion in Hardware that the future held in store. Otherwise, he would not have stocked up so heavily on such strange articles as clout nails, copper chafing dishes, frying pans, white chapel needles, knee buckles, sugar tongs and other queer goods which "Jack" Daland shoveled out into a tip cart the other day, and had taken off to the foundry to be melted down for old metal, and for cash in his own coffers. Daland runs "Georgie" Dean's store today, or at least a store on the same site on which Dean did business, but if the famous merchant of a century ago happened to drop into his old stand and got a glimpse at safety razors, safety revolvers, thermometers, electric bells and novelties, washing machines and other articles of which he never dreamed he would undoubtedly rejoice that his shoe pegs, his shoe buckles, his circassian wash balls and his horn combs and other articles of Hardware of a century ago had gone up in smoke.

In a spirit of progress, "Georgie" Dean one day had printed a handbill flyer, announcing his stock, a common form of advertising of a century ago, and an original copy is still preserved in the store today. This copy was recently framed by Mr. Daland, and exhibited to the general public, and for the benefit of the Hardware trade in general he has turned over a copy to **HARDWARE**.

The bill, which catalogues many an article which will make a twentieth-century dealer smile, is as follows:

A LARGE ASSORTMENT

For Sale By

George Dean

At his Store in Essex-Street, Salem,

At very low prices for Cash, or short approved credit; among which are the following—viz:—

Brads, Clout and Pump Nails;
Hammers;
Steelyards; Brick Trowels;
Files, Rasps, Sad Irons;
Cart Boxes, Shovels and Spades;
Frying Pans, Pots and Kettles; Iron Dogs;
Copper and Iron Chafing Dishes;
Copper and Brass Scales;
Socket and Cast-steel Firmer's Chisels;
Best Steel Plate Hand Saws;
Plane Irons: H. H. L. Butt, Chest;
Table, Trunk, Desk, Book Case, and Prospect Hinges;
Thumb Latches, Rat and Mouse Traps;
Mincing Knives;
Stirrup Irons, and Snaffles; Tin'd and
Plated Common and Portsmouth Pelhams;
Inlets, and Flat sets, Cock Eyes,
Breast Plate and Tug Buckles.
Octagon Harness Buckles;
Brass Nails; Twig and Chaise Whips;
Whip Thongs, Saddlers' Pincers and Awls;
A Large Assortment of Screws;
Iron and Steel Knitting Pins;
White Chapel Needles; Darning and Sail do.;

Fish Hooks; Iron and Britannia Table and Tea Spoons;
A great variety of Pen Knives;
Cutteaux, Scissors, Razors, Knives and Forks;
Razor Cases, Wilson's Shoe Knives;
Shoe Nippers and Pincers, Sand Stones;
Compasses and Squares;
Desk, Bookcase, Chest, Till, Prospect, Closet, Cupboard, Trunk,
Stock, Ring and Knob Locks.
Single and Double Padlocks, Common Brass and Secret Port-
manteau do. ;
Iron and Brass and high Candle Sticks;
Mahogany and Common Bellows;
Shovels and Tongs, Brass Cocks, with and without keys;
Pewter Dishes, Plates, Basons, and Porringers;
Britannia and Pewter Tea-Pots;
Sugar Basons, Cream Pots, etc., etc.;
Small and Spike Gimblets;
Bow Latches; Flat and round Bolts;
Iron and Box Coffee Mills;
Brass Knobs and Bolts; Brass and China Cloak Pins;
Escutcheons; Tea Tray Handles;
Clock Balls; Table Catches; Bed Caps;
Quadrants and Catches;
Portable Desk Furniture;
Assortment Commodes and Rose Handles;
Sand Paper; Marking Irons, Tooth and Comb Brushes;
Ivory, Horn and Tortoise Shell Combs;
Pewter and Japan'd Ink Stands; Sealing Wax, Paper;
Quills and Ink Powder; Pocket Dials;
Common and Double Spectacles; Oval Glass, do. ;
Brass, Steel and Plated Thimbles; Coat and Vest Moulds;
Plated Shoe and Knee Buckles; neat Steel Knee do. ;
Brass Plated Sugar Tongs; Yellow and Plated Sleeve Links;
Common and Plated Clasps; Enamel'd Snuff Boxes with Mot-
toes; Japan'd Brass and Leather do. ;
An elegant assortment of Steel Snuffers and Snuffer Trays;
Corn Screws, Morocco Purses, Pocket Books;
Box Rules; Bed Castors; Shot Bags and Powder Flasks;
Tweezers, Curling Tongs; Japan'd Tobacco Boxes;
Nutmeg Graters;
A large assortment of handsome Tea Trays, Waiters' Canis-
ters; Caddies, Fruit Baskets, Knife Trays, etc.
Quart and Pint Jacks; Money Scales and Weights;
A Great Variety of Patent Brass and
Japan'd Lamps and Lanterns;
Shaving Boxes and Brushes;
Lead Pencils, Slate do. ; 3 1-2, 4, 4 1-2, and pound Pins; Salt
Spoons; Smelling Bottles; in plain and pierced Cases;
Cut do. ; and Flat Silk Winders; Tambour Cases;
A large assortment of Watch Chains, Seals and Keys;
Court Plaster; Britannia Cream Pots;
Holland Brushes; Horse and Cloth do. ;
Circassian Wash Ball;
Looking Glasses, etc., etc., etc.

Also,

A few Traveling Desks; and an assortment of Boston Glass,
as cheap as at the Manufactory.

PRACTICAL PHILOSOPHY.

Pull never had a show against brains.
Self-confidence is a genuine business asset.
Applause has made fools of more men than criticism.
A steady average is better than an occasional exception.
A pessimist is one who can see only the hole in the doughnut.
Man wants but little here below—and that's about all he gets.
There is in the worst fortune the best of chances for a happy change.
More time may be lost by labor on Sunday than by floating all the week.
It is just as easy to find fault with an electric light as with a tallow candle.
Many a man doesn't know what he is talking about until after it is too late.
Some men know nothing, and know it and say nothing. Others know nothing and cannot keep from telling it.

HOW TO SELL SAWS

By G. W. CLARK, OF E. C. ATKINS & Co.

This excellent paper on the important art of selling saws was delivered before the Kentucky Retail Hardware Dealers' Association at its convention in Louisville.

Upon your sales force depends the success with which Saws or any other tools can be sold to the very best advantage, as a Saw possessing the finest qualities and highest merits cannot be successfully offered so as to obtain the greatest return of immediate profit and best results in creating an increased demand for more Saws from the advertisements of a well satisfied customer unless your salesmen properly present the Saw to prospective customers in a skillful, forceful and courteous manner.

To sell saws easily a salesman must study the peculiarities of each customer, tell his tale and stop when he has said enough. He must try to discover the faults or weaknesses or prejudices of the prospective buyer and overcome them with tactful, logical arguments.

HE SHOULD STUDY THE GOODS CARRIED IN STOCK

and in a general way be able to discuss familiarly any process of construction of the tool from raw material to the finished product and talk intelligently of the advantages of such process. This information can be had from studying manufacturers' catalogues, booklets and circulars and by talking with their traveling salesmen, as all who are posted are willing to talk freely on this subject. An earnest argument made by a cool, well balanced salesman will usually convince even an exasperatingly stubborn purchaser.

To select good saws a careful study of conditions in your locality, coupled with your past experience and consultation with Saw salesmen, will enable you to put in stock patterns which will sell rapidly and which will give satisfaction. The number, the class and the skill of mechanics and the kind of work they are doing are all important factors to consider, but all

SAWS SHOULD BE SELECTED FOR THE REAL UTILITY

and actual intrinsic value which they possess, bearing in mind that nearly all good mechanics want the best tools they can afford to buy. They are willing to pay a fair price for a good Saw. The real value of any article depends on the buyer's state of mind, and the size of his pocketbook influences his mind when he has a desire to purchase an article which he needs or fancies he needs.

For a stock of hand saws five or six different patterns, well chosen to sell at different prices, will be highly profitable. It would be well to have Hand Saws to retail each at \$2.25, \$2, \$1.50, \$1.75 and 50 cents, carrying mostly the better grades. By having Saws of all prices you have an

ARGUMENT THAT STRIKES THE PURCHASER FORCIBLY,

as you can give him a Saw at most any price he wants to pay, and you have an opportunity to recommend and try to sell what you find most profitable and satisfactory. The assortment should consist of Hand Saws, 26 inches long; Rip Saws, 28 inches long; Panel Saws, 18 and 20 inches long, etc., with teeth assorted according to the quality of the saw and the work it must do. The greater majority of 26-inch Hand Saws are used with teeth 8 points to the inch, but in green timber are sold with but 6 and 7 points to the inch. For fine cabinet work and high-class interior finishing they are used with teeth as fine as 12 points to the inch. Rip Saws with graduated teeth are usually used with 4½ to 5½ points to the inch, but the conditions of your trade may require carrying more or less of other sizes and points. This is true of all small Saws, such as Back Saws, Butcher Saws, Compass Saws, Hack Saws, Work Saws, &c., as the variety and quantity of small Saws to be carried depend on the volume of your trade and the location.

Crosscut saws are used in almost as great variety as Hand Saws and the quality, length, pattern, style, teeth and finish should be determined by the size and character of timber in your territory and the extent of active timber operations carried on.

GREAT CARE SHOULD BE EXERCISED

to have a full stock on hand at the beginning of the season to fully supply the demands.

Attractive displaying of Saws in wall cases having glass fronts will help increase the demand for them, second only to a nice window display. Both methods should have attention, as anything which suggests to a prospective purchaser that you have a complete variety of Saws will make him instinctively call on you when he is ready to buy, as your display will talk for your Saws when the other fellow's Saws, if hidden in drawers, will continue to sleep until they are out of date.

The arrangement can be in tasteful groups which attract the eye and leave a lasting impression of your stock.

Another business creator is a nice display board with a velvet or black background, showing a line of Saws and fine tools of all classes. This is a medium especially valuable to such of you as carry a large line of high grade mechanics' tools, as the articles can be grouped in artistic arrangement that unconsciously will be remembered by every one who sees it.

You doubtless advertise in local papers and should during seasons mention Saws and other tools. If you put a little "ginger" in your ad you will see results

THAT WILL BRING SMILES OF CONTENTMENT

to your face that will reflect the wisdom of your progressiveness when you look at the profit account.

THE HAMILTON RIFLE NO. 15.

The Hamilton Rifle Co., Plymouth, Mich., are the manufacturers of the popular lines of .22 calibre Rifles bearing their name, of which we present an illustration of No. 15, which is listed at \$1.50. This is a Take Down model of genuine walnut stock. Full

adapted to the use either of the young American sportsman who is experiencing his first enthusiasm for outdoor sports or the older and more experienced hunter, who readily appreciates the various characteristics which combine to make the Hamilton Rifle of acknowledged merit.

THE HAMILTON RIFLE NO. 15.

length 28½ inches. Distance between sights 16 inches. Lever action. Rear adjustable peep sight, and is chambered to take .22 calibre short and long rim fire cartridges. In following new methods of rifle building, the Hamilton Rifle Co. have been able to produce different models, of which this is the lowest priced, each one in a class of its own, and each in its individual way

THE UMPIRE'S TURN.

"Charley, dear," said young Mrs. Torkins, at the baseball game, "doesn't that man with the blue clothes run, too?" "Not till after the game is over. Then he runs and hides." *Washington Evening Star.*

RECENT TRADE PUBLICATIONS.

THE DUCHARMES & Co., Shelburne Falls, Mass., with a New York office at No. 157 Chambers Street represented by the Joseph F. McCoy Co., have favored us with their Catalogue No. 2, in which are described and illustrated their improved Electrician No. 1, Hand D No. 5, Peerless No. 7, O. K. No. 9 and Dandy Jewelers' Screw Drivers, Screw Driver Bits, Perfect Nail Sets, Ice Picks, Scratch Awls, Rimmers, Center and Tinner's Punches and Ship Carpenters' and Belt Awls. A price list is also included in the catalogue.

THE ENTERPRISE MANUFACTURING COMPANY OF PA., Third and Dauphin Streets, Philadelphia, and No. 10 Warren Street, New York, have favored us with a copy of their 1906 catalogue of Patented Hardware Specialties. The contents include a line of Sad Irons, Meat and Food Choppers, both Hand and Power, Grinding and Pulverizing Mills, Sausage Stuffers, Lard and Fruit Presses, Meat Hooks, Corrugated Spouts, Bone, Shell and Corn Mills, Coffee Mills, Measuring Faucets, Paint Faucets, Measuring Pumps, Smoked Beef Shavers, Cheese Cutters, Bung-Hole Bore, Tobacco Shavers, Tobacco, Root and Herb Cutters, Tincture Presses, Cork Presses, Lawn Mowers, Lawn Sprinklers, Meat Juice Extractors, Fruit, Wine and Jelly Presses, Cherry Stoners, Raisin and Grape Seeders, Vegetable Slicers, Ice Shredders, Flag Pole Holders, Mole Traps, Cobblers' Kits, etc.

BEALL BROS., Alton, Ill., manufacturers of Old "Alton" Coal Miners' Tools, Miners' Supplies and Shovels, Spades and Scoops, are distributing their illustrated catalogue and price list covering their line of high grade heavy hammers, railroad picks, track tools, etc. These goods are now being manufactured at their new factory which was started some six months ago. In the forefront of the catalogue are illustrations of their three factories: One for the manufacture of Miners' Tools and Miners' Supplies; another for making Shovels, Spades and Scoops; and the third for making all kinds of Heavy Hammers and Track Tools. Included in the contents will be found railroad, tamping, surface and ore picks; mattocks, drifting and poll picks, coal picks, striking hammers, blacksmiths' sledges, coal miners' mauls, blacksmiths' and engineers' hand hammers, stone sledges, spalling napping and hand drilling hammers, mason and stone breaking hammers, stone axes, quarry picks, stone wedges, macadamizing hammers, railroad track chisels, etc., etc. This is a very complete catalogue of the lines of goods mentioned and may be had upon application.

SIMONDS MANUFACTURING Co., Fitchburg, Mass., makers of saws, machine knives and crucible sheet steel, have recently issued a booklet entitled "Simonds Guide for Millmen." In the introduction, the company state: "In offering this treatise on the care and handling of saws, we aim to separate each kind, and treat each differently, suggesting such rules as have been found to be the most practicable to obtain the best service from the different kinds and styles of saws. In the latter part of the book we illustrate the principal kinds of saws treated on in this work, giving at the same time their list prices. We also give a table showing the standard number of teeth in circular saws, both for splitting and cutting off; also table showing gauge and its equivalent in fractions of an inch, thousandths of an inch, and in millimetres. We trust that our readers will appreciate our endeavors to bring before them this work, and that same will prove to them a valuable aid in the care and selection of saws. There is no manufactured article of which more is required than large saws for log sawing. Our improvements have demonstrated that saws can be made as reliable as the most common article, and we issue this book to explain some of the principles which govern them, that errors may more readily be discovered and corrected."

ROLLMAN MANUFACTURING Co., Mt. Joy, Pa., have distributed to the trade a booklet illustrating a series of proofs of newspaper ads. Electrotypes of these cuts will be sent by that company to any dealer handling the Rollman Food Chopper. In designing these ads., the company are prompted by a desire to help their customers "secure general publicity as well as to advertise the Food Chopper in particular." These ads. have been copyrighted. Their Catalogue No. 1160 has also been received, devoted to the line of household specialties manufactured by them. This includes their Food Chopper, Peanut Butter Machine and Spice Mill, Cherry Seeder, Apple Cutter, Peach Stoner and Potato Cutter.

AMERICAN TAP & DIE Co., Greenfield, Mass., are distributing to the trade their 1906 catalogue No. 2 of "Adamantine" Threading Tools. A new factory for this department of manufacture has been erected within the past year, which has been fully equipped with the latest and most modern machinery and tools for making screw-cutting articles. The contents include screw plates, tap wrenches, adjustable stocks, machine screw, machinist hand, machine or nut, taper, pulley, horse shoe, bit brace, blacksmiths' taper, Beaman & Smith holder, stove bolt, boiler, patch bolt, spindle stay-bolt, mud wash-out, stay-bolt, short and long hob and Sellers hob taps, pipe hobs, screw dies, gas fixture taps and dies, die holders, adjustable square bolt and square pipe dies, pipe stocks, etc.

SIMMONS HARDWARE Co., St. Louis, Mo., are sending out their 1906 catalogue No. 506 of "Leader" Baby Carriages and Go-carts. The entire line is thoroughly illustrated and described, as well as an extensive assortment of parasols for same. A portion of this catalogue is devoted to a line of "Siberia" refrigerators, as well as to "Leader," "White Clad" and Opalite refrigerators. The Savin Ice Pad is also shown, and a line of water coolers and filters, "Wonder" and "White Mountain" ice cream freezers, boys' wagons, automobile wagons, hand cars, velocipedes, tricycles, croquet sets, clothes hampers, willow clothes, lunch and work baskets, iron and brass bedsteads, wood and brass cribs, cradles, davenport, woven wire mattresses, wood-frame cots, rocking chairs, Morris chairs, etc. Their catalogue No. 507 is devoted to their "Banner" line of baby carriages and go-carts.

THE ALLEN GERM-PROOF FILTER Co., Toledo, Ohio, have issued a catalogue describing and illustrating the merits of the Allen Germ-Proof Filter. Sectional views are also given of the unglazed porcelain tubes used in their filters, besides several views of public buildings in Toledo in which these filters are in use, including the new Lucas County Court House, the Central High School Building and U. S. Custom House and Post Office. Numerous testimonials are also published. This is a very seasonable catalogue, and should be sent for.

CHARLES PARKER Co., Meriden, Conn., with New York sales-room at 32 Warren Street, have favored us with their latest revised catalogue and price list of vises. These vises are adapted to locomotive works, car builders, machinists, gun, sewing machine and carriage manufacturers, jewelers and artisans generally. Illustrations and descriptions are given of Parker's swivel, stationary and swivel heavy railway, Hall's Sudden Grip, Parker's stationary and swivel Victor filers', wood workers', watchmakers' and jewelers' vises; combination pipe, interchangeable jaw and stationary and swivel coach makers' vises; oval slide, heavy chipping or filing, die sinkers' adjustable, saw filers', Vulcan stationary and swivel coach makers' vises. The contents also include a line of parallel and heavy railway vises as well as ratchet drills.

BERGER BROS. Co., manufacturers of tinner's and roofers' supplies, No. 237 Arch Street, Philadelphia, Pa., have distributed their 1906 catalogue and price list. The contents include a full line of gutter and pipe hangers, pipe hooks and fasteners, steel roofing and siding, roofing, Russia and American planished iron, galvanized and black iron, sheet zinc, sheet copper, metal lath, rivets, bolts, solder, registers, ventilators, hods, elbows, ears, handles, valves and plungers. These goods are thoroughly illustrated and described. This company are large manufacturers of tin andterne plates, eave gutter and pipe, tinner's machines and tools, galvanized and copper cornice work, malleable and grey iron castings and tinning. The catalogue is a complete one, and will be found very useful to those interested in these lines.

GIFFORD-WOOD Co., successors to William T. Wood & Co., Arlington, Mass., and Gifford Bros., Hudson, N. Y., with shops at Arlington, Mass., and Hudson, N. Y., are sending out their catalogue of Ice Handling Machinery for the Summer of 1906. The contents include Hand Plows, Bar Chisels, Starting Chisels, Floor Shavers, Splitting Chisels, Hoisting and Lowering Tongs, Ice Axes, Hatchets, Chippers, Hand Saws, Cleavers, Hooks, Shavers, Breakers, Aprons, Crushers, Scales, Runs, Skids, etc. In addition to this catalogue, they will also be pleased to send a full descriptive catalogue of tools and machinery, upon application.

NEW GOODS AND SPECIALTIES.

CARPENTERS' NEW HAND TOOL CASE NO. 35.

C. E. Jennings & Co., 42 Murray Street, New York, have added to their useful assortment of tool cases adapted to special uses, a Carpenters' New Hand Tool Case No. 35, of which we give an illustration. It is made from selected hard wood, handsomely finished, and with paneled sides. It is furnished with a brass lock, and with leather handle, having rings for strap to pass over shoulder; has metal clasps and is provided with metal corners; a saw rack for holding four saws, including a 28-inch rip saw; and hooks for holding brace and coping saws. Has a wood button for a try square, a partitioned tray for bits, chisels and small tools; with sufficient space in the bottom to hold

CARPENTERS' NEW HAND TOOL CASE NO. 35.

planes, levels, etc. It is designed so it will take in a steel square with an 18-inch tongue. To put the steel square in case, it is necessary to place the square back of tray with end of body and end of tongue resting on bottom of case. The outside dimensions of this case are: Length, 34 1/4 inches, height 17 inches and width 6 inches. The inside dimensions: Length 33 inches, height 15 1/4 inches and width 5 inches. The inside dimensions of removable tray: Length, 32 1/2 inches, height, 1 3/4 inches and width 4 1/4 inches. The weight of case when empty is 15 pounds, while a crate holding 6 ready for shipment is about 100 pounds.

DUPLEX WIRE TERMINALS.

The Bliss-Chester Co., of Providence, R. I., are manufacturing a series of Duplex Wire Terminals, of which we give an illustration. All wire in automobiles and motor boats should be thoroughly insulated, and the ends fitted with copper terminals.

DUPLEX WIRE TERMINALS.

These terminals can be easily attached with or without solder. The manufacturers recommend soldering them to the wire for the best results. The short clips are designed to clamp the bare strands of wire, and the long clips clamp the insulation and prevent its working back, which often causes the wire to break off at the terminal. Electric tape can be used to insulate the terminal so that only the round head remains bare. The ends of all wires used should be fitted with terminals, even the short wires connecting the dry cells. Terminals insure a good contact and lessen the external resistance in the circuit which the current has to overcome thereby increasing the mileage obtained from a set of dry cells.

BLACKSMITHS' HOOK AND HANDLE RULE.

The L. S. Starrett Co., of Athol, Mass., among the numerous high-grade tools with which they are identified, are manufacturing the Blacksmiths' Hook and Handle Rule, No. 465, shown in the illustration herewith. These rules are made from hard-rolled sheet brass 1-10 inch thick, one 1-16 inch wide, with heavy gradu-

ations and figures, graduated from the end in 16ths of an inch on one side and from the inside of the hook in 16ths of an inch on the other, adapting them for taking correct measurements

BLACKSMITHS' HOOK AND HANDLE RULE.

from either the outside edge of a hot piece of iron, or from the inside when held against a corner. They are graduated twelve inches, have flat handles and measure over all 16 3/4 inches.

STARRETT'S POCKET SCREW DRIVER NO. 554.

The L. S. Starrett Co., Athol, Mass., are the manufacturers of the useful little tool we show herewith in its actual size. This nickel-plated screw driver is made with a check to hold the blade

STARRETT'S POCKET SCREW DRIVER NO. 554.

firmly into a split socket when in use. To carry in the pocket, on key-ring or watch chain, the blade may be removed by slightly loosening the chuck, then reversed and telescoped through the socket nearly full length, and held safely by tightening the chuck. Screws in eye glasses have a provoking way of getting loose. This little tool is just the thing to have on hand in such cases.

NEW AMERICAN PADLOCK NO. 477.

The Keystone Works, (E. T. Fraim, proprietor) Lancaster, Pa., are placing on the market what are known as the New American line of padlocks, ornamented as they are by the Stars and Stripes. They are made in four sizes, from 1 1/2 inches to 2 3/4

NEW AMERICAN PADLOCK NO. 477.

inches. We present herewith an illustration of No. 477, size 1 7/8. They are made of pressed steel with malleable steel oval shackle, brass studs and cylinder, having self locking spring shackles, and two keys each. The locks have nine changes. Each padlock is made in three styles: Black japanned, with brass plated shackle; the same style having the design bright burnished, and the same style with full brass finish. They are quite attractive in appearance, and make good sellers.

EMPIRE PUNCH KNIFE.

The Empire Knife Co., Winsted, Conn., is placing upon the market a pocket knife that has an improved gouge blade, upon which a patent has been applied for, and we give an illustration of the knife herewith. The blade is drop forged from the best cutlery blade steel, having a round back and a cutting edge up-

EMPIRE PUNCH KNIFE.

lifted from the flat part of the blade, which can be ground and kept keen and sharp, so that by a turn of the wrist and a slight pressure it will cut a smooth hole of varying size. The knives are designed for use in mills or factories, for horsemen and harness-makers, and for general use about the farm or stable. They manufacture this knife in ebony and stag in one regular blade, as shown in the illustration, and also with two regular blades.

THE "UNIQUE" STEP LADDER.

The Udell Works, Indianapolis, Ind., are placing before the Hardware trade what is claimed to be one of the most substantial, best constructed and durable step ladders ever placed on the market. It is called the "Unique," and we give an illustration of the same accompanying this. It is made more durable by the iron bolt running from one stile to the other under each step. On each end of each bolt is a piece of malleable iron, which acts as

THE "UNIQUE" STEP LADDER.

a washer. In this piece of malleable iron are two holes, in which are driven their famous barb wire nails. These nails penetrate the steps, being driven through the stiles. The steps are set into slots in the stiles, which these barb wire nails make almost impossible that they should ever work loose. Should they do so, however, they can easily be tightened by a turn of the nut on the bolt under the step. Another unique feature of this ladder is the new automatic leg brace, which absolutely prevents the ladder from "walking," enabling it to stand perfectly rigid when open. The braces or strips on the legs are bound by pieces of stamped steel, which prevent them from becoming loose at the joints. They are constructed of white Norway pine only.

WHITE DAISY WASHING MACHINE.

White Lily Washer Co., Davenport, Iowa, is placing upon the market the White Daisy Washing Machine which is a new washing machine of the rubber or ball-bearing type, and is claimed to possess many advantages over other machines similar in construction. We give an illustration of the machine herewith. It has a double ball-bearing at both the top and bottom, instead of a single ball-bearing such as is used in other machines

WHITE DAISY WASHING MACHINE.

of this type of manufacture. The advantage of this is readily understood, when it is considered that any bearing to work in perfect alignment must have two points of contact. It is claimed that this makes the machine keep a perfect alignment, revolve easier and work to better advantage in every case. It is the only machine of the rubber type that has a corrugated tub. By using the corrugated tub, the operator not only rubs the clothes

WHITE ROSE WASHING MACHINE.

on the top and bottom, but also on the sides, which enables this machine to wash clothes cleaner than would be supposed possible. The tub is manufactured out of the finest grade of Louisiana red cypress, which is less susceptible to expansion and contraction because of hot and cold water, than any other lumber known. It possesses a hinged cover, the advantage of which is, when the operator is through washing the cover is quickly lifted, and the

water runs back into the tub; whereas if one uses one of the old-style loose covers, when through washing it becomes necessary to find something to lay the cover upon, otherwise the water and soapsuds would be all over the floor. The frame and wringer board is especially referred to. The frame is made of the very best material, and well braced by four iron braces running diagonally across the frame, while the wringer board is a special invention of the company, being a continuation of the frame and fitted with a sliding drip board, so that the wringer can be kept attached to the machine all the time, saving the trouble of removing the wringer at every washing.

THE WHITE LILY WASHER CO., in addition to the above, are placing upon the market The White Rose Washing Machine which is claimed to be the only ball bearing rotary washer known to the trade. Realizing that there is a demand for a washer that is equipped with ball bearings, the White Rose is a ball-bearing machine in every sense of the word. These bearings run in ball races, turned from the very best grade of Bessemer tool steel. The bearings are so fine that the White Rose claims to run fully 100 per cent. easier than any other washer made. The tub is made from a selected grade of Mississippi and Louisiana red cypress, filled and varnished in a natural finish, and bound with heavy galvanized hoops, making an extremely durable tub. The hinges are put on with bolts, and every part is reinforced wherever necessary. The iron and steel parts of the machine being taken from selected stock are thoroughly guaranteed.

NEW ADJUSTABLE PORTABLE LAMP NO. 5P.

The D. C. White Company, Worcester, Mass., are engaged in manufacturing the most practical standard adjustable fixtures for incandescent lamps made for use and application to roll-top desks. They are made with that degree of care given to the applicability that has already created a large demand. The moderate price at which they are marketed, justifies the extensive

NEW ADJUSTABLE PORTABLE LAMP NO. 5P.

sale which they enjoy. We give an illustration of their Portable Lamp No. 5P, which shows the many uses for which this new portable is especially adapted. Perfect illumination of copy, work and keyboard on the typewriter, with absolute protection for the eyes of the operator, and show an ideal lighting effect over a roll-top desk. It is claimed it can be employed with the same results for lighting a flat desk as a reading or study lamp. The base is new in design and construction, and affords a perfect support for the lamp and shade on extreme leverages. The joints are japanned iron and finished gun-metal, while the lamp arm is of heavy brass tubing. The whole is plated and finished. They embody mechanical principles which permit turning, dipping and sliding adjustments to any position or angle by frictional tension secured at one point of fastening. The large sizes of electric cord can be used in this portable. Protection from abrasion is afforded at every point by insulated bushings of hard fibre. In its use it brings the lamp just where it is needed over the work, securing the best possible service from the light, and permitting the use of low candle-power lamp with correspondingly low cost for current.

WORCESTER LAWN MOWER.

Worcester Lawn Mower Co., Worcester, Mass., J. C. McCarty & Co., No. 10 Warren Street, New York, selling agents, are the

manufacturers of the Worcester Lawn Mower, of which we give an illustration. It is a ball-bearing machine that has a drive wheel of ten inches. It is provided with large wheel bearings, with ball races $1\frac{1}{2}$ inches in diameter, with tool steel balls 5-16

WORCESTER LAWN MOWER.

of an inch in diameter. It has ground cones and a patent cone adjustment, from which the cones cannot work loose. The reel has four tempered tool steel knives. The manufacturers claim this mower to be of the highest grade of materials, and the easiest running machine on the market. It has an under knife made especially for this machine, by welding a piece of tool steel a half-inch wide to a piece of Bessemer steel which is then hardened and ground, making the best under knife ever put on a lawn mower. It is made in five sizes: 12 inch, \$14; 14 inch, \$15; 16 inch, \$16; 18 inch, \$17; and 20 inch, \$18.

A SPECIAL OFFER.

The Rose Manufacturing Co., 505-513 W. 50th St., New York City, is offering to the trade their Family Water Cooler, Model

ROSE FAMILY WATER COOLER, MODEL F.

F., shown herewith, at the greatly reduced price of \$40.00 a dozen with bottles. They were formerly sold at \$7.00 each, retail, without bottles. As these Water Coolers are considered to be the best of their kind and adaptable for home use, and as they are guaranteed in every respect to be free from defects, it will be of advantage to any dealer interested to write for further particulars about this special offer.

JUST AS HE THOUGHT.

A small boy was reciting in a geography class. The teacher was trying to teach him the points of the compass. She explained: "On your right is the south, your left the north, and in front of you is the east. Now, what is behind you?"

The boy studied for a moment, then puckered up his face and bawled: "I knew it. I told Ma you'd see that patch in my pants."

J. STEVENS ARMS & TOOL CO.'S IMPROVEMENTS.

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., with a constant endeavor on their part of so improving their firearms that they will invariably be found up to date in every respect,

CHAIN AND NAIL MAKING.

The following interesting account of the Dudley chain and nail industry is taken from a report by Miss Martindale, lady inspector of factories: Chain and nail-making, says the *Iron-*

STEVENS FAVORITE RIFLE NO. 17.

have taken their Favorite Rifle No. 17 and by the addition of a sporting rear sight and a Rocky Mountain front sight, as shown in the illustration herewith, have so greatly improved it that it is destined to be more of a favorite than ever. This addition will

mongers' Chronicle, may be classed as a home industry. The workshops are usually situated in the back yards of cottages. In each workshop there are several separate benches or "stalls," on which the metal is shaped, and in the centre a large furnace with

SPORTING, REAR SIGHT.

ROCKY MOUNTAIN FRONT SIGHT.

undoubtedly add materially to the value of the rifle, and yet they are not making any advance in the price. Among other improvements, they have added a new extension rib to the No. 250 series of their hammer guns, and their No. 350 series of hammerless

bellows, or in the chain workshops a small furnace to each stall. The workers hire these stalls, and the rent which they pay usually covers the use of the glee. They obtain the iron in the form of bundles of long strips from the warehouses; each bun-

NO. 250 RIFLE—SHOWING THE EXTENSION RIB.

guns. The new check hook, which they are using on all their double-barrel guns, takes off all strain from the forearm, and these two improvements make the guns in the series noted above especially strong, preventing their shooting loose in the heaviest charges of dense powder.

SAVAGE "MODEL 1899" TAKE DOWN RIFLE.

The Savage Arms Co., Utica, N. Y., with very slight alteration have been able to convert their regular "Model 1899" Rifle into a Take Down, as shown in the accompanying illustrations, without

dle weighs about 60 lbs. On taking out the iron they are informed of the price they are to receive and the amount of waste which is allowed. Whole families are found employed in one workshop; in one place a woman of 70 and her three married daughters are all busily engaged. The hours do not seem to be excessive; many of the women do not work on Monday, and only a few hours on Saturday morning. In several of the workshops the period of employment is from 9 A. M. until 9 P. M. Certain of the workers take apprentices. In nail-making the period of apprenticeship, during which they receive no wages,

SAVAGE "MODEL 1899" RIFLE.

in any way sacrificing strength or durability. The Take Down feature is referred to as being the simplest that has ever been devised for a high-power rifle, and to be no more trouble to take this rifle down than it is the ordinary double-barrel shot gun. When

is nine months. In chain-making the length of apprenticeship is one year. Nail-making by hand is become gradually less. With regard to chain-making this is not the case, owing to the difficulty experienced in devising a machine. It is undoubtedly

SAVAGE "MODEL 1899" SHOWING THE TAKE DOWN FEATURE.

the rifle is assembled and the fore end in proper shape, the barrel and receiver are locked securely together. This is claimed as being a distinctive feature of the Savage Take Down. The Savage Arms Co. can furnish any of the round barrel "Model 1899" rifles illustrated in their catalogue, with Take Down feature, at an additional charge of \$5, excepting the Featherweight.

very arduous work, and carried on in squalid and poor surroundings.

To endeavor to work upon the vulgar with fine sense is like attempting to hew blocks with a razor.—POPE.

LET ME
DO YOUR**COOKING**

Why worry, watch and fret over a hot stove when you can put your meat, vegetables, custards—in short, the whole meal for the whole family—into my ample shelves and cook it, as food never was or can be cooked in any other way, over ONE BURNER of stove, range, gas, gasoline or oil stove?

I come in both round and square shapes—both kind have whistles
Prices \$2.00

The TOLEDO COOKER CO. 1336 to 1342 West Bancroft St. TOLEDO, OHIO.

THE POLAR WATER MOTOR.

The A. Rosenberg Motor and Mfg. Co., Baltimore, Md., are the manufacturers of the Polar Water Motor shown in the illustration herewith. The Motor which we illustrate is the seven-inch decorated and enameled Adjustable Water Motor. It has a steel shaft 5 inches long, $\frac{3}{8}$ inch diameter, with brass

THE POLAR WATER MOTOR.

hub, brass discs and brass pulleys, for either round or flat belt. It is shown here driving a family sewing machine, with auto-brake (will fit any sewing machine.) It can be run on any ordi-

nary house supply with 20 to 75 pounds pressure. It can be used with any pressure above 75 pounds when used for driving light machinery. Uses from 10 to 20 cubic feet of water per hour. The same Motor can be used for running a fan.

THE PROJECTOR OF SOME HANDSOME FIRE SCREENS.

The S. M. Howes Co., Boston, Mass., produce some of the most artistic and decorative Fire Screens which it is possible to conceive of; and as a guard against vagrant sparks that sometime interfere with the peaceful serenity of the occasion, they are convenient and positively safe. The principal enjoyment of a modernly constructed dwelling is the glowing fire emanating from the open fireplaces, with which they are adorned; when

the convenience of their folding screens may well be studied, particularly as they may be folded and placed to one side of the glowing embers, where they do not disturb the artistic harmony of their surroundings. Their screens allow a free passage of heat from fireplace to room. They make brass screens to conform to the best representations of the various art periods, in a large variety of sizes, which they can furnish to correspond with fixtures for lighting and other Hardware. They also make a large variety of black and gilt finished screens of a cheaper metal, so that their screens meet all requirements. Prices from \$1.50 to \$50, according to size and material. Complete illustrations and prices will be sent on request.

OUR CANADIAN LETTER

TORONTO, May 5, 1906.

ONTARIO HARDWARE DEALERS ORGANIZE.

At last Ontario Hardware men have followed the example of the retail Hardware merchants in the United States and Western Canada and have organized for the betterment of trade conditions and the correction of the many abuses that exist in Ontario as well as other sections of Canada and the United States. The catalogue house evil is not so important a factor in Canada as in the United States but the mail order houses are steadily gaining strength and the postmasters throughout Canada have recently formed an association, one of the demands of which is the right to compile lists of names of persons receiving mail at their offices and the unrestricted right to sell such lists to mail order and patent medicine concerns. There are numerous evils which require action on the part of an association but the chief of these is the price-cutting in wire nails and fencing, cement, churns, etc., and the sale of paints, cutlery, tools, woodenware, etc., to druggists, grocers and general merchants who use these Hardware lines as a bait to catch trade in their own lines. Overcharges for cartage, freight and express are also important matters which deserve much consideration.

For a year past there has been a quiet but persistent educational campaign carried on in favor of organizing a Retail Hardware and Stove Dealers' Association in Ontario similar to the Western Association organized in Winnipeg two years ago. This finally resulted in a few of those favorable to organization getting in touch with each other and the calling of a convention in Toronto on Good Friday, on less than ten days' notice. Considering this, therefore, the representation of over two dozen at the convention and the receipt of letters from about a dozen more indicated the strength of the desire for an association.

THE GOOD FRIDAY CONVENTION.

A. W. Humphries, Parkhill, the convenor of the convention, was the chairman of the convention, and Weston Wrigley, who as editor of *Hardware and Metal*, had been chiefly responsible for the agitation in favor of organization, was chosen secretary, both of these officers being re-elected when it was definitely decided by the convention to organize as the Retail Hardware and Stove Dealers' Association of Ontario. The other officers chosen were W. G. Scott, of Scott & Murphy, Mount Forest, first vice-president; J. R. Hambley, Barrie, second vice-president, and John Caslon, Toronto, treasurer. These officers form the Executive Committee and they are actively pushing forward the work of organization, circulars having been sent to every dealer in Ontario and a Hardware merchant. O. M. Hodson, Bolton, having been set to work to enroll as many members as possible before the adjourned convention to be held in Toronto on May 15 and 16. At this convention a proposition will be voted upon that the new organization merge itself into the Retail Merchants' Association of Canada as a Hardware section, along with grocers, druggists, dry goods and other sections. The feeling is decidedly opposed to this, however, and the present association will, undoubtedly, continue as an entirely separate organization, co-operating only with the other associations of retailers in matters of legislation affecting alike all branches of trade.

At the time of writing over fifty members have been enrolled and about forty towns and cities are represented on the membership roll. It is expected that over one hundred will be in attendance at the convention. An interesting program of addresses has been arranged and the social features include a banquet to be tendered the delegates by the publishers of *Hardware and Metal* and an automobile ride around Toronto by the delegates.

EXCELLENT SPRING TRADE.

Jobbers in all the large centers report a lively spring trade in builders' Hardware, wire fencing, lawn goods, garden and farm tools, screens, refrigerators, and other Spring and Summer goods. Outdoor sporting goods have also had an exceptionally good sale owing to the fine, clear weather and dry Spring. Bicycling has experienced considerable of a revival, baseball is more popular than ever, while roller skating is again winning its way into popularity, roller rinks having been established in several places. Building is reported brisk in all parts of the country, the open winter having allowed contractors to clean up old contracts and get an early start this Spring. As for instance, the figures of Toronto might be quoted, they showing permits issued up to

April 30 this year amounting to \$3,343,168, as compared with \$2,086,964 in last year's record-breaking figures. Manufacturers and jobbers are rushing to keep up with their orders in the expectation of a heavy demand keeping up all season. With an exceptionally warm summer in prospect trade in screen doors and windows, freezers, refrigerators, lawn goods, hammocks and other Summer goods should reach record figures.

INDUSTRIAL AND TRADE NEWS.

Fred C. Lariviere, president of Amiot, Lecours & Lariviere, wholesale and retail Hardwaremen, Montreal, has returned from a trip to the States where he has made a study of mutual Hardware insurance with a view to developing a similar protective movement here. Mr. Lariviere is treasurer of the recently organized Hardware section of the Retail Merchants' Association in Quebec Province.

C. M. Cutts, Hardware dealers and manufacturers of retail ash sifters, Toronto Junction, have moved into fine new premises.

A glass factory is to be established at Eburne, a suburb of Vancouver, B. C.

Brandram Bros., London, Eng., represented in Canada by Henderson & Potts, Halifax and Montreal, are to establish a large lead corroding works at Montreal. The Carter White Lead Co. already have large corroding works at Montreal.

The Capewell Horse Nail Company's branch factory at Toronto has been greatly increased in capacity since its establishment last September. A new power plant is now being installed for lighting and factory purposes.

John M. Bond, who for over fifty years had been engaged in the Hardware business at Guelph, Ont., died suddenly in Montreal recently, aged 69 years.

John Miller & Co., Montreal, have been incorporated with a capital of \$100,000 to continue the wholesale Hardware and sporting goods business carried on by them.

Work has been begun on the new \$110,000-warehouse of the Marshall-Wells Co. at Winnipeg, the building to be ready for occupation next December.

The George Phillips Cut Glass and Cutlery Company, Sheffield, Eng., have opened a branch at Montreal.

The Wade Manufacturing Company, Dundas, are to manufacture silver-plated novelties.

The Starr Manufacturing Company, manufacturers of skates, bolts, nuts, etc., Dartmouth, N. S., are to form a merger with the Dartmouth Rolling Mills and the Dartmouth Electric Light Companies.

A strong deputation of jobbers and retailers visited Ottawa a fortnight ago and requested the Dominion Government to revise the law under which trade "combines" were proceeded against last Winter. It was pointed out that corporations, professional men and laborers were allowed to combine together in associations and merchants and manufacturers should have the same right. The request will probably be granted and no more will be heard of the scores of trade associations threatened with prosecution.

A NOVEL WINDOW DISPLAY.

One of the most original samples of window dressing shown in Canada this spring was the work of Mr. S. Wetmore in the windows of A. M. Bell & Company, Halifax, N. S. Mr. Wetmore is a traveler whose love of art has won for him an enviable reputation in many directions. The window displays, which were entirely original and made of stock goods exclusively at a cost of less than \$1 for material, are described as follows: The north window represents with perfect fidelity a farmhouse and mill, the wheel propelled by a stream of real water, which runs lightly over its pebbly bed. There are the stables, barn and usual outbuildings, while teams partly laden with hay stand about. In the foreground is the ferry, with boats all ready to take you across the tiny river. This flourishing property on all its fences and the walls of its outbuildings set forth the excellence of "Cyphers'" incubator, and in the south window, walking about in comfortable environment of a big brooder, are eighty-two little chickens, to whom the brooder serves the place of the wings of the mother hen, and who, through the medium of Cyphers'" incubator were hatched out recently. Eighty chickens out of a total of one hundred eggs is a fairly satisfactory result. Both windows were magnets for thousands during Easter week.

REVIEW OF THE MARKETS.

WIRE NAILS: The general trade are alive to the fact that the Wire Nail market is enjoying an unusual activity, and have been placing the orders that average up their stocks in fine shape. April has shown up well on the sales sheets. The continued activity in building requirements in all parts of the country makes it a confident market. Quotations are well maintained, and are as follows: f. o. b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|--|--------|
| Carloads to jobbers | \$1.85 |
| Carload lots to retail merchants | 1.90 |

New York.—The local demand is fully up to the standard, and the jobbers' prices are fully maintained. Small lots from store are quoted on a basis of \$2.15 per keg.

CUT NAILS: No change in prices was made at the recent meeting of the Cut Nail Association, the old quotations being reaffirmed. The current demand is a moderate one, but a steady increase in the sales is reported. Quotations are as follows: \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than New York; \$2 for less than carloads on dock, New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—The local market on Cut Nails is in good shape, and proper attention is paid to jobbers' prices, which are fully maintained. Quotations are on the basis of \$2.05 per keg for small lots from store.

BARB WIRE: Orders are being received by the mills in good shape for specifications on contracts, while the demand on account of new business is a satisfactory one, representing as it does a filling in for stock requirements. Quotations are firmly held as follows: f. o. b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|--|----------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots..... | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: Business is reported as being good; orders are being received in considerable volume by the mills, representing a demand from Telephone and Wire Fence makers, who are reported having a larger and more active consumption than usual. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers, 6 to 10. The other numbers of Plain and Galvanized Wire take the usual advances.

WIRE PICTURE CORD: Recent prices announced by the manufacturers of Wire Picture Cord indicate an advance of 10 to 15 per cent. in current quotations. The leading makers have had a conference to correct existing irregularities in quotations, of which the advance is the result.

REFRIGERATORS: While the leading makers of Refrigerators are reported as being almost filled up with orders to the limit of their production, on account of the high prices prevailing on almost everything used in their construction, they have decided to advance the prevailing prices 10 per cent. A comparison of cost of the various materials with prices which obtained five years ago would justify more than this stiffening in prices in the present condition of affairs.

ROPE: The following prices may be said to represent the market:

| | Cents per Pound. |
|-----------------------------------|------------------|
| Pure Manila, 7-16 and larger..... | 12½ @ 13 |
| B Quality Manila | 11½ @ 12 |
| Pure Sisal, 7-16 and larger..... | 9½ @ 10 |
| No. 2 Sisal, 7-16 and larger..... | 8 @ 8½ |

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

| | |
|--|-----------|
| White Sisal (500 feet to the pound)..... | 9¼ @ 9½ |
| Standard (500 feet to the pound)..... | 9¼ @ 9½ |
| Standard Manila (550 feet to the pound)..... | 10½ @ 10¾ |
| Manila (600 feet to the pound)..... | 11½ @ 12 |
| Pure Manila (650 feet to the pound)..... | 12½ @ 13 |
| Less than car lots ¼ cent advance. | |

LINSEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

| | |
|-------------------------------------|----------------------|
| In lots of less than 5 barrels..... | 43 cents per gallon. |
| In lots of 5 barrels or more..... | 42 cents per gallon. |

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil65 cents per gallon.

THE PHILADELPHIA TRADE.

The amicable settlement of the Anthracite Coal Strike has apparently dispelled the last cloud which overhung the horizon of trade, and now there appears to be no reason why we should not look for a continuance until Summer of the extraordinarily good demand which has been such a prominent feature of the year 1906.

It is remarkable how evenly and strongly this demand is maintained, and here it comprises so many varied lines of goods. Articles that in former years have been in slow demand, are now sought out and ordered in fair quantities. As an illustration we might mention a certain line on which for many years we have sent to our salesmen prices every Spring with very poor results. This year we decided not to send out any prices on this line, as the sales were too small to justify the trouble, but to our surprise we find that our April sales alone on these goods amounted to more than the entire sales in any previous year for some time, and as we had not taken the trouble to even remind our salesmen of the goods, it was certainly a remarkable illustration of the universal demand.

Naturally prices are firm and disposed toward higher figures. A notable scarcity has developed on Wire Cloth, although as yet no one has had the courage to mark prices up, but conditions would warrant a greatly increased price. Southern trade has been unusually good this year, but in the far South this is now drawing to its natural close—not to re-open until some time in June—but with cotton at present prices there seems to be every reason to look for a continuance of Southern prosperity. Locally there is a very satisfactory condition of trade. Dealers generally are busy, and although buying only for their immediate wants, are purchasing in the aggregate a great deal of Hardware.

BIDDLE HARDWARE CO.
James H. Ritter.

THE CLEVELAND TRADE.

To cause doubt of the integrity of men, interferes with prosperity. Confidence is more important than capital, without which business could hardly continue. Experience teaches that a large majority of men are honorable, but if the headlines are accepted as true, real rascals are only distinguished from the rest of us, in having the opportunity, or in being found out. We have been surprised to find that among great financiers some have proved unworthy but peculiar conditions have contributed more than criminal intent to much of this irregularity. No State, county or township treasurers in Ohio had reason for thinking they were doing an unlawful act in accepting compensation for the use of funds that came into their hands providing the money was ready when the public wanted it. They had the custom of a hundred years to justify their actions. In a spasm of virtue it is well to provide against wrong, but universal condemnation for men who may not have risen above the generally accepted moral status leaves no dividing line between unintentional and intentional criminality, which is dangerous to all moral sense and opens the way of escape for the real criminal from public

condemnation. We can bear any loss but the loss of respect for integrity. The scornful sneer against honor is worse than the bubonic plague, as that can be quarantined against. When the public believe that no woman is virtuous and no man honest the last stage of degradation has been reached, and the estimate we have of others is a reflection of the estimate we have of ourselves. A revival of indignation against slanderers of human nature is badly needed, as the value of life so largely depends upon the estimate we have of others.

The urgent demand for shipment and the large number of letters hurrying shipment of Spring goods, forbid the conclusion that depression threatens trade. The jobber's trouble is to supply the goods wanted; the demand from consumers is the prime factor, and as long as that continues to compel railroads to increase their facilities to move the products, everything else is compelled to move also. The awful calamity at San Francisco, while it is responded to by the donation of millions for relief of the suffering, has little influence on business. It is evidence of greatness to be able to meet such a calamity with courage, and it shows that sympathy and generosity, which are germane to integrity, are not dead.

What the effect will be on the money market from the San Francisco loss is uncertain. In a loss of three or four hundred millions, which will take that amount of money in circulation to replace, will likely have some effect. Besides the unusual amounts being used by our large transportation lines for extensions, suggest that the limit of liability to furnish may be reached. The prodigal investments in stock and bonds in the last few years would have taxed the ability of any past decade. If all this can be cared for, it will be evidence of remarkable improvement in our financial condition. If, however, two dollars are wanted with only one to supply it, however rich we are on paper, a money panic will follow, and it might be well to take off a balance sheet of our national resources and carefully consider our condition. The amount of money necessary to do business without extraordinary expenditures is also greatly increased.

THE LOCKWOOD-TAYLOR HARDWARE CO.,
C. B. LOCKWOOD, Pres.

THE SAGINAW TRADE.

Business is fair and collections good. This vicinity has not been troubled this year with high water. The farmers are plowing and seeding and there will be a large acreage of sugar beets this year. We look for a fair and normal trade the balance of the season.

MORLEY BROTHERS.

THE PITTSBURGH TRADE.

Pittsburg is about as busy as it can be to be comfortable. In the jobbing trade, April closed with a large increase in volume of trade over the same month last year. Spring weather came with a rush about the middle of April and brought a rush of orders with it, so that jobbers have had all they could do to keep up with the demand. It is to be regretted that such a large proportion of spring goods are sold below the average cost of doing business, and while the jobber is working his force to the limit, if he stops to think of it, a large part of his output is made purely as an accommodation to his customers and without profit. Happily for this section, the coal strike does not affect us and mines are generally running as usual. Both east and west of us it may take some time to get together as both sides seem determined to hold out.

LOGAN-GREGG HARDWARE CO.

THE CHICAGO TRADE.

We are pleased to announce that we have just leased and taken possession of the building joining us on the West, which was formerly occupied by the Beckley-Ralston Company, which gives us just fifty per cent. additional space, which will put us in a position to take better care of our greatly increased business. The front half of the first floor of the new addition will be used expressly for our Cutlery, Sporting Goods, Fishing Tackle, etc., and the back half will be used for laying out city orders and taking care of all city business. We have a lease for one year with the privilege of from five to ten years. We have been badly crowded for the past two years. This additional space is going to help us out in fine shape and put us in a position to take better care of our orders than ever before. Prospects for business were never better.

TROUT HARDWARE CO.

GEO. W. TROUT, Pres. & Treas.

THE ST. PAUL TRADE.

The Hardware dealers of our territory are prospering beyond their expectations. Of course, there is competition. Some of it is disagreeable. In the whole, conditions are splendid. Prices are firm with a tendency toward higher prices. Goods are scarce in many lines and we believe that these conditions will prevail when Fall and Winter goods are needed. We advise everybody to buy ahead so that the goods will be on hand when wanted. We are advocating, and know it to be a good policy for the dealer to get his goods in before the season is on. We believe that if lanterns sell in September, the dealer should get them in during August. Then, he will surely have the goods when wanted, and will catch some trade which buys ahead of needs, and,

furthermore, will advertise by showing the goods that he will be supplied with; in fact, is ready when the season begins. So go through the line and buy early, get the goods in early and you will win by so doing.

HACKETT, WALTHER, GATES HARDWARE CO.

THE GRAPHITE TRADE.

In these times of rush business there is nothing that we can say different from what we have been saying for the past year. We are busy in all of our departments without an exception. The only thing new that we can say is that our branch store at 304 Market Street, San Francisco, went down in the first part of the earthquake and is a total loss with stock to the amount of about \$20,000. It is reported that our warehouse is only a partial loss but for the present all shipments will have to be from headquarters, here in Jersey City.

JOSEPH DIXON CRUCIBLE CO.

THE SAN FRANCISCO TRADE.

When I last wrote *HARDWARE*, a fortnight ago, everything here was in happiest condition and commercial activity at prime standard. My letter was posted on the evening of April 17th. At break of day next morning I was awakened by a lightning-like revolving sensation, thrice repeated, with an alternate backward action, my room's crowded contents all flying back and forth at random, and myself on the floor with my mattress for a covering. It was the fury of a colossal earthquake that made a ruin of San Francisco. When the mighty jar subsided, I escaped down the broken and twisted stairways, I know not how, and with a few immaterial bruises, and body and right hand so glass-cut by fallen wall pictures that overhung my pillow and bed that I found it quite inconvenient by bandaged hand to write these lines. Before my benumbed senses returned to a degree of composure sufficient to act wisely, a fire followed the earthquake and fiercely burned at will, for the reason that the quake had dislocated the water mains of the city and the few fire engines that were left for duty could get no water, the consequence being that I could not secure a handful of relics of the comfortably furnished house I possessed before it went up in smoke, as did the homes of tens of thousands of others, leaving standing at present only the smallest one-third section of the beautiful San Francisco we all were very proud of. But I am thankful to Providence that I am alive; that it was no worse. "How could it have been worse?" asked Manager Jones of the Alexander-Yost Hardware and Tool Co., whose firm lost everything and whom I met two days ago. My response was like this: "You know that out in the South Side, not far from where your warehouse stood, there is a spot of ground nearly an acre in extent that subsided fully seven feet. Suppose that all the ground that San Francisco occupied had sunk sufficiently to let in the waters of the Pacific Ocean. Then it would have been worse." The most substantially built North Side of San Francisco, the wholesale and retail division, and the South Side, a residence section, were reduced to cinders. The Western Division of the city, mainly a residence portion, still remains, having escaped the fire, but is crumpled and torn by the earthquake.

In this Western Division are two old-time houses in the trade, the Knowles Hardware Co. and the Ellis Hardware Co. I talked with both Mr. Knowles and Mr. Ellis, and found each thoroughly optimistic as to the speedy upbuilding of the city. Only the plastering of their stores is shattered and torn and they and regular and extra clerks were fully busy dispensing oil stoves, nails and staples to crowds of customers. And where are the scores of down-town, burned-out retail Hardware dealers and their salesmen? I have seen some and heard of others, and can only locate them in a general way as among tens of thousands that are occupying the army tents now pitched among the flower beds throughout the fourteen-hundred-acre Golden Gate Park, and over the green hillsides of San Mateo county that afford a view of the burned city. These merchants of the trade that I have seen, and others that I have heard from, are imbued with a hopeful feeling of good cheer and the spirit of optimism, and are impatiently awaiting the opening of the bank vaults to see the condition of their treasures, wishing for the best and minded to stay with San Francisco for a renewed business career. The manufacturers and wholesalers of Hardware, iron and steel are outspoken as to their intention to rebuild business houses beyond what they were, and this seems to be the line of thought predominating all the burned-out commercial community.

INDUSTRIAL PRESS ASSOCIATION.

HE WAS A WAITER.

Myer (entering cafe)—Hello, Gyer! I hear you quit your job in the bank. What are you doing now?

Gyer (seated at table)—I'm a waiter in this restaurant.

Myer—Is it possible!

Gyer—Yes; I'm waiting for my dinner.

DOWNING'S U. S. CUSTOMS TARIFF.

R. F. Downing & Co., 15 William Street, New York, owing to the active demand which has exhausted Downing's former editions of the Customs Tariff Act of 1897, have now issued their fourth edition, which has been revised to January 1, 1906, and which is ready for delivery. The book is alphabetically arranged with rate of duty on each item, and special reference to the paragraph in the law that describes the article. It contains references to all Treasury Department, United States and General Appraisers' and United States Court decisions. French, Portuguese, German, Italian, Cuban and Swiss Reciprocity Treaties. Customs Provision Sealing Act of December 29, 1897. Pure Food Act of March 3, 1903, and list of Parcels Post countries. This book will be found invaluable to all who wish to obtain information relating to Custom House matters, as it is used exclusively by the Treasury Department and Government officials.

A UNIVERSAL FAULT.

In the advertising pages of McClure's Magazine for March, appears the following advertisement of that magazine, says *Drygoodsman and General Merchant*. "A gentleman recently told us that he went into a large department store to buy skees for his children. He was anxious at the same time to get information as to sizes and weights they would carry, etc., but the clerk could not tell him. All he could do was show him the skees and give him the prices. We wrote to an advertiser up in Maine somewhere, and by return mail received a booklet telling him all the things he wanted to know, as well as the prices. This very pertinently illustrates the value of buying goods in McClure's—the market place of the world. There you are waited on by the proprietor himself. The fact that when he writes an advertisement or a booklet it answers the questions of hundreds, and perhaps thousands, of his customers, makes it important that he do this work himself, and so in trading in this marketplace you get the services of the man who knows best, rather than those of a clerk who can only show you the goods and give you the prices."

No one can say the point taken and the argument made are not good—good from the standpoint of the magazine and of the man who has goods to sell and wants to sell them to the public direct, if possible. The square truth of it all has been left for a magazine advertising for advertisements to state and the store managers who have known it all for years and years are still pondering over and finding fault at the very trouble which they continue to allow to exist in their stores to the advantage of the people who sell goods by mail and by catalogue.

The great body of retailers will attempt to make themselves think that the general public is perverse and more anxious to buy of the advertisers who do business at a distance than of the advertisers who do business at home. If these same retailers will ponder a few minutes over the above advertisement in that magazine they will find more meat for thought than may have come to them in many a long day. The average customers come into the store in ignorance of what the store has for sale, and often in ignorance of what may be suitable and best for them to buy—the same as did the man who wanted to buy skees for his children. They are ready to buy, but they want to buy on good information. The clerk is set before them to sell. Sell, sell, sell, is dinned into his ears day in and day out. He is expected to sell, he is told to sell and he knows he must sell in order to hold his job. He does his best to sell, and often, all too often, he gives the customer information that may be right and may be wrong, simply, because he knows he is expected to sell. When he is cornered, as was the department store clerk, he has to back down and out—and lose the sale. He loses the sale, not because he is lazy, unwilling, listless, inattentive, foolish, impudent, saucy, or because of the great number of faults that are so often laid at the door of a clerk's failures, but because he doesn't know—he is ignorant and not in the least to blame because he is ignorant. The boss, whoever he may be, has never taken the trouble or the thought to place information regarding the goods in the way of the clerk, much less impart that information himself.

Is the clerk very much to blame, when the boss himself never thinks that information regarding the goods is a necessity toward the selling of them? Is the public very much to blame when it finds accurate description of goods in booklets, circulars, catalogues, and orders the goods because of that accurate and satisfying information? Thousands of clerks sell goods in a mechanical manner every day—sell millions of dollars' worth of them—and store managers don't stop to think about the dense ignorance of these clerks concerning the goods they sell. The question is raised as to how to make better salesmen of the clerks already behind the counters and somebody tries to teach salesmanship in a school—and the supposed salesman is put behind a pile of goods and told to "sell" them. He doesn't know the goods, nor does he know anything about them, but he is

25 YEARS' REPUTATION BEHIND EVERY BLADE

The **SECRET**
THE 3 STARS BLADE 

Manufactured under a process
peculiar to Kampfe Brothers

New York, Apr. 2, 1906.

Mr. R. U. PROGRESSIVE,
Retailers of Cutlery and Hardware:

We are pleased to solicit your patronage under an agency for the Original and Mechanically Perfect STAR SAFETY RAZOR, which is endorsed by men of all nations.

You, as a dealer, are offered substitutes, possibly at a lower price. Have the sales and profits on the substitutes been satisfactory to you?

Do you know that you are purchasing at the same price quoted to your competitors, and if not, are you willing to subject yourself to such methods?

We hope to interest you to write us for terms and quotations to authorized agents for the sale and distribution of Star Safety Razors and accessories.

If agreeable to you we will submit a proposition, feeling confident that it will meet with your approval and hearty co-operation, and that you will accept our offer, considering it for your business interest to do so.

In anticipation we desire to thank you for an early and favorable reply.

Very truly yours,

KAMPFE BROTHERS, Dep't 'S'

Dic., D. L. W. 2nd.

expected to "sell" them to a confiding public that is cursed and confounded because it goes away unsatisfied and orders something from a catalogue or other advertisement that gives the information desired.

DESPISE NOT THE DAY OF LITTLE THINGS.

There are a lot of little things around a store which need attention. Some goods are taken out and shown to a customer who does not purchase. A moment's display of irritation may lose that customer for the store. It is a little thing, but the trade of the customer may be worth hundreds of dollars a year. A woman rushes in and asks if she may use the telephone. She is told, in a grudging way, that she can. Perhaps she accepts, and perhaps she becomes offended and declines to do so. Perhaps, also, she decides that she does not want to trade with that establishment any longer. Another customer gone, because one of the little things has been neglected.

A clerk goes to ask for a position. He ought to be shaved and have his shoes polished, but he does not. He thinks that it will make no difference. He is mistaken. Possibly the merchant to whom he applies for a position is a man who keeps himself scrupulously neat. He immediately notes that the applicant has dirty shoes, that he needs a shave, and that his finger nails are filled with dirt. He doesn't want that kind of an employee, and so the unfortunate young man who overlooked a couple of little things is told that his services are not needed. If he had paid attention to the little things, he might have had a good position. It is a little thing to remember—to lock the store at night—and yet it is important, for if this is not done, burglars can enter with ease and carry off whatever they please. It is a little thing—to be careful to make the right change—but if one does not give a customer all that he is entitled to, that customer may jump to the conclusion that the clerk or the store is endeavoring to cheat him, and withdraw his custom. It is a little thing to be certain that a bill has been added correctly, but if this is not done the debtor may take offense and believe that the mistake was made purposely. There are little things by the score to which a clerk must give attention, and which, if he does not, will run into big things.

Therefore, look after the little things carefully. If you can master them, you can master the big ones, too.—*Exchange.*

STANDING ON A GREASED PLANK.

A large business is like a steamship bound for the port called Success. It takes a big force to operate the boat and eternal vigilance on the part of the captain or the man at the wheel to keep it from being stranded high and dry on a shoal or sunk quite out of sight by the bumpings and joltings of rival lines.

To keep this steamship moving, the captain requires the assistance of hundreds of people who have a singleness of aim—one purpose—a desire to do the right thing and the best thing in order that the ship shall move steadily, surely and safely on her course.

Curiously enough, there are men constantly falling overboard. These folks who fall overboard are always cautioned to keep away from dangerous places. Still there are those who delight in taking risks. These individuals who fall off and cling to floating spars or are picked up by a passing craft usually declare that they were "discharged." They say the captain or the mate or their comrades had it in for them.

I am inclined to think that no man was ever "discharged" from a successful concern—he discharges himself.

When a man quits his work, say, oiling the engine or scrubbing

the deck, he leans over the side calling to outsiders, explaining what a bum boat he is aboard of, how bad the food is, and what a fool there is for a captain, he gradually loosens his hold until he falls into the yeasty deep. There is no one to blame but himself, yet probably you will have hard work to make him understand this little point.

When a man is told to do a certain thing and there leaps to his lips or even to his heart the formula, "I wasn't hired to do that," he is standing upon a greased plank that inclines toward the sea. When the plank is tilted to a proper angle, he goes to Davy Jones' locker, and nobody tilts the fatal plank but the man himself.

And the way this plank is tilted is this: The man takes more interest in passing craft and what is going on on land than in doing his work on board ship.

So I repeat: No man employed by a successful concern was ever discharged. Those who fall overboard get on the greased plank and then give it a tilt to starboard.

If you are on the greased plank, you better get off from it, and quickly, too.

Loyalty is the thing—faith!—*Elbert Hubbard.*

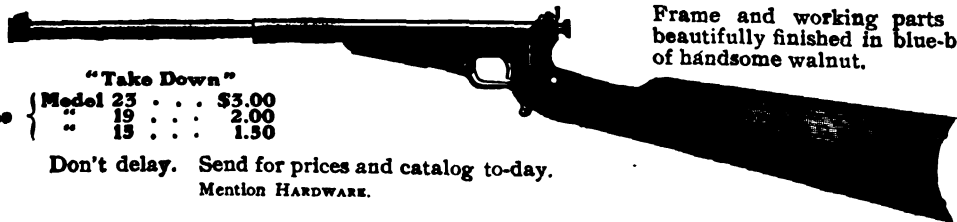

CENSUS OF THE BRITISH EMPIRE.

The report and summary of the census of the British empire in 1901 show that on or about April 1 in the year named the area of the empire was 11,908,378 square miles and the population 398,401,704. These aggregates from a striking contrast to the figures for the United Kingdom, which are included in them, the area of the latter being 121,089 square miles and its population 41,458,721. The reports from which the tables appended to the main report have been derived range, it is stated, from a ten-page pamphlet concerning the 2,253 inhabitants of the Falkland Islands to an elaborate review extending to more than sixty volumes dealing with the manifold races of the Indian empire the population of which approaches 295,000,000 persons, speaking no fewer than 147 distinct vernacular languages. At the time of the census of 1861 the empire comprised, in round numbers, 8,500,000 square miles; in the next two decennial periods no important territorial addition took place, but between 1881 and 1891 the extensions in the East Indies and in the Indian dependency and the great annexations of territory in Africa added about 2,000,000 square miles. Since 1891 further expansions have occurred, principally in Africa and in Asia, raising the grand total, as nearly as can be ascertained, to 11,908,378 square miles, comprising more than one-fifth of the land surface of the globe. In 1861 the population of the empire, inclusive of the Indian feudatory states, was, as far as can be ascertained about 259,000,000; in 1897 it had risen to nearly 283,000,000; in 1881 to nearly 310,000,000; in 1891, largely through acquisitions of territory, to more than 381,000,000; and in 1901 to nearly 400,000,000. Broadly speaking, says the report, the 398,000,000 within the empire may be divided into two classes: "Whites," numbering, approximately, 54,000,000, or 13.6 per cent. of the total, and "colored" population, numbering about 344,000,000. Of the 344,000,000 of colored population over 295,000,000 were either natives of India or descendants of Indian emigrants.—*Bradstreet's.*

"Don't you think that young man is afflicted with a swelled head?"

"No," answered Miss Cayenne; "he's not afflicted with it; he enjoys it."

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 16, 1906.

- 401,327. COMBINATION TOOL. A. J. Bryant, Cincinnati, Ohio.
- 401,357. WASHING MACHINE. J. Q. Leffingwell, Nevada, Iowa.
- 401,407. PADLOCK. G. Brambel, Lake Park, Minn.
- 401,481. TOOL HANDLE. G. Carlisle, Attleboro, Mass.
- 401,490. TUBULAR LANTERN. E. C. Glazier, Rochester, N. Y.
- 401,513. WRENCH. C. Pomeroy, New York, N. Y.
- 401,534. DOOR CHECK. W. S. Barlow, Paterson, N. J.
- 401,535. DOOR CHECK. M. H. Bassett, New Britain, Conn.
- 401,540. LATCH AND LOCK COMBINED. J. A. Campbell, Ellis, Kans.
- 401,560. WAFFLE IRON. E. Hotchkiss, St. Louis, Mo.
- 401,590. CURTAIN POLE SOCKET. H. Reubel, New York, N. Y.
- 401,592. CANDLESTICK. A. Roelofs, Phila., Pa.
- 401,604. BRACE. G. T. Sutterly, Phila., Pa.
- 401,605. PIPE GRIPPING ATTACHMENT FOR WRENCHES. C. H. Thomas, Hancock, Wis.
- 401,614. WINDOW. P. Weber, New York, N. Y.
- 401,630. WASHING MACHINE. W. F. Belton, Greenville, Pa.
- 401,656. MACHINE FOR MAKING HOES AND SHOVELS. H. E. Marchand, Pittsburg, Pa.
- 401,672. CORKSCREW. S. L. Alvord and E. E. Brown, West Winsted, Conn.
- 401,712. COLANDER STEAMER. G. L. Motter, Rich Hill, Mo.

PATENTS ISSUED APRIL 17, 1906.

- 817,740. LOCKING AND SQUARING DEVICE. E. G. Allen, Detroit, Mich.
- 817,741. CURTAIN POLE LIFTER. C. S. Armstrong, Columbus, O.
- 817,748. DROP AND CELLAR DOOR HINGE. Wm. M. Boulden, Wm. I. Boulden, and H. D. Boulden, Chester, Pa.
- 817,759. CURTAIN FIXTURE. H. H. Forsyth, Chicago, Ill.
- 817,799. CAN OPENER. C. A. Phillips, Washington, D. C.
- 817,801. WASHING MACHINE. J. W. Pittock, Phila., Pa.
- 817,826. WASHING MACHINE. A. Wheatley, Phila., Pa.
- 817,845. TEMPORARY HINGE. H. H. Greene, Milwaukee, Wis.
- 817,876. TOOL FOR PRESSING AND PIERCING SEAMLESS PIPE JOINTS. C. S. Schmidt, Erkelenz, Germany.
- 817,878. LATCH. A. Shepard, Plantsville, Conn.
- 817,889. FOLDING AX. A. E. Veon, Brainerd, Minn.
- 817,962. DOOR SECURER. E. Dengler, Gibbon, Nebr.
- 817,971. BROOM BRIDLE. C. A. Hall, New Orleans, La.
- 818,025. WRENCH. E. A. Hardison, Bakersfield, Cal.
- 818,058. WASHING MACHINE. G. A. Thode, Omaha, Neb.

YOU and NAPOLEON

Napoleon overlooked one "little thing"—the sunken road at Waterloo—and it cost him his job. You can overlook "3 in One" and still hold your job. But you'll lose trade. People ask for

3 in One

because they know that it is the "one" oil and the "only one" oil for properly cleaning, polishing, preventing rust and lubricating.

Do you prescribe for your customers or do you sell them what they want?

We will advertise for you to-morrow—write us to-day.

G. W. COLE COMPANY

145 Broadway, New York City.

The America Alarm

Gives you an opportunity to offer a clock, accurate, efficient, guaranteed, at a remarkably low price and is sold at a figure that leaves you plenty of room for profits. Your jobber has the "America."

GET BUSY

That is the one secret of success in the Hardware trade. The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

THE JEWEL COFFEE MILL with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Bristol, Tenn.—The new plant of the Bristol Stove & Foundry Company is now in operation. This company was organized recently by G. G. Harris, of Bristol. Associated with him are the George Brothers, practical foundrymen, who were formerly in business in Knoxville. The buildings of this new plant are divided into rooms of the following dimensions: Casting room, 100 by 60 feet; mounting room, 75 by 50 feet; warehouse, 75 by 50 feet; boiler house, 50 by 25 feet.

Brooklyn, N. Y.—Vortex Manufacturing Company has been incorporated to manufacture Hardware and Hardware supplies. Capital, \$25,000. Incorporators: S. Greenblatt, D. B. Date, J. C. Snackenbergh, Brooklyn.

Buffalo, N. Y.—A certificate of incorporation of the Buffalo Radiator Company has been filed. Business is to be begun with half of the capital stock of \$150,000. The directors, all Buffalo men, are Whitney G. Case, Joseph P. Fell, Henry M. Poole, Harry R. Montgomery and Fred A. Mason.

Chicago, Ill.—Casement Hardware Company has been incorporated; capital, \$14,000; to manufacture Hardware and supplies; incorporators, Robert C. Spencer, Jr., Horace S. Powers, William D. Ordway.

Detroit, Mich.—The P. R. Manufacturing Company has filed articles of incorporation with a capital of \$50,000 for the manufacture of electrical Hardware and mechanical specialties. Of the capital, \$16,000 is in cash and the rest is represented by the plant at 40-44 Larned Street, East.

East Hartford, Conn.—Articles of incorporation have been filed by the Adams Tool Company. The authorized capital is \$50,000. The incorporators are Harry A. Adams and Percy S. Bryant, East Hartford, and Francis H. Peabody, of Hartford.

Macon, Mo.—The Lowell Steam Plow Company is a concern capitalized at \$25,000, with offices at Nos. 1318 to 1324 Union Avenue. It is probable that the offices will still remain in Kansas City, but the plows will be manufactured here. The plant will consist of a large foundry, machine shops, and warehouses.

Marshall, Mich.—The Dobbins Furnace Company of this city has filed articles of association. The capital stock is valued at \$25,000. The stockholders are J. L. Dobbins, A. B. Wagner, G. M. Barrett, J. M. French, E. A. Holtzel, and George E. Chapin of Battle Creek. This company is the successor of the J. L. Dobbins Furnace Company and will manufacture hot air furnaces, etc.

Middletown, N. Y.—W. F. Teuser, of Cohecton, and Harry W. Tuthill, of this city, have formed a co-partnership for the manufacture and sale of the adjustable window screen recently patented by Mr. Tuthill and as soon as the necessary machinery arrives will commence their manufacture.

Morrisburg, Ont.—Joseph F. Howard, who has purchased what is known as the Miller property here, is busy with a large staff of men putting the buildings in order. Mr. Howard proposes to manufacture stoves, radiators, etc.

Morristown, N. J.—The Standard Cooking Utensils Company has been incorporated. Manufacturing fireless cooking boxes, stoves, heaters, ranges, kitchen and domestic utensils, etc. Capital, \$50,000. Incorporators: F. O. Hays, Morristown; F. A. Teraberry, Newark; J. H. Blanchard, Elizabeth, N. J.

New York, N. Y.—Manhattan Electrical Range Company has been incorporated; manufacturing electrical ranges, stoves, etc.; capital, \$30,000. Incorporators: O. H. Leaman, M. A. Leaman, J. H. Wood, New York City.

New York, N. Y.—Pfeifer Bros. has been incorporated to manufacture metal cornices, skylights, etc. Capital, \$3,000. Incorporators: H. Pfeifer, North Bergen, N. J.; W. Pfeifer, Jersey City, N. J.; F. Aue, New York City.

New York, N. Y.—The Durability Company has been incorporated; manufacturing Hardware and Hardware supplies. Capital, \$10,000. Incorporators: E. Phillipson, New York City; H. Torchiani, W. C. Settgas, Brooklyn.

New York, N. Y.—Thomas B. Adams has incorporated to manufacture lamps; capital, \$5,000. Directors: T. B. Adams, Lucinda J. Adams, Edith Adams, New York.

Changes and Improvements.

Batavia, N. Y.—George Wiard, who has always been president and general superintendent of the Wiard Plow Company, has given up the position of general superintendent, and it has been assumed by his son, Louis Wiard. Louis Wiard has been in the works for six years as an assistant to his father.

Bessemer, Ala.—The Day Stove & Foundry Company, located between this city and Jonesboro, has commenced the manufacture of stoves. About a year ago the foundry was started with the view of making stove castings and ultimately branching out in the manufacture of finished articles. The stoves are now being turned out completed and in the near future the plant will be enlarged and the output considerably increased.

Chicago, Ill.—The International Harvester Company has increased its South Side holdings by the purchase of about five acres in Auburn Park. This property will be added to that acquired when the Weber wagon works were purchased, and the whole will be known as the wagon works of the International Harvester Company. The works will cover the entire territory between Eighty-first and Eighty-third Streets, the Rock Island Railroad's right of way, and Wallace Street. The old plant is to be enlarged until the whole space is occupied with buildings, yards, etc.

Connellsville, Pa.—The Wonder Manufacturing Company expect to locate at Mt. Pleasant. The concern employs 300 skilled mechanics and will manufacture a new and up-to-date line of heaters, furnaces, stoves

and heating apparatus. The buildings will be erected at a cost of \$100,000.

Dowagiac, Mich.—The Round Oak Stove Works has just commenced the erection of a large three-story brick addition to its steel range department which will greatly increase the output of that branch of its already immense industry.

Evansville, Ind.—The Advance Stove Works will erect a \$10,000 brick addition to its foundry and warehouse on the block at Read and Pennsylvania Streets.

La Crosse, Wis.—In building construction started in La Crosse by the Lamping and Tool Company in the building of its factory on Third and Jay Streets. According to the blue prints of plans now in possession of the company the building will be absolutely fire proof. The building will be constructed almost entirely of steel and cement.

Pittsburg, Pa.—By almost a unanimous vote the stockholders of the Pittsburgh Stove & Range Company have approved the plan for the reorganization of this corporation under a new charter and reduced capital. From a capital of \$2,000,000, divided into half common and half preferred shares, the company will start soon the name of the Pittsburgh Stove Company with a capital of \$500,000 and a issue of \$600,000 or a reduction of ties of \$900,000.

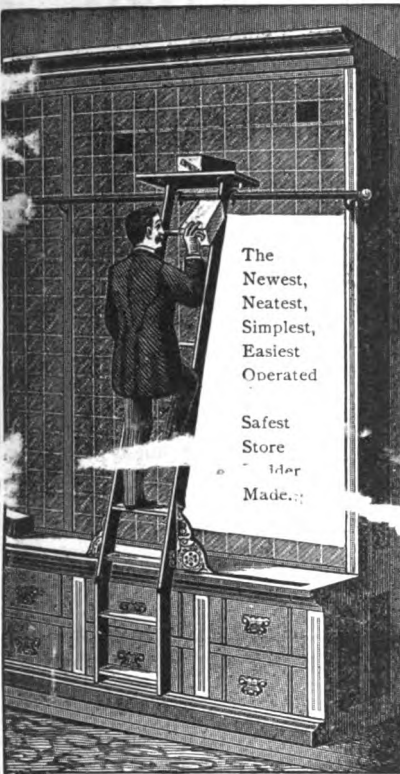

Poughkeepsie, N. Y.—The DeLaval Separator Works, owing to an increase in business, will build a nine section addition, 200 feet long, on the north end of the plant, which will give the company 20,000 additional feet of floor space.

Stamford, Conn.—The property Mix-Riddell Hardware Manufacturing Company, which intends to proceed with the erection of a large plant, company manufactures motors and dynamos, sparking dynamos and magneto dynamos for telephone and battery sets. It has at present a plant in New York, and its New York office is at Liberty Street.

Utica, N. Y.—For some time past the office facilities of the Hart & Crouse Company, one of the city's most thriving enterprises, which has its office at 78 Lafayette Street, has been entirely inadequate for the increasing business of the firm, and has been decided to increase the office by the immediate erection of a fine stone office building on the proper Lafayette Street, just east of the office and owned by the company. Hart & Crouse Company is one of the best stove and furnace manufactories in New York.

West Millbury, Mass.—The Stove Company is preparing to erect a new plant. The buildings will include a dry, power house and machine shop. The foundry will be 40 by 80 feet, one story high and of brick and steel. The power house will be of brick, 24 by 28 feet, one story high. The machine shop will be of brick, 40 by 40 feet, two stories high. The estimated cost of the buildings is \$100,000. It is expected that the buildings will be completed in two months.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Camden, N. J.—The White Motor Co., of 305 Market Street, has been incorporated to manufacture automobiles, motor boats and cycles. Capital \$150,000; incorporators: James W. White, Philadelphia; Charles F. Woodhull and Charles S. King, Camden, N. J.

Decatur, Ill.—J. Saunders; new store at 614 East Eldorado Street.

Green Bay, Wis.—Matt Anheuser; new store.

Kansas City, Mo.—The Dickey Bird Target and Trap Company have filed articles of association in Independence. The capital stock is \$60,000. The company has manufactured bird traps and targets at the Dickey clay plant in the East bottoms for years.

Kearney, Neb.—J. C. Wright is about to open a Hardware and sporting goods store.

Louisville, Ky.—The Prince Wells Company has been incorporated with \$5,000 capital. Prince Wells, H. L. Wells and M. Ehrle are named as incorporators.

Milwaukee, Wis.—The Wisconsin Chlorate Company has been organized by C. E. Mathews, W. C. Martins and John M. Clarke for the manufacture of a new smokeless powder for blasting and sporting purposes; capital \$25,000. They hold the rights to the formula invented by their president, C. E. Mathews, of Rio, Wis., for the manufacture of powder by a new and economical process, for which a patent was granted Feb. 6 of this year. The company's factory will be located near Milwaukee and will be in operation in sixty days, when their capital will be increased to \$100,000.

New York, N. Y.—For the convenience of the uptown demand, C. F. Splittorf, the well-known coil maker, has taken the lease of the four-story building at 1679 Broadway. A full stock of Splittorf coils and other ignition appurtenances will be carried, of course.

New York, N. Y.—M. Laufeld & Co. have incorporated to manufacture sporting goods, etc.; capital \$6,000. Incorporators: Max Laufeld, Brooklyn; John F. Yerkin and Abraham Greenburg, both of New York.

Ottawa, Ont.—A sporting goods store will be opened at 191 Sparks street, under the firm name of Hurd & McBride. They will carry a complete stock of sporting goods and bicycle sundries.

Sturgis, Mich.—The Foyer Manufacturing Company is the style of a new concern that has been incorporated to manufacture bicycles and go-carts. The company has an authorized capital stock of \$150,000.

Traverse City, Mich.—A new bicycle repair shop has recently been opened in the shop formerly occupied by the Eckler firm, the new firm being J. W. Houghton & George Manning. The firm also handles all repair work on autos.

Waterville, Me.—J. M. Blanchard; new store at 151 Main Street.

Changes and Improvements.

Addison, N. Y.—The Reliance Motorcycle Co., conducted by W. H. Ives, will be located in Elmira, N. Y., within a short time. The company will erect a building of its own and market the motorcycle for the season of 1907 from that place.

Chicago, Ill.—The R. J. Ederer Company, manufacturers of fish nets, have leased ground and purchased the building at 2430 Michigan Avenue.

Dexter, Me.—W. E. Haseltine has admitted Olin Warren to partnership; new style, Warren & Haseltine.

Duluth, Minn.—F. M. Smith; succeeded by Smith & Campbell.

Green Bay, Wis.—The firm of Engels & Drissen, have opened a sporting goods department. They have secured the Spalding agency for that city and will carry a complete line of sporting goods, making a specialty of base ball supplies.

New York, N. Y.—R. H. Welles, treasurer of the Badger Brass Manufacturing Company, Kenosha, Wis., who has been in New York seeking a desirable location for the Solar lamp plant, which the company has decided to establish in the East, has completed the lease of large quarters in the David Williams building, Eleventh Avenue, near Thirty-seventh Street, which will be at once equipped for the intended purpose.

New York, N. Y.—The Brower Wheelmen have moved from 117 Greenwich Avenue to their new clubrooms at 98 Greenwich Avenue. The New York Club will make a special effort to be represented in all the races this year.

New York, N. Y.—The G. & J. Tire Co. are about to establish a branch of their own at 10 West Sixtieth Street. Arthur T. Smith will be in charge. Heretofore the G. & J. interests have shared the Hartford Rubber Works' branch.

New York, N. Y.—The office of the Single Tube Automobile & Bicycle Tire Company has been removed to 42 Broadway. It was previously located in the Postal Telegraph Building, at 253 Broadway.

New York.—Schoverling & Welles, formerly at 2 Murray street, who handle various kinds of sporting goods including guns, ammunition and fishing tackle are now located at 6 Reade street.

Reading, Pa.—Robert DeHart; removed to 941 Penn Street.

Riverside, Cal.—Riverside Cycle and Sporting Goods Company have moved from 860 Main Street to 960 Main Street.

Sabetha, Kans.—S. Miner, Jr. has purchased the Hardware and sporting goods business of A. N. McCleary.

Westfield, Mass.—The Pope Manufacturing Company has awarded the contracts for two big additions to the bicycle factory. The additions are one wing 60 by 100 feet, to increase the capacity of the shipping department; one wing 50 by 150, which will be used exclusively for the lamp department of the concern. The buildings will be one story.

Fires.

Milwaukee, Wis.—Fire recently damaged the Quin Book and Sporting Goods Co., of 427 East Water street, to the extent of \$5,000.

Burglaries.

Cleveland, O.—The store of Theodore P. Curtiss of West Twenty-fifth street, was robbed recently of revolvers and cartridges valued at close to \$100.

Grand Rapids, Mich.—About \$1,800 worth of revolvers, knives and sporting goods were stolen from the store of the W. B. Jarvis Co. a few weeks ago.

Miscellaneous.

Dayton, Ohio.—Members of the Dayton Bicycle Club held their annual election of directors recently and the following were selected: Edward E. Burkhardt, Wood Patton, E. C. Baird, R. G. Corwin, Orrin Jones, J. Finke, Harry J. Chancellor, J. B. Parmalee and Thomas McGee. The directors will organize within several weeks.

HARDWARE DEALERS RECORD

(Continued.)

Sulphur Rock, Ark.—George Martin has sold his Hardware store to James Jimereson.

Vail, Ia.—T. J. Giblin has sold a half interest in his Hardware store to Richard McQuire.

Watkins, N. Y.—Harry C. Stouffer has purchased the interest of T. and S. E. Banks, of Ithaca, in the Banks & Woodward Hardware business here. The inventory is being taken and as soon as it is completed Mr. Stouffer will assume possession. The new firm will be known as Woodward & Stouffer.

West, Tex.—E. E. Halloway & Co. have sold their Hardware store to Popp & Cernock.

Wetmore, Kan.—Rabonstorf Bros. have purchased the Hardware and implement business of Hough & Hayden.

Winnipeg, Man.—The Marshall-Wells Hardware Co. has completed arrangements for the construction of a handsome addition to its present quarters at Winnipeg, to handle the increased trade the company has in Canada. The new structure will cost \$150,000, and will be seven or eight stories high. The company's present building in Winnipeg is about four stories high, and the new building will be right alongside. The new structure will occupy a space about 130 by 132 feet in size, and will be of brick and stone. Work will commence on the new building at once.

Embarrassments.

Pontiac, Mich.—A receiver is asked for the Howland Manufacturing Company, manufacturers of sleighs and farm tools. The indebtedness is said to be \$20,000. The court is asked to name A. K. Edgar as receiver.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub

of the Majestic is made of selected Virginia White Cedar, and will stand the action of water a life time. It is bound with our celebrated Electric-Welded Wire Hoops, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the Snow Ball Freezer. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of Virginia White Cedar, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are **JOBBER** or **DEALER** write us to-day for particulars and prices which will surprise you.

DON'T MOVE

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelving and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 14 other standard styles adapted to every form of shelving. It will be mailed on request.

THE EBBING MANUFACTURING CO.

400 N. 8th St. . . ST. LOUIS, MO.

The Simplex Riveter

Price with 12 boxes of Rivets **\$1.50 per doz.**

This is the simplest possible form of tool for setting tubular and split rivets and is also the easiest and simplest to use; all that is necessary being a wagon tire or other convenient hard surface to rest the head of the rivet against and a hammer or wrench to drive with. The illustration explains the method of using.

This is new and sells like hot-cakes at 25 cts., with a box of 50 rivets included.

For sale by leading jobbers, or we will send one dozen prepaid with 12 boxes of rivets on receipt of the price.

SAT. READY

A Blade for every day in the Week

We are running full blast now at the new "Ever-Ready" factory. It's a wonderfully large and wonderfully complete razor makery. All that pressure of too much business in the old place has been overcome with the gigantic output of a half million blades weekly. That world-wide, sweeping, increased demand that is still coming, will be taken care of with precision, thoroughness and uniformity of product to the "happiness" of jobber, dealer, consumer and ourselves. Let the orders come. Prepare strongly. There's new impetus for increased sales forced by increased advertising.

Samples of the improved "Ever-Ready," improved boxing—the new idea in sets—if you'll write.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

HARDWARE BUYERS' DIRECTORY

CLASSIFIED LIST OF ADVERTISERS

Adzes

National Cutlery Co., Detroit, Mich.

Agricultural Implements

Geneva Tool Co., Geneva, Ohio
John H. Graham & Co., New York
American Fork & Hoe Co., Cleveland, O.

Animal Pokes

American Fork & Hoe Co., Cleveland, O.

Anti-Friction Metal

Magnolia Metal Co., New York

Anti-Rust Tin Ware

Reed Mfg. Co., Newark, N. Y.

Anvils

Alfred Field & Co., New York

Arbor Presses

Chandler & Farquhar, Boston

Augers and Auger Bits

John H. Graham & Co., New York
C. E. Jennings & Co., New York
Russell Jennings Mfg. Co., Deep River, Conn.

Automobiles

J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Auxiliary Ironing Boards

Auxiliary Ironing Board Co., Rochester, N. Y.

Axes

National Cutlery Co., Detroit, Mich.
L. & I. J. White Co., Buffalo, N. Y.

Axle Grease

Frazer Lubricator Co., Chicago, Ill.
Snowflake Axle Grease Co., Fitchburg, Mass.

Axle Oil

Frazer Lubricator Co., Chicago, Ill.
The Frank Miller Co., New York
Snowflake Axle Grease Co., Fitchburg, Mass.

Babbitt Metal

Magnolia Metal Co., New York

Balances, Sash (Spring)

Pullman Mfg. Co., Rochester, N. Y.

Bank Railings

J. E. Bolles Iron & Wire Works, Detroit, Mich.

Barb Wire

Fuller Bros. & Co., New York

Barn Paints

E. E. Nice, Philadelphia, Pa.

Bath Room Fixtures

Buffalo Mfg. Co., Buffalo, N. Y.

Bearing Metal

Magnolia Metal Co., New York

Beef Shavers

Enterprise Mfg. Co. of Pa., Phila.

Beet Forks

American Fork & Hoe Co., Cleveland, O.
Geneva Tool Co., Geneva, O.

Beet Hoes

American Fork & Hoe Co., Cleveland, O.
Geneva Tool Co., Geneva, O.

Bellows, Smiths'

C. E. Jennings & Co., New York, N. Y.

Bells and Gongs

John H. Graham & Co., New York

Belt Dressing

Jos. Dixon Crucible Co., Jersey City, N. J.

Belt Punches

Sattley Stacker Co., Indianapolis, Ind.

Belt Shifters

Chandler & Farquhar, Boston

Belting

Ames Sword Co., Chicopee, Mass.
Voorhees Rubber Mfg. Co., Jersey City, N. J.

Bench Shears

Chandler & Farquhar, Boston

Bicycles

J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Bicycle Stands

F. E. Myers & Bro., Ashland, Ohio

Bicycle Sundries

Cushman & Denison, New York
Harrington & Richardson Arms Co., Worcester, Mass.
Smith & Egge Mfg. Co., Bridgeport, Conn.

Bits

Alfred Field & Co., New York
C. E. Jennings & Co., New York
Russell Jennings Mfg. Co., Deep River, Conn.

Blocks, Tackle

Lane Bros., Poughkeepsie, New York

Boiler Feeders

N. A. Watson, Erie, Pa.

Bolt and Screw Cases

J. D. Warren Mfg. Co., Chicago

Bolts, Bolt Ends, Etc

Columbus Bolt Works, Columbus, O.

Boring Machines

Ajax Mfg. Co., Pittsburgh, Pa.
C. E. Jennings & Co., New York

Box Corner Fasteners

Cary Mfg. Co., New York

Box Hasps and Hinges

Cary Mfg. Co., New York

Box Straps

Cary Mfg. Co., New York

Boxes (Hardware)

J. D. Warren Mfg. Co., Chicago, Ill.

Braces, Carpenters

John H. Graham & Co., New York
C. E. Jennings & Co., New York

Brackets

E. E. Josef Mfg. Co., Buffalo, N. Y.

Brackets, Shelf

Piqua Bracket Co., Piqua, Ohio

Brands, Burning

Schwerdtle Stamp Co., Bridgeport, Conn.

Brass Goods

Walworth Mfg. Co., Boston, Mass.

Brick Trucks

Geo. P. Clark Co., Windsor Locks, Conn.

Bridge Rods

Columbus Bolt Works, Columbus, O.

Broad Axes

National Cutlery Co., Detroit, Mich.

Builders' Hardware

Champion Safety Lock Co., Geneva, O.
John H. Graham & Co., New York
Hobart B. Ives Co., New Haven, Conn.

L. S. Starrett Co., Athol, Mass.
J. Stevens Arms & Tool Co., Chicopee Falls, Mass.

Camping Outfits

Fond du Lac Awning & Tent Co., Fond du Lac, Wis.

Can Openers

John H. Graham & Co., New York
A. F. Meiselbach & Bro., Newark, N. J.

Carpenters' Pencils

Jos. Dixon Crucible Co., Jersey City, N. J.

Carpet Beaters

Holt-Lyon Co., Tarrytown, N. Y.

Carriage Bolts

Columbus Bolt Works, Columbus, O.

Carriage Top Dressing

Frank Miller Co., New York

Carriers, Hay

F. E. Myers & Bro., Ashland, Ohio

Cases (Display)

J. D. Warren Mfg. Co., Chicago, Ill.

Cases (Screw & Bolt)

J. D. Warren Mfg. Co., Chicago, Ill.

Casters

Faultless Caster Co., Nebraska City, Neb.

Casters (Furniture)

Geo. P. Clark Co., Windsor Locks, Conn.

Catalogue Cases

J. D. Warren Mfg. Co., Chicago, Ill.

Cement Rollers

John Stortz & Sons, Phila., Pa.

Chafing Dishes

Buffalo Mfg. Co., Buffalo, N. Y.

Chain Hoist

Jos. F. McCoy Co., New York.

Chain Pump Buckets

Henry C. Freshour, Bridgeport, Conn.

Chains

Covert Mfg. Co., Troy, N. Y.
Alfred Field & Co., New York
Fuller Bros., New York
Oneida Community, Oneida, N. Y.

Chains, Cow

Covert Mfg. Co., Troy, N. Y.
Oneida Community, Kenwood, N. Y.

Chains, Halter

Oneida Community, Ltd., Kenwood, N. Y.

Chains, Sash

Oneida Community, Kenwood, N. Y.
Smith & Egge Mfg. Co., Bridgeport, Conn.

Chair Seats

Eureka Chair Seat Co., Syracuse, N. Y.

Checks, Brass

Schwerdtle Stamp Co., Bridgeport, Conn.

Cherry Stoners

Enterprise Mfg. Co. of Pa., Phila.

Chisels

L. & I. J. White Co., Buffalo, N. Y.

Chisels, Cold

John Stortz & Son, Philadelphia, Pa.

Chisels, Firmer

Alfred Field & Co., New York
C. E. Jennings & Co., New York
L. & I. J. White Co., Buffalo, N. Y.

Clamps

North Bros. Mfg. Co., Phila., Pa.
Smith & Egge Mfg. Co., Bridgeport, Conn.

Clamps, Rug and Carpet

E. E. Josef Mfg. Co., Buffalo, N. Y.

Cleavers

John Chatillon & Sons, New York

**IN THE COAL MINES OF PENNSYLVANIA CAPEWELL NAILS ARE
USED AND THEY STAND THE SEVERE TEST SUCCESSFULLY**

THE CAPEWELL HORSE NAIL CO.,

Gentlemen:—I have given Capewell horse nails a good test. I am using them these last eight years in the Anthra-
cite Coal Mines of Pennsylvania, where the roads are not the best by a long way. I am shoeing 130 mules in the mines
and ought to know what the nail is. Have been shoeing the last twenty years and have used all kinds of horse
nails, but the Capewell nail is the best I ever used.

EDWARDSDALE, PA.

Yours respectfully,
THOS. W. BLANDFORD.

A VAST DIFFERENCE

Between the orderly and roomy appearance of this store and many others—isn't there? It's because this store uses

Baines Shelf Brackets Adjustable or Fixed

Those other stores don't—to their own detriment. . . .

If crowded for room try the Baines Brackets. They'll change the entire appearance of your store and make it more roomy and attractive to your customers. . . . Catalog H for Hardwaremen tells of number of brackets required; how to install them, etc. *Send for it to-day.*

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

THERE

"The Faultless" never refuses to turn, because it is supplied with Faultless Patent Steel Spring Sockets.

The Faultless is interchangeable; will fit six different sizes of wood bed sockets.

The Faultless received the highest award at the World's Fair, 1904, over all other casters.

It never refuses to turn itself into dollars and cents. Try a sample lot.

The Faultless Caster Mfg. Co.,
Nebraska City, Neb.

sell them by full page advertisements in the June Issues of the *Delineator*, *Designer*, and *New Idea* women's magazines; later by quarter page ads. in the *Saturday Evening Post*, *Colliers' Weekly*, *Youth's Companion*, *Delineator*, *Designer* and *New Idea*. In the Fall full pages will again be run in *Colliers'*, *The Saturday Evening Post* and others. We advertise each month in nearly all the leading magazines.

MILLIONS OF READERS

will see and read our advertisements. It's up to you, Mr. Dealer, to prepare for the demand created. Stock up with the "IRISH MAIL" and the rest of our line.

GET BUSY FOR PROFIT SHARING!

The "IRISH MAIL" Line is easy running for the children; easy selling for the dealer. Each vehicle is strong and durable. Built of hickory and steel. No chain to get out of order. The best for children as they furnish healthful exercise and loads of fun.

A copy of our catalogue will show you how complete and profitable our goods are for you. Don't argue. Don't delay. Send for it to-day.

HILL-STANDARD MANUFACTURING CO.

680 IRISH MAIL AVE., ANDERSON, IND.

BACK DOOR Business Methods

and unfair competition can't win in the end. So don't be even an unwitting accessory in selling an inferior oil made to imitate

3 in One

in every possible way, style of carton, advertising, etc.

If you're uncertain about helping "3 in One" don't help the pirates. "3 in One" will meet any honest competition in a fair open fight and be happy with your decision. But when underhanded methods are resorted to we want to warn you that we can and will enforce our rights in the U. S. Courts—do you know that the dealer who sells an infringing article is equally liable with the man who makes it?

G. W. COLE COMPANY,

You can increase the size of your store without increasing your rent by installing one or more

Milbradt Rolling Step Ladders

They make it easy to utilize the space between the top shelf and the ceiling for extra shelving and boxings.

Milbradt Ladders are made to order from measurements covering the conditions peculiar to each store.

They combine great strength, easy and noiseless operation and handsome finish at a cost that is as low as the price for ready made ladders.

Style No. 4 (shown in outline), a ladder for use on shelving with very narrow or no base. The swinging arms hold the ladder in the position most convenient for climbing. These arms may be swung up allowing the ladder to hang close to the shelves when not in use. Rubber rollers are attached to these arms and run against the base. This is a most convenient ladder for use in narrow aisles or in stock and store rooms.

Our latest catalog illustrates 24 other standard styles adapted to every form of shelving. It will be mailed on request.

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for
it. Consumers know the excellent quality that the name Arcade signifies.
They know that it stands for the highest satisfaction and greatest efficiency
that their money can buy. It is this knowledge that makes them demand
Arcade Goods when they are in need of any of the 300 articles we
manufacture.

To prove their unquestionable merit to any doubting dealer we will send
a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

The Crystal Coffee Mill

THE CRYSTAL COFFEE MILL
with glass hopper and tumbler. This
is the most perfect mill made and
with it the most discriminating cus-
tomers may be interested. Its super-
ior advantages are appreciated on
sight.

You can satisfy every requirement of your trade with one of the sixty
different styles of wood, glass and metal mills which we manufacture.

The Gem Mop Head.

THE FAMOUS GEM
is known to housekeepers everywhere
as the one dependable mop head. It
is made of the best steel and
equipped with the latest improved
spring adjustment. It is a most dur-
able, saleable and profitable article.

THE JEWEL COFFEE MILL
with glass canister holding one
pound of coffee. This is a compan-
ion of the Crystal, but sells at a
lower price. A liberal dose of these
two mills will prove a tonic to your
coffee mill trade.

THE RIGHT SPACE SPICE CABINET
is made of hard wood in natural fin-
ish. It is strongly built to with-
stand the roughest usage. Each com-
partment is labeled and fitted with
iron pulls. The general effect is one
that appeals to the careful house-
wife.

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest seller and commands the biggest profit to you of any Washing Machine made. That is why you should sell it. The tub of the Majestic is made of selected **Virginia White Cedar**, and will stand the action of water a life time. It is bound with our celebrated **Electric-Welded Wire Hoops**, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the Majestic Washing Machine in seven years, it is easy to introduce to you the **Snow Ball Freezer**. It is as good a freezer as the Majestic is a Washing Machine. The Snow Ball tub is made also of **Virginia White Cedar**, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are **JOBBER** or **DEALER** write
us to-day for particulars and prices which will
surprise you.

HARDWARE

BEECH NOVELTY CO., Mansfield, Ohio, have issued circulars descriptive of the merits of the Beech Mop Wringer and Bucket Combined, which they state to be "a live, salable article which sells readily, and every sale is sure to produce others."

J. A. Carter, who was actively identified with the formation of the American Fork and Hoe Co., Cleveland, Ohio, and who has been its sales manager for the past four years, has resigned, to go into other business. Mr. Carter is still largely interested in the company and continues as a director.

George E. Sternberg, who for the past fifteen years has been connected with the Peck, Stow & Wilcox Co. at the New York branch, has identified himself with the Biddle Purchasing Co., 78 Reade Street, New York.

SICKELS & NUTTING COMPANY.

A special meeting of the Board of Directors of the Sickels & Nutting Company, 35 Barclay street, New York, was held May 15, at which J. R. Loder was chosen president and treasurer, owing to the recent death of Robert Sickels, the late president. The Board of Directors as now constituted consists of J. R. Loder, Otto Dederer, E. C. Hamilton (recently elected), B. E. Randolph and J. K. Eldridge, the latter being vice-president. The secretary is Thomas Borrows.

THE USE OF A LIMPID OIL WITH GRAPHITE WILL REDUCE FRICTION TO ONE-THIRD THAT OF THE ROLLER BEARING.

This statement seems to be justified by the following:

The October, 1905, issue of *Machinery*, contains a report of a series of tests on roller bearings, made by Prof. C. H. Benjamin, at the Case School of Applied Science, which are of especial interest in view of certain results which have been obtained by Professor Goss, from plain bearings lubricated with kerosene and Dixon's Flake Graphite.

Professor Benjamin's experiments were made upon several different kinds and sizes of roller bearings in common use. The purpose of the experiments was to determine the friction developed by such bearings when run under different conditions of load and speed. The apparatus employed was similar to the well-known Thurston oil testing machine, and was in every way well adapted to the purpose for which it was used. Professor Benjamin's reputation as an experimenter, and the highly refined character of the apparatus he employed, leave no question as to the accuracy of his work.

In the results which were obtained by Professor Benjamin from the use of roller bearings 1 15-16 inches in diameter, in comparison with those obtained from the step bearing testing machine made use of by Professor Goss in connection with his study of graphite under similar conditions of pressure, it was demonstrated that the co-efficient of friction developed by the use of graphite and kerosene in a step bearing. Thus, when the pressure is 40 pounds per square inch, the co-efficient of friction for the graphite and kerosene is .00459, while the average co-efficient for the two roller bearings is .018, or 3.92 times greater. When the pressure is 50 pounds per square inch, the co-efficient of friction for the graphite and kerosene is .00442, and for the roller bearing .0175, or 3.95 times greater. There are no conditions which can impair the value of this comparison except that a higher speed was employed with the roller bearing than with that which was lubricated. But as the co-efficient of friction of the lubricated journal generally diminishes with increase of speed, a correction of this would make the differences in results greater. The step bearing was able to carry a load of 110 pounds per square inch, while the greatest load carried by the roller bearing was 61 pounds per square inch, or only 55.5 per cent. as much as that of the step.

Professor Benjamin also made tests of plain bearings and found that "the friction of roller bearings is less than that of plain bearings."

There is no secret in all this. The plain bearings experimented on by Professor Benjamin were undoubtedly lubricated with an oil possessing considerable body, whereas in the presence of graphite a very light oil will suffice. The friction of lubricated journals is largely a matter of viscosity of the lubricant. For any given service, the use of graphite will always present a reduction in the viscosity of the liquid lubricant and hence a

reduction in friction. The extent to which such a change may be carried is, however, not commonly recognized. It is well illustrated by the fact that a graphitic mixture, well designed for the service expected of it, gave results which leave the roller bearing quite distanced in the race.

ELECTRIC PROPERTIES COMPANY.

The Electric Properties Company, incorporated May 10th under the laws of the State of New York with a capital of six million preferred and six million common stock, has been organized to acquire, finance and develop properties, either whole or in part, especially those in which electricity plays the principal part, such as power, electric traction and electric lighting enterprises, and to invest and deal in and to guarantee the securities of corporations operating such properties. It will also conduct through Westinghouse, Church, Kerr & Company (all of whose capital stock is owned by the new company) a general engineering and construction business. It may also issue collateral trust bonds secured by the pledge of securities acquired in the course of business.

The purpose of the company, as mentioned above, will be mainly financial. It is not intended to make any changes in the organization or personnel of Westinghouse, Church, Kerr & Co., whose operations have been highly successful and they will continue to be conducted under the efficient administration of Mr. Walter C. Kerr, President.

While the Electric Properties Company will avail itself of the engineering and construction organization of Westinghouse, Church, Kerr & Company, it will also use other engineering organizations or independent consulting engineers as circumstances may require. One of the objects of the new company will be to co-operate with vested interests, such as railways and other public service companies, in the development of properties for their account, and either temporary or permanently assist in financing such properties.

The great rapidity with which the uses of electricity are being extended, not only in the creation of new enterprises, but in changing the character of existing enterprises, will, it is believed, afford constantly increasing opportunities for the profitable investment of capital.

Mr. John F. Wallace has been selected as President of the new corporation, and two Vice Presidents will be elected at the first meeting of the Board of Directors.

KEEP YOUR CREDIT GOOD.

Interest on borrowed money eats a big hole into a dealer's profits but deferred payments and unpaid bills eat a bigger one into his credit. A man's credit is a big part of his stock in trade and it differs from most of his ethical possessions in that it strengthens with disuse; still there are times when any merchant may be justified in stocking up beyond the limits of his ready cash. Having once done this nothing should tempt him to allow the bill to go over a few days, depending upon the good nature of his creditor to see him through; far better borrow the money and pay a little interest. Probably the jobber would not kick at a few days' delay and the interest could be saved. The temptation is all the greater because it is so easy to accompany the delayed payment with some plausible excuse about "an oversight" or something of that nature. But the time is sure to come when any dealer who resorts to these petty infringements upon the rights of others in order to hold his own expenses at the lowest notch will find out that there is a big difference in cash valuation between the reputation of a man who always pays his bills on time and the one who "will probably pay it sometime,—when he has to."

STEAM TURBINES IN COTTON MILLS.

That steam turbines are readily adapted to cotton mill work is again brought out by the fact that the Francis Cotton Mills has recently adopted Westinghouse-Parsons turbines for their power plant at Biscoe, N. C. This plant adds one more to the list of cotton mills using steam turbine power. Some of the plants in this field are those of the Pelzer (S. C.) Manufacturing Company, 1500 K. W.; the Oneita Knitting Mills, Utica, N. Y., 500 K. W.; Henrietta (N. C.) Mills, Gray Manufacturing Company, Charlotte, N. C.; Modena Cotton Mills, Gastonia, N. C., and the Lumberton (N. C.) Cotton Mills. These plants are now in highly successful operation.

MAY 25, 1906

Editorial Trade Review

As we anticipated, the abnormal demand for goods of various kinds for the wants of San Francisco is being favored in the shipments, and it is a matter of pride to be able to make prompt and early deliveries of the goods wanted. As manufacturers have up to date been unable to supply their regular customers with similar goods for several months, there is little possibility of their being able to do so until the present wants of San Francisco are all attended to. Then again, the demand in a general way for Builders' Hardware, independent of the Coast trade conditions, is so good that the permits for new buildings are reaching record figures in the large trade centers, with the demand from the Coast still in its primitive stages.

The settlement amicably, and without much waste of time, of the various strikes throughout the country must be considered a good thing for the future trade of this vast continent. The coal strike, the longshoremen's strike and the varied other unsettled conditions in the field of labor are no longer to be added to our fears for the future. "Grim-visaged war has smoothed its wrinkled front" and trade must have no discount taken off from its volume, while apprehension is an additional source of worry to the intelligent man of business.

Money seems to be in abundance for the propagation of industrial activity in every branch of the business, and in every grade, and this is to be seen and felt notwithstanding the high prices of merchandise in general. With lumber, brick and other material at highest points the building interests of the country show a prosperity that is remarkable, and will keep the manufacturers away from any idea of the necessity of lessening production during the summer months; and the demand even at present prices seems to be for better grades of goods than would be called for if money were not so abundant and a willingness shown to lend it to promote all reasonable undertakings.

The universal prosperity apparent on every hand is the incentive given to add to facilities that are already promis-

ing for the manufacturing and promotion of enlarged outputs, that bid fair to give fears of overproduction at the first ebb of the wave of general prosperity.

While the prices of Hardware on every hand are by no means abnormally high by comparison with previous dates, the metal market is by no means so conventional, and prices have soared to points which in a single year show advances from 25 to 35 per cent., and those metals especially that enter into house-building, and if Hardware was relatively quoted at an advance that averaged as high, the promoters of huge operations might well pause at the threshold.

The thousands of immigrants that are almost daily reaching our hospitable shores are becoming welded into the ranks of labor on every hand, exciting our wonder and astonishment at this possibility. Men who are willing to work at better wages than were ever obtained in the Old World, were never in greater demand than at present. A scarcity even is said to exist.

THE FOREIGN COMMERCE OF THE UNITED STATES.

The foreign commerce of the United States in April, 1906, was larger than that of the corresponding month of any earlier year, consisting of 107 million dollars imports and 144 millions exports; total, 251 millions, or more than a quarter of a billion dollars in a single month. In only one previous April in the history of our export trade has the total of imports and exports reached as much as 200 millions. For the ten months ending with April the record is equally striking, being: Imports, 1,021 millions; exports, 1,488 millions, or a total of 2,509 millions. No similar period of any earlier year ever touched the one billion dollar line in imports or reached the 1,300 million line in exports. The total commerce of the United States for the ten months ending with April is thus over 2½ billions of dollars, and should the monthly average for May and June be as great as that for the ten months for which the record is made the total of the fiscal year 1906 will exceed 3 billion dollars.

The fiscal year 1906 seems likely to make a new record in the foreign trade in several particulars. The total imports and total exports are in each case likely to be greater than those of any earlier year, and several monthly records have been already broken. For example, imports never exceeded 100 million dollars a month prior to 1905, except in a single instance in which large quantities of merchandise were being rushed into the country to avoid pending tariff changes; but seven out of the ten months ending with April of the present year have shown each an importation of more than 100 millions, and the month of March showed the highest import record ever made, \$113,597,277. On the export side the high-water mark of earlier years has also been passed, the total for the ten months ending with April being 200 millions in excess of the total for the corresponding total of any earlier year, and the total for the single month of December, \$199,738,520, being 25 million dollars greater than in any preceding month in the history of our export trade.

The increase in imports occurs in manufacturers' materials and finished manufactures, and the increase in exports occurs in agricultural products and manufactures. The increase in imports for the ten months ending with April amounts to about 86 million dollars, and is about equally divided between manufacturers' materials and manufactures, the total figures for the nine months of which the Department of Commerce and Labor through its Bureau of Statistics has completed the analysis, indicating a gain of about 44 millions in manufacturers' materials, and 51 millions in the two classes, manufactures and luxuries, while there is a decrease of about 20 millions in foodstuffs. In exports there is for the ten months an increase of 215 millions, and the nine months' figures, now completed, show a gain of about 136 millions in agricultural products and about 50 millions in manufactures.

The classes of manufactures which show the largest increases for the first nine months, for which comparative figures are at hand, are iron and steel manufactures, 19 million dollars; cotton goods, 7 millions; cars and carriages, 5½ millions; mineral oils, 3 millions; leather and its manufactures, 2 millions; agricultural implements, 1 million; paraffin, nearly 1 million, and numerous other articles in smaller sums. The classes of manufacturers' materials which show the largest growth in imports are: Hides and skins, an increase of 14 million dollars; copper, 4 millions; tin, 4 millions; tobacco, 3 millions; and pig iron, 3½ millions.

A LOCAL CLIPPING BUREAU.

The use of press clipping bureaus is now so generally recognized that perhaps the most remarkable feature about the following scheme of an Eastern Ohio Hardware dealer is the fact that others are not using it more.

Among his clerks he organizes a local clipping bureau in which each is forever on the alert for items of information, printed or personal, regarding any contemplated building or other industrial movement opening up a possible avenue for Hardware. For each available bit of information the clerk is credited with a small amount which is duly recognized on pay day. Then there is a scale of prizes for the information that lands orders of certain sizes.

Where more than one informant hands in the same item the first one who gives it is the one rewarded unless a later informant gives enough additional matter to justify its being treated as a separate item. This has a tendency to stimulate the various employees to seek early information.

By following out this course the dealer not only obtains early knowledge of all the published enterprises where Hardware is required but friends and acquaintances of the clerks not infrequently give the latter quiet advance tips regarding their own future intentions "just to help them along," and much to their own surprise give way to the personal solicitation of the dealer himself when he comes after them for a contract long before any of his competitors know that there is one in prospect. Besides it keeps his clerks more alert to his interests outside of business hours and puts them into closer communication with the entire community.

NEEDED POISE IN BUSINESS.

You can never control other people until you have first learned to control yourself, and the man with poise is the man who gets the better of every argument and every incident and crisis of life. Have you ever seen two men in an argument, in either public or private, that the cool fellow did not get the better of the excited one? So poise in business is as much needed as in public speaking or any place else. When a kicker comes in above all things hold your dignity and steady, smiling courtesy at all times, and you will have no cause to regret it. Then when the incident is over dismiss it from your mind! Refuse to think about unpleasant things, for it unfits you for your work and it's for you to solve that constant puzzle that confronts every business man of how he can best please that fickle and changeable clientage, the great American public.

D. C. W.

THE CLEVELAND MEETINGS.

Meetings of the Wholesale and Retail Hardware Joint Committee and of the Executive Committee of the National Hardware Association were held at the Hollenden, Cleveland, Ohio. The Executive Committee of the Jobbers' Association met on Monday and Tuesday, 7th and 8th inst. The following members of the committee were present: P. E. Strauss, Fitz, Dana & Co., Boston; R. M. Dudley, Gray & Dudley Hardware Company, Nashville, Tenn.; A. J. Bihler, James C. Lindsay Hardware Company, Pittsburgh; W. D. Taylor, George Worthington Company, Cleveland; J. D. Moore, Moore & Handley Hardware Company, Birmingham, Ala.; Frederick Barker, Barker, Rose & Clinton Company, Elmira, N. Y.

THE JOINT COMMITTEE.

The sessions of the Joint Committee extended over three days, Wednesday, Thursday and Friday, May 9, 10 and 11, with the following members in attendance: S. Norvell, St. Louis, chairman; E. M. Bush, Evansville, Ind., vice-chairman; W. S. Wright, Omaha, Neb.; R. A. Kirk, St. Paul, Minn.; Samuel A. Bigelow, Boston; W. P. Bogardus, Mt. Vernon, Ohio; S. R. Miles, Mason City, Iowa; A. H. Abbe, New Britain, Conn.; W. L. Sanford, Sherman, Texas; C. B. Carter, Knoxville, Tenn.; T. James Fernley, Philadelphia, general secretary, and M. L. Corey, Argos, Ind., secretary for retail trade.

Announcement was made of the decease of T. Frank Ireland, Belding, Mich., and an appropriate resolution was adopted. A. H. Abbe, New Britain, Conn., was recently appointed to succeed Mr. Ireland on the committee. W. L. Sanford of Roberts, Sanford & Taylor Company, Sherman, Texas, was appointed to take the place of R. M. Dudley, Nashville, Tenn., who resigned owing to pressure of business. The various committees having charge of the detail work of the Joint Committee presented their reports.

The work for the next year was apportioned among the various members of the committee, whose task was to be the expressing to manufacturers a preference that they should recognize only the legitimate jobbing and retail trade as distributors.

Mr. Norvell and the other officers were unanimously re-elected.

THE NATIONAL HARDWARE ASSOCIATION.

Secretary-Treasurer T. James Fernley has recently addressed the following letter to the members of the National Hardware Association, announcing some of the details in connection with their Thirteenth Annual Convention, and naming the dates for holding the convention, and at the same time calling attention to the necessity of securing hotel accommodations at an early date:

13TH ANNUAL CONVENTION.

DEAR SIR:—You will recall at the last meeting of our Association no selection was made by the convention of a place for holding our 1906 meeting, but a committee was appointed to arrange after conference with a committee of the American Hardware Manufacturers' Association for the selection of time and place for holding the same.

The usual difficulty of obtaining hotel accommodations ample to take care of the large number of members of our Association and others who attend confronted the committee. After seriously considering all claims from various cities, both committees unanimously selected Atlantic City, N. J., as the place, and October 17, 18 and 19 as the dates.

The Marlborough Hotel has had a very large addition made recently and is now known as the Marlborough-Blenheim. Both Associations will have their headquarters at this hotel, and without any question it is the very best appointed house on the Atlantic Coast. The rates are as follows:

One person in one room without bath, \$4, \$5 and \$6 per day. American plan, depending upon the size and location of room desired.

One person in one room with bath, \$6, \$7 and \$8 per day. American plan, depending upon the size and location of room desired.

Two people in double room, without bath, \$8, \$9 and \$10 per day, American plan, depending upon the size and location of room desired.

Two people in double room with bath, \$10, \$11 and \$14 per day. American plan, depending upon the size and location of room desired.

We would suggest that the members of our Association promptly engage their accommodations. Do this by corresponding direct with the hotel. Rooms will be reserved, and about October 10th you will be advised by card from the hotel as to the number and rate of your room. Respectfully yours,

T. JAMES FERNLEY,
Secretary-Treasurer.

THE CATALOGUE HOUSE QUESTION.

In our notice of the booklets issued by the Dover Mfg. Co., Canal Dover, Ohio, on "Co-operation" and "Maintenance of Prices" in our last issue, Mr. Keyser, their efficient advertising manager, under whose careful attention they were written, takes exception to our language which apparently looks like a misconception of his argument. So to set us right in the matter he sends us a note as follows, which explains itself:

"In the May 10th issue of *HARDWARE*, we note the following sentence which may give the wrong impression: 'Catalogue competition is dwelt upon, and they acknowledge it as being instrumental in creating a demand for goods with which the dealer should be satisfied.' The writer thinks that you have misunderstood our reference to the catalogue house question. We make the statement that the catalogue house not only distributes, but also creates demand. However we do not say that the dealer should be satisfied with this fact or that it modifies the dealer's attitude toward the catalogue house in any respect. From your statement of the case it would seem that we are apologizing for catalogue house, whereas, we look at this question from the standpoint of the retail Hardware dealer. Furthermore we do not imply in our pamphlet that the demand created by the catalogue house is beneficial to the trade as it would be inferred from your statement. We are sorry that our method of handling the subject misled you as to our attitude toward the catalogue house."

We are happy in being corrected in any particular where we placed a wrong construction on the language used.

FOUR LEADING REASONS.

Consul Brittain, of Kehl, gives four leading reasons why German merchants are succeeding in extending their foreign trade, which are as follows: (1) The training of men especially for the business, who shall know every detail, and who are able to speak several languages. (2) Disposition to please the purchaser with styles and prices, and giving long credits. (3) Determination to hold a customer once won. (4) Their ability, by Government aid, to deliver goods in their own ships.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

PAWNBROKER'S LIEN—SUBROGATION.

QUESTION: A friend of mine pawned a ring for \$45 and asked me to go to the pawnbrokers, take up the loan and get the ring. He agreed to pay me whatever it cost to get the ring back. I did as he directed and have the ring. He now demands it from me, although he has not paid me the money I advanced to get it. Can I keep the ring until he has repaid me?

REPLY: You can. He clearly gave you the authority to redeem the ring and asked you to advance the money necessary to obtain the property. By advancing the money pursuant to his request, you became in the technical language of the law subrogated to the pawnbroker's lien on the ring. It would be otherwise if you had advanced money to redeem the ring on your own authority, and without your friend's request or direction.

EFFECT OF ADOPTION.

QUESTION: If a child is adopted in the State of New York (1) Can he inherit from his former parents; (2) Can he inherit from his foster parents; (3) If the child dies leaving property and no will, which parent inherits from him?

REPLY: (1) The child's rights of inheritance and succession from his natural parents are unaffected by his adoption;

(2) He has also the right to inherit from his foster parents;

(3) The effect of adoption is to relieve the natural parents from all parental duties towards and of all responsibility for the child, and they have no rights over the child or to his property by descent or succession. But the foster parents may inherit from the child in case he dies intestate leaving no descendants.

BANK—DRAFT—COLLECTION—LIEN.

The Supreme Court of Michigan held, in the case of Garrison vs. Union Trust Company, that a bank sending to another bank, which was its regular correspondent, for collection, a draft indorsed for collection and credit, had no right to assert its title as against the lien upon the proceeds to which a third bank, to which the draft was forwarded for collection, was entitled in the ordinary course of business to balance its account against the intermediate bank.

INSURANCE—BLOOD POISONING—PHYSICIAN.

The Supreme Court of Illinois held, in the case of The Central Accident Insurance Company vs. Rembe et al., that insurance covering the death of the insured caused by external violence or accidental means extended to a case of death from blood poisoning inoculated by an accident external injury to the person of the insured without which the poisoning would not have ensued, and that a clause in an accident policy issued to a physician and surgeon, extending the insurance to "septic wounds caused by accident while performing any operation pertaining to the business of the insured, the poison matter being injected into the wound at the time of the accident," was not limited to surgical operations, but included accidental wounds received when administering, or preparing to administer, treatment pertaining to the business of the insured.

INTEREST—COMPUTATION—RENEWAL—USURY.

The Kentucky Court of Appeals held, in the case of Bramblett vs. Deposit Bank of Carlisle, Ky., that in order to ascertain the exact amount due on a note which had been repeatedly renewed so as to purge it from usury, the sum originally loaned be taken as the original principal, and interest should be calculated upon that sum at the rate of 6 per cent. per annum until the first renewal or payment; that such payment should be applied first to the discharge of interest accrued; that any excess should be applied upon the principal, and that when the note was renewed accumulated interest which had not been paid should be added to the remaining principal; the sum to constitute a new principal upon which interest was to be calculated and payments applied as above indicated. The court further held that it was competent for parties to agree to pay a legal rate of interest in advance, and that such rate of interest would not be usurious.

THE LATE ROBERT SICKELS.

The following memorial expressing the loss the Hardware Club has sustained in the death of the late Robert Sickels was reported at a meeting of the board of governors on May 15th by a Committee consisting of Joseph Gales, E. C. Van Glahn and R. R. Williams, and was adopted and ordered spread on the Records of the Club, and an engrossed copy to be sent to Mr. Sickels' family:

IN MEMORIAM

ROBERT SICKELS, A GOVERNOR OF THE HARDWARE CLUB, DIED APRIL 11, 1906.

Mr Sickels was born of Dutch ancestry in Albion, N. Y., April 15, 1833, and after receiving such schooling as was necessary to fit him for a business life he began his career as a clerk in a general store in his native town. After a short time spent in learning the fundamental principles of a successful business career he removed to Davenport, Iowa, to look after his brother's interest in a Hardware house in that city.

Mr. Sickels soon decided to make Davenport his home, and in 1863 formed the firm of Sickles & Preston, which in 1881 became and now is Sickels, Preston & Nutting.

In 1890 Mr. Sickels decided to establish himself in business in New York City, and in addition to his Western house started the concern now known as Sickels-Nutting Company, with which he was actively identified up to the time of his death. Such, briefly stated, was the business career of Robert Sickels.

For 43 years Mr. Sickels was an honored member of the Hardware trade. He was also a member of the Hardware Club from its beginning, and since 1899 a member of its Board of Governors.

Although he has passed from among us and his calm, dignified countenance will no more be seen to lighten up this place, which for so many years was his club home, yet his genial personality, his kindness of manner and his affable greeting will long be missed by his fellow members, while those who through many years of business intercourse, and in the closer ties of friendship, had learned to know him intimately, will hold him in peculiarly warm and affectionate remembrance.

As a business man he was broad minded, progressive and just; devoted to the principles of truth and honor, his life actuated by high moral purposes. By his courage, his ability, his loyalty to truth and his fidelity to every trust committed to his care he achieved success.

As a citizen he was patriotic and public-spirited. He formed his opinions after wide reading and careful thought, and gave his unwavering support to every cause which he conscientiously believed would benefit his country, his State or his city.

As a friend he was gentle, considerate and staunch. He was an inspiration to all that was lofty and noble and true, and a rebuke to whatever was base, selfish and unworthy.

While business was his pursuit, truth, honor and Christian virtues were his passion. He was ever true to his high ideals, and often expressed his firm faith in the all-controlling goodness and providence of God. In that faith he lived and died.

During the last few months of Mr. Sickels' life, amid physical infirmities always bravely borne, his interest in all good works, his love for his friends and his devotion to this club were as real as when he first came to New York and made his strong, manly presence felt among us.

His character and career will be an inspiration to all who knew him, who will remember him as a courteous, Christian gentleman, whose congenial companionship, sound judgment and unwavering fidelity they will sadly miss.

COES WRENCH CO.'S NEW DEPARTURE.

The Coes Wrench Co., Worcester, Mass., the New York agents of which are J. C. McCarty & Co., 10 Warren Street, and John H. Graham & Co., 113 Chambers Street, considering the retailer's requirements and the advantage to be derived by his carrying a more representative assortment of these desirable goods, are putting up an "introduction assortment case." The case contains one dozen each steel-handle Screw Wrenches, 6, 8, 10 and 12 inch; two-thirds dozen 15-inch and one-third dozen each 18 and 21 inch sizes. The case also contains circulars and window decalomania transfer signs and weighs 230 pounds gross. The opportunity of obtaining the various sizes of these well-known wrenches in this convenient form will undoubtedly be appreciated by both the dealer and consumer.

D. C. Washington, says:

If you have people around you that you can't get to do things the way you want them done, don't stamp the floor and make every one unhappy then and at home at night, but simply make up your mind in a calm way whether you would rather have the man do things the way he is doing them or not have him in the place. Then wait till next day and go to him when you are cool and explain the alternative to him. Tell him he must work your way or go some place else and if he seems mulish let him go. But for the sake of your help, for the sake of your health, and for the sake of the ridiculous figure you cut in the eyes of others, don't kick! You can see from the strong kick I am now putting up against you kickers that I never kick. No, indeed! Never!

PROFIT MAKING LINES

DAVIES SCREWLESS SPRINGSET SHEARS.

The Davies Automatic Shear Co., No. 41 Maiden Lane, New York, are engaged in placing upon the market the Screwless Springset Shears and Scissors, which are claimed to embody more and greater improvements of an up-to-date character than any similar goods on the market, the original but simple improvements in the manufacture of these important specialties placing them prominently before the trade, and making them leaders among profit-making lines. These Screwless Springset Shears and Scissors are what their name implies. They are absolutely screwless, and are set by means of an adjustable spring

member, forming a perfect locking device which firmly retains the whole connection in place. Note the slope on the tension plate. The adjustment of the plate forward and backward gives the variations in strength of tension with which the blade edges are held together; tighter if the plate is pushed forward towards the edge of shear, and lighter if the plate is pushed back toward the handles. The pivot is perfectly free to rotate, thus forming an ideal roller bearing, the wear on which is evenly distributed. This pivot is original with the Screwless Springset Shears. All other shears have the pivot or screw fixed to one shear member, which, by limiting the wear to a small section

DAVIES AUTOMATIC SHEARS.

plate to the desired tension. The blade edges are held together automatically with an even tension throughout their cutting length; the action is easy, smooth and very agreeable, and this not merely for a brief period but throughout the life of the shears. The inherent defects of the old-fashioned, screw-con-

of the pivot or screw, soon develops unevenness of action. The blade edges are held in contact with the same even tension in opening as in closing, and thus the shears are in a large measure self-sharpening, the edge thrown down in cutting being thrown back as the shear opens. With ordinary shears one not only has to close the blades, but must also cramp the hand so as to hold the blade edges together. With the Screwless Springset Shears

PIVOT.

TENSION WASHER.

TENSION PLATE.

nected shears are well known. Uncomfortably stiff when new, they soon wear so loose, that they will cut only when the shear handles are twisted so as to hold the cutting edges together, cramping the hand, and making it troublesome to guide the shears aright. All the faults, obvious or latent, of screw-connected shears have been avoided in the construction of the Screwless Springset Shears. So simple is the construction that a glance at

SIDE VIEW OF PIVOT, TENSION WASHER AND BOTH SHEAR BLADES, WITH SPACE EXAGGERATED TO SHOW DETAIL.

one simply closes the handles and guides the blades, and the shears attend automatically to the cutting. Nearly all the labor of cutting is saved. Every woman knows how troublesome it is to guide a pair of screw-connected shears, how difficult it

PIVOT AND TENSION WASHER.

POSITION OF CONNECTING PARTS WHEN ASSEMBLED.

the cuts conveys a clear idea of it. The connection consists of but three simple detachable parts, a connecting pivot, a tension washer and a tension plate. When pivot and tension washer are put in position in both shear blades, the spring plate is pushed

TENSION PLATE ABOUT TO ENTER GROOVE IN END OF PIVOT.

is to make the firm, straight cut or the artistic curve desired. The Screwless Springset Shears free the hand from this handi-

PIVOT, TENSION WASHER AND ONE BLADE OF SHEARS IN POSITION.

into the annular groove at the upper end of the pivot. A small round projecting dot on the under side of the tension plate click, down into a shallow hole in the surface of the shear

cap. The appearance of this shear on the market was a signal event in the history of shears. It is a scientifically constructed cutting tool instead of a pair of blades clumsily put together with

a screw. To users of this peerless cutter scissors and shears are no longer implements of drudgery, but have become a comfort and a satisfaction. Each shear passes through on the av-

and meats are the chief productions. While sections of Australia do not produce wheat, the production of other sections and of New Zealand is sufficient to supply all domestic demands and

SHEAR COMPLETE.

erage 387 operations. Particular attention to the hardening and tempering is given to these goods, no oil being used, as the superior process employed by the manufacturers insures uniform hardness and temper.

THE "GEM JUNIOR."

The Gem Cutlery Co., No. 34 Reade Street, New York, have just placed on the market the "Gem Junior" Seven Blade Safety Razor. This remarkable little razor has a keen blade for every day in the week and, although it retails for a dollar only, there is a good margin of profit left for the dealer handling this new shaving device.

The Gem Junior is furnished in a handsome case, packed com-

THE "GEM JUNIOR."

pactly with its seven keen all-steel blades. The blades are made from the best razor steel, hardened and tempered by this company's own process. They have a very keen and lasting edge, so that every blade will give a number of shaves without honing or stropping. When dull, they can readily be revived by stropping with the handle furnished for this purpose. The blades also fit other makes of safety razors.

TRADE OF THE UNITED STATES.

Trade between the United States and British Australasia in the fiscal year 1905 aggregated 38 million dollars, against 34½ millions in the preceding year, 32 millions in 1900, and 14 millions in 1895. Statistics compiled by the Department of Commerce and Labor through its Bureau of Statistics show that imports from British Australasia have grown from 4⅓ million dollars in 1895 to 12 millions in 1905, and exports thereto in the same period from 9 millions to 26 millions. For nine months of the present fiscal year the exports are about 2 millions in excess of the same months of last year.

The term "British Australasia," as used, includes Australia, Tasmania, New Zealand, and the Fiji Islands, but the commerce included under the term is chiefly that of Australia and New Zealand. Australia has an area of practically 3 million square miles, or but little less than that of the United States, and its population approximates 5 millions, or slightly in excess of that of our country at the beginning of our national existence. While the northern portion lies within the Tropics, the southern and more populous section, representing about three-fifths of the total area, is in the South Temperate Zone, with population, customs, and institutions, and therefore social requirements not dissimilar to those of the United States. Agriculture and stock raising are the most important industries, though the mining of gold and copper has assumed considerable proportions. The value of the principal crops aggregated in 1900 about 125 million dollars, wheat being credited with 31 millions, hay 30 millions, oats 10 millions, orchard and garden products 10 millions, potatoes 6 millions, and corn nearly 6 millions of dollars. Wheat, wool

leave a considerable surplus for exportation. Australasia is the largest wool producer of the world, her production in 1900 according to the reports of the National Association of Wool Manufacturers, being 510 million pounds, against 370 millions for Argentina, 361 millions for Russia, 190 millions for the United States, 140 millions for the United Kingdom, 104 millions for France, 103 millions for Spain, 100 millions for the British South African colonies, and 96 millions for Uruguay.

Exports from the United States to British Australasia include iron and steel manufactures, refined mineral oils, wood and its various manufactures, tobacco and manufactures thereof (chiefly plug,) paper and paper manufacturers, boots and shoes, upper leather, cotton manufactures, fruits and nuts, agricultural implements, fish, chemicals and drugs (patent and proprietary medicines forming a large share), cars and carriages, clocks and watches, rosin and turpentine, and many other articles of lesser values ranging as high as \$100,000 each per annum. The statistics of our exports to Australia and New Zealand disclose the preponderance of manufactures and the absence of agricultural products in any considerable quantities.

Comparing conditions in 1905 with those of a decade earlier, exports of Builders' Hardware increased from \$635,494 in 1895 to \$1,223,066 in 1905; sewing machines, from \$224,875 to \$541,713; wire, from \$106,799 to \$944,757, and iron and steel manufactures as a whole from \$1,543,739 in 1895 to \$6,695,253 in 1905. Meantime exports of refined mineral oils increased during the decade from \$1,541,073 in 1895 to \$2,638,455 in 1905; tobacco manufactures, from \$1,303,690 to \$1,795,191; agricultural implements, from \$246,930 to \$1,159,933; unmanufactured tobacco, from \$268,079 to \$741,215, and paper manufactures, from \$269,294 in 1895 to \$849,404 in 1905, the latter sum, however, being a million dollars less than that for 1901 and considerably below that for any years since 1891. Exports of boots and shoes increased from \$62,090 in 1895 to \$499,702, while in 1901 the total had risen to the unusual level of over 1½ million dollars. Upper leather increased from \$50,628 in 1895 to \$517,788 in 1905; cotton cloths \$59,084 to \$560,994; other cotton manufactures, from \$89,087 to \$518,185, and boards, deals, and planks from \$419,581 in 1895 to \$1,565,211 in 1904 and \$866,094 in 1905. The only countries to which we exported a larger value of merchandise in 1905 than to Australasia are the United Kingdom, to which the total exports were 523 million dollars; Germany, 194 millions; Canada, 141 millions; France, 76 millions; Netherlands, 73 millions; China, 53½ millions; Japan, 51¼ millions; Mexico, 45⅓ millions; Cuba, 38 millions; and Belgium, 38 millions of dollars. Our exportation of 26 million dollars' worth of merchandise to British Australasia was greater than that to Argentina, to which the total sales were 23½ millions; Spain, 17 millions; Russia (so far as ascertainable from the stated destination of outward manifest from the United States), 16⅓ millions; Denmark, 15 millions; British Africa, 15 millions; Sweden and Norway, 12 millions; the Central American Republics, 14 millions; Austria-Hungary, 12 millions; Brazil, 11 millions; Hongkong, 11 millions, and the British West Indies, 10 millions of dollars.

CHRONIC KICKING.

If business is dull and the fellow down the street seems to be getting some that belongs to you, says D. C. Washington in *The Optical Journal*, don't kick, but smile and try and get some new business in place of it. Don't kick, for the world hates a sore-head and will keep out of his society as much as possible. Don't go beefing around your store hunting for trouble, for it won't be long until the people in your place will get discouraged and think that it doesn't make any difference what they do you will kick any how, and so they won't take the trouble to try and do right. Kicking, like any other habit, is one that grows on you, and if you get at it you will find that you will soon become a chronic one, despised by your fellows, feared by your wife and children, and damned by the world as a whole. The boys that grow up in your home and in your store are using you for a pattern and will grow to maturity as kickers and your kicking will be visited on other generations, and while, as an Irish alderman in New York once asked, "What has posterity ever done for us?" we still must buck up a little when we remember that there are others who are studying our mental attitude and patterning their own by it.

VIRGINIA HOT SPRINGS CONVENTIONS

The tenth semi-annual convention of the American Hardware Manufacturers' Association and the sixteenth annual convention of the Southern Hardware Jobbers' Association will be held jointly at Hot Springs, Va., on June 12-15, 1906. The headquarters for both Associations will be at the New Homestead Hotel. A special train will be run between New York City and Virginia Hot Springs under the direction of the Chesapeake and Ohio Railroad Co. This train will include both Pullman sleepers and compartment cars, and it is now contemplated that it will either precede or follow, with a ten-minute interval, their regular train for Virginia Hot Springs, which leaves the Twenty-third Street Station (Pennsylvania Railroad) New York on Monday, June 11 at 4:55 P. M., arriving at 8:30 A. M. (Eastern time) and leaving Hot Springs for the return trip at such time as may prove most convenient to those returning on the special train. Applications for reservations on this train should be addressed to U. L. Truitt, G. E. P. A., care of the Chesapeake and Ohio Railroad Co., No. 362 Broadway, New York, who will be glad to furnish further particulars regarding the arrangements making, and who will make reservations in the order of their receipt by him. The programme decided upon for the conventions by the executive committees is as follows:

MORNING SESSION.

TUESDAY, JUNE 12, 1906.

10:00 a. m.—Meeting of the Executive Committee of the American Hardware Manufacturers' Association.

The Executive Sessions of the American Hardware Manufacturers' Association will be open only to members of the Association and their accredited representatives, and admission to such sessions will be regulated by cards to be issued by its Credentials Committee, which will be in session for this purpose at the Association's Headquarters in the Homestead Hotel during the convention period.

These cards will be issued in the name of the delegate; will not be transferable; and will be required to be shown at the door of the Convention Hall.

All delegates will be recognized to speak on any question which is under discussion—each speaker to be limited to five minutes, except by pre-arrangement.

Under the order of "New Business," members are requested to suggest or present any question for present or future discussion.

EXECUTIVE—FOR JOBBERS ONLY.

Meeting called to order promptly at 10:00 a. m. in Breakfast Room of the New Homestead Hotel.

Reading of minutes of 1905 convention.

Annual report of the president.

Report of secretary-treasurer.

Report of transportation committee.

Report of press committee.

Report of grievance committee.

Report of manufacturers' committee.

Report of membership committee.

Report of supply committee.

Report of metal committee.

Report of special committees.

Report of executive committee, read by O. B. Barker, Lynchburg, Va.

Appointment of special committees.

Communications.

Miscellaneous business.

Discussion of executive committee's report—Each speaker limited to five minutes.

Opening of Question Box—General discussion.

All delegates earnestly requested to attend this session and to remain in the Convention Hall until adjournment.

AFTERNOON SESSION.

TUESDAY, JUNE 12, 1906.

Convention Hall, New Homestead Ball Room.

Delegates and visitors will please assemble promptly at 2:30 p. m. The manufacturers, their representatives and the ladies are cordially invited to this session.

Meeting called to order by C. W. Asbury, Vice-President American Hardware Manufacturers' Association.

Prayer—Rev. Dr. J. G. Scott, Hot Springs, Va.

Chorus—"America."

Address of welcome by the president, S. H. J. A.—F. P. Dunlop.

Response—By a member of the American Hardware Manufacturers' Association.

Welcome to Hot Springs—J. T. McAllister, Hot Springs, Va.

Address—Good Fellowship—G. S. Gillman, Belfont Iron Works Co. Ironton, O.

Report of reception committee—Irby Bennett, chairman.

Introduction of new members, visitors and guests.

Impromptu addresses.

Informal reception of manufacturers, jobbers and their representatives.

EVENING.

TUESDAY, JUNE 12, 1906.

Entertainment features to be announced.

MORNING SESSION.

WEDNESDAY, JUNE 13, 1906.

EXECUTIVE SESSION.

10:00 a. m.—Strictly executive, and open only to members of the American Hardware Manufacturers' Association and their accredited representatives.

Reports of Committees and Discussions.

EXECUTIVE—FOR JOBBERS' ONLY.

Meeting called to order promptly at 9:30 a. m. in the Breakfast Room of the New Homestead Hotel.

Roll call.

Increased Expenses Demand Increased Profits.

Open discussion. Each speaker limited to five minutes.

Discussion of executive committee's report.

Trade Courtesies Due a Competitor.—H. M. Price, Mobile, Ala. H. M. Price & Co.

Open discussion. Each speaker limited to five minutes.

Opening of Question Box.

General discussion.

AFTERNOON SESSION.

WEDNESDAY, JUNE 13, 1906.

Joint session of jobbers, manufacturers and their representatives, the Southern Hardware Jobbers' Association being the guests of the American Hardware Manufacturers' Association.

Open only to accredited members of both associations and invited guests.

Convention Hall, New Homestead Ball Room.

Meeting called to order promptly at 2:30 p. m.

The Effects of Quantity Differentials.

Discussion opened for the S. H. J. A. by W. W. Webber, Ft. Smith, Ark., Webber-Ayres Hardware Co.

Discussion opened for the A. H. M. A.

Open discussion. Each speaker limited to five minutes.

Uniform Freight Classification.

General discussion—By both manufacturers and jobbers.

EVENING.

WEDNESDAY, JUNE 13, 1906.

Entertainment features to be announced.

MORNING SESSION.

THURSDAY, JUNE 14, 1906.

Strictly executive, and open only to members of the American Hardware Manufacturers' Association and their accredited representatives.

Communications.

Unfinished business.

New business.

Adjournment.

EXECUTIVE—FOR JOBBERS ONLY.

Meeting called to order promptly at 9:30 a. m. in the Breakfast Room of the New Homestead Hotel.

Discussion of committee reports.

Best Methods of Posting Travelling Men.—W. L. Sanford, Sherman, Texas, Roberts, Sanford & Taylor Co.

Open discussion. Each speaker limited to five minutes.

Advantages and Disadvantages of Direct Shipments.—F. L. Scott, Paducah, Ky., Scott Hardware Co.

Open discussion. Each speaker limited to five minutes.

Backbone—An Essential Element.

Open discussion. Each speaker limited to five minutes.

Opening of question box.

General discussion.

AFTERNOON SESSION.

THURSDAY, JUNE 14, 1906.

General session.

Convention Hall, Ball Room, New Homestead Hotel.

Meeting called to order promptly at 2:30 p. m.

Integrity of Contracts.

Discussion opened for the A. H. M. A. by Alfred Lang, Pittsburgh, Pa., Garland Nut & Rivet Co.

Discussion opened for the S. H. J. A. by Chas. H. Ireland, Greensboro, N. C., Odell Hardware Co.

Open discussion. Each speaker limited to five minutes.

Address—E. M. Bush, Evansville, Ind., President National Retail Hardware Association.

Address—The Best Business in the World—James H. Kennedy, N. Y., Editor *Hardware Dealers' Magazine*.

Opening of Question Box.

General discussion.

EVENING.

THURSDAY, JUNE 14, 1906.

Entertainment features to be announced.

MORNING SESSION.

FRIDAY, JUNE 15, 1906.

10:00 a. m.—Meeting of the executive committee of the American Hardware Manufacturers' Association.

EXECUTIVE—FOR JOBBERS ONLY.

Meeting called to order promptly at 9:30 a. m. in the Breakfast Room of the New Homestead Hotel.

Unfinished business.

Miscellaneous Business.

General discussion.

Report of special committees.

Election of officers.

Selection of place for next annual convention.

Adjournment.

AFTERNOON AND EVENING.

FRIDAY, JUNE 15, 1906.

Entertainment features to be supplied by reception committee.

VIRGINIA HOT SPRINGS HOTELS.

Sixteenth Annual Convention of the
SOUTHERN HARDWARE JOBBERS' ASSOCIATION.
and Tenth Semi-Annual Convention of the
AMERICAN HARDWARE MANUFACTURERS'
ASSOCIATION.

June 12th, 13th, 14th and 15th, 1906.

NEW HOMESTEAD HOTEL AND COTTAGES.

Official Headquarters of both Associations.

Single room, American plan, without bath, two in room, \$3.50 per day each.

Single room, American plan, without bath, one in room, \$4.00 per day each.

Single room, American plan, with bath, two in room, \$4.50 per day each.

Single room, American plan, with bath, one in room, \$6.00 per day each.

HOTEL ALPIN.

(Within five minutes walk of the New Homestead.)

Single room, American plan, without bath, \$2.50 per day each.

Single room, American plan, with bath, \$3.50 per day each.

Engagements of room will be made in the order in which reservations are received, and every possible effort will be made to give everybody satisfactory service.

All Reservations To Be Made Direct With The Hotels.

RAILROAD RATES.

From Southeastern Points.

RATES.

One first-class fare plus 25 cents for the round trip (minimum rate 50 cents) from all points in territory south of the Ohio and Potomac and east of the Mississippi rivers. The 25 cents included in the rate to be reported to the Chesapeake & Ohio Railroad.

The above rate under conditions named is respectfully tendered to connecting lines for basing purposes.

Going, tickets will be effective from starting point June 8 to 14, and will be good returning—without extension privilege—until June 19.

EXTENSION OF FINAL LIMIT.

Original purchasers of tickets may secure an extension of final limit to July 3 by personally depositing their tickets with Ticket Agent at Hot Springs upon payment of 50 cents at the time of deposit.

From Points Outside the Southeastern Passenger Association.

To those who attend the Convention coming from points outside the Southeastern Passenger Association, the various passenger associations have granted a rate of one and one-third fare, plus 25 cents, for the round trip; full fare going and one-third fare, plus 25 cents, returning, called the Certificate Plan Reduction.

To secure this rate certain steps must be taken, which are as follows:

When purchasing your tickets from starting point to Hot Springs, at the same time you ask for the regular one-way ticket, for which you pay the regular tariff rate, instruct the ticket agent to give you a certificate, properly filled out and signed. You will please turn this certificate over to the railroad secretary at the first opportunity upon your arrival, in order that it may be properly endorsed, when it will be returned to you. By presenting certificate to the ticket agent at Hot Springs, he will give you a return ticket to the point from which you started, at one-third regular fare, but under no consideration will reduction be allowed until you have a certificate, and it properly endorsed.

The reduction on this certificate plan will be effective from starting point June 8 to 14, and will be good to return until June 19.

It will be observed that from all points east of the Mississippi River and south of the Ohio River and Washington, the round trip rate will be ONE FARE, plus 25 cents, while from all other sections the rate will be ONE AND ONE-THIRD FARE for the round trip, plus 25 cents.

It will probably be less expensive for those who live near the boundary line to purchase a local ticket to terminal points, and from there secure the round trip ticket.

The New York Office of the Merchant & Evans Company, Tin Plates, Metals, Sheet Iron, Corrugated Leader and Gutter, Solder, General Tinner's Supplies, etc., has been removed to 224-226 Pearl Street, near Burling Slip. This location is in the center of the metal trade, and the facilities are such as to insure prompt deliveries. Large stocks in warehouses in New York and Brooklyn, and close connection with the Philadelphia works, permit prompt mill shipments.

AMERICAN STEEL LEAD KEGS.

American Can Co., of New York, Chicago, and San Francisco, are the manufacturers of the American Steel Lead Kegs, which possess several practical advantages over the old-fashioned keg. Dealers will be able to get a better price for steel kegs than for wooden ones, because better lead and more lead is taken from the steel keg than from the wooden one. Good lead has a definite proportion of oil. It must retain that oil to remain as good as it was made, because a wooden keg absorbs a great deal of this

AMERICAN STEEL LEAD KEGS.

oil, but the American Steel Keg cannot, because the steel keg has a patent friction top, which fits very tightly and excludes the air, which dries the lead or causes it to "skin." There is no loss from "skinned" or dry lead; the keg may be opened and a little lead removed, and the keg closed again practically air tight. The inside of the keg being smooth, it can be scraped and every ounce of lead used. Then again, fire hazard is practically eliminated where the American Steel Keg is used. A wooden, oil-soaked keg is good food for fire, and the American Steel cannot burn. Fire insurance on a stock of lead in steel kegs should cost much less than in wooden ones, because oil cannot soak through steel kegs. The American Steel Kegs are made in four popular sizes, calculated to hold 12½, 25, 50 and 100 pounds. The manufacturers are urged to send the company their schedule of sizes and quantities, and to permit them to quote a price to them.

HOW TO SECURE FOREIGN TRADE.

AMERICAN AGENTS PREFERABLE FOR AMERICAN PRODUCTS.

Consul Harris, of Mannheim, Germany, furnishes some valuable facts and suggestions on how to obtain foreign trade. The consul claims that American salesmen who handle their own goods are more successful in securing customers than are foreign salesmen engaged in handling American goods. He says:

Any man who will make a study of the organization and methods in Europe of other great concerns whose goods are found in every available market will best learn how foreign trade is secured. At the threshold of such study he will see that the methods employed are the ordinary American methods fitted to slightly different conditions. He is apt to hear the view from the foreigner who would handle American products that conditions in Germany are wholly different from those in the United States, and that as the German understands these best he can best sell American goods here. The American manufacturer, on the other hand, is sometimes led to believe that an indifferent salesman who is able to speak German is quite fitted for the German trade. Experience has not confirmed either view.

An American of much experience at the foreign sales department of a large American agricultural machinery concern, with a good trade in all parts of the world, gives it as his experience that American salesmen succeed best with the machinery of his concern—much better than foreign agents. It is no reflection on the foreign salesman to say that he has his own preconceived notions of how machinery should be sold, that these notions are not easily changed, and that they seem not to fit themselves readily to the American mower and harvester and to other branches of American trade.

One needs but to attend any of the large agricultural fairs in a foreign country to see how much more at home with American machinery are American agents than are the foreign agents. An American salesman yielding his bed at a crowded hotel in Germany to a writer who reported the matter to the papers, with the explanation that in certain parts of his territory he was in the habit of sleeping out doors on the platform of a harvester and would not miss his bed, gave in his explanation a partial clue to why the American agent is superior.

RECENT TRADE PUBLICATIONS.

INDEPENDENT REGISTER Co., Cleveland, Ohio, are distributing to the trade their catalogue and price list for 1906 of Independent Semi-Steel Registers, Ventilators, Borders and Fences. The contents include Registers in Moorish and Independent Designs; Square Convex, Circular Top Convex and Independent Deflecting Wall Registers, Independent Box Frames or Wall Borders, Independent Iron Register Boxes, etc. The catalogue is very attractively gotten up, printed on coated paper and with fine half-tone engravings, and deserves a wide distribution.

GREYSTONE MFG. Co., Greystone, Conn., have recently issued a new catalogue devoted to Key Chains, with Patent Hanger to display same, Key Rings, Snaps, Dog Chains, Dog Couplers, Kennel Chains and Trunk Hardware, list prices accompanying each line. The company state: "We are this year bringing out many new things in the 'Greystone' line, as well as continuing those that have already become popular, all of which we invite your attention to in the following illustrated price list." They are also manufacturers of a complete line of Small Coil Chains, Sporting Goods and Hardware of all kinds.

MERIDEN CUTLERY Co., Meriden, Conn., are distributing a booklet illustrating some samples of their line of Fine Table Cutlery made especially for family use under the name of the "Anvil Brand." Special attention is called to their Pearl-handled Knives with sterling silver trimmings, as well as to single pieces suitable for wedding presents, such as Berry Spoons, Orange Spoons, Cream Ladles, Sugar Shells, Oyster Forks, Pickle Forks, Orange Knives, Pie Knives, Cheese Scoops, Corkscrews, etc. Packed in satin-lined boxes they are specially attractive and also moderate in price.

MARK MFG. Co., Chicago, Ill., with general offices in the First National Bank Building, and mills in Chicago and Zanesville, Ohio, have presented us with their Catalogue No. 9 of Wrought Nipples, Couplings, "Navalite" Conduit Pipe for Electrical Wiring, Drive Well Points, Irrigation Strainers, Artesian Well Cylinders, Working Barrels, Irrigating and Pump Cylinders, Check Valves, Well Seals, Ball Valves, Rod Couplings, Pipe Strainers, Drive Shoes, Tool Couplings, Box Heads, Tank Floats, Earth Augers, Sand Pumps and Drills, Valve Grabs, Pipe Pullers, Artesian Cup Leathers, Leather Washers, Pipe Cutters, Pipe Vises, Melting Ladles, Pipe Benders, Oilers, Lathe Dogs, Carriage Clamps, Emery Wheel Dressers, Rowlocks, etc. The catalogue will be found a seasonable one and should be sent for.

TRIMONT MFG. Co., 15-27 Amory Street, Roxbury, Mass., have favored us with their revised catalogue for 1906 of "Trimo" Tools, in which a view is given of their building occupied by their main offices, grinding, polishing, assembling, testing, packing, and shipping departments, a rear view of their plant, and interior views of their machine and drop forge shops. Illustrations are also given of their "Trimo" Pipe Wrench and parts, Bull Dog Chain Wrench, Pipe Cutter and parts, Monkey Wrench and parts, Giant Chain Pipe Wrench, Special Narrow Jaw Wrench and Basin Wrench. We have also received from this company a Report of Mechanical Tests made with the United States Testing Machine at Watertown Arsenal, Mass. by the Ordnance Department between three sizes of the "Trimo" Monkey Wrench and the corresponding sizes of the next best.

BUTTERFIELD & Co., Derby Line, Vt., and Rock Island, Province of Quebec, Canada, are sending out their 1906 catalogue devoted to Screw Plates, Taps, Dies and Reamers. Included in the contents will be found Blacksmiths' Taper Taps, Stocks and Dies, Bicycle Repairer Screw Plates, Collet Tap Wrenches, Reece's New Screw Plates, Screw Plates for Bicycles, Round Adjustable Dies, Pump Stocks and Dies, Tap and Reamer Wrenches, Solid Tap Wrenches, Countersinks, Centre Reamers, Hand Taps, Tap Drills, Machine or Nut Taps, Stove Bolt, Bit Brace, Straight and Taper Boiler Taps, Tapper Taps, Stay Bolt, Pulley, Screw Machine, Long and Short Hob Taps, Mixer's Gummer Plates, Taper Reamers for Bit Braces, etc. This catalogue is gotten up in an exceedingly artistic manner, and will prove a valuable one to the dealer.

IDEAL REGISTER AND METALLIC FURNITURE Co., 14th & Kirby Avenues, Detroit, Mich., have published an exceedingly attractive catalogue of their "Ideal" line, which includes Combination Costumer and Toilet Mirrors, Hat and Coat Racks, Hall Trees, Cafe or Consorial Racks, Wall Mirrors, Barbers' Mirrors, Hand Glasses, Shaving Stands, Umbrella Stands, Towel and Column Racks. These are made in a variety of the most artistic designs. The catalogue will be sent upon request, and will be found of interest.

WILCOX, CRITTENDEN & Co., Inc., Middletown, Conn., are sending out a booklet describing and illustrating their line of Special Fittings for Launches and Motor Boats, which includes Galvanized Steel Rudders and Skags, Spray Hook Attachments and Sockets, Galvanized Tiller Chain, "Pig Tail" Hooks for Launch Curtains, Curtain Toggle, Drop Forged Socket Row Locks, Connecting Links, Launch Steering Wheels, Ely's Patent Deck Plates and the "Nutmeg" Portable Bilge Pump for Launches. This is a very timely booklet, and will prove of interest to those contemplating purchases of the kind.

WORCESTER LAWN MOWER Co., 108 Gold Street, Worcester, Mass., J. C. McCarty & Co., 10 Warren Street, New York, selling agents, have favored us with a copy of their new catalogue printed in colors, devoted to the line of Lawn Mowers of their manufacture, which includes the Worcester, Golf, Highland, Homestead, Elm Park, Green Mountain, Wizard, Commonwealth, Mount Tom, New England and Tip Top patterns. These are made both plain and ball bearing, and descriptions and list prices of each variety are given. They also illustrate the Worcester Grass Catcher and their Cone Adjustment. This is a catalogue that should be sent for by the trade.

BILLINGS & SPENCER Co., Hartford, Conn., have recently issued a handy booklet devoted to a few of the specialties manufactured by them, such as the "B. & S." Magazine Screw Driver, Billings' Knife, Combination Pen Knife and File, Improved Key Ring, Cigar Cutter and Whistle, Combination Pliers, Bicycle and Pocket Wrenches, Auto Wrenches, etc.

B. C. MILAM & SON, Frankfort, Ky., manufacturers of the genuine and original "Frankfort" and "Kentucky" Fishing Reels, have presented us with a booklet giving "some account of the nature, capabilities and manifold virtues" of their line of manufacture. A full history of these reels is included in the contents, with illustrations of their construction, and price list. Numerous testimonials are also given, as well as a reproduction of the gold medal awarded the company at the International Fisheries Exposition held in Bergen, Norway, in 1898.

SPRAGUE ELECTRIC Co., Nos. 527-531 West Thirty-fourth Street, New York, with branches in Chicago, Baltimore, Boston, Pittsburgh and San Francisco, have issued their Catalogue No. 312 illustrating their Direct Current Fan Motors of the Swivel and Trunnion Desk Type, Telephone Booth Motors, Midget Exhaust Fans, Desk and Bracket Fan Motors of the Lundell Single Field Coil Type, Type S Ceiling Fan Motors, Alternating Current Fan Motors, and appliances for same. A telegraph code and code word index are included in the contents. This timely catalogue should be sent for.

OHIO TOOL Co., Columbus, Ohio, and Auburn, N. Y., have sent out their illustrated catalogue and price list No. 22 devoted to Iron Planes, Jointers, Carriage-Makers' and Rabbit Planes, Wood Bottom Planes, Jacks, Block Planes, Bull-Nose Rabbit Planes, Adjustable Circular and Scraper Planes, Veneer Scrapers, Scrub Planes, Car Beading Planes, Router and Floor Planes, Hand Readers, Cabinet and Box Scrapers, Iron Spoke Shaves, Recess Handle Planes, Toy Planes, German Pattern Planes, Bench Planes, Moulding and Fancy Work Planes, Fillisters, Panel Plows, Iron and Wood Bench Screws, Wood Hand Screws, Chisel Handles, Cabinet-Makers' Clamps, File, Brad-Awl, Auger and Plane Handles, Coopers' Wood and Edge Tools, Carpenters' Edge tools, Drawing Knives, Socket Firmer Chisels and Gouges, Auger Bits, etc., etc. This is a very complete and useful catalogue, and may be had for the asking.

NEW GOODS AND SPECIALTIES

THE HANDY SAW.

George H. Bishop & Co., Lawrenceburg, Ind., are the manufacturers of the Handy Saw of which we give an illustration. The saw being double-toothed, really performing the work of two saws, is placed before the trade to be sold at a moderate price. It can be made to answer readily in a useful and convenient way for panel, cabinet, miter and for household use. The handle is so constructed and attached to the blade as to allow it to be swung upon its pivot to one side or the other of

THE HANDY SAW.

the blade, and held firmly in its adjusted position for cross-cutting or rip-sawing. The blade is made of fine steel of sufficient stiffness for endurance, and is toothed on one edge for cross-cutting and on the other so it may be used for ripping. The saw is made in 6 sizes, from 8 to 18 inches in length, of warranted quality, and put up in cartons containing one third of a dozen.

BAY STATE QUICK ACTING MONKEY WRENCH.

Bay State Tool Co., No. 147 Milk Street, Boston, Mass., are the makers of the Quick Acting Monkey Wrench illustrated herewith. This wrench is noted for its simplicity of construction and its quickness and sureness of adjustment. Once ad-

BAY STATE QUICK ACTING MONKEY WRENCH.

justed it may be relied upon to stay adjusted. It does not back off as does the ordinary screw wrench, and the adjustment can only be changed intentionally. It has a wider opening, at least a quarter-inch more opening on the jaw than other wrenches. It is made exceptionally strong from the best drop forgings, and steel castings, and being case hardened throughout its durability is unquestioned. All parts are interchangeable and all parts fully guaranteed. It is made in three sizes: 8, 10 and 12 inch, with an opening on the jaw respectively of 1½, 2 and 2½ inches.

BAY STATE RATCHET WRENCH.

Tudor Mfg. Co., No. 147 Milk Street, Boston, Mass., are putting on the market as a part of the Bay State line of quick-acting small tools a Ratchet Wrench adapted for various purposes.

BAY STATE RATCHET WRENCH.

The opening of the wrench is in a cylindrical part, having upon its circumference a ratchet forming a cylindrical rack. In a recess of the wrench is a spring pawl containing from five to ten

ratchet teeth, according to size, all of which engage the cylindrical part during the forward motion of the wrench, but permit the wrench to operate freely in the reverse direction. This feature renders the wrench useful for many purposes, obviating the necessity of removing it from a nut or bolt head while working. The Bay State Ratchet Wrench shown in the illustration is designed for general use, and is manufactured in 15 sizes to take standard hexagonal cap screws from ¼ to 1½ inches. This type of wrench is also made as an automobile ratchet tire lug wrench, in four sizes to fit lugs ½, 9-16, 5⁄8 and ¾ inch, and as a line-man's cross-arm ratchet wrench.

STARRETT'S TILE CUT-NIPPER.

L. S. Starrett Co., Athol, Mass., are making an addition to their special tools for various trades, a Tile Cut-Nipper, which is manufactured in deference to the expressed want of the workers in that industry. These Nippers are made the same as their No. 1 Cut-Nipper, except that the frames are cut out to allow the

STARRETT'S TILE CUT-NIPPER.

jaws to be adjusted for wide opening, as illustrated in the accompanying cut, thus fitting them to be used for cutting tile, for which purpose they are highly recommended by many tile workers who are now using them. The jaws can be easily replaced when necessary. These Nippers are made in two sizes: 5½ inch and 7 inch.

THE 'PHONE LOCK.

Business Utilities Co., No. 54 Warren Street, New York, are placing on the market the 'Phone Lock which the accompanying cut illustrates understandingly. It is a 'Phone Lock that has in a very many cases been greatly needed, and the use of which prevents the telephone being used by unauthorized persons at

THE 'PHONE LOCK.

APPLICATION TO TELEPHONE.

all times both on local, and especially long distance calls, which, whether the service be limited or unlimited, is a great saving. The device consists of a nickel-plated lock with rubber-covered

shackle, which prevents the marring of the woodwork or the nickel on the telephone. The method of its use is shown in the cut. The lock is closed automatically, and it opens with a key. Two keys are furnished with each lock, there being sixty changes of key. It is placed on the market to be sold at a moderate price. The 'Phone Lock is put up so it can be well displayed in a small window space, on top of or in a showcase on a shelf. Inquiries resulting from the general advertising being done by a concern are referred by the manufacturers to the nearest dealer carrying a supply of locks.

THE KITCHEN KUMFURT.

The Lasher Mfg. Co., No. 117 Perry Street, Davenport, Iowa, are introducing to the Hardware and housefurnishing goods trades a kitchen utility under the name of "Kitchen Kumfurt," that is, a Plate, Pan, Kettle and Sink Scraper Combined, which quickly and effectually cleans off all grease and refuse from the

THE KITCHEN KUMFURT.

dishes and pans before washing, thereby greatly facilitating the operation and making the dish-washing less of a task to accomplish. Used as a Sink Cleaner, it readily prevents greasy refuse from reaching the drain and making the plumber's presence a necessity. It is constructed in a sanitary manner of specially prepared rubber that will not scratch the finest china. The scrapers are mounted on display cards for the trade, and are designed to be marketed for 10 cents each.

NEW FAVORITE WASHER.

R. M. Ball, Muncie, Ind., is the manufacturer of the New Favorite Washer which we illustrate in the cuts accompanying

NEW FAVORITE WASHER.

this article. In Fig. 1 is represented the Washer closed as if filled with clothes and ready to be made useful. In Fig. 2 is exhibited the internal construction of the Washer, which affords a view of the rubbers made of white wood, on which the clothes are rubbed, the handle oscillating over a set of similar rubbers which are fixed in the concave bottom of the tub. The clothes are submerged in warm soapsuds during the operation, and there is no turning or pounding; just an even, gentle pressure of the rubbers rubbing away on both sides of the clothes, which rub at every forward and backward motion of the lever. The action of these two sets of rubbers rubs the dirt out of the clothes in a natural, easy, simple, sensible way without wear and tear on the garment. Also in Fig. 2 the cut shows the New Favorite Washer taken apart, cleaned and ready to be put away until next wash-day. This is a very simple operation, and does not require the use of a single tool, the heaviest part of the machine proper weighing 25 pounds, being carried by the woman as in the illus-

tration. The sides of the machine are made of one solid board of white wood thoroughly kiln-dried, and will not stain the clothes. The top or cover is made of the same material. The

THE WASHER TAKEN APART TO PUT AWAY.

bottom is lined with galvanized steel. The machine is light in weight, and easy to take apart in cleaning.

DECORATED "POLAR" BRACKET FAN.

A. Rosenberg Motor & Mfg. Co., Baltimore, Md., are the manufacturers of the Decorated "Polar" Bracket Fan which is shown in the accompanying illustration. It shows the 12-inch and 16-inch Adjustable, which is driven by the water supply in ordinary house pipes. It is adjustable in every way possible while running, enabling air to be thrown in any direction tilted

DECORATED "POLAR" BRACKET FAN.

up or down. It uses from 6 to 10 cubic feet of water per hour, having a half-inch supply pipe and three-quarter inch outlet pipe. The same motor can be used for power purposes.

NEW STRAP-CLAMP DESK FIXTURE.

In a recent issue we took occasion to call the attention of our readers to the Roll-top Desk specialties manufactured by The O. C. White Company, Worcester, Mass. We now call attention to one of their most recent productions for direct attachment to a roll-top desk, which we illustrate in this article, their New

Strap-Clamp Desk Fixture No. 2M, which brings the light directly over the work, eliminating all shadows and glare, and securing a perfect lighting effect with a low-candle lamp. It is claimed the cost of current with this fixture is decreased nearly one half. Its strap parts are of steel, its joints of japanned iron and finished gun-metal, and its lamp arm of heavy brass tubing the whole being finely plated and finished. It is attachable to all widths and thicknesses of desk tops, and can be clamped se-

NEW STRAP-CLAMP DESK FIXTURE.

curely in place in a moment, or as quickly removed without the use of tools. It has a standard wrist-joint at the end of desk arm, which gives free angular adjustment to the lamp. The unrestricted range of adjustability and the facility and firmness of attachment make this lamp possess undoubted selling merits.

EXTENSION ARM WALL MIRROR.

Ideal Register and Metallic Furniture Co., Detroit, Mich., are manufacturing a line of metallic furniture in which are included a number of ornamental articles in which utility is plainly in

EXTENSION ARM WALL MIRROR.

evidence; among which may be mentioned the Extension Arm Wall Mirror, of which we present an illustration herewith. It has a hinged bracket plate 12 inches in height, with an extension arm that is adjustable from 7 to 48 inches in length, and which can be swung against the wall on either side of the bracket plate. The mirror is oval, of bevel plate 10 by 14 inches,

and with a backing of three-ply veneer. Oxydized copper or nickel-plate finish are furnished at the option of the purchaser. In referring to this article, the company state that its strength and handsome appearance as well as its many adjustments make it a desirable store fixture, and an especially convenient article for the bathroom or toilet room. It is spoken of as one of the most popular articles that they have ever manufactured, and which is meeting with large demand on the part of the Hardware trade throughout the United States, as well as from the furniture trade.

"LITTLE GIANT" FLOOR SCRAPER.

The Hurley Machine Co., Nos. 153-159 South Jefferson Street, Chicago, and an Eastern office No. 1010 Flatiron Building, New York, are placing on the market the Little Giant Floor Scraper shown in the accompanying illustration, which is designed for

"LITTLE GIANT" FLOOR SCRAPER.

surfacing hard wood floors, and it is claimed can be successfully used on oak, maple, birch, yellow pine, beech and parquet floors. The knife being attached to the front of the frame of the machine enables the operator to get in all corners and up to the baseboard, thus obviating the surfacing of any part of the floor by hand. The machine consists of a solid steel roller with a shaft running through its center, upon which is supported a cast steel frame. The bearings are of bronze, and two springs on either side interposed between them and the frame enable the operator to tilt the knife to either side without the necessity of tilting the entire machine. The knife, which is slightly convex, thus preventing the scratching of floors with its corners, is bolted to the front of the frame and is adjustable, and when the machine is in position is raised $\frac{1}{8}$ inch from the floor. Two small wheels adjusted to the frame in the rear of the roller serve as a balance for the former. The handle is likewise adjustable, and can be shortened for use in small rooms where it would be inconvenient to operate with the handle at its full length. The small balance wheels as well as the roller have rubber tires, offering ample protection to the floors.

"PULLMAN" SCREEN SPRING.

Pullman Manufacturing Co., Rochester, N. Y., are offering the spring for sliding window screens, of which we give an illustration.

"PULLMAN" SCREEN SPRING.

It is a high-grade flat spring made from best quality tempered Bessemer steel, and is 5 inches long and $\frac{1}{4}$ inch in width. They are designed to be placed out of sight in the side of screens, where they furnish sufficient friction to hold them at any desired point, but still permitting the screen to be freely and readily moved. It is explained that one or two springs may be used as desired, but that one is sufficient for small screens.

OUR BRITISH LETTER.

THE I. F. A. CONFERENCE IN LONDON.

The Annual Conference of delegates of the Ironmongers' Associations which are included in the federation known as the Ironmongers' Federated Association, has just been held in London. The sittings of the assembly, together with other functions held in connection with it, lasted over three days, and was undoubtedly one of the most successful gatherings of retail Hardware tradesmen ever held in this country. As I have frequently mentioned in my monthly letters, the association movement in Great Britain has been gradually developing, until its ramifications reach to all parts of England and Wales—so far associations based upon the same constitution have not reached either Ireland or Scotland. The meetings consisted of ironmongers from all parts of the country; both in towns and rural districts being fully represented. The conference opened on May 9, Charles Parsons, the president, welcoming the members and delegates in the fine old hall belonging to the ancient guild of the Worshipful Company of Ironmongers. The minutes of the last conference, which was held at Bristol in May, 1905, having been confirmed, Secretary Smith presented his annual report, which contained a resume of the chief matters which have been under discussion during the year, both by the Central Board and the different local associations; and gave a review of the work done and the objects achieved. The treasurer's report, which was very satisfactory, was next presented. The conference then proceeded with the election of president, vice-president, treasurer and secretary; the existing officers being all re-elected. The method of election of members to the Central Board has given rise to some controversy during the last few months, and a discussion arose as to the best methods of proceeding, in order that the best representation possible might be attained.* The necessity for urging the Government to appoint a Minister of Commerce having been discussed, a resolution, "That such an officer is absolutely necessary, in order that commercial undertakings, both at home and abroad, may be more closely watched than they can be under existing circumstances," was carried. The business of the first day having been brought to a close, the members adjourned. In the evening a reception was held and a very interesting social gathering took place in the Hotel Russell, under the auspices of the president and members of the London Ironmongers' Association.

THE SECOND DAY: BUSINESS AND THE ANNUAL DINNER.

On Thursday, May 10, the conference was resumed in the morning, and President Parsons delivered his presidential address, in which he reviewed the present position of ironmongers' associations. He pointed out their growth and development, and urged the members to still further advancement in order that their trade might be safeguarded and their interests bettered. The General Secretary, R. H. Smith, then made an announcement of the results of the examinations of assistants, which were held in London recently. The report of the examiners was very satisfactory, thirty-one assistants out of the thirty-three who presented themselves, having qualified for the I. F. A. certificates. Some discussion arose as to the desirability of instituting local preliminary examinations. One of the most important matters brought up for the consideration of the conference was the suggested incorporation of the I. F. A. Mr. L. A. L. North, the Hon. Solicitor to the Federation, in an able paper pointed out the advantages of incorporation of the Federation would be improved by a charter being obtained.** The report of the Committee appointed at the Bristol Conference to complete the In Accord list was given by R. B. Browne, of Liverpool, who announced the addition of a number of well-known firms who were willing to fall in with the views of trading laid down as principles which should be accepted by manufacturers in their dealings with retail ironmongers.*** The increased amount of municipal trading which has taken place during recent years gave rise to an animated discussion upon the position of retailers, and it was ultimately decided to adopt the following resolution: "That municipalities should not deal in, and sell to the public,

articles or commodities which can be distributed equally as well by the shop-keeper, who is the rate-payer in the district."

PRICE MAINTENANCE QUESTIONS.

Perhaps one of the most advanced suggestions brought forward in connection with the general adoption of price maintenance principles was that promulgated by W. Clarke, a North Wales ironmonger, who, together with many other ironmongers in North Wales, is of the opinion that price maintenance should be strictly carried out by manufacturers of implements and machines. The position of implement agents in Great Britain is just now in a very unsatisfactory condition owing to the price-cutting of harvesting machinery which has been going on. Complaints are made that cut prices have been advertised largely by makers and some dealers educating the public, not only in the prices which implement dealers are now forced to sell at, but also in the prices they pay the manufacturers. It is claimed that the profit margin is below a living profit, and that the only likely way to bring about better results is by some powerful organization taking up the matter. The ironmongers of North Wales are large retailers of implements, and as the Branch Associations in that district are very strong, the conference considered the matter in all its bearings, ultimately deciding to approach the manufacturers on the subject. The president of the I. F. A. has recently taken great interest in the movement to alter the present bankruptcy laws, and to prevent debenture holders from having a covering charge, to the exclusion of what is considered to be the rights of creditors. Resolutions were therefore adopted by the conference, drawing the attention of the Government to the urgent need for alterations in the present laws. The inequality of rates, and especially of the charges of carriage on small consignments, by railway companies, together with other matters, were also discussed. The programme of the meetings was handled in a business-like manner by the leaders of the Conference, and carried out by the members, so many of whom had come long distances. It thus shows how keenly the ironmongers of Great Britain are alive to the evils which exist in trade matters, and that they are not slow to try remedies, by the adoption of which their position as retailers may be improved. The annual banquet held at the Hotel Russell at the close of the second day's proceedings, will ever be a memorable one, not only on account of the large attendance of ironmongers, many of whom were accompanied by their wives and daughters, but also on account of the distinguished guests who were present; the Sheriffs of the City of London greeted the banquet with their presence, but the Lord Mayor, who had promised to be present, was prevented by illness from doing so.

LADIES' DAY AND A RIVER EXCURSION.

A novel feature in connection with this year's conference was introduced; the honor of the "happy thought" being due to American forethought and enterprise. In view of the number of ladies who accompanied the delegates to London, The Bissell Carpet Sweeper Co., and The Coldwell Lawn Mower Co., both American firms of high standing in Great Britain, put their heads together and decided to inaugurate a "Ladies' Day," mapping out a very pleasurable series of visits to some of the chief features in London, the fatigue of which was minimized by luncheon and afternoon tea being included. The tour was personally conducted, and the round of the city was made in motor vehicles. Friday, May 11, was made the occasion of a very instructive river excursion to Greenwich and Woolwich, in a luxurious steamer which had been chartered for the occasion. The principal object of the visit was to explore the mysteries of Woolwich Arsenal, and to afford visitors the somewhat rare opportunity of inspecting the different processes of manufacture of guns and munitions of war which are carried out, to so large an extent, at the Government foundries and factories. Lunch at the famous "Ship" Inn at Greenwich brought to a close the annual event which is now looked forward to so keenly by ironmongers in all parts of the country, and regarded as a sitting of the "Ironmongers' Parliament," which should not be missed.

THE FURNITURE TRADE AS PRACTICED BY IRONMONGERS.

Many ironmongers are gradually developing into house furnishers, and in the large county towns where a general trade is most applicable, they are taking up the sales of household furniture, domestic machinery, and kitchen appointments to a much greater extent than formerly. Quite recently a Furniture Exhibition has been held in London, attended by a number of ironmong-

*A resolution advocating the direct representation of every local association was, however, lost on being put to the meeting. It was, however, decided to appoint committees to deal with special subjects.

**After some discussion it was decided to proceed with incorporation of time and methods being left in the hands of the Central Board.

***This list was accepted by the conference as a basis to be added to from time to time. It was ordered to be circulated privately among members.

SCREWLESS SPRINGSET SHEARS AND SCISSORS

Have taken the trade by storm. By sheer force of merit they have cut their way into popular favor. Are absolutely screwless, adjustable by a spring plate; are self-sharpening; they have

a perfectly even tension throughout their cutting length, which preserves their keen edge.

The
"Screwless"

is perfectly simple in construction—simply perfect in action.

NO MORE

twisting of shear handles to hold the cutting edges together; no more painful cramping of hand to guide the shears-aright. You simply close the handles and guide the blades—the shears do the cutting automatically.

MR. DEALER:—Our descriptive circular and price list tell the rest. Write for them to-day.

DAVIES AUTOMATIC SHEAR CO.

41-43 MAIDEN LANE, NEW YORK.

ers and others engaged in the different branches of the furniture trades. Such exhibitions have been popular for some time past, and are regarded as boons by busy men who gladly seize such opportunities of inspecting the latest designs in general goods, and especially the opportunities which such exhibitions afford of comparison, as on those occasions the different styles and values of specialties made by individual makers may be examined side by side, and their values compared. The secret in success in furnishing, and especially in the furniture trade as applied to ironmongers, appears to lie in the choice of goods offered, and in the selection of suitable novelties. It is very easy to lay in a stock of unsalable goods, and to block up show-rooms, as well as to lock up capital in accumulating unsuitable articles. Therefore the utmost discretion should be exercised in buying, and the careful salesman cannot have a better opportunity of acquiring the knowledge he needs than by attending exhibitions such as those which have been inaugurated during recent years among the furnishing and Hardware trades. The exhibition to which I have referred contained not only a number of leading lines and household furniture such as suites and general goods, but also side lines and accessories, many of which are equally applicable to the Hardware and furnishing trades. A furniture window is always made attractive by a suitable supply of art goods, so many of which are now being introduced in this country. The introduction of improved library, office and hall furniture by American importers a few years ago, led to considerable development in that particular type of furniture manufacture. The use of roll-top desks and library furniture of improved types has spread considerably, one of the best known firms of importers of American goods being J. C. Plimpton & Co., of Liverpool, who have recently published a new catalogue, in which they include a pleasing selection of Sheraton tables and office furniture, as well as organs and musical instruments—all imported from the States.

GARDEN FURNITURE.

Most ironmongers are now busily engaged in the supply of garden furniture, and outdoor specialties. The beautifully made and highly decorative swing seats, chairs with awnings, and folding deck and saloon chairs which are now so extensively sold are not only an attractive stock, but their display leads to the sale of other kindred goods. The American hammocks, so many of which have been introduced in this country, are still

popular, and many British gardens and lawns are at the present time made bright by smart and well-made hammocks of American manufacture. The sale of garden furniture also includes tools and accessories, in which lawn mowers figure conspicuously. American mowers are popular, although British horticulturists take exception to the American principle of arranging the knives on the cylinder of the mower, and prefer a larger number of knives arranged at shorter distances, a plan generally adopted by makers of British pattern mowers. In order to meet this preference, several of the leading American manufacturers, notably The Coldwell Lawn Mower Co., have adopted British patterns, and in consequence, are doing good business here.

The demand for improved horticultural tools, and for labor-saving appliances is gaining ground, and the tools and implements used in gardens to-day, both by amateurs and professionals, are much in advance of those formerly employed. The Spring season has been somewhat late this year, and, consequently, the demand for Summer goods has only just commenced. The general trade of the country, although not very brisk, shows promise of improvement, and ironmongers are still busy before the season closes, they will be able to report a successful business, and to show that the present year has been up to the standard which was raised at its commencement, by those who foresaw a good business year ahead.

WARNING TO EXPORTERS.

Consul-General Listoe sends from Rotterdam, as a warning to American exporters, a copy of a postal card published in Dutch weekly *Unitas*, which card, it is declared, is being sent to France, England and the United States, by a firm at Breda, the Netherlands, calling itself "Guillaume Siehl Aine, Maison d'Importation." The postal card reads as follows:

As English goods daily become of a more important sale on our markets, I take the liberty to inform you that your articles interest me and that I am a large buyer of same.

I therefore beg to ask you kindly to supply me with your lowest offers for wholesale and I am sure that, if prices be convenient, we will come to a rather large business.

Consul-General Listoe says that the editors of *Unitas* advise persons receiving such postal cards, before entering upon business transactions, to make inquiries with reference to the financial standing of the writers and not to deliver goods until payment for same has been received.

REVIEW OF THE MARKETS.

WIRE NAILS: The demand for Wire Products is above the ordinary requirements, except from San Francisco. The ordinary requirements, except from San Francisco are not especially heavy, but the shipments from the mills attract orders are fully up to the mark. San Francisco is buying for wire nails largely, which is owing to the large number of temporary structures now in course of erection. The quotations are as follows: f.o.b. Pittsburgh, plus actual freight and cost of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

Carloads to jobbers\$1.85
Carload lots to retail merchants 1.90

York. An improved demand is noticeable for Wire Nails that is encouraging. The prices for small lots from the well maintained, and are quoted on the basis of \$2.15

NAILS: A little unevenness is referred to as affecting the market for Cut Nails, a light demand making it possible in the future for carload lots. Shipments on orders under contract are as large as ever. Regular quotations are as follows: Case, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than 100 lbs, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock, New York. Iron nails at points west of Buffalo and Pittsburgh are held at 10 cents advance on Steel Cut Nails.

York. Although the market is a little affected by the scarcity of quotations on carload lots, no change has been made in jobbers' quotations, for small lots from store which are quoted at \$2.05 per keg.

BARB WIRE: The demand for Barb Wire is quite moderate from agricultural trade centres. The railroads are busy heavily, and the mills are full of their orders. The market is firmly held, with quotations as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|---|----------|--------|
| Jobbers, carload lots | \$2.00 | \$2.30 |
| Retailers, carload lots | 2.05 | 2.35 |
| Retailers, less than carload lots | 2.15 | 2.45 |

TOOTH FENCE WIRE: The nearby territory is busy with orders for immediate shipment, limited though they are. The manufacturers, anticipating that a good trade will be their share on this Fall, are contracting for their wants even this early. The quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads\$1.70
Retailers, carloads 1.75

The foregoing prices are for base numbers, 6 to 10. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

White Sisal (500 feet to the pound) 9¼ to 9½
Standard (500 feet to the pound) 9¼ to 9½
Standard Manila (550 feet to the pound) 10½ to 10¾
Manila (600 feet to the pound) 11½ to 12
Pure Manila (650 feet to the pound) 12½ to 13
Less than car lots ¼ cent advance.

The following prices may be said to represent the market:

| | Cents per Pound. |
|------------------------------------|------------------|
| Pure Manila, 7-16 and larger | 12½ to 13 |
| B Quality Manila | 11½ to 12 |
| Pure Sisal, 7-16 and larger | 9½ to 10 |
| 2 Sisal, 7-16 and larger | 8 to 8¼ |

SEED OIL: The following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels 42 cents per gallon.
In lots of 5 barrels or more 41 cents per gallon.
The "American" brand for respective quantities, 2 cents per gallon less.
The five-barrel price applies only to deliveries of that quantity in time.
Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.
Calcutta Oil 65 cents per gallon.

MR. GLADDING VISITS THE COAST.

Our Mr. N. A. Gladding returned on Saturday, May 12th, from his recent trip to the Pacific Coast. On the day of the earthquake, April 18, Mr. Gladding was en route to Spokane,

Seattle, Portland and San Francisco, and on receiving word of the terrible calamity which befell the latter city, he hastened on to that place, arriving at Oakland Tuesday morning April 24th. On the morning of his arrival Mr. Gladding was fortunate enough to secure a pass from the Governor of California permitting him to go through the military lines of both Oakland and San Francisco, which enabled him to visit the scene of the catastrophe. Together with the Manager of our San Francisco Branch House, Mr. R. W. Neighbor, Mr. Gladding traversed the entire burned district comprising about 450 blocks. The desolation was simply indescribable and heart-breaking. It is one of those things that is absolutely beyond exaggeration. In fact the half will never be told or even realized by the sufferers themselves, let alone the people who are outside. Your readers of course, are so well acquainted with the details by this time through the accounts given in the press, that it is not necessary to go into same here.

Our Company had a Branch House at No. 21 and 23 Main Street, which was three squares from the Southern Pacific Ferry, the store being located about one half block from Market Street. It was therefore located right in the track of the conflagration in its earliest stages and the building and stock, consisting of a complete line of Atkins' circular, band, cross cut, hand and other saws, mill specialties, etc., was a complete loss, and while this was quite a sharp blow to us, yet we feel that in comparing same with the loss of thousands of others in which many of them had everything they possessed entirely wiped out, we have no reason to complain; in fact our loss is too small to talk about.

Mr. Gladding found that our San Francisco Manager, Mr. R. W. Neighbor, with his usual enterprise and push, had already located a temporary office at No. 1055 Broadway, Oakland, Cal., and was ready for business. Mr. Neighbor had sent out a card on Friday the 20th, announcing location of the office and that all orders would have prompt attention. After spending several days studying the situation it was decided to prepare still further for future business and Mr. Gladding therefore leased a warehouse at No. 862 Market Street, Oakland, which will be the temporary location of the San Francisco Branch until further notice.

We were very fortunate in securing in this room a large, well-lighted place, splendidly suited for carrying a stock of goods such as we manufacture, giving ample office room, etc. In Mr. Gladding's opinion there is no doubt about the re-building of San Francisco on a more substantial and more beautiful plan than in the past, and that the business in all lines will assume greater volume than ever before.

E. C. ATKINS & Co.
H. C. Atkins, President.

THE PITTSBURGH TRADE.

May has brought an active movement of jobbers' stocks. Always the central Spring month for amount of sales, this year is no exception and shows up a good increase over 1905. Because of the bulky character of Spring goods, shipping departments find it hard to keep up with the demands upon them, so that shipments are not so prompt as is customary. It is also difficult to keep up stocks of some items, such as poultry netting and wire cloth, which are selling heavily at present. Retailers who delay ordering until the goods are wanted immediately, find they cannot always be promptly served and should make some allowance for the conditions, as they may feel certain their jobber will do his utmost to accommodate and fill orders promptly.

LOGAN-GREGG HARDWARE CO.

THE SAGINAW TRADE.

We have always considered that about the best barometer of immediate business with the retail Hardware dealer is the volume of mail orders and telephone orders, and so judging, conditions in Michigan are not far from perfect at this season of the year. Dealers are enjoying a heavier and earlier business than for several years. The numerous pick-up orders reflect the conditions of the country. The spring has been a very favorable one, no floods, enough rain, an early break-up, and good growing weather. The roads are in good condition. The writer spent one day last week on the largest improved farm in Michigan, which comprises about sixteen square miles, largely under cultivation, and was able to observe results of such a favorable season. Everything seemed at least three weeks ahead of last season 240 extra hands arrived to assist in cultivation of the sugar beets.

Providence, R. I.

THE CLEVELAND TRADE.

The prospect for good crops and a settlement of the strikes that threatened to injure business and pauperize thousands of laborers being settled, leaves the outlook promising. The farmers were never in a more prosperous condition, and business is increasing month by month. The people have money to buy and keep in repair automobiles, and this means much to those who have experience. The Executive Committee of the National Hardware Association have been in session this week in this city. St. Paul, Omaha, Philadelphia, Boston, Pittsburgh, St. Louis and Birmingham, Ala., were represented. The National Tube Co. took them out and through their works at Lorain, where they are making a thousand tons of pipe daily, winding it up with a fine lunch. This with an automobile ride over the park system, and dinner at the Union Club, given by the American Steel & Wire Co., concluded their session.

The settlement of the Longshoremen's strike permits lake transportation to proceed without interference, which is very important. The Moulders' strike has also been settled. With the millions coming to this country, work people are very scarce with no excuse for tramps. The probability of an advance in price is much greater than at any time this season, and there would be danger of a boom if the larger manufacturers would consent. We owe to their attitude the continuance of prosperity, and they will keep in touch with the business pulse, and happily are in condition to apply an antidote if they see danger. It is well to have the business and brains of the country in unison. Some new precedents are in the making by the courts, relating to liberty versus ethics. We are learning that the rights of property and individual liberty do not include the right of trespass. Congress seems to have "built better than they knew" when it passed the Sherman Act, and it was followed by legislation in the States, and now that the National and State officials have commenced prosecution, the woods are full of criminals. The passion to form combinations to fix prices seems to have been contagious, ignoring both National and State laws. Associations to improve trade methods have been useful, but when they are used against the public they become nefarious.

THE LOCKWOOD-TAYLOR HARDWARE CO.,

C. B. LOCKWOOD, Pres.

THE ST. PAUL TRADE.

We consider that business in general was never better all over this beloved country of ours than it is at the time of writing this. Our beautiful, progressive and healthful Northwest is up with the balance of the country. Every one who is able and desirous of work can get all the work desired. Wages are good and especially so for certain kinds of labor in our line. Tinners are called for every few days; \$2.50 to \$3.00 per day is offered. Steady work is promised and the demand is beyond the

supply. The crop prospects, so far, are everything that could be desired and so a good Fall trade is promised. Goods of certain classes are hard to get and if the sheet manufacturers tell the truth, we can expect a drought in that line, and, consequently, stoves, stove pipe, elbows, drip pans and such articles will be scarce. We feel that tin is abnormally high and care should be taken to unload stock and buy closely until the market steadies down. We advise the purchase of Fall goods, as these can be bought at fair price and future delivery; to our mind such purchases, if made from responsible parties, are safe and sure to result satisfactorily. A close watch on the market is desirable as the demand is so large that further advances in our line is imminent.

HACKETT, WALTHER, GATES HARDWARE CO.

T. G. Walther, Vice-President.

THE MINNEAPOLIS TRADE.

As to present business we think we can safely say that not only Hardware merchants, both wholesale and retail, but that in every other branch of commercial business, conditions are most favorable. We know, as far as we are concerned, we are very busy and talking with jobbers generally, as we have recently, they all tell the same story. The greatest trouble we are having now is the utter impossibility of getting many of the most staple goods. Goods that we need to put out over our counter from day to day. Prices are somewhat demoralizing here. There is quite a strong question whether the Minneapolis Retailers' Hardware Association will continue to exist and keep up the good work that it has been doing for the past five years. For several years there was a most energetic president who was always ready and willing whenever there was any trouble between dealers, or between the retail dealers and jobbers, to get right into the fight and whip people into line. It is a very trying position, every one is not adapted for it and the fact that the same results are not being accomplished at the present time is not intended as a reflection on the present presiding officer.

As to future business, it's a safe proposition to say that conditions will remain about as they are up to July 1st, at which time we ought to know more definitely as to the crop possibilities. We don't think that even though they should look rather bad at that time it would materially affect business generally, still it would have a depressing effect.

At present quoting from the acting President of the Chamber of Commerce, who has just returned from a general tour through Minnesota and the Dakotas, he says the conditions could hardly be more promising and doubts if they have ever been at a corresponding date. "There is everything in sight, at this time, to indicate continued activity and prosperity for all commercial lines dependent upon the Northwest's annual crop output. It is, of course, a long way to harvest, but all things encouraging have been with the country so far."

The total grain area is larger. There are some late spots in

the Red River Valley, but relative to the whole this is not important. Again quoting from a former President of the Chamber, he says: "Crops are looking fine, promise well and the general outlook is highly favorable; in Minnesota particularly there is increasing tendency towards diversification. Acreage of corn, oats and small crops are much larger than ever before and more farms are being given over every year to dairying."

All this encouraging news, with the further fact that the eighteen years the writer has been here we have never had a crop failure, or as you might say, even a suspicion of it. Of course there have been some years when the crops as a whole have not been as good as others and now and then it has been spotted, but these States could stand a bad condition successfully, for the farming country as a whole is very rich.

W. K. MORISON & Co.

THE DAVENPORT TRADE.

There is a decided improvement in the volume of business and the goods wanted are varied in character. The great bulk of sales are in general Hardware. There is already a scarcity in some lines of goods as trade has been greater than manufacturers have anticipated, and in many lines there is a decided shortage. Prices are naturally very firm under these conditions and should crops prove as large as they now promise, there cannot help but be a large demand for goods for the Fall trade and in some lines the prices may go skyward. The weather is absolutely perfect for growing crops as well as for pleasure. The mercury has not dropped below 65 night or day for several days in succession.

SICKELS, PRESTON & NUTTING Co.

THE SAN FRANCISCO TRADE.

The most important matter before San Francisco now is the restoration of trade, and to that end all available energies seem bent. We subsist, not only as a city, but as units, on our trade, and on it our daily income depends. It supplies us with money and food. Furthermore, it is not confined to this single city, which is its center, and therefore its great distributing point, but ramifies to the remotest parts of the State. Any impairment of that trade, therefore, carries more or less business languishment all over California. Therefore we owe it to the farmers, fruit and vegetable growers, country merchants and many others to restore our trade with all possible dispatch, so that the products of the farms may not go to waste for lack of the usual market, but the business of the interior proceed unchecked. As far as California trade is concerned the outlook is bright. The crops are generally promising, assuring us of excellent harvest returns, and they are not far off. In a few weeks we shall be selling our crops of 1906 and receiving fine returns for them. We have as much Pacific Ocean to the west, north and south, as many railroads to the east of us, as before the fire. Our ships and cars are still with us. We have the crops to put into them, and as soon as we can get some of the litter and rubbish cleared away from our doors so that we may go in and out, our business as a city and State will proceed as if our great earthquake-fire had not happened.

W. J. Golcher, of the firm of Clabrough, Golcher & Co., which was one of the big gun stores and prominent resorts for fly-casters of the city before the earthquake-fire disaster, and will shortly be greater than ever, has earned the gratitude of a considerable number of gentlemen sportsmen. While the fire was raging in the vicinity of the Market-Street store, Golcher made his way into the building, and saved the favorite shotguns of well-known quail and duck shots, more than 100 guns which were stored with the firm during the closed season. The majority of them were by the most celebrated European makers, and were highly prized.

E. J. Kaplan, undaunted by the fire which destroyed his sporting goods house, is making a fresh start at Market and Valencia Streets.

The State Fish Commissioner reports the fish hatcheries throughout the State in good order. The earthquake shook tens of thousands of trout out of the breeding troughs, but deputies in charge replaced large numbers of them before damage could be done.

W. W. Montague & Co. have commenced the erection of a capacious warehouse at Pine and Atlantic Streets. Besides this, this same Hardware house has leased the Kirk Iron Works in East Oakland, and will begin here the manufacture of stove pipes. Temporary locations for a number of foundries have been secured in this neighborhood.

Hon. Frank K. Mott is not only the exceedingly popular Mayor of Oakland, but the president and active manager of the Frank K. Mott Hardware Company of Oakland. He said to me this week: "The recent catastrophe at San Francisco has driven to us thousands of people who will without doubt remain here

permanently. Many are buying homes, others are building, and a large percentage of those who are renting homes here will more than likely make Oakland their home in the future. Business men of San Francisco who were burned out, and who are now located in Oakland, are building warehouses and factories here, buying property and putting up manufacturing plants. These will remain with us to a great extent. Some of the people and some of the business will in the course of time go back to San Francisco, but the present condition of increased business activity that has resulted to Oakland because of the disaster to our sister city will stay, and our condition will be marvellously better than ever before. I believe Oakland has advanced five years in the last three weeks."

Mayor Schmitz of San Francisco has received the following letter from the L. S. Starrett Co. of Athol, Mass.: "We wired you this morning to draw on us for \$1000 for benefit of suffering people of your city, which message we hereby confirm. We are thus prompted not only by a feeling that we owed a duty to suffering humanity, but especially on account of our sympathy with the many Hardware dealers in San Francisco, who have been our loyal business friends for a number of years."

Among the first of the Californians to reach home from Europe after San Francisco's calamity is Leon Sloss, who arrived May 12th after a record trip across the Atlantic and the continent. He read in the European newspapers of the harrowing details of his city's disaster, and without waiting for confirmation of the wildly exaggerated stories, he started for home with a firm determination to lend his influence in the upbuilding of the stricken city. Personally Mr. Sloss is a very heavy loser by the fire. As the head of the great Alaska Commercial Company and of all of the many Sloss interests he has been deprived of many valuable properties. In his home-coming he was joined by his brother, Joseph Sloss, who was also in Europe. Joseph is the head of the Pacific Hardware and Steel Co., formerly Miller, Sloss and Scott. This property, far out in the Western section of the city, was unharmed by the flames. Here were their offices and great warehouses crowded full of stock, and here they are now doing an enormous business at ante-disaster rates. The Sloss business structures of great dimensions on Sansome and Halleck Streets, the center of the city's district, however, and four palatial residences owned by members of the family on Van Ness Avenue, were completely destroyed. All the members of the Sloss family intend rebuilding at once. At the corner of Sansome and Halleck Streets a new class A skyscraper steel building will be erected for the Alaska Commercial Company, and other offices.

INDUSTRIAL PRESS ASSOCIATION.

THE PHILADELPHIA TRADE.

Summer is apparently ahead of the calendar, so that we have jumped almost at a bound into warm weather and the demand for hot weather goods is naturally active. We think, however, it is safe to say that retailers are probably unusually well supplied with goods of this class and are in a good position to fill promptly orders received from their customers. This is largely due to the fact that the open winter led many to believe that Spring would be correspondingly early and in this way Spring orders were largely anticipated, on such goods as screens, poultry netting, wire cloth, lawn mowers and similar lines.

There is no falling off in trade—on the contrary the volume of business continues very satisfactory and while last year was regarded as a record breaker, sales for this month are running ahead of 1905. Manufacturers are still exceedingly busy and raw material is being produced in unprecedented volume. The statistics of the iron and steel trade show this country is now consuming some 25,000,000 tons per year—figures which are practically inconceivable and which require re-statement in order to be fully realized; all this immense output is apparently going directly into consumption and there does not seem to be any evidences of speculation in raw material or manufactured goods.

It would be only natural if building suffered from the high prices of lumber and almost equally advanced figures on all kinds of building material. It is true that occasionally we hear complaints that building is quiet owing to increased cost but we are inclined to think that these complaints are individual and are no means typical. On the whole we are led to believe that building is fully up to the average and perhaps heavier than usual. This is simply another illustration of the well known fact that prosperity begets prosperity and that people only spend money when they have money to spend.

It is pleasant to report that there is an improvement in collections. Farmers are now beginning to realize on their Spring products and money is coming in more freely. The large volume of business this year has made an unusual demand for funds and it is gratifying to see that money is now in wider circulation.

BIDDLE HARDWARE CO.

Gillette Safety Razor

NO STROPPING NO HONING

It Pleases
Every User.

The Most
Wonderful Selling
Razor
in the World

It pleases every customer, who in turn brings a new customer.

"The Gillette" sales are permanent, no shelf worn stock. It turns orders to money and profits.

"The Gillette" Blade is of Fine, Flexible, Wafer Steel that Shaves.

12 BLADES, 24 SHARP EDGES,
Every blade will give from 20 to 40 close, smooth,
comfortable shaves.

Triple silver-plated set with 12 blades \$5.00.

Quadruple gold-plated set with 12 blades \$10.00.

Quadruple gold-plated set with 12 blades and monogram \$12.00.

Standard combination set with shaving brush and soap in triple silver-plated holders \$7.50.

Other combination sets in silver and gold, up to \$50.00.

Standard packages of 10 blades with 20 sharp edges, for sale by all dealers, at the uniform price of 50 cents.

Sold by Leading Drug, Cutlery and Hardware Dealers.

We Supply all Dealers with Signs and Booklets.

Write us for facts, and for terms.

GILLETTE SALES COMPANY,

Times Building,

New York City

ONTARIO RETAIL HARDWARE AND STOVE DEALERS' ASSOCIATION

TORONTO, May 17, 1906.

SUCCESSFUL CONVENTION.

The second convention of the Ontario Retail Hardware and Stove Dealers was held in Toronto on May 16 and 17 and was most successful in every sense of the word. Organized only a month ago on Good Friday the Executive Officers went to work with a vim and had the date for the second convention been the middle of June instead of the middle of May there would have been an attendance of fully one hundred delegates. It is, however, eminently satisfactory that fifty Hardware and stove dealers gave up their business at such a busy time in order to perfect the work of organization commenced at the Good Friday convention. The names entered on the roll-call were as follows: A. W. Humphries, Parkhill; John Caslor, Toronto; J. R. Hambly, Barrie; Weston Wrigley, editor *Hardware and Metal*, Toronto; D. A. Macnab, Orillia; D. E. McDonald, Florence; Fred. A. Brewer, Parkhill; J. F. Norton, Ingersoll; C. F. Moorehouse, Toronto; J. Walton Peart, St. Marys; W. G. Scott, Mount Forest; H. Becker, New Hamburg; W. B. Clifton, Alliston; R. Redlam, Jarvis; F. W. Jeffery, Sidland; W. Holborn,

postage, organizing and convention expenses, all this being accomplished in the three weeks prior to the convention.

The report also drew the attention of the delegates to the "knocking" done the convention in a circular sent to the Hardware and stove trades in Ontario by Secretary Trowein of the Retail Merchants' Association, who had promised to endeavor to induce as many Hardware and stove dealers as possible to attend the convention. Instead he sent out this "knocking" circular together with a post card proxy which he asked the dealers to sign and return to him.

The secretary's report was adopted, but when the executive offices made their report the half dozen Retail Merchants' Association men present objected loud and long because only members were to be given the right to vote. The controversy lasted on into the afternoon session, but when a vote was finally taken it resulted in 34 to 1 in favor of a distinct Retail Hardware and Stove Dealers' Association with no affiliation whatever with the Retail Merchants' Association.

GROUP PHOTO OF ABOUT FORTY OF THE DELEGATES TO THE ONTARIO RETAIL HARDWARE AND STOVE DEALERS ASSOCIATION IN TORONTO, ON TUESDAY, MAY 15, 1906.

Sutton West; Fred W. Otton, Barrie; C. E. Noble, Dundalk; Albert Wideman, Markham; Chas. E. Jones, Uxbridge; J. W. Peacock, Toronto; A. Welch & Son, Toronto; G. E. Rudd, Guelph; John Coffey, Barrie; W. I. Wagg, Providence Bay; Jas. Dandie, Streetsville; W. J. Geddes, Embro; M. R. Marshall, Dunnville; W. F. Moser, Blyth; Charles W. Conn, Tillsonburg; E. P. Paulin, Goderich; D. McGregor, Caledonia; A. E. Nichols, Fergus; E. S. Hubbell, Thamesville; James Lohead, Forest; A. E. Bottum, Bobcaygeon; D. Brocklebank, Arthur; J. S. Hall, Toronto; Robert Smith, Bolton; R. H. Thornhill, Mount Forest; William Conrad, Waterloo; James Wilson, Thorold; Thomas Fullerton, Monkton; V. D. McPherson, Woodville; John Bailes, Oshawa; O. M. Hodson, Bolton; Robert Smith, Bolton.

The convention opened with a civic address of welcome followed by the President's address, which outlined the reasons for organization and suggested a course of action for the delegates. The secretary's report aroused enthusiasm, he presenting figures showing a membership of 120 in over 80 towns and cities and with a cash balance in hand of \$130 after paying all printing,

COMMITTEE REPORTS.

The fight over affiliation having been satisfactorily disposed of committees were appointed as follows:

By-laws and Constitution—R. J. Walken, Tottenham; W. G. Scott, Mount Forest; J. W. Peart, St. Marys; E. P. Paulin, Goderich; F. W. Otton, Barrie.

Finance—O. M. Hodson, Bolton; D. A. MacNab, Orillia; E. S. Hubbell, Thamesville.

Resolutions—J. R. Hambly, Barrie; J. McDonald, Florence; C. F. Moorehouse, Toronto.

Legislation—F. W. Jeffery, Midland; J. T. Norton, Ingersoll; W. I. Wagg, Providence Bay.

Trade Grievances—D. Brocklebank, Arthur; J. W. Peacock, Toronto; A. E. Bottum, Bobcaygeon; C. A. Conn, Tillsonburg; C. E. Noble, Dundalk.

Mutual Insurance—J. Caslor, Toronto; J. F. Moorehouse, Toronto; J. W. Peart, St. Marys; J. S. Hall, Toronto; D. Brocklebank, Arthur.

These committees, with the exception of the latter which was made a permanent committee, brought in their reports on Wednesday morning the convention referring to the executive for action the following resolutions presented by the resolution committee:

(1) *Resolved*, That this association will not purchase goods from a wholesale house that supplies goods to fairs, auction sale rooms, mechanics, contractors, factories and mills, with goods handled in a general Hardware store.

(2) *Resolved*, That the matter of cartage from shipping point charged on freight bills be taken up by this association.

(3) *Resolved*, That this association take steps to prevent the wholesale prices of Hardware being published in the general newspapers.

Similar action was taken with the report of the legislation committee who recommended petitioning the legislature to so amend the statute law and abolish the exemptions in section 180 of the Division Court Act so far as to make small accounts up to five dollars collectable by garnishment by a procedure in the magistrate's court, similar to that for the collection of claims for wages, the prosecutor to serve the summons in the case without charge.

The Trade Grievance Committee's report was acted upon in a similar manner after an interesting discussion on the different grievances reported against jobbers and manufacturers.

The By-laws and Constitution presented by that committee were remarkably clear and brief, the main points decided upon being an annual convention in March and a membership fee of \$3 per annum.

As recommended by the Finance Committee an organizer will be kept in the field. Organizer Hodson who generously offered to give two months' time without salary is to be continued in the field and another special convention is to be held in Toronto during the Industrial Exposition next September.

The convention recognized Organizer Hodson's good work by a vote of thanks, presented an honorarium to the secretary for his work in organizing the association and elected President Humphries as a fraternal delegate to the National Retail Hardware Association convention in Boston next winter.

All the former officers were re-elected with six additional members of the Executive, the officers now being:

President, A. W. Humphries, Parkhill; First Vice-President, W. G. Scott, Mount Forest; Second Vice-President, J. R. Hamblly, Barrie; Treasurer, John Caslor, Toronto; Secretary, Weston Wrigley, Toronto. Executive Officers: J. Walton Peart, St. Marys; M. R. Marshall, Dunnville; E. P. Paulin, Goderich; F. W. Jeffery, Midland; D. Brocklebank, Arthur; Frank Taylor, Carleton Place. Auditors: J. W. Peacock and C. F. Moorehouse, Toronto.

A most interesting feature of the convention was the banquet tendered the delegates on Tuesday evening by Col. J. B. MacLean, publisher of *Hardware and Metal*. Jobbers, manufacturers and retailers fraternized at this social event and all branches of the trade voted the Colonel their thanks for affording them a good opportunity to "get together."

THE COLUMBUS TRADE.

What would be the result of humans instead of the Almighty had control of the weather? Just now we need rain very much. It is hot and dry and each day adds a little more hot and dry. Lawn mowers was the daily cry up to within a week, but now it is rubber hose; and from a selfish standpoint this change is good for us as we have not been able to get enough lawn mowers. Dealers who put off buying screen goods are now sending in orders freely. The price seems high, but in reality the consumer is not being hurt much when he pays \$1.25 to \$2.00 for a screen door. Prices are largely a matter of education any way. If an article has been selling to the consumer for less than it costs the manufacturer, and price is advanced so all make a fair profit, there is a kick clear down the line; but after a while it is forgotten. Some people could give "Maud" pointers on kicking any way.

Why is it leading manufacturers of wire cloth do not make deliveries in season? It is the same old story every year. They are good at making promises each year, but fail to keep them. The truth is, they take more orders than they can fill and know it at the time they book the orders. It is an imposition on dealers for a manufacturer to take orders he knows he cannot fill in season.

Up to a week ago prospects were never as favorable and encouraging for a record-breaking trade, and if we get rain very soon, it will reinstate the bright outlook; but if dry weather continues another week, it means a short hay crop and a light wheat and oats crop.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

LANDLORD AND TENANT.

No. 13. VERBAL LEASES. LOSS OF WRITTEN LEASES. FORMALITIES ATTENDING THE EXECUTION OF CERTAIN KINDS OF LEASES. WARNING. A TENANT'S INTEREST IN PROPERTY MAY BE LEVIED UPON BY HIS CREDITORS.

Away back in 1677 there was passed by the English Parliament an act that became known as the Statute of Frauds. The purpose of the act was to prevent fraud in connection with contracts, making it necessary that memoranda in writing be shown signed by the person who it was claimed had made a contract, in order that he be held on it. This was perhaps one of the most important acts of legislation ever passed by a legislative assembly. So important and so excellently drawn was it, it has been adopted oftentimes in its original form by nearly every State of the United States.

One provision of the Statute of Frauds related to leases, it making all verbal leases void, except where the leases were for a term not exceeding three years whereon the rent reserved amounted to two thirds of the full value of the premises. This to-day is the law in New Jersey, Maryland and South Carolina.

In Indiana, Pennsylvania and North Carolina, verbal leases for a term not exceeding three years, are valid, without regard to the rents reserved.

Verbal leases for one year are declared valid in Alabama, Arkansas, California, Delaware, Illinois, Iowa, Kentucky, Michigan, Mississippi, Rhode Island, Tennessee, Texas, Virginia and Wisconsin. In the States of Massachusetts, Missouri, Ohio, Maine, Vermont and New Hampshire, no verbal lease is valid, other than a lease at will.

In Connecticut, no lease for a term exceeding a year is valid, except as against the lessor, or unless it is in writing and signed by the lessor in the presence of two witnesses and acknowledged.

Now, where a verbal lease is made for a longer period than is permitted by the statutes, the tenant cannot sue the landlord for not letting him into possession, nor can the landlord sue the tenant for rent, the tenant not having taken possession; but if the tenant passed into possession under the lease and pays rent, it is held in all the States, excepting Maine, Massachusetts, Missouri, Ohio, Vermont and New Hampshire that the tenancy becomes a tenancy from year to year.

A lease that has once been written and signed remains in full force, even although it is lost or destroyed. Should the matter come into the courts, it can be proved by any competent evidence.

In some of the States, leases must be under seal, acknowledged and recorded to be valid against anybody except the lessor. This is to protect third persons who propose to buy or lend money of the property in order that they may know the extent of the title of the owner and whether it is encumbered. We have not the space in which to enumerate the various statutes in the many States and territories, providing for the acknowledging and recording of leases.

No matter, however, what the record shows, it is not safe to rent property where there is some person in possession of it, without finding out what is the nature of the occupant's title. One renting property occupied by a third person, should also inquire as to whether or not any of the buildings or improvements belong to the tenant and are removable.

Once the tenant has obtained a good lease, his lease is valid against anybody who by foreclosure of a mortgage subsequently put on the premises, has come into ownership. His lease, too, is valid against the landlord and his creditors, even though the landlord go through bankruptcy. In other words, the lease is not affected by any subsequent disposition of the property. Any one who takes it by buying it, getting it on a mortgage or a lien, or by sale on execution, or by bankruptcy sale, must recognize the lessee's rights as paramount to his own.

A lessee's rights may be sold on execution, or in bankruptcy proceedings, or may be taken for the benefit of his creditors. Then, too, unless there is a provision in the lease prohibiting it, the tenant may sell, or sublet, or mortgage his interest. A provision in a lease prohibiting the lessee from selling his interest, does not prevent it being sold by the court to satisfy a judgment.

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

PATENTS EXPIRED APRIL 30, 1906.

- 402,173. ICE TOOL. S. K. Lovewell, Chelsea, Mass.
 402,186. WRENCH. I. F. Peck, Providence, R. I.
 402,220. CARPET STRETCHER. L. G. Ballinger, East Liberty, O.
 402,222. WASHING MACHINE. D. H. Benjamin, Utica, N. Y.
 402,265. WRENCH. V. J. McDonnell, Philadelphia, Pa.
 402,292. HANDLE FOR DUSTPAN. L. Angevine, Sweden Valley, Pennsylvania.
 402,295. ADJUSTABLE WINDOW SCREEN AND FRAME. H. Barrett, Decatur, Ill.
 402,327. COMBINATION HOUSEHOLD TOOL. F. A. Huehn, Chicago, Ill.
 402,397. IRONING BOARD. C. W. Carr, Richmond, Va.
 402,400. TOOL FOR MANIPULATING SAW TEETH. F. W. Cook, San Francisco, Cal.
 402,538. TOOL DRIVER. C. H. Olson, Decatur, Ill.
 402,539. STOVE. W. H. Owen, Onarga, Ill.

PATENTS ISSUED MAY 1, 1906.

- 819,064. CORD ATTACHMENT FOR WINDOW SHADES. E. F. Harts-horn, Newark, N. J.
 819,070. BROOM HOLDER. J. E. Kenerson, Lynn, Mass.
 819,121. HOLDING AND GRIPPING PLYERS. J. Carter, Malden, Mass.
 819,167. TUBULAR LANTERN. A. R. Pritchard, Rochester, N. Y.
 819,176. LAWN-TRIMMING DEVICE. H. O. Secrest, Cleveland, O.
 819,192. WRENCH. LaFayette T. Wever, Crawfordsville, Fla.
 819,246. WRENCH. C. H. Hoyes, Decatur, Nebr.
 819,428. PIPE WRENCH. F. A. Headson, LaFayette, Ind.

PATENTS EXPIRED MAY 7, 1906.

- 402,560. SAW SHARPENING MACHINE. Gustave Carlsen, Uleaborg, Finland.
 402,569. AUTOMATIC SPRINKLER. E. H. Davis and R. Westervelt, Elmira, N. Y.
 402,583. FERRULE BOX FOR STOVE PIPE FORMERS. H. S. Gran-nis, Southington, Conn.
 402,594. FERRULE FOR REEL PLATES. J. P. H. Hook, Rome, N. Y.
 402,606. PLATE LIFTER. S. T. Mickey, Salem, N. C.
 402,850. CAN OPENER. J. Kaylor, Decatur, Ill.
 402,886. BENCH PLANE. F. M. Bailey, New Britain, Conn.

PATENTS ISSUED MAY 8, 1906.

- 819,761. FLAT IRON. F. Johnson, Racine, Wis.
 819,772. DOUGH KNEADING AND AERATING ROLLER. W. Latham, New York.
 819,780. SAFETY RAZOR. Wm. J. Moore, Washington, D. C.
 819,796. DOOR HANGER. T. C. Prouty, Aurora, Ill.
 819,817. COMBINED WRENCH AND BIT STOCK. P. L. Sweeney and L. C. Jahn, Jasper, Ind.
 819,825. LIFTING JACK. N. Weller, Sioux City, Iowa.
 920,302. CHEESE CUTTER. J. Halliday, Detroit, Mich.

PATENTS EXPIRED MAY 14, 1906.

- 403,083. DRILL CHUCK. M. L. Andrew, Delhi, Ohio.
 403,093. COOKING VESSEL. E. L. Dawes and W. A. Myler, New Brighton, Pa.
 403,107. VISE. B. Holly, Lockport, N. Y.
 403,126. CARPET STRETCHER. A. W. Muhlhauser, Platteville, Wis.
 403,131. BOLT LOCKING DEVICE. C. I. Penrose, Chatham, N. Y.
 403,132. BOLT LOCKING DEVICE. C. I. Penrose, Chatham, N. Y.

PATENTS ISSUED MAY 15, 1906.

- 820,449. RAKE. H. Vesperman, Steubenville, Ohio.
 820,462. HINGE. J. B. Willard, New York, N. Y.
 820,503. COLD AXLE SETTER. E. F. Krengel and W. G. McLennan, Nezperce, Idaho.
 820,557. COMBINATION LOCK. J. J. Deal, Canton, Ohio.
 820,601. GARDEN IMPLEMENT. G. W. Robinson, Lodi, Wis.
 820,639. PLANE. A. N. Gabrielson, Mount Iron, Minn.
 820,651. WRENCH. J. W. Lanham, Danville, Ill.
 820,814. COMBINATION TOOL. J. P. McGinnity, New York, N. Y.

IMPORTANT LISTS OF GOODS.

Logan-Gregg Hardware Co., Pittsburgh, Pa., in the current issue of their popular house organ, "Hardware Hints," publish a list of strictly seasonable goods which it is important the Hardware dealer should have in stock during May and June; and as the trade for these articles is good for only a few months in the year, the sale of them should be pushed with insistence while they last. This is the list to which they call attention:

| | |
|-----------------------|------------------------|
| Base Ball Supplies | Hose Menders |
| Bicycles and Sundries | Hose Nozzles |
| Cherry Stoners. | Hose Reels |
| Croquet Sets | Hot Plates |
| Dog Muzzles | Ice Chests |
| Filters and Coolers. | Ice Cream Freezers |
| Fishing Tackle | Lawn Mowers |
| Fly Pans | Lawn Mower Sharpeners |
| Fly Nets | Lawn Rollers |
| Fly Traps | Lawn Sprinklers |
| Garden Tools | Lawn Swings |
| Gasoline Stoves | Oil Stoves |
| Grain Cradles | Quilts |
| Grass Catchers | Refrigerators |
| Hammocks | Screen Doors & Windows |
| Haying Tools | Scythes and Snaths |
| Hose | Summer Blankets |

In the April number of "Hardware Hints" they also published a list of Housefurnishing goods which it is desirable the Hardware dealer should have before him to suggest some line of goods which he might profitably carry in stock during the entire year, but more especially in the Spring and Summer. This list presents many articles to the attention of the dealer worthy of the best efforts of his salesmen.

| | |
|---------------------|-------------------------|
| Apple Parers | Kitchen Saws |
| Baby Carriages | Knife Sharpeners |
| Bathroom Fixtures | Knives and Forks |
| Brass Handed Tacks | Lamps |
| Bread Makers | Lamp Chimneys |
| Bread Toasters | Lemon Squeezers |
| Brooms | Lid Lifters |
| Butcher Knives | Linoleum |
| Carpet Beaters | Market Baskets |
| Carpet Stretchers | Match Boxes |
| Carpet Sweepers | Metal Polish |
| Carpet Tacks | Mirrors |
| Chair Seats | Mops |
| Cherry Seeders | Mop Wringers |
| Churns | Mouse Traps |
| Clocks | Night Latches |
| Clothes Bars | Oil Cans |
| Clothes Baskets | Oil Cloth |
| Clothes Lines | Oil Stoves |
| Clothes Line Hooks | Ovens |
| Clothes Pins | Padlocks |
| Coat Hangers | Paints |
| Coat and Hat Hooks | Paint Brushes |
| Cooking Utensils | Pastry Boards |
| Coolers | Picture Hangers |
| Cork Screws | Picture Wire |
| Cover Knobs | Potato Mashers |
| Crockery Mender | Pot Cleaners |
| Curtain Stretchers | Pot Covers |
| Cuspidors | Rat Traps |
| Door Keys | Refrigerators |
| Door Latches | Rolling Pins |
| Door Locks | Scissors |
| Door Springs | Screen Doors and Window |
| Dust Pans | Scrub Brushes |
| Electric Door Bells | Sewing Machines |
| Electric Lamps | Shoe Blacking |
| Enameled Sinks | Shoe Brushes |
| Enameled Ware | Sink Strainers |
| Family Grindstones | Soap Dishes |
| Family Scales | Spoons |
| Feather Dusters | Step Ladders |
| Filters | Stove Mats |
| Flour Bins | Stove Pipe |
| Flour Sifters | Stove Pipe Collars |
| Fry Pans | Stove Polish |
| Food Choppers | Table Oil Cloth |
| Furniture Polish | Tack Claws |
| Garbage Cans | Tack Hammers |
| Gas Brackets | Thermometers |
| Gas Burners | Tile-Like |
| Gas Mantles | Tin Ware |
| Gas Ranges | Towel Rollers |
| Gas Tubing | Trouser Hangers |
| Gasoline Stoves | Twine |
| Glue | Waffle Irons |
| Hot Plates | Wall Paper Cleaner |
| House Figures | Wash Boards |
| Ice Cream Freezers | Washing Machines |
| Ice Picks | Wash Tubs |
| Irons | Window Cleaners |
| Ironing Boards | Window Glass |
| Kitchen Knives | Wool Palls |

HARDWARE DEALERS RECORD

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Albany, Tex.—J. W. Putnam has engaged in the Hardware business.

Ballston, Ore.—George Haynes has engaged in the Hardware business.

Broken Bow, Neb.—S. P. Croat & Co. have opened a new store.

Corning, Iowa.—Floyd Newcomb has engaged in business.

Hoxie, Kans.—John Hillstead has opened a new store.

La Jara, Colo.—The Manassa Hardware Co. has put in a complete line.

Peabody, Kans.—Charles Carey will engage in business.

Soldier, Ida.—W. Y. Perkins & Co. have opened a new store.

Wapato, Wash.—Ness & Wagner have engaged in business.

Changes and Improvements.

Agra, Kans.—Tipton & Heaton have succeeded to the business of T. E. Tipton.

Altamont, Mo.—Ellis & Kimes have sold their store to W. A. McIntosh & Son.

Anamosa, Iowa.—I. P. Mineheart has purchased the store of John K. Hale.

Benkelman, Neb.—J. W. Smith has purchased the business of L. E. Walker & Co.

Benton, Kan.—J. Herron has purchased the business of D. C. Pitcher.

Bison, Kans.—J. C. Meyer & Co. have sold their business to Timken & Money.

Blythedale, Mo.—Baker, Smith & Ellington have succeeded to the business of Baker & Ellington.

Cairo, Nebr.—E. D. Parker has sold his store to McAllister Bros.

Central City, Nebr.—W. J. Stephen has sold his store to E. Meyers.

Coeur d'Alene, Idaho.—J. H. Nevers has purchased a controlling interest in the Lake City Hardware Co.

Culbertson, Neb.—Chris Roupp has purchased the business of M. M. Bree.

Edmonds, Wash.—Cohen & Drew have purchased the store of Simonson & Konnerup.

Grainfield, Kans.—Conrad Bros. have purchased the business of E. B. Atkinson & Co.

Huron, Kans.—W. E. English has sold his interest in the firm of Kelly & English.

Imperial, Nebr.—John A. Furr has sold his store to Hicks & Hayes.

Kennewick, Wash.—Mrs. H. A. Bier has purchased the interest of A. F. Brown in the Kennewick Hardware Co.

Lindale, Tex.—W. S. Hicks has purchased the store of D. S. Smith.

Lock Spring, Mo.—Achauer & Minnick have succeeded to the hardware business of Achauer & Co.

Louisiana, Mo.—The Suda-Buffington Hardware Co. has succeeded to the business of the Suda Hardware Co.

Marengo, Iowa.—F. M. Darnell has purchased the store of J. E. Bender.

Maryville, Mo.—Roberts & Bennett have

sold their business to Shepherd & Miller.

Missouri City, Mo.—The Brown Hardware Co. has purchased the business of the White Mercantile Co.

Wilmington, Del.—John R. Hudson has purchased the iron business of the late William Wilson, Jr., at Third and Orange Streets and has taken possession. The business will be conducted by an incorporated company, known as the Wilson & Hudson Hardware Company.

Monett, Mo.—S. W. Pierce has purchased the interest of D. C. Marbut in the Monett Hardware Co.

Muskogee, I. T.—Marshall Bros. have sold their store to Matley & McConnell.

Omaha, Tex.—G. L. May has succeeded to the business of Coffee & May.

Perkins, Okla.—I. Moorich has sold his store to L. C. Shannon.

Pilot Grove, Mo.—Francis Schilb has succeeded to the business of Schilb & Becker.

Provo, Utah.—The Monarch Hardware Co. has been succeeded in business by the Central Hardware Co.

Ragan, Nebr.—W. Hatfield has succeeded to the business of Hatfield & Agen.

Reinbeck, Iowa.—Robinson Bros. have been succeeded in business by Robinson & Terrall.

Roscoe, Tex.—Haley Bros. have succeeded to the business of the Haley Hardware Co.

Rutland, Iowa.—Gregory & Sheridan have been succeeded in business by H. H. Gregory.

Salem, Nebr.—V. H. Shier has sold his store to E. S. Davis.

Salt Fork, Okla.—C. S. Watson has sold his business to J. M. Corn & Co.

San Saba, Tex.—Fentress & Woods have been succeeded by Woods & Laird.

Sedgwick, Colo.—Isaac W. Wallace has sold his store to the Sedgwick Hardware Co.

Turon, Kans.—The Potter Mercantile Co. has purchased the business of W. S. Smith.

Vail, Iowa.—Giblin & McGuire have succeeded to the business of T. J. Giblin.

West Side, Iowa.—C. W. Paine has purchased the stock of Suhr & Sons.

Fires.

Centralia, Kans.—The store of C. C. Wadleigh has been destroyed by fire.

Leshara, Nebr.—In a recent fire the stock of Hamann & Son was damaged to the extent of \$3,000, with \$2,000 insurance.

Embarrassments.

Belding, Mich.—Involuntary bankruptcy petitions and the appointment of a receiver marked the insolvency of Otto J. Kuhn, a Belding general Hardware merchant. With the bankruptcy petition was a petition stating that Mr. Kuhn's indebtedness aggregates \$12,000 and asking that William J. Wilson of Belding be appointed receiver. It is claimed the estate is valued at \$10,000.

Bremond, Tex.—Herman Schmidt, doing a Hardware business, has filed involuntary bankruptcy proceedings. His liabilities

were shown to be \$131,000, of which \$82,000 was secured.

Delhi, La.—Sol Fried, R. L. Crook & Company and the Louis Hoffman Hardware Company, all domiciled at Vicksburg, Miss., have filed a petition in voluntary bankruptcy against Fred Van Riper, a merchant of Delhi, who agreed to their request that he be adjudged a bankrupt. Debts claimed amount to \$145,148.

Farmington, Minn.—Herbert W. Allen has been appointed receiver of the Irving Hardware and Implement Co.

Joplin, Mo.—An involuntary petition in bankruptcy against the Miners' Hardware Company has been filed. Four creditors of the corporation united in filing the petition, their claims aggregating \$510.66.

Lewiston, Idaho.—The Spokane Jobbers' association has received an assignment of the Cash Hardware Co. of Lewiston, Idaho.

Palmer, Iowa.—The Witte Hardware Company have made an assignment for the benefit of their creditors, and F. S. White has been appointed as assignee.

Petersburg, Va.—T. J. Jefferson, a Hardware merchant and manufacturer, has made an assignment to Richard B. Davis, trustee, for the benefit of his creditors.

Miscellaneous.

Pine Bluff, Ark.—The annual stockholders' meeting of the Cleveland-Matthews Hardware Co. was held at their office recently, at which time all of the old officers and directors were reelected for the ensuing year, the officers being M. C. Cleveland, president; J. H. Carmical, vice-president, and Wm. L. Matthews, secretary and treasurer. The business having grown to such an extent during its first year, the paid-up capital stock was voted to be increased to \$20,000, and in the future they will do a wholesale as well as a retail business.

Taylor, Tex.—At the annual meeting of the stockholders of the Prewitt Hardware Co. the following directors were elected: Ira A. Prewitt, E. V. Stearnes, T. B. Hyde, J. J. Thomas, C. T. Everett, C. H. Snell and H. M. Finch. The directors in turn elected Ira A. Prewitt president, C. T. Everett vice-president and T. B. Hyde secretary and treasurer.

346 Congress Street

BOSTON, MASS.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Augusta, Me.—Fletcher Manufacturing Company has been incorporated, making and dealing in knives, forks, spoons, etc.; capital, \$200,000. President and treasurer, I. L. Fairbanks; clerk, Joseph Williamson, Augusta.

Canandaigua, N. Y.—The Canandaigua Enameling Co.'s works have been put in operation and the manufacture of enameled rings for insulating telegraphic apparatus begun. The company has a contract to turn out several thousand a day of these rings for a railroad company. Later the company is going to make enameled stoves.

Columbus, O.—The Capitol Lock-nut and Washer Co. has been incorporated with a capital of \$3,000, by L. B. Ayers, J. Z. Krum, H. B. Hutchinson, C. B. King and C. R. Roof.

East Cambridge, Mass.—Judson Manufacturing Co. has been incorporated to manufacture saw frames, saw handles, etc.; capital, \$10,000. President, J. Judson, East Cambridge; treasurer, G. L. Parmenter.

Grand Rapids, Mich.—Negotiations have been closed whereby the Grand Rapids Hand Screw Co. acquires four acres of land from the Macey Co. in the rear of the latter's plant. The Hand Screw Co. will begin building its permanent home there next year. The plans are not completed, but a three-story brick building is contemplated, 70 by 103 feet, to cost in the neighborhood of \$50,000. A power and heating plant will be added, and the new equipment will materially add to the value of the business.

Hudson, Mass.—The Lepointe Machine & Tool Co., Boston, has decided to locate in Hudson. A factory 120 by 60 feet and four stories high is being built.

Jersey City, N. J.—Pittsburgh Pneumatic Tool Co., 250 Washington Street, has been incorporated to manufacture pneumatic tools, machinery and appliances; capital, \$250,000. Incorporators: Norman C. Raff, Henry H. McCorkle and Alexander Howell, all as above.

Loveland, Colo.—Loveland Pump & Implement Manufacturing Co. has been incorporated with a capital stock of \$24,000. Incorporators: Edward A. Smith, Edward B. Smith, Charles Prior, C. A. Coykendall, E. S. Allen, Loveland.

Menominee, Mich.—The latest addition to the metal working plants of Menominee is the knife factory of Louis Franz & Son, situated just north of their dwelling at No. 518 Holmes avenue. Thus far the plant has been devoted to the manufacture of butter knives, bread knives and similar implements of all sorts and sizes.

Minneapolis, Minn.—Mill City Manufacturing Co. has been incorporated to manufacture machinery and tools; capital, \$10,000. Incorporators, G. F. Kriessell, A. E. Helmick, Minneapolis.

Newark, N. J.—H. J. Reusch Machine Co. has been incorporated as tool makers, machinists, founders and electrical engineers; capital, \$100,000. Incorporators:

H. J. Reusch, H. F. Behrendt, A. J. Reusch, Newark.

Newark, N. J.—L. & W. Gravity Lock Co., No. 56 Sherman ave., has been incorporated to manufacture gravity locks, Hardware, etc.; capital, \$100,000. Incorporators: Frank F. Smith, No. 323 Clifton avenue, Newark, N. J.; Augustus H. Woodruff, Irvington, N. J.; Joseph L. Munn, East Orange, N. J.

New York, N. Y.—Auto Strop Co. has been incorporated to manufacture safety razors, etc.; capital, \$200,000. Incorporators: Richard E. Dwight, Herbert K. Stockton and Henry Audley, all of No. 96 Broadway.

New York, N. Y.—J. R. Dawson Manufacturing Co. has been incorporated to manufacture Hardware specialties; capital, \$25,000. Directors: J. R. Dawson and Bertha H. Dawson, Philadelphia; F. A. Richter, Brooklyn, N. Y.

New York, N. Y.—M. Glaeber & Co. has been incorporated to manufacture machinery, tools, etc.; capital, \$30,000. Incorporators: S. F. Butterworth, Morristown, N. J.; E. B. Bruce, J. Daly, New York City.

Norwalk, Conn.—A firm of tool makers from Torrington has leased a portion of the Loth factory in Fair street and taken possession. The firm is now composed of Charles F. Dykeman and Joseph F. Dykeman. The company will shortly incorporate. It is understood that the company will manufacture automatic tools. The machinery to be installed consists of screw machines, drill pressers and cutting-up machines.

Pottsville, Pa.—A new corporation has been organized to take possession of the oldest stove works in the anthracite region and to develop a large plant. The name given the corporation is the Pottsville Foundry and Stove Co. The officers are: E. Forry Laucks, of York, president; F. S. McMullen, of York, general manager; C. F. Derr, of Pottsville, secretary and treasurer.

Rockford, Ill.—Work on the addition to the foundry of the Eclipse Gas Stove Co. is progressing favorably and the structure will soon be ready for use. It will substantially increase the capacity of this plant. President George D. Roper announces that later in the year the company will erect a warehouse over 200 feet in length, together with an office, this building to extend through to South Main street.

Stamford, Conn.—Another company has been incorporated with Stamford as its home. It is the Monarch Tool Co., for the manufacture of mechanics' fine tools, builders' hardware and other specialties. Among the latter is a "universal center test indicator," the patent of which the company controls. The president, Mr. Alcott, is a resident of Sound Beach, and is a mechanical inventor, his own tools being a special feature of what the new factory will turn out. The company expects to erect, immediately, a two-story building, to be completed in three or four months, the dimensions 40x80 feet. The finished plant contemplates employment for 200 men, and negotiations are now on foot for the purchase of six acres of land in Springdale.

St. Louis, Mo.—Cast Steel Specialty Co. has been incorporated to manufacture appliances, joints and nuts for steel castings; capital, \$10,000.

St. Louis, Mo.—Monarch Pneumatic Tool Co. has been incorporated; capital stock, \$2,000. Incorporators: Peter H. Murphy, Emil R. Hensil and James A. Carr.

Washington, D. C.—The Fries, Beall & Sharp Co., which proposes to manufacture and deal in Hardware has been incorporated. The capital stock is placed at \$50,000. The incorporators, who are also to act as trustees for the first year, are Milton H. Beall, Alvin W. Chapin, Clarence E. Fries and Joseph K. Sharp, all of this city.

Changes and Improvements.

Chattanooga, Tenn.—Permits have been issued to the Chattanooga Plow Co. to make a concrete and brick addition to the plant at a cost of \$3,000.

Detroit, Mich.—The Proctor-Raymond Manufacturing Co., makers of electrical and Hardware specialties at Nos. 40-44 Larned street, have plans all drawn for a new two-story brick factory to be built this summer on Bellevue avenue, near Waterloo. The factory will have a frontage of 416 feet.

Indianapolis, Ind.—Retirement of one of the principal stockholders is the reason assigned in a petition filed for changing the name of the Frazer-Koch Co., manufacturing steel ranges. The court is asked to sanction the change of name to, the "Cusack-Frazier Co."

Marion, Ind.—A petition has been presented by the Marion Stove and Range Co. to have the name changed to the Hoosier Stove Co. The petition was granted.

New Britain, Conn.—President Charles Glover of the Corbin Screw Corporation has announced that the company have let the contract for the erection of its new factory building. The new factory will be located on Lafayette, High and Grove streets and will complete the square now occupied by the buildings of the corporation. The new building will be seven stories high, 640 by 450 feet and will be of brick and factory construction.

Oncida, N. Y.—The Oneida Steel Pulley Co. has added another new industry to its extensive business. In the manufacture of steel pulleys many narrow strips of sheet steel are left and for several years the strips have found their way to the scrap heap. The company has installed four machines and these narrow strips are converted into carpet tacks. The company intends to equip its factory with fire escapes on the Linden street side of the building, which is a large four-story brick structure.

Reading, Pa.—The Jackson Manufacturing Co., located at Carpenter and Cherry streets, will branch out in their business in a few weeks. They now make the Jackson Washing machine. In a short time they will make a motor washing machine, using as power both water and electricity. When the manufacture of the new machine commences, the number of employees will be doubled.

Starrett Hack Saws have made good!

¶ During the past two years our Hack Saw department has grown faster than any other part of our business. The reason? It's the SAWS. They cut quicker and last longer than other saws---and saws cost money and workmen's time costs money. Users of STARRETT SAWS save money both ways.

¶ This fact is recognized in a marked degree in railroad shops, where waste of time or material is particularly guarded against.

¶ The following are extracts from original letters, on file in our office, from Master Mechanics and other officials of some of the largest railroads in the country.

THE BEST—"We are now using Starrett Saw Blades and have been some time, and find them one of the best if not the best saw blade we have ever used."

SUPERIOR TO ANY—"We have made a test of the Hack Saw Blades sent here, and we have found that these blades are superior to any that we so far have used."

GOOD SERVICE—"These blades have given good service, and we will therefore give them consideration in future orders."

O. K.—"We tested your hack saw blades and found them to be O. K."

SUPERIOR—"We have tried these blades in our shop and find that they are a superior blade, giving very good satisfaction."

FIRST CLASS—"The hack saw blades No. 112 are reported by our foreman to be first class."

AS REPRESENTED—"Regarding hack saw blades, will say that I have given them a trial and they were all that you represented them to be."

VERY SATISFACTORY—"Referring to hack saw blades sent us, have to advise we have placed same in service and find that the results obtained from their use are very satisfactory, and we have taken the matter up with our Supt. Motive Power, asking him to request Purchasing Agent to purchase hack saw blades from your company in future."

SUPERIOR—"We have given the blades furnished by you a thorough test and find them superior to the blades we have been using."

BETTER THAN ANY OTHERS—"We are using your hack saws for some time past owing to their giving better satisfaction than any others we have been supplied with."

GOOD SATISFACTION—"I am in receipt of a statement from our Master Mechanic that these blades give good satisfaction."

SATISFACTORY—"We have tested hack saw blades you sent us and find they are satisfactory."

THE L. S. STARRETT CO.
ATHOL, MASS., U.S.A.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Jersey City, N. J.—Multiplex Tube Tire Company has been incorporated with a capital of \$1,000,000. Incorporators, Frank A. Magowan, Frank B. Adams, John F. Fritts and Kenneth K. McLaren.

Reading, Pa.—The Arionian Bicycle Club has been organized for touring purposes. Earl E. Hafer was elected captain.

Changes and Improvements.

Binghamton, N. Y.—After extensive alterations and improvements that have been made at Bump Brothers' store, corner of Wall and Court streets, that firm now occupies one of the handsomest business places on Court street. Among the improvements are a mammoth plate glass window, 132x122 feet, the removal of all partitions on the street floor and devoting it entirely to the display of goods, and the location of the repairs department in the basement. The store has also been attractively painted and papered. The firm of Bump Bros. was established eleven years ago and is composed of A. S. and F. S. Bump.

Chicago, Ill.—Within a few weeks, the last of the Pope Mfg. Co.'s effects will have been removed, its one remaining factory there will have been closed, and thereafter Westfield, Mass., and Hagerstown, Md., will house its bicycle interests. The decision to abandon Chicago was reached several months since, and is in line with the policy of concentration that has been followed by the Pope people since they acquired the remnants of the American Bicycle Company.

Fargo, N. D.—Al. Johnson has moved into a new store on Broadway.

Hartford, Conn.—The Hartford Rubber Works Co. has a new president, Thomas Midgley, who was elected at the last meeting of the board of directors. Mr. Midgley, who only recently came from Columbus, Ohio, to assume the duties of vice-president, succeeds Charles H. Dale, who is the head of the whole Rubber Goods Manufacturing Company. Mr. Dale resigned the Hartford presidency because he found it impossible to give to the office the particular attention it required.

New York, N. Y.—F. A. Baker & Co. have removed to 37 Warren street.

Portsmouth, N. H.—Charles Lindstrom has re-opened at 5 State street.

Embarrassments.

New York, N. Y.—Frederick A. Ives, of 130 East Thirteenth street, has filed a petition in bankruptcy, with liabilities amounting to \$1,833 and no assets. The debts were contracted in 1901 in New Haven, Conn., mainly for bicycles and tires.

Miscellaneous.

Buffalo, N. Y.—The Cycle Manufacturers' Association at the final session at the Lafayette Hotel, elected the following officers: President, George N. Pierce, of Buffalo; vice-president, F. E. Southard, of Toledo; treasurer, Harry Walburg of Middletown, O., and secretary, F. J. Fox, of Hartford.

MANUFACTURERS' RECORD—Conc.

Incorporations

Canandaigua, N. Y.—The Canandaigua Improved Enameling Co. has been formed and is erecting a temporary factory east of the village, alongside the Northern Central Railway Company's tracks. The company is now securing patents on an enameled stove, and while this will be the principal article manufactured, it is already working in temporary quarters turning out a large order for enameled hooks and rings for a large railway company. Twenty-two hands will be employed at first, and a company with \$100,000 capital will be organized.

Hamilton, Ont.—The Hamilton Anchor Co. is authorized by its charter to manufacture and sell anchors, drive bars, and other articles manufactured from iron and steel, or other metals and materials. The incorporators are: H. L. Frost, H. N. Kittson, H. C. Beckett, C. S. Scott and D. R. C. Martin, of this city; the share capital \$40,000, and the head offices Hamilton.

Hamilton, Ont.—The incorporators of the London Machine and Tool Co., capital stock, \$200,000; head offices Hamilton, are Wm. Y. Yeates, Ernest G. Yeates, Ronald Yeates and Percy Yeates, London; Geo. F. Webb and Wm. Southam, Hamilton.

Changes.

Dundas, Ont.—The immense new moulding shop erected by the Bertram Tool Works is about ready for occupation, and moving in will soon be in order. It is one of the largest and most up-to-date structures of the kind in the Dominion.

Nashville, Tenn.—Work on the stove foundry of Jones & Hopkins will begin immediately. The structure, which will be situated at the corner of Monroe and Front streets, will cost \$2,500.

Reading, Pa.—The Penn Hardware Co. has taken out a permit to erect a four-story brick building, 45x70 feet, south side of Spruce, between Canal and River streets. Also for a brick boiler house, two stories, 23x79 feet, adjoining the present works.

Fires.

Marion, Ind.—Fire has destroyed the National Sweeper Works here, entailing a loss of \$100,000. High grade carpet sweepers were manufactured at the plant and 200 men were employed. The origin of the fire is a mystery. The plant was insured for about \$60,000.

Middletown, Pa.—Fire of unknown origin has completely destroyed the stove construction plant of the Raymond Company and for a while threatened to destroy the business section of the town.

Miscellaneous.

St. Johnsbury, Vt.—At the annual meeting of the stockholders of the Fairbanks Scale Co. the following officers were elected for the ensuing year: Vice-president, Henry Fairbanks; treasurer, John C. Clark; general manager, H. N. Turner.

Embarrassments.

Anderson, Ind.—The Neely Knife and Saw Works have been sold at public sale by Arnie Friel, the receiver. There was but one bid for the plant and that was W. F. Edwards. His bid of \$4,000 secured the property. It is the intention of Mr. Edwards to reorganize the company and put it on a better footing than heretofore. Some changes will be made in the plant which will be a decided improvement.

Buffalo, N. Y.—Frederick G. Oscar Ehle, who has conducted a factory for the making of tin-stamping machinery at No. 339 Glenwood avenue, and his wife, Louisa A. Ehle, have filed petitions in voluntary bankruptcy.

Mattapan, Mass.—C. H. Whitehouse, wire goods, has made an assignment for the benefit of his creditors to Giles Tainter.

New York, N. Y.—Justice Bischoff, of the Supreme Court, has appointed George K. Muskat receiver for the partnership property of Hubert Hansen and George H. Muskat, trading as the Superior Manufacturing Co., manufacturers of tinware, etc., at Walton ave., near 182d street, pending a suit brought by Hubert Hansen against George H. Muskat for a dissolution of the partnership on account of disagreements between the partners.

MANCHESTER HARDWARE CO., Manchester, N. H., are distributing, for the benefit of their local trade particularly, a Spring and Summer Catalogue of 1906, of selected Hardware and Tools, Paints, Sporting and Photographic Goods, Household Specialties, etc. In an introductory note they state: "In offering this, our first catalogue, for your consideration, it is prompted by many requests received from our customers for something of the kind. We carry an immense stock and the good things shown here are simply picked at random therefrom. Regarding prices, those quoted in the following pages are current at the time the book goes to press. Market changes will enable us to offer reductions on some of these and perhaps compel us to make a slight advance on others; but the difference will not be much either way, and you can always depend on receiving the benefit of all re-

ductions just as surely as you may be asked to pay a slight advance." In any classes of merchandise they will, upon request, send a special complete catalogue, showing in detail other goods from which they have selected the articles described, illustrated and priced in the catalogue under consideration.

✱

Prisoner-at-the-Bar—No, yer honor; I ain't makin' no business o' stealin', yer honor! I'm a decayed gintlemun, yer honor, an' I jes' took it up as a fad.—Puck.

Wanted.

WANTED—Agency for good American Hardware manufacturer by established merchant. H. Stalham, offices 71 Victoria Street, Toronto.

C. C. C. Saw Clamp

Pat. U. S. Feb. 20, 1906; Canada, April 3, 1906.
Other Foreign Patents Pending.

Is the latest, lightest and best Saw Clamp on the market.

Best For Wood Workers

because it only weighs about a pound, is simple in construction, durable and efficient. Can be carried in the pocket.

Frame is made from the best grey iron, japanned. The clamping part is of rolled steel completely covered with rubber, which holds the saw perfectly rigid, taking up all vibration, and thus saves greatly in the cost of files. It's noiseless in operation.

PRICE 75 CENTS.

Send for further particulars and discounts. Mention **HARDWARE**.

C. W. Cardwell Mfg. Co.
JAMAICA, N. Y.

TRADE MARK
Stamped on the Handle.

WE ARE PIONEERS

We made the First STEEL SPIDERS and our Trade Mark

"NEVER-BREAK"

has become the general name for Steel Spiders. Beware of spurious and unbranded imitations.

Ask any Jobber. Write for our catalogue of STEEL SEAMLESS COOKING UTENSILS.

THE AVERY STAMPING CO., Cleveland, Ohio
Mfrs. "Never-Break" Goods.

Look

each ad in the face. It is a salesman. If you doubt his words, write to the firm he represents. If you believe him — write anyway. Always Mention "**HARDWARE**" for having "put you wise."

CARY'S UNIVERSAL BOX STRAP

A continuous Metal Strap with a series of raised bosses along edges to strengthen it and to protect nail-heads.

Put up in coils 300 feet each.

Patent Metal Reel Frame with each coil. Straps made in four widths: $\frac{1}{2}$, $\frac{3}{8}$, $\frac{1}{4}$ and $\frac{1}{8}$ inch. Patented in all countries.

CARY MFG. CO.,
19 & 21 Roosevelt Street, New York.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

PLAIN PATTERN CITY HEAD.

**IN THE COAL MINES OF PENNSYLVANIA CAPEWELL NAILS ARE
USED AND THEY STAND THE SEVERE TEST SUCCESSFULLY**

THE CAPEWELL HORSE NAIL CO.,

Gentlemen:—I have given Capewell horse nails a good test. I am using them these last eight years in the Anthra-
cite Coal Mines of Pennsylvania, where the roads are not the best by a long way. I am shoeing 130 mules in the mines
and ought to know what the nail is. Have been shoeing the last twenty years and have used all kinds of horse
nails, but the Capewell nail is the best I ever used.

EDWARDSDALE, PA.

Yours respectfully,
THOS. W. BLANDFORD.

Made By

THE

Imperial Rotary Washer

THE record it has made for itself by its noiselessness—its easy operation (has all steel roller bearings)—its handsome finish—its gold and aluminum bronze castings—has caused people to expect more of Washers than they used to.

This is unfortunate for other washers; the IMPERIAL ROTARY still gives more satisfaction than is expected.

You ought to have our catalogue! It shows the most complete line of washers on the market.

BLACKSTONE MFG. CO.

JAMESTOWN, N. Y.

Established 1871.

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

Catalogue and information free.

CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

1,500,000

WAYNE WASHERS SOLD Up to the Present Time
And increasing at the rate of 300 per day.—What more evidence
do you want to convince you that Wayne Washers are the best to sell?

WE Know It's a
"WINNER"

Because it possesses
everything to make
It a "WINNER"

FIRST—It has fewer
parts in its construction
than any other rotary,
and Every one knows the fewer
parts there are in the con-
struction of any machine,
the easier it will work and
the less liability there is to
wear and get out of order.

The appearance of the
"WINNER" is different
than any other machine
upon the market. The tub
is finished in the natural
wood, with green bronze
hoops, green enamel hand
wheel, and the gearing in
gold bronze; the combina-

WAYNE WASHERS
Klean Clothes

tion making the most beau-
tiful appearing machine
upon the market. We are
also using a special prepara-
tion in connection with
the finishing of our tub—
which holds the varnish to
the surface and retains the
lustre for all time. You
will not find this finish on
any other washing machine
made.

We also use the detach-
able stave leg, which does
away with the necessity of
throwing away the entire
machine in case the leg
becomes broken.

Simplicity—Quality—Ap-
pearance—Good Value for
your money, are all posses-
sions of the "WINNER."
Order a sample from our
jobber or direct from us,
and we will leave the rest
to you and the

"WINNER."

WAYNE MANUFACTURING CO., St. Louis, Mo.

Experiments are costly—why not sell your Trade an article of demonstrated usefulness?

The "Cleveland" Lawn Weeder

"Quality first always." A Hardware Staple, Malleable Castings, Crucible Steel Blades,
Varnished Hardwood Handle.

"LOADS OF FUN"

FOR

THE SMALL BOY

In Your Town

The moment he gets hold of an "IRISH MAIL" car that's as safe as a cradle; that can't up-set because it's geared, like an automobile—built on low, broad lines.

The "IRISH MAIL" is rubber-tired—smooth running—the most substantial vehicle for children.

The "IRISH MAIL" is the only geared car on the market and puts all other "just-as-good" cars in the shade.

If it's Dollars you're after, Mr. Dealer, 'twill pay you twice over to stock up with the best line of children's vehicles—the

"IRISH MAIL"

LINE: "IRISH MAIL"—"FLYING DUTCHMAN"
FRENCH MOBILE---KATY-FLYER---HOTTENTOT

and others, because we shall advertise the "IRISH MAIL" Line in Magazines, with millions of readers, in June, which is bound to add greatly to the popularity of the "IRISH MAIL" Line and to your purse and ours.

Get in line—get our catalogue and prices. Put in your sample order to meet the demand, for there will be

Loads of Money

for the

DEALER!

Hight's Union Combination Square

**Five Tools in one: 8-inch Try Square, Bevel,
Butt Gauge, Marking Gauge and Mitre**

The notches in the edge of the slot in the blade, $\frac{1}{8}$ inch apart, make it a gauge. To use the bevel protractor, loosen the clamping bolt, draw the protractor out to the angle required, and clamp in place. Set the protractor by the scale marked on the circular segment. This scale is marked to indicate the angle expressed in inches rise for twelve inches base, when set on the figure 6, in the first series. The angle is one which will give rise of six inches in twelve, or the angle for the bottom of rafter for $\frac{1}{4}$ pitch. Set on the 6 in the second series and you have the angle for the top of the eave for the same pitch. So with all the figures in the two first series. The first series is from 1 to 12, the second from 12 to 1. The third series is for convenience, when it is inconvenient to turn the tool over to get reverse angle. The circular segment is laid off in degrees on the lower side, which will readily show you the figures on a square with 12 required to cut any desired number of degrees. The notch in end of protractor will enable it to be used for a gauge to get in corners, gauging for setting hinges and bevelling edges, etc. All nickel plated. The scale alone, to any workman, is worth the price of the square.

The best tool of its kind on the market. A quick seller.

BACK DOOR Business Methods

and unfair competition can't win in the end. So don't be even an unwitting accessory in selling an inferior oil made to imitate

3 in One

in every possible way, style of carton advertising, etc.

If you're uncertain about helping "3 in One" don't help the pirates. "3 in One" will meet any honest competition in a fair open fight and be happy with your decision. But when underhanded methods are resorted to we want to warn you that we can and will enforce our rights in the U. S. Courts—do you know that the dealer who sells an infringing article is equally liable with the man who makes it?

"Everything In Apple-Pie Order"

Is the "order of the Day" in every down-to-date store in the land—hardware stores included.

PIQUA SHELF BRACKETS

Not only make an orderly arrangement of your goods possible so that your customers can see them and be attracted by them, and you, Mr. Dealer, can get at them more easily : : : : : : : :

But---

Piqua Brackets, Adjustable or Fixed give at least

30% More Room

If crowded for room—don't build a larger store—don't move—try Piqua Brackets first.

Piqua Brackets are the best and cheapest Adjustable Brackets on the market, and we can prove it.

Nothing attracts so many women customers as a neat, orderly and attractively arranged store. Look well to these women customers. You can win and keep their trade by displaying the goods for the household on Piqua Brackets. 'Twill pay you twice over.

Catalog H for Hardwaremen tells of number of brackets required; how to install them, etc. Send for it to-day.

THE PIQUA BRACKET CO., Piqua, Ohio.

40
Years
Experience

In the manufacture of Seeders has put our line of Seeders:

**"The Cyclone"—"The Chicago"
"The Cyclone Jr"—"Little Wonder"
"Chicago Steel Bow"—and
"Champion Jr"—at the head of the procession**

They are practical—convenient—perfect and simple in operation.

All our Seeders sow evenly, economically and quickly—any kind of grain or grass.

Be Wise: Keep them in stock. Display them. One customer sold 448 machines in 3 seasons

Send for prices and catalog to-day.

Best Made--Sells Best

¶ This Fork is absolutely the very best tool in the world for handling Vegetables and Corn—no question about it at all. Naturally it is the very best seller, too.

¶ The shank, tines and head are forged from one solid piece of steel and perfectly tempered. The tines have blunt flat ends to save the vegetables from injury, and they lie flat so as to load the Fork with ease. The scoop is just the right size, and no tool was ever made with "the hang" more perfect. Made with Malleable D Ash handles and extra wide strap ferrules: 8, 10 and 12 tines as order d. It screens out dirt, snow, etc. Used for dozens of purposes on the farm.

¶ Every farmer wants one of these Forks after he has seen them once. That is the sober truth.

¶ Every Retailer ought to have plenty of them right now.

Order from your Jobber.

LARGEST.

THE PREPARATIONS FOR USE ON HARNESS KNOWN AS

"THE STANDARD OF THE WORLD."

HIGHEST AWARDS
CENTENNIAL, 1876.

HARNESS OIL.

Preserves and softens the Leather, consequently adds life. Compounded with pure Neatsfoot Oil.

CARRIAGE TOP DRESSING.

Gives an Elastic, Durable, Waterproof Gloss, and is positively safe to use on finest stock.

HARNESS COMPOSITION.

Cleans, Oils, Finishes.

HARNESS DRESSING.

The very best article of its kind. Unequalled for use by both manufacturer and owner of harness. Is used by nearly all Harness Manufacturers in the World.

FRANK MILLER'S HARNESS DRESSING

For Harness, Buggy Tops, Saddles, Fly Nets, Traveling Bags, Military Equipments, Etc.

Gives a beautiful finish, which will not peel or crack off, smut or creak by handling; does not lose its lustre by age; dust will not stick to work finished with it. Is NOT A VARNISH. Contains no Turpentine, Benzine, Naphtha, Alcohol, or other injurious articles. It is simply a finishing dressing.

DIRECTIONS.

Let your leather be clean and perfectly dry. Apply with a clean, soft sponge or brush, giving a quick easy motion, and allow the dressing to dry undisturbed. If a high gloss is required, give a second application after the first is thoroughly dry. This dressing will not work with gum tragacanth, or any other mixture. Keep the can closed tightly when not in use.

PUT UP IN CANS, KEGS & BARRELS.

Its most recent improvements put the "Sterling" at the head of all other Power Hack Saw Machines--in actual work and--as a seller. Our circular will convince you.

Diamond Saw & Stamping Works

BUFFALO, N. Y.

THE American Steel Lead Keg

For economy and convenience nothing can equal them.

Made in 12½, 25, 50 and 100 pound sizes.

The advantages of the Steel Lead Keg over the old wooden kegs are apparent:---

It is absolutely impossible to lose any oil, such as is the case with the wooden keg---from which the oil seeps out gradually.

PREVENTS CAKED LEAD

NO MORE OIL LEAKING INTO THE FLOOR

The American Steel Lead Keg enables you to use all the lead you pay for. The Steel Keg prevents drying out---caking and skimming of the lead;---thus lead packed in a metal package is, when opened, all usable lead.

Our Steel Lead Kegs lessen the risk of fire by doing away with oil-soaked inflammable store floors.

GET BUSY

That is the one secret of success in the Hardware trade.
The rapid sales and quick turning over of capital that

A Line of Arcade Goods

will produce is a revelation to Hardware dealers, and there is a reason for it. Consumers know the excellent quality that the name Arcade signifies. They know that it stands for the highest satisfaction and greatest efficiency that their money can buy. It is this knowledge that makes them demand Arcade Goods when they are in need of any of the 300 articles we manufacture.

To prove their unquestionable merit to any doubting dealer we will send a sample of any article desired.

We show on this page four articles that are money-makers for the dealer.

THE CRYSTAL COFFEE MILL
with glass hopper and tumbler. This is the most perfect mill made and with it the most discriminating customers may be interested. Its superior advantages are appreciated on sight.

You can satisfy every requirement of your trade with one of the sixty different styles of wood, glass and metal mills which we manufacture.

THE FAMOUS GEM

is known to housekeepers everywhere as the one dependable mop head. It is made of the best steel and equipped with the latest improved spring adjustment. It is a most durable, saleable and profitable article.

Right Space Spice Cabinet

THE JEWEL COFFEE MILL
with glass canister holding one pound of coffee. This is a companion of the Crystal, but sells at a lower price. A liberal dose of these two mills will prove a tonic to your coffee mill trade.

THE RIGHT SPACE SPICE CABINET
is made of hard wood in natural finish. It is strongly built to withstand the roughest usage. Each compartment is labeled and fitted with iron pulls. The general effect is one that appeals to the careful housewife.

Are Crowned With Praise Wherever Sold or Used

The largest chair makers in the United States use them in their factories. John Wanamaker and other large Department Stores sell them at a good profit. Why shouldn't you?

BETTER AND CHEAPER THAN
CANE OR LEATHER --- MORE
DURABLE THAN EITHER

Any one with a pair of shears can put them on any ordinary chair, no matter how bottomless.

You ought to try a sample order and see how they sell, if displayed.
Send for circular and prices.

Eureka Chair Seat Co.

SYRACUSE, N. Y.

GIBFORD'S RED-E-FOR-USE RAZOR STROPS

DON'T monkey with cheap Razor Stropps. You can't afford it. Don't sell a cheap strop with a good razor, either. It may cost you a customer.

If you are after the Best Razor Strop, the kind whose surface draws or pulls properly and pulls trade,—try ours

The Red-E-For-Use RAZOR STROPS

Our variety is so large,—each strop is made of such fine horse hide and calf skin,—so even in texture,—so carefully finished,—that they are the best stropps sold in any market in the world.

You cannot afford to be without them. Our catalogue will tell you of your needs. Be sure; get it to-day.

HARDWARE

G. H. Garity, formerly with The Neal & Brinker Company and Western Electric Company, has joined the office force of William B. Fox & Brother, 21 Warren Street, New York.

The factory of the Wire Goods Company at Worcester, Mass., will be closed for the usual inventory and necessary repairs resulting from continuous employment, from July 2 to 7. The season has been a remarkably busy one, and the necessity of anticipating the events of the trade is recommended to the buying community.

THE SELLING MAGAZINE.

The first issue of a new magazine to be called the Selling Magazine has been recently added to the list of our exchanges. It is a monthly periodical devoted to "the sales and demand promoting departments of machinery, tool, equipment and supply houses, precisely what the best of trade and technical papers are doing for the manufacturing interests of such concerns, to the end that the former may be reduced to something like the scientific economical basis of the latter." The initial number gives good promise that it will amply fulfill its mission, as a number of excellent articles on the subjects indicated are to be found in its columns, and a number of leading trade journals make use of its advertising pages in a way that guarantees a successful career. It is published at 253 Broadway, New York, at \$1.00 per year, by Emerson P. Harris, a veteran in knowing what is demanded by subscribers, while its editorial force is headed by John A. Kershaw, and Walter D. Gregory is manager. We welcome the new arrival and wish it every success possible of achievement.

TEXAS HARDWARE JOBBERS.

The annual convention of the Texas Hardware Jobbers' Association at Fort Worth, Texas, concluded May 18, with the election of the following officers: Ed. S. Hughes of Abilene, president; Charles E. Nash of Fort Worth, first vice-president; E. A. Peden of Beaumont, second vice-president; R. E. Bell of Fort Worth, secretary and treasurer. On the executive committee were named Messrs. Keith of Beaumont; Moroney of Dallas; Betts of Paris, and Sanford of Sherman. On the transportation committee Messrs. Thumbull, Torain and Love. On the manufacturers' committee Messrs. Heitmann, Jackson and Tipps. On the grievance committee Messrs. Bering, Stringfellow and Burnside.

RETAIL HARDWARE, IMPLEMENT AND VEHICLE DEALERS' ASSOCIATION.

The traveling men covering Oklahoma and Indian Territory are reporting favorably that the attendance at the convention which this association will hold in Oklahoma City on July 10, 11 and 12 will be unusually large. The association is working very hard in order to make it a great success, and have an exhibit hall where they are furnishing free space to manufacturers and jobbers for a fine display of their goods. It is conveniently located, and large enough to accommodate quite a number of exhibits, as it is 150 by 175 feet. They are receiving calls for space every day, and are reserving same as calls come in, and will continue to do so until it is all taken up. So at present it will be "first come first served."

SOUTH CAROLINA RETAIL HARDWARE ASSOCIATION.

The South Carolina Retail Hardware Association will hold its second annual meeting at Wright's Hotel, Columbia, on June 12, 13 and 14. The railroads have granted a reduced rate of a first and a third on the certificate plan from all points in North and South Carolina and Virginia. It is hoped to interest all dealers in those States in the Association, with a view to making it representative of the retail Hardware interests of the three States. The advisability of forming a mutual fire insurance company on the lines carried out by Hardware Associations in other States will be discussed, and efforts will be made to get one under way in that section of the country.

BRIDGEPORT HARDWARE MFG. CO.

The Bridgeport Hardware Mfg. Co., Bridgeport, Conn., manufacturers of Hardware and Cutlery specialties, have increased their capital stock from \$75,000 to \$125,000 to be devoted to the expansion of the business of Hardware specialties, including nail pullers, screw drivers, cutting nippers, hack saws and frames. Within the past month the company has absorbed the entire business of the Perfect Sliding Door Co., Bridgeport, and has started the manufacture of the sliding doors formerly manu-

factured by that company. The sales end is being developed to cover the entire United States and Canada, the new factory building having ample space to permit almost doubling the company's business.

BANQUET OF THE "ATKINS PIONEERS."

E. C. Atkins & Co., Indianapolis, Ind., have in their employ a number of men who have been with them anywhere from ten to forty years. Three months since those who had been with them twenty years and over organized an association of veteran saw makers, called themselves "Atkins Pioneers" and enrolled 62 men out of 75 that were on the payroll in 1886. The company honored the movement by giving the "Pioneers" a banquet at the Grand Hotel on May 26, and the veterans to a man thoroughly improved the opportunity. After they had made away with an excellent dinner, speeches were made by John H. Wilde, president of the "Pioneers," who acted as the toastmaster on this occasion, and other members. H. C. Atkins, N. A. Gladding, U. A. Potter and Fred C. Gardner, the officers of the company, also gladdened the assemblage by a display of oratory. References were frequently made to the late E. C. Atkins, the beloved founder of the business, who is highly revered by his workmen, and lives in their hearts as a master workman of his craft. The oldest veteran of them all, and with the longest term of service with the company, was William Miller, whose life is referred to in another part of this paper. He is now past seventy, but his muscles are as strong and his mind as clear as a man only half his age. The 1100 employees of the saw works are to be treated to a monster picnic at a later date, which is now being planned for their enjoyment.

HARDWARE CITY TRUST CO.

During the past winter, several of the manufacturers, headed by the Hon. George W. Corbin, ex-Mayor of New Britain, secured from the State Legislature a charter for a new trust company. Under this charter the Hardware City Trust Co. has been formed, the idea of the company being to promote both the mercantile and manufacturing interests of New Britain. The company has commenced business with a capital of \$100,000 and a surplus of \$50,000. The officers and directors of the company, who are selected from the leading manufacturers and merchants of New Britain, are as follows: Charles M. Jarvis, American Hardware Corporation, president; George P. Hart, the Stanley Works, vice-president; F. G. Vibberts, Manchester Trust & Safe Deposit Co., Manchester, Conn., secretary and treasurer. Directors: Charles M. Jarvis; C. J. Parker, of the Parker Shirt Co.; H. C. Noble, North & Judd Mfg. Co.; F. G. Vibberts; George P. Hart; N. P. Cooley, Hart and Cooley Co.; Howard S. Hart, Russell & Erwin Mfg. Co.; Charles F. Smith, Landers, Frary & Clark; George W. Corbin, Corbin Lock Co.; C. A. Earl, Corbin Screw Corporation; B. A. Hawley, Russell & Erwin Mfg. Co.; Charles H. Parsons, P. & F. Corbin; George L. Damon, D. A. Niven and J. E. Cooper.

ENTERPRISE WON.

The Enterprise Enamel Company of Bellaire was awarded a silver medal at the St. Louis Exposition for the high quality of its ware, and has just received the medal. This makes the second silver medal for the company, the other award being from the Paris Exposition. The award came unsolicited and the company made no contest for the medal and its award was a surprise to all. Their ware entered the exposition in this way. The Ohio State University made an exhibit and when preparing it a representative called at the office of the company in Bellaire and asked for samples of the ore used in making the enamel and some of the other ingredients along with a sample of the ware, which was given them. This was the extent of the interest the company had in the exhibit, which shows that their ware was held as the best. The medal is a handsome one and is highly prized by the company.

EMIL CALMAN & Co., with offices at 209 Pearl Street, New York and 225 Kinzie Street, Chicago, and works at Long Island City, N. Y., are sending out to the trade a descriptive catalogue and price list of varnishes and japans manufactured by them, which include coach, furniture, piano, cabinet and decorators' varnishes, as well as pigment wood fillers, liquid and japan driers, baking varnishes and japans, bicycle enamel and spar varnish. They have also distributed a very interesting booklet entitled "A Guide to Home Builders," in which are given views of many residences and public buildings throughout the country where their architectural varnishes have been used for finishing.

Editorial Trade Review

With very few lines of goods developing anything in the shape of weakness, the commencement of the last month of the first six boasts of a tidal wave of prosperity that continues its good fortune and industrial success, making new records as the days pass to congratulate the trade.

There is but slight relaxation from the pressure of good business, notwithstanding the hot weather is now upon us, for the arrival of the vacation season leaves more work for those who linger in the field of employment, while the first platoon of the tired working forces finds a spot where they can pass in recuperation the vacation they have so well worked for and won.

Manufacturers very generally find themselves still behind in filling the orders already in hand, being unable to meet with promptness the steady requests demanded by the wants of their customers, for at this time in the season holes in the retailers' stocks create a series of urgent requests, which the jobber is only too anxious to fill and keep his own trade from becoming too importunate.

The requisitions for Builders' Hardware still keep busy the architects' demands on the trade as well as to meet the frequent applications for the finished products of the more moderate class of builders who are in every hamlet making the habitations which will yet be filled with happy occupants. The trade in every direction have reason to be thankful that no drawbacks have shown up to interfere with the upward trend of business, the prices of but very few commodities showing a lower range in their indications, the general quotations being steady or advancing in the face of the large consumptive ability of the country.

It has been more pleasure to be in business this year than usual, and with large crops in prospect and the variety of agricultural products that form the foundation of the country's wealth, looming up more in harmony with the increasing population than ever, it gives every confidence that fewer mistakes can be made by the Hardwareman by carrying a good stock of staple goods especially,

The several interesting matters that have been before Congress for final adjustment we have felt were in the interests of the catalogue houses particularly, have been so closely followed up by the trade in general that they have been "scotched" if not killed outright; and until another season when the law-making power of our government shall convene, we shall be able to pursue our vocation without the overweening fear and apprehension born of adverse legislation simply to create opposition.

When it is considered what a narrow escape was had from the scheme of a Parcels Post, which the combined attack of the trade on it was found sufficient to leave it without a friend in the end. Then the Post Check scheme was defeated, because it was not investigated with sufficient thoroughness; even the substitute bill presented by the Postmaster General of a system of fractional currency, after an extended hearing, was laid one side. Then the scheme of consolidating the classes of Postage which would have benefited Catalogue Houses as much as anything and proved a parcels post scheme under a new name. As all the parcels post workers seem to hold the number of its friends the Senate and House seemed to be afraid of it and rejected it. Notwithstanding the favorite action on these subjects which was the ultimate result of our watchful care, it still behooves us as being of the highest importance to watch every move of the enemy and see that they don't spring some nefarious scheme on us to the detriment of the Hardware trade and its many zealous workers among the Associations.

THE "GOOD ENOUGH" HABIT.

If there is any one little habit that above all others eats holes in the Sunday clothing of a man's business methods it is the "good enough" habit. A letter is dashed off, not fully thought out or quite satisfactory but "good enough;" still it lacked just the last vital force that lands the order and a valuable contract was lost. An agreement is drawn up ready for signature. Some deficiency is apparent in it at the last moment and is finally dismissed with the mental comment, "It is good enough. Let it go." But the defect invalidates the paper and cost some one a pretty penny as well as a lot of trouble and hard feeling.

An order for new stock is given that a little more consideration would show was not a well balanced one, but it is allowed to pass as "good enough" rather than take the trouble of making a few inquiries. Result: a lot of goods that are not needed and some empty shelves in places where the stock was really short. In a dozen other details of more or less importance the "good enough" principle is applied until the whole business is honey-combed with unsatisfactory arrangements.

Nothing is good enough except the best that can be done and any concern, however humble, run upon that principle is sure in time to be a more desirable possession than a far more pretentious neighbor conducted upon the opposite plan. If a letter can be improved upon it should be re-written even if it is only a notice to Bill Smith that the slow point ordered for him has arrived. It will take time, but the next one will be more carefully prepared in the first place, and time spent in establishing the habit of exactness is time well spent even if the richest customer on the rolls of the concern has to cool his heels outside while it is being done; for it will eventually, if persisted in, place any establishment upon a footing to be proud of.

HOLD YOURSELF DOWN.

You had better learn to accept all the misfits and all the trivial annoyances of life as a matter of course. To allow them to receive attention beyond their deserts is to wear the web of your life to the warp. Be on the lookout for the great joys and never let life's mosquitoes worry you into a passion. When little things happen around your place that cannot be helped, even if they are caused by someone's carelessness, there is no reason why you should add the loss of your temper to your financial loss. There can no good come of blustering and quarrelling when the porter leaves the door unhooked only to be slammed by the wind and smashed. Hold yourself down!

D. C. W.

KNOW THE MATERIAL YOU HANDLE.

Sometimes a glance of the eye will tell an intelligent purchaser why one axe is worth \$1 and another one 50 cents; not always. Then it is up to the salesman to know just why and to be able to explain. In order to do this he must know something about the different kinds of iron, their properties and proper use and their relative strength and wearing qualities under given conditions. For instance he should be able to tell just why the new line of steel ranges has to cost more than the iron ones of another make and why they are worth more; also should bear in mind the fact that there are kinds of steel that, while they might cost more, would be worth less in a range than iron.

It is no longer enough for the salesman to know the name of the metal his goods are made of—that is not so much what the customer wants to know as whether the material will wear best in that place and if it is sufficiently superior to justify the difference in price. Be prepared to help your customers in their selection if they ask you to. Some men may want an article for a very short time only, and will therefore want the very cheapest that will do the business. Others want a permanent investment and the best value for their money. Not long ago the writer heard a young man who had entered a Hardware store rather hurriedly say: "I want the cheapest tin bucket you have got; something that will do to water a horse with once and then throw away."

"Here," said the salesman, handing it out, "is one that I can almost guarantee to last but once."

That man was shipping stock on the train. The instance is given to illustrate the legitimate call there may be for all grades of goods. The salesman is in a store where there is a good buyer if he is always able to meet these varying demands; he is himself wise if able to tell why the grades are different and how much they differ in real value; still it is a sort of wisdom he will have if he is the kind of a salesman he ought to be. Frequently too, a manufactured article made of one material is satisfactory for one place and not for another because of some chemical action. An old maple-sugar maker claims to prefer the ordinary galvanized pan for boiling sap. Later when caught in the act of purchasing a copper pan at a higher price he explained his seeming change of mind with this statement:

"The old pan was what I wanted for sap only. Now I have added a cider-mill to my establishment in order to get some good of my investment in the Fall as well as Spring, and want to boil cider. The acid of the hot cider would soon attack the old pan; I have to use copper now."

Another instance where some knowledge of the properties of different metals on the part of the salesman may save some customer a serious loss, disappointment and dissatisfaction. Not every clerk knows that lead paint should never be applied to a metal roof, but the sooner he finds it out the less risk he will take of being called upon to face a wrathful ex-customer.

Be prepared, then to advise the customer who wants advice with real intelligence or don't advise at all, remembering always that even cold, inanimate iron may, in its various forms have as many characteristics that have to be humored as a trick mule at the circus.

By carefully studying up some of these details that lie just a little outside of his own business, but that none the less lie back of it, the Hardware dealer can not only do a great deal more in pleasing his customers, but will soon acquire a reputation, both as buyer for his own establishment and salesman to his customers that will of itself prove of quite important commercial value.

THE SWELLED HEAD.

The fellow who has not enough pride in his work to get an occasional swelled head about it when he achieves any special success, is not sufficiently interested in it to deserve success. The vital question is, what will be the after effect of his egotism upon himself; will it inspire him to go at it again or prompt him to stop and try to look pretty at himself in the mirror of self-contemplation.

Egotism, like the measles, seems to be a peculiarity to which all members of the human race are subject and the earlier its more malignant form of attack can be brought out the better. The victim has more time to recover then and he usually makes such a noticeable fool of himself that he gets plenty of ridicule as a counter-irritant. One severe attack, if recovered from, is usually sufficient inoculation against a variety of serious future attacks upon a man's good sense later in his life.

At the same time the man, be he in charge of the sweeping department in his employer's office or in charge of the office as employer and manager of a thousand men, who does not let a certain amount of pride in his business crop out occasionally is pretty surely running a business of which he has nothing to be proud.

LEGAL CORRESPONDENCE

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

PROMISE—WHEN SUPPORTED BY SUFFICIENT CONSIDERATION.

QUESTION.—An uncle promised his nephew that if he would not smoke or use tobacco in any form until he became 21 years old, he would give him \$100 on his twenty-first birthday. The nephew kept his promise and did not use tobacco in any form, but after he became twenty-one, the uncle refused to pay the money, on the ground that he was not legally bound to do so. Can the nephew compel him to pay it?

REPLY.—The question involved in all cases of this kind is, was there a consideration for the uncle's promise? If there was, it can be enforced. If there was not, it was a mere promise to make a gift and is not legally enforceable. We think in this case there was a consideration. The nephew had the right if he chose to use tobacco before his twenty-first birthday. He relinquished that right because of the uncle's promise. Although the right may not have been beneficial to the nephew, nevertheless it was a legal right, and it is well settled that the relinquishment of a legal right at the request of another, is a sufficient consideration for a promise, even though it may not be beneficial to either party. It follows that the nephew is entitled to recover from his uncle the sum promised.

SUIT AGAINST EXECUTOR.

QUESTION.—A person who owed me \$100 died and an Executor was appointed in the State of New York. I presented my claim to the Executor and he has rejected it. What must I do to protect my rights?

REPLY.—Where an Executor in the State of New York rejects a claim against a decedent's estate, the parties may consent to have the claim referred to a proper person for determination, or they may consent to leave it to the Surrogate of the Executor's accounting. Unless such a consent is entered into, the creditor or person presenting the claim must bring the suit within six months after the rejecting of the claim, or he will be forever barred from any action or remedy against the Estate. Unless such an agreement as we have stated, is made, you must sue within six months after the rejection of the claim or lose all rights.

RIGHTS OF A RETIRING PARTNER.

QUESTION.—When a person retires from partnership and sells all his interest in the business and the good will, will this prevent him from starting a new business in competition with the old business or soliciting the trade of the old customers or from carrying on a new business in such a way as to make it appear that it is the old business?

REPLY.—The Courts are agreed that if he has sold his interest in the business and the good will, he has no right to carry on a new business in such a way as to make it appear that he is the successor to the old firm. Some States adopt the English view that his sale of the good will of the business also prevents him from soliciting the trade of the old customers. In other States, such as New York, the law seems to be that the retiring partner can start a new business in direct competition with the old and even go so far as to solicit the trade of the old customers unless he has made an express agreement not to do so.

BELKNAP HARDWARE & MFG. CO.

At the annual meeting of the stockholders of the Belknap Hardware & Mfg. Co., Louisville, Ky., held on May 24, the following officers and directors were elected: William R. Belknap, president; Morris B. Belknap, vice-president; William Heyburn, vice-president; John W. Price, vice-president; Richard I. James, secretary; Harry S. Perkins, treasurer; M. R. Porter assistant treasurer. Directors: William R. Belknap, Morris B. Belknap, William Heyburn, John W. Price, R. I. James, Harry S. Perkins, Arthur D. Allen, M. R. Porter, Charles W. Allen. The company reported having spent approximately \$400,000 during the past fiscal year for new buildings and improvements. The plant now consists of eight buildings with about 1,000,000 square feet of floor space. All the buildings are connected by underground tubes, and in this connection 65 telephone stations are used.

"MECHANICAL DRAWING FOR PLUMBERS."

The Plumbers' Trade Journal Publishing Co., 61 Beekman Street, New York, have recently published a handsome octavo volume under the above title, in which they have embodied a series of articles written by R. M. Starbuck for the journal in question with a view of making mechanical drawing a valuable and practical acquisition to the plumber who wishes to gain a thorough knowledge of all that applies to his particular line of plumbing work. The book is embellished with 150 drawings of actual and practical work, elementary and otherwise, by the aid of which the contents are made plain in connection with the drawings, being readily understood in all their applications and in language that can be easily comprehended, without the mystifying effect of trying to translate the customary technical language in which the subjects treated are usually couched. The effect has been to make perfectly obvious by the aid of mechanical drawings many difficult problems in plumbing which the easily acquired art of the student can make sufficiently plain, and the proficiency of the plumber is thereby made subservient to a course of study that produces results in a short time, that hastens his skilled ability and gives the requisite confidence to an employer to prosecute the most difficult phases of his employment. Mr. Starbuck says in the introduction that what he has written "has been undertaken with a firm conviction that the knowledge of the subject of plumbing drawing has to-day become a most valuable and practical acquisition to the working tools of the plumber. In fact, no person who is connected with construction work of any kind can afford to be without a thorough knowledge of such drawing as belongs particularly to his line of work. Much that the author has to say in this little treatise is the result of his own experience gained in the pursuit of the plumbing business, and it is the thought of the personal benefit that he has derived from a knowledge of the subject that has led him to attempt the writing of this series. The writer believes that his readers will appreciate with him the many difficulties that confront an attempt to give instruction of this nature by means of printers' ink rather than by word of mouth, for certainly personal oral instruction is the only method to bring the fullest results. It is his sincere hope that this little book may prove of some real and practical benefit to the younger men of our trade for whom it is especially intended." The book is divided into twenty-six chapters or separate heads, each of which treats of a special subject, so that the 110 large pages are filled with the very information which is the most important on each subject that the young plumber would desire to be informed upon.

The author says in commencing his work: "The man who to-day does high-class plumbing or heating, and is worthy the name of doing that class of work, is as deserving of credit as is the lawyer who conducts his case in court successfully, or the physician who performs the duties that devolve upon him in a creditable manner. The trade, we must remember, is not in the crude state that it was years ago, and if the plumber keeps abreast of the times he must educate himself along several lines in addition to the manual side of the question. He must be conversant to some extent with chemistry, and the subject of physics, that is, natural law, is more valuable to him than to any other man that we can think of. If he is to make the most of himself and his opportunities, the progressive man cannot do better than to take up the study of mechanical drawing, at least so far as it concerns the laying out of plumbing and heating work. A knowledge of the subject is valuable, not only to the man who is conducting the business and uses his knowledge in demonstrating his ideas to the prospective customer, but even the apprentice cannot afford to be ignorant of it, for on paper he can lay out work, run his lines of pipe and make his connections—all in a practical way—and gain experience thereby that he cannot gain in serving at the trade, unless more fortunate than his brothers in the advantages that are given him. The writer has in mind instances where the obtaining of good work can be traced directly to the fact that a neat little sketch of the proposed work was submitted to the owner. The sketch showed that the one who presented it was up-to-date, and knew his business, and that thereby he gained a better place in the opinion of his customer than his competitor, was to be expected. And it is these little points that count, not merely to-day, but always in the years to come."

C. W. GAUSE COMPANY.

C. W. Gause, late of Dunham, Carrigan & Hayden Company, San Francisco, and formerly with the Simmons Hardware Company, St Louis, has just organized the C. W. Gause Company, the business of which will be that of factors in Hardware and kindred products, for domestic and export trade, in San Francisco. The company has a temporary office at 314 San Pablo Avenue, Oakland.

TRADE OF THE UNITED STATES WITH JAPAN.

Trade of the United States with Japan is larger than with any other oriental country, and aggregated in 1905 106 million dollars. The exports to Japan have grown from a little more than 5 million dollars in the calendar year 1895 to over 55 millions in 1905, being more than ten times as great in 1905 as in 1895. The imports from Japan also show a material increase, having been 27½ million dollars in 1895 and nearly 51 millions in 1905. The gain in exports to Japan, comparing 1905 with 1895 is not quite so rapid as in those to China, but the growth in imports from Japan is much more rapid than in those from China. In the period from 1895 to 1905 the exports to Japan increased 45 million dollars, and those to China increased practically 55 millions. During the same period imports from Japan increased 23 million dollars, while those from China increased but about 6 millions.

The growth in exports from the United States to Japan and China has been a remarkable feature in our export trade in the last decade. The increase in exports to Japan was in round terms 50 million dollars, while during the same period the growth in exports to all South America was but 32 million dollars, to all Africa but 10 millions, to Oceania, including Hawaii, 30 millions, and to all Asia except Japan and China 13 millions. Thus the growth in exports to Japan from 1895 to 1905 has been greater than that to South America, Africa, Oceania, or Asia exclusive of Japan and China; while the growth to Japan and China in combination has been greater than that to the remainder of Asia, plus Africa, South America and Oceania.

This growth in exports to Japan has occurred chiefly in very recent years. A statement just issued by the Department of Commerce and Labor through its Bureau of Statistics shows the details of commercial movements between the United States and its neighbors on the west. The exports to Japan, as indicated, were but a little over 5 million dollars in 1895, and had reached 21 million dollars in 1903, when the extraordinary demands for foodstuffs, railway material, machinery of all sorts, and material for clothing during the war pushed the total up to 31½ millions in 1904 and 55¼ millions in 1905. Exports to China, which were but little less than 4 millions in 1895, lagged until 1903, when they were 15 million dollars; they grew to 28 millions in 1904, and by reason of the unusual demand for American cottons and copper, as explained a week ago, grew to 58½ millions in 1905.

The articles which make up the large and rapidly growing total of American exports to Japan are more widely diversified than in the trade with China. The chief articles in the exports to Japan and their values in the fiscal year 1905 were raw cotton, practically 17 million dollars; manufactures of iron and steel, about 10 million dollars; flour, 5 millions; leather, 5 millions; mineral oil, nearly 3 millions; provisions, including meat, butter, condensed milk and canned foods of various kinds, about 2 millions; cotton cloths, a little over 1 million; copper, a little over 1 million, and breadstuffs other than flour, a little over 1 million.

This diversification is a marked characteristic of trade with Japan in recent years. Raw cotton exports to Japan in the fiscal year 1895 amounted to less than 1 million dollars, to 12 million dollars in 1900, and were practically 17 millions in 1905, far in excess of any earlier year. Manufactures of iron and steel exported to Japan in 1895 amounted to less than one-half million dollars, and in 1905 were over 10 millions, with a large increase in the number of classes included under that general term. Leather exports to Japan in 1895 were less than one-half million dollars in value, and in 1905, 5 millions. Flour exports to Japan in 1895 amounted in value to but a quarter of a million dollars, and in 1905 to over 5 millions, while other breadstuffs exported were valued at more than 1 million. Cotton cloths exported to Japan in 1895 amounted to less than \$100,000, and in 1905 to over 1 million dollars. Unmanufactured tobacco exported to Japan in 1895 amounted to less than \$8,000, and in 1905 to nearly 1 million dollars.

On the import side the growth has been less rapid and the variety of articles rather more restricted than on the export side. Raw silk formed in 1905 more than one-half the value of the total imports from Japan, being practically 52 millions. The growth in imports of raw silk has been very rapid during the decade, the total imports thereof from Japan having been but 10 million dollars in value in 1895 and practically 29 millions in 1905; while the manufactures of silk imported from Japan amounted to a little over 6 million dollars in 1905, against 4¼ millions in 1895. Tea was the next article in importance among the imports from Japan, amounting in 1905 to a value of a little over 7 million dollars; matting and mats to a little more than two millions, and earthen, stone and china ware to nearly 1 million dollars.

PROFIT MAKING LINES

"COMMUNITY SILVER."

The interest attaching to Community Silver and the men who make it, is sufficient to justify some special notice. As at present constituted the Oneida Community, Ltd., is a strictly commercial organization. It ranks among the larger manufacturing interests of the United States, operating no less than five separate and extensive manufacturing establishments in connection with its

nary triple plate of commerce. The character of this plate imparts extraordinary durability, the life of the ware under ordinary usage being conservatively estimated at from twenty-five to thirty years. The wearing qualities of Community Silver were recently demonstrated in a unique experiment at the hands of an ingenious silver plater at the company's works. Attached to a revolving arm were various well-known makes of plated flat ware, which were so suspended that as they swung around the

AVALON PATTERN.

various departments. These departments, however, are merely alluded to in passing, the most famous product of all being Community Silver, in which the readers of this journal will be especially interested.

The product easily lends itself to artistic presentation, and where elements of superior merit exist there is always matter for reasonable and convincing argument. While there has been no aim at introducing great variety of designs, such patterns as are made are always the work of recognized artists and do not fail to satisfy the varying tastes of consumers. Of these designs the "Flower-de-Luce" pattern is probably the best known.

circle they came in contact with a number of objects over which they continued for some time to drag and bump and rattle. By this means they were subjected to the hardest wear that they would be liable to encounter in actual use. It was found that Community Silver traveled a distance of about eighty miles before showing the effects of wear, out-distancing the best of its competitors. This unusual experiment furnished a very practical test, constituting a concrete and unanswerable argument for durability.

Other salient points may be briefly mentioned. The element of "balance," that poise which causes a knife or fork or spoon

AVALON PATTERN.

The flower in question is peculiarly adaptable for such a design; it does not need to be conventionalized, but is reproduced in the silver practically as it is found in nature. For example, the bowl of a spoon may be said to represent a bulb from which the tender stems push their way up along the handle of the spoon culminating at the top in a beautiful open flower. The lines bearing this pattern have the subdued finish so largely in vogue at the present time. A simpler design, though none the less correct in its own way, is the "Avalon" pattern which is conventional but classic in its outlines. The latter design possesses

to "feel" right when held in the hand, this has not been overlooked in the making of Community Silver. Again, the thickness of the plate permits of engraving as in the case of Sterling silverware. In short, the aim of the Oneida Community, Ltd., has been to furnish a product which should be absolutely superior in all respects, regardless of the initial cost or the prices it would be necessary to charge. That is to say, in the first instance the sole consideration was that of quality; questions of cost and problems of marketing were matters to be taken up afterwards. And yet it is only fair to state that Community Sil-

FLOWER-DE-LUCE PATTERN.

a bright finish, preferred by many purchasers owing to the brilliancy it adds to the table. The selection of design is simply a matter of individual taste, as the same standards as to weight and quality apply to all.

Aside altogether from the matter of design, there is another consideration upon which very great emphasis is placed. To Community Silver belongs the distinction of having the heaviest pure silver plate of any ware on the market. The term "triple-plus" has sometimes been used to distinguish it from the ordi-

ver costs but little more than the ordinary silver plate of commerce.

So far as the trade is concerned, the policy of the management is a generous one. A good margin of profit affords practical incentive. The company has no retail salesrooms, sending the consumers direct to the dealers. And it is the trade that reaps the first fruits of this volume of advertising. These facts partly account for the good will with which the Oneida Community, Ltd., is regarded by dealers everywhere.

THE ROCHESTER CYLINDER ROTARY WASHER.

The Rochester Rotary Washer Co., Rochester, N. Y., are the manufacturers of the Cylinder Rotary Washer, shown in the accompanying illustration, which is 36 in. high, 28 in. long, 22½ in. wide, and its cylinder is 20 inches in diameter. The iron work is well galvanized, and the entire machine is securely and substantially constructed. There is nothing to grind, tear or stain the clothes in the slightest degree. The articles to be washed are placed within a wooden cylinder, and do not come in contact with any metal likely to rust there. This washer is built on an entirely new principle. It has a rotary cylinder—composed of alternate wooden slats and perforated zinc—non-rustable, allowing the free access of hot soap suds in which the cylinder revolves. The gear wheel connecting the handle with the cylinder shaft renders the labor of turning extremely easy. The cylinder holds from 40 to 60 pieces, three times as many clothes as any other washing machine made, and will wash anything from the

THE ROCHESTER CYLINDER ROTARY WASHER.

most delicate fabric to the heaviest blanket. As it revolves the clothes are prevented from packing by two wooden wings (a patented device in no other washing machine) placed on either end of the cylinder, at such an angle that the clothing falling against them, is thrown on the opposite side. This motion opens up the clothes, subjecting every article to the suction of the suds, produced by the revolutions of the cylinder. The wear of the clothes is thus reduced to the minimum. There is no tearing or grinding action whatever. The clothes are thoroughly sterilized in the scalding rinsing water. It is, therefore, a waste of time to boil the clothes when using this machine. It has a deeper tank than any other machine, permitting the use of an abundance of water without the slopping or dripping of dirty water on the floor. It is the most durable machine made. It has no wooden tub to shrink, warp or rot. It is made of the best material and of the best workmanship.

Another valuable feature about the Rochester Cylinder Rotary is the fact that it can be operated by water, electric, gas or gasoline motor, at a merely nominal cost by water motor. This water motor can be used in any home without inconvenience or expense. All the work there is to the washing is putting the clothes into the washer and wringing them when they come out.

"A MANUAL OF CARPENTRY AND JOINERY."

Under the above title an important book, by J. W. Riley, has recently been published by the Macmillan Company, No. 66 Fifth Avenue, New York and London, treating of the necessary preliminary knowledge of a technical character that should be inculcated in the mind of a student of the above industry in order to make easy any work he may undertake and bring it intelligently to a successful conclusion. The volume forms a compact book of 500 pages, printed clearly on good paper, and would prove a handsome and useful volume to be added to the working library of the industrious and intelligent carpenter who takes an ambitious pride in his work. It will be found especially instructive to the apprentice daily adding to his stock of knowledge, as the work is sufficiently elementary in character, and amplified and rendered even more instructive by the nearly one thousand illustrations with which the painstaking author has illumined its text.

In his prefatory introduction to the work in question, he

states: "In writing this book the needs of carpenters and joiners who are studying the scientific principles of their work have been borne in mind throughout. Students who are attending classes in technical institutes to prepare for examinations will find that the following chapters have the same aims as their syllabus, inasmuch as they are intended to develop an appreciation of general principles rather than to encourage empirical methods of work."

The simplest types of construction have been dealt with most fully, and the principles they embody have been emphasized continually. Without going into great details, these rules have then been applied to more complicated examples, for a long experience has convinced the author that the student who has grasped the fundamental facts of the subject requires a minimum of guidance in more advanced work. Unusual prominence has been given to the elementary parts of geometry, mensuration and mechanics, because students of carpentry and joinery constantly begin their work without this necessary preliminary knowledge.

Among the special features of the book are the chapters on

Tools and Wood-Working Machinery as well as a large number of technical diagrams of details of construction. It is hoped that in addition to its use by students of technical classes the book will be of service to practical men in the workshop, and to schoolmasters framing courses of manual training. Summaries are given at the ends of the chapters and ample material for testing the knowledge of the student will be found in the questions which immediately follow the summaries. The work is sub-divided under the following heads: Timber, Plane Geometry, Solid Geometry, Mensuration of Carpentry and Joinery, Tools, Wood-Working Machinery, Joints and Fastenings, Wooden Floors, Wooden Roofs, Partitions and Wooden Framed Buildings, Miscellaneous Carpentry Instructions, Mechanics of Carpentry, Doors and other Panel Framing, Windows, Roof Lights and Conservatories, Staircase Work and Hand Railing, Work Shop Practice and Special Instructions, with Technical Examination Papers, Answers and Index.

Each of these chapters is treated exhaustively in all matters, relating to the various subjects and all matters that make the mechanics information sufficiently complete to give him confidence to take any job and fill it satisfactorily.

The volume can be obtained from the publishers direct for the moderate price of \$3, and the amount of technical knowledge obtainable from a study of its many pages would seem to be incalculable, and well worthy of the thorough study and close attention of the beginner and also the skilled laborer and mechanic further advanced.

THE UTILIZATION OF BLAST FURNACE GAS.

Many of the steel mills, iron works and other furnace plants are making great progress in the utilization of blast furnace gas. This has chiefly become possible, because within the last few years the gas engine business has made enormous strides. A gas engine unit of 100 horse power was, about five years ago, a curiosity, while to-day such engines are manufactured with a capacity that runs as high as five thousand horse power. These engines have found a great field of utility in mills, mines and factories where their introduction offers many points of advantage. It saves much space, because boiler room is eliminated. Its operation is more uniform and less costly than the steam engine. The manufacture of producer gas, which has also reached a state of high development recently, is another feature which makes the use of the gas engine desirable. In the mills, however, the blast furnace gas, which would otherwise have to go to waste, is now used for the operation of gas engines, which furnish power in various forms throughout the mills. The United States Steel Corporation was perhaps the first large mill operator which began the operation of gas engines with producer gas and that company has a number in use. In the rail mill at Braddock, Pa., gas engines run several immense electric generators which furnish power to the rolling mills and other machinery, and these gas engines are operated by blast furnace gas. In addition, the American Steel & Wire Co., which is an underlying company of the U. S. Steel Corporation, is now equipping the plant at Worcester, Mass., with an 800 H. P. gas engine to operate the mill machinery. All of these gas engines are manufactured by The Westinghouse Machine Co. of East Pittsburgh, Pa., which firm makes a specialty of their production, and produces gas engines as large as 5,000 horse power.

There is nothing so bad that will not admit of something to be said in its defense.—STERNE.

RECENT TRADE PUBLICATIONS.

WESTINGHOUSE ELECTRIC & MANUFACTURING Co., Pittsburgh, Pa., have issued a special publication No. 7043, illustrating and describing the Westinghouse Electric Fans. The booklet presents a very artistic appearance, and views are given of the interiors of homes, stores, restaurants, offices, banks, etc., which are fitted out with various types of fans of the company's manufacture, comprising Desk and Bracket Fans, Ceiling and Floor Column Fans. Westinghouse Small Power Motors are also shown for such service as operating sewing machines, dental apparatus, coffee grinders, small ice cream freezers, phonographs, sign flashers, moving window novelties, and hundreds of other adaptations. The booklet may be had upon application.

STUDEBAKER BROS. MANUFACTURING Co., South Bend, Ind., with branches in New York, Chicago, Kansas City, San Francisco, Portland, Ore., Salt Lake City, Denver and Dallas, are sending out some very attractive and striking literature regarding their Studebaker Junior Wagons for boys and girls. Various illustrations from life are given, showing the amount of enjoyment afforded by the possession of one of these little vehicles. The company state: "The demand for this splendid little wagon is so extensive that we have made a special department for it, and expect to sell during the season more than 10,000."

DUFF MANUFACTURING Co., Pittsburgh, Pa., with works at Allegheny, Pa., have distributed their Catalogue G for 1906. This firm, which was established in 1883, are exclusive manufacturers of Barrett's Patent Compound Lever Jacks, and Duff Roller Bearing Screw Jacks. Included in the contents will be found a line of Track Jacks, Automatic Lowering Jacks, Car and Journal Jacks, Geared Ratchet Lever Jacks, Oil Well Jacks, Pipe Forcing Jacks, Automobile Jacks, Differential Screw Jacks, Motor Armature Lifts and Traversing Jack Bases. Dimensions and price lists accompany the same, and the catalogue is a very complete one of this class of goods.

ABERCROMBIE & FITCH Co., No. 57 Reade Street, New York, have published a catalogue and price list of Complete Outfits for Explorers, Campers, Prospectors and Hunters. Illustrations and descriptions are given of Wall Tents, Shelter Tents, Canoe Tents, Camp Beds, Tables, Folding Shelves, Chairs, Stools, Bath Tubs, Lanterns, Acetylene Gas Stoves, Pocket Lamps, Axes, Hatchets, Picks, Shovels, Buckets, Sleeping Bags, Ovens, Cooking Outfits, Bakers, Food Bags, Clothing, Saddles, Sledges, Toboggans, Snow Shoes, Canoes, Shotguns, Rods, Reels, etc. This catalogue is an exhaustive one, and will be found exceedingly interesting.

MAINE WOOD NOVELTY Co., No. 104 Reade Street, New York, manufacturers of wooden novelties and house furnishing specialties, are sending out to the trade their catalogue. Included in the contents will be found their Genuine "Hub" Step Ladder, the "Pilgrim" and "Gem" Step Ladders, Shelf Steps, Plank Ladders, Ladder Hooks, Window Cleaning and Sectional Ladders, Safety Extension Ladders, Hardwood Meat Boards, Pastry Boards, Ratchet Ironing Tables, Square Clothes Bars, Maine Wall Dryers, Advance Clothes Dryers, Folding Wash Benches, Boston Wash Benches, Folding Card and Sewing Tables, Toy Tables, Lap Boards, Step Ladder Chairs, Library Steps, Maine Hardwood Flower Stands, Baby Tenders and Walking Chairs and Lawn Swings. This is a very complete catalogue, and should be sent for.

NEW YORK AND NEW JERSEY LUBRICANT Co., Nos. 14-16 Church Street, New York, are distributing a booklet entitled "The Survival of the Fittest Lubrication," devoted to a description of the Non-Fluid Oils of which they are manufacturers. The company state: "This booklet is practically a treatise on the important subject of obtaining the most efficient service from machinery at lowest cost for repairs, lubricants, etc., therefore is of value to all who are interested in the uninterrupted and economic operation of machinery."

ANDERSON TOOL Co., Anderson, Ind., have favored us with a booklet describing and illustrating some of the many useful articles of their manufacture. Included in the contents will be found

the Anderson and Dunn Computing Cheese Cutters, the Dunn Long Horn Cheese Cutter, Dunn Cheese Cutter Case, Dunn Computing Oil Tank, Anderson Slot Machine for clipping cigars and delivering matches; Swank Computing Scoop, Corbin Computing Scale, Dunn Automatic Scale, Dunn Computing Scale and Crescent Putty Knife. This is a catalogue that should be sent for by the dealer.

STUDEBAKER AUTOMOBILE Co., South Bend, Ind., with a New York office at Broadway, Seventh Avenue and Forty-eighth Street, have published a booklet entitled "Italy and France in a Studebaker Car." In the foreword the company state: "Half the pleasure in doing is in knowing how to do. These notes are not intended to give an extended history or complete scenic description of the places and countries visited during an automobile trip on the continent, but rather to serve the novice with information, practical and beneficial, derived from the experience of a novice. This little book gives an interesting account of a tour from Florence to Paris, and is particularly noteworthy on account of the very full notes which give much useful information for the novice in foreign touring." The latter half of this book is devoted to giving details of expense, recommendations regarding the hiring of chauffeurs, securing useful maps and guides, and very helpful data in regard to custom regulations, hotels, repairs, garages, etc. This company are also sending out folders illustrating and describing their Gasoline and Electric Automobiles, Electric Trucks, Express Wagons, etc.; also a folder concerning the Studebaker Automobile Front, showing the manner of attachment and use.

WILEY & RUSSELL MFG. Co., Greenfield, Mass., are distributing circulars of their Genuine Lightning Full Mounted and Green River Screw Plates, with specifications and price lists. The company states: "The quality of the Green River Screw Plate both as to material and workmanship, is up to the highest standard; and its simplicity and durability, with its moderate price, makes it particularly attractive. Like the Lightning Plates, it does its work at a single cut. The die is adjustable for wear, and to make bolts and nuts fit tightly or loosely as may be desired. The stock used is similar to the Lightning, and the taps the same."

CLARK MANUFACTURING Co., Buffalo, N. Y., have favored us with a copy of their 1906 catalogue devoted to Blind Hinges, which includes a line of Surface Gravity-Locking Blind Hinges, under the name of Cottage, Diamond, National, Victor, Noiseless, Empire, Storm and Eagle. There will also be found in the contents Niagara Stove Pipe Dampers, Lull & Porter, Dixie and Buffalo Reversible Shutter Hinges; also Self-Closing Reversible Gate Hinges and Latches, Superior Loose Pin Door Butts; Buffalo, Olympia and Samson Spring Hinges; Buffalo, Eclipse Standard and Square Sash Pulleys; Stove Lid Lifters, Sash Cord Irons, Shelf Supports, Scroll Sink Brackets, and Niagara and Acme Door Pulls. This catalogue should be in the hands of every Hardware dealer.

THE W. H. MULLINS Co., Salem, Ohio, have issued an exceedingly artistic catalogue printed on calendered paper and illustrated with fine half-tone engravings, showing their line of Pressed Steel Boats, this being their Catalogue No. 12. The booklet is filled to overflowing with picturesque views of the boats in use at various summer resorts, and specifications and illustrations will be found as well of their line of Motor Boats. An interior view of their factory is also shown, and a description and price list of extras are included. This seasonable and interesting catalogue may be had upon application to the manufacturers.

COLEMAN HARDWARE Co., 168 Michigan Avenue, Chicago, manufacturers of Builders' and Cabinet Hardware, have issued their Catalogue No. 9. In the contents will be found illustrations and descriptions of their casters, sash balances, frame and sash pulleys. The company state that they are equipped to manufacture complete all kinds of Hardware specialties, either in grey iron or stamped steel, and make a specialty of fine grey iron castings.

NEW GOODS AND SPECIALTIES

ATKINS METAL CUTTING SAW.

E. C. Atkins & Co., Indianapolis, Ind., whose motto is "Atkins always ahead," are placing upon the market a tool that will be welcomed by the carpenter especially, as filling an ideal. It is placed before the trade in the shape of a nest of saws, as shown in the following illustration, and is intended to include in the large blade, which is of silver steel hardened for metal cutting purposes, a saw that will cut through a nail or piece of metal

ATKINS METAL CUTTING SAW.

without fear of damage to the saw. Heretofore there has been no provision for a tool that would accomplish this work. In this saw the teeth are cut straight across, and the saw operates without a set. It is taper ground from tooth edge to back and is of sufficiently wide gauge so as to cut a kerf wide enough to permit the use of an ordinary saw properly set without damage to its teeth. With the nail cutting blade comes both compass and a keyhole blade, made of silver steel and gas tempered to that particular degree essential in order to produce the best results and hold their keen cutting edges the longest possible time. Any of these blades are made to fit an adjustable handle, which is operated by a thumb lever. The blades can thus be used in the regular way or made to operate at any angle or even reversed, if desired. It can readily be seen that the operator by the use of this tool may reach almost any spot desired and after starting the kerf with either of the small blades, may insert the metal cutting blade, this being made narrow on the point with that end in view. The nail can then be cut, after which the metal cutting blade can be withdrawn and an ordinary blade substituted. The nest of saws (known as No. 3) is already in the hands of most of the large dealers, or can be secured through the home office at Indianapolis, or at any of the ten Atkins branches at Atlanta, Chicago, Memphis, Minneapolis, New Orleans, New York City, Portland, Seattle, San Francisco and Toronto, Canada.

SOCKET BUTT CHISELS.

L. & I. J. White Co., Buffalo, N. Y., with New York office at No. 45 Centre Street, are the makers of the Socket Butt Chisels of which we give illustrations herewith, they having recently

SOCKET BUTT CHISELS.

added them to their line of carpenters' tools. They are manufactured in both plain and bevel edge and in all sizes from $\frac{1}{8}$ to 2 inches. They are solid cast steel, nine inches over all, and are used for fitting in butts when hanging doors.

METALLIC WALL RACKS.

The Ideal Register & Metallic Furniture Co., Detroit, Mich., are making a line of metallic wall racks. The racks have sliding hangers which fit on the metal straps to which the coat and hat hooks are attached, so that it is an easy matter to adjust them so that the screws with which they are attached to the wall will strike the studding. This is particularly desirable where they must be attached to a lath and plaster wall. The three

NO. 74.

styles shown in the accompanying cuts are made as follows: No. 74 has a $\frac{3}{4}$ inch cold rolled steel strap, 20 inches long, and four malleable iron hooks; No. 76, same as No. 74, but has six hooks on a 30-inch strap; No. 84, 2-inch cold rolled steel strap 24

NO. 84.

inches long, has four malleable iron hooks; No. 86, same as No. 84, but has 36-inch strap with six hooks; No. 94, 2-inch cold rolled steel strap 24 inches long, with four malleable iron hooks connected by two 3-16 inch Bessemer steel rods; No. 96, same as No. 94, but has 36-inch strap with six hooks. All styles are

NO. 94.

burnished in oxydized copper or nickel finish. The racks may be used in the hall to supplement the ordinary hall rack, or they may be placed in toilet rooms and large closets. The racks are mentioned as being very moderate in price and easy to put in position.

THE CYCLONE SEED SOWER.

The Cyclone Seeder Co., Urbana, Ind., are the manufacturers of the Cyclone Seed Sower, which has been long before the trade

THE CYCLONE SEED SOWER.

as a convenient, practical and an all around first-class grain and grass seeder that will meet the most exacting demands. It differs materially and very advantageously from all other sowers in

having a slope feed board with an oblong hopper which terminates in a metal edge on which edge oscillates a feed plate which does not allow the seed to become clogged, but makes a positive force feed and insures a uniform flow and even distribution of seed. The machine is supplied with their recently patented interlock, double flange, non-solder joint distributing wheel and a self-acting feed adjustment so that seed can be let on or shut off instantly. The right side of sower is concave in shape and rests nicely against the body just above the hip. The crank being above the distributing wheel brings both hands to nearly a level and gives the operator the easiest position possible with left hand resting naturally in place to open or close feed instantly. The frame parts are made from well seasoned yellow poplar and the curved parts from tough sycamore. The machine is neatly finished and nicely painted, has a large heavy duck hopper and is specially recommended by the makers when a sower is wanted for sowing grain, as well as grass seed.

SILVER BLADE CREAM AND EGG WHIP.

J. S. Dunlap, Nos. 39-45 West Randolph Street, Chicago, is the manufacturer of the Silver Blade Cream and Egg Whip, of which we give an illustration herewith. The No. 2 size, which, when a pint or more is to be whipped, the manufacturer strongly recommends, has a perforated blade of flexible silver and con-

SILVER BLADE CREAM AND EGG WHIP.

tains more than a yard of cutting edge when in motion, and cuts, rather than beats the cream without spattering it or producing fatigue to the muscles. It is further stated that a half pint of ordinary cream can be perfectly whipped in less than one minute, if the cream and bowl are cold. When the whipping is finished the whipped cream, etc., is instantly slipped off the blade by a sudden movement over the bowl, a few seconds sufficing for washing the whip.

FRUIT JAR TOP STRAIGHTENER AND TRUER.

The Home Supply Mfg. Co., Rockford, Ill., are placing upon the market the Fruit Jar Top Straightener and Truer which we illustrate herewith. The device is shown in the cut on the right

FRUIT JAR TOP STRAIGHTENER AND TRUER.

hand, while the manner in which it is used is readily elucidated from the rest of the cut. In its construction the circular portion of the device is cast and the revolving handle is stamped from steel. It is designed to straighten the lower edge of

flanges of fruit jar tops, many of which become bent or are made uneven by the careless manner of their use, although quite a number suffer from bad packing, which this simple device can be relied on to straighten and make as good as ever. The saving of a single jar of fruit is referred to by the makers as paying for the straightener.

THE PILGRIM STEP LADDER.

The Maine Wood Novelty Co., No. 104 Reade street, New York, are the manufacturers of the Pilgrim Step Ladder, which is illustrated herewith, and represents a ladder for which there has long been a specified demand; the trade requiring in addition to the other styles now on the market a step ladder which at a medium price possesses great strength and yet not too heavy

THE PILGRIM STEP LADDER.

for ordinary use. Electricians, painters and carpenters have wanted just such a ladder for all purposes where strength and rigidity are required. The Pilgrim is made of clear Kennebec spruce, with a steel right angle brace riveted down through the ends of each step and through the sides on steel burrs countersunk, making a perfectly stiff ladder for any use. It has wrought iron hinges riveted on, and is braced on the back by extra strong triangle back legs, as shown in the cut, and is provided with an independent pail rest. They come in all sizes, from 2 to 12 feet, weighing about 3 pounds per foot.

STEEL BARN DOOR LATCH.

Falkenhainer & Co., 313 Carr Street, St. Louis, Mo., are the manufacturers of the Steel Barn Door Latch, which we illustrate herewith. This is a latch the action of which is positive

STEEL BARN DOOR LATCH.

and direct. Slightly lifting the handle on either side of the door opens it, and whether opening the door from the outside or closing from the inside there is no strain whatever upon the screws.

The connecting bolt passes through the outer handle and screws into the inside handle, which is fitted with a jamb-nut on the inside, avoiding all danger of the thread giving away by the hardest kind of a pull with either hand. By this arrangement you apply the pressure against the door, whether pulling it open or shut. The latch is easily and quickly applied, a bit and brace and screw-driver being all the tools required. The manufacturers furnish a connecting bolt, which makes the latch adjustable to doors from $\frac{3}{4}$ to $1\frac{1}{2}$ inches thick. Should the door be lighter or heavier simply use a shorter or longer bolt. They are finished with a coat of durable black japan. The latches are packed with all the necessary screws, and they are put up in neat and convenient shelf boxes, properly labeled, each box containing one dozen latches complete. The latches are referred to as being correctly made, all holes being punched true, and all parts fitting perfectly smooth.

THE "IRISH MAIL."

Hill-Standard Mfg. Co., Anderson, Ind., are the manufacturers of the "Irish Mail," an improved boys' wagon, advertisement of which appears in our columns. It is illustrated in the cut herewith. It is claimed to be built in a durable manner, and to stand a most extraordinary amount of knocking about. Its construction is as follows: The front axle is $\frac{9}{16}$ square steel, with bearings machine-turned and fitted to insure easy running. The back axle is $\frac{5}{8}$ cold-rolled steel turned and fitted. The wood-

THE "IRISH MAIL."

work of the machine is hickory. It is claimed to have a greater tension than steel, and is sanded to give a smooth finish. Its finish is exceedingly attractive. The reaches, or long parallel bars, and handles are painted with two prime coats of red and one finish coat; the seat with two prime coats of green and one finish coat. The whole machine is then neatly stenciled and transferred with catchy designs. Then the machine is given two coats of varnish. The running gears of the machine are painted jet black. The wheels are tinned, giving them a light silver color. Attention is called to the fact that the variety of colors used on the machine gives it a very neat and attractive appearance. The wheels have extra heavy spokes and hubs, and are made of the very best material. The front wheels are 8 inches in diameter, with 12 spokes. The back wheels are 12 inches in diameter, with 16 spokes. The rubber tires are $\frac{1}{2}$ inch, made from the best grade of rubber, free from grit, and thoroughly vulcanized. The lever is connected to the large gear, which works on the small gear on the rear axle. This gearing gives the car increased speed with less energy. Only one wheel is secured to the rear axle. This wheel is the driving wheel of the machine, and is constructed in this way so that one wheel will be able to keep pace with the other in turning corners. In fact, this feature is on the same principle as the differential gear on an automobile. The car is started by placing the feet on the front axle. This is claimed to be very simple and without danger of the child getting his feet caught. The manufacturers claim to have no frail steering gears such as are often seen in vehicles of a similar character. By the addition of a detachable lever, which is furnished when required, every car is a single as well as a double car. The detachable lever can be attached to any "Irish Mail" by inserting two bolts. This is very easy and simple, and a child can adjust it. By ordering a detachable lever, a complete car is then furnished.

WOLF STEAM AND AIR DRILL COUPLING.

Boston Woven Hose & Rubber Co., Cambridge, Mass., have lately improved their Wolf Coupling, perspective and sectional views of which are given herewith. It is strong, heavy and designed to stand the roughest usage. The clamps are made of malleable iron, the bolts of best Swedish iron and the rest of the coupling of brass. By referring to Fig. 1, it will be observed

WOLF STEAM AND AIR DRILL COUPLING.

that the beveled piece is hinged on two ears or lugs. These are cast directly on to the tail of the coupling, making the beveled piece stationary and doing away with any lateral movement. Heretofore these beveled pieces were attached to a round collar and there was some slight likelihood of their slipping sideways.

SECTIONAL VIEW.

Fig. 2 shows the clamps and wedge-shaped pieces, the latter serving the double purpose of pressing the hose firmly against the tail of the coupling, and of holding it to prevent it from blowing out. Tightening the bolts produces a uniform pressure around the entire circumference of the hose, so that the joint is said not to leak under any circumstances. It is also said that the coupling may be easily attached by anyone with the aid of a wrench, having nothing complicated in its construction and requiring no special tools.

THE CLEVELAND LAWN WEEDER.

The Cleveland Lawn Weeder Co., No. 97 Public Square, Cleveland, Ohio, are the manufacturers of this useful little implement which has been for some time before the trade and won a deserved popularity. The construction of it is graphically illustrated in the accompanying cut. The curved edge of blade,

THE CLEVELAND LAWN WEEDER.

which is shown, enters the soil and loosens it, when pressure upon the lever causes the toothed jaw to grasp the plant, when a slight pull is sufficient to dislodge the weed without disturbing the surrounding sod. It was awarded a silver medal for its acknowledged utility at the Universal Exposition at St. Louis.

MRS. HUTCHINS' STRAINER SPOON.

The C. K. Hutchins Co., Buffalo, N. Y., manufacture the useful Hardware specialty which we illustrate in the accompanying cut. Fig. 1. It consists of a spoon constructed of steel and then retinned with pure metal, and having an ebonized handle, and brass wire gauze strainer placed in the bowl, forming an extremely

handy kitchen utensil for skimming jelly or soup, or for poaching eggs or whipping cream; thus providing all the uses of a strainer or skimmer with all the convenience of a spoon. It

arms are all made of black walnut, the walnut of which is air-seasoned and dried in sheds from two to four years, then kiln-dried before going into the wood shops. In Fig. 1 we show the

MRS. HUTCHINS' STRAINER SPOON.

measures 12 inches in length, and they are put up three dozen in box, in a very attractive manner for sales to be made, as shown in cut, Fig. 2, which may be placed on counter or case to attract the attention they deserve.

FIG. 2.

They also manufacture a folding "Model" set, consisting of Coat Hanger and Trouser or Skirt Hanger, that has the perfect shoulder shape so much called for by the trade, and which is illustrated in the cut herewith. They are thoroughly made

THE "MODEL" SET.

of steel and steel wire beautifully nickel-plated and especially durable. Packed one dozen in a box. The name of the dealer can be added to the trouser or skirt hanger at a cost of \$1 per gross extra.

MARLIN BABY REPEATING RIFLE MODEL 18.

The Marlin Firearms Co., New Haven, Conn., are calling the attention of the trade to the New Marlin Baby Repeating Rifle. The barrels are made of the first quality open-hearth gun-barrel

BREECH MECHANISM OF MODEL 18.

steel, having a tensile strength of from 60,000 to 80,000 pounds to the square inch, every billet being thoroughly welded and hammered before rolling, and each bar is finished by planishing. The

working parts of the rifle. The breech mechanism consists of two pieces only, the breech bolt and the locking bolt. The locking bolt is pivoted in the breech bolt in such a manner that while the rear part of the locking bolt is up within the breech bolt while the action is open, this portion of the locking bolt drops down against a section of the frame just as soon as the action is closed. The locking bolt and firing-pin are so adjusted that it is impossible for the cartridge to be exploded by the firing-pin until the cartridge is in the chamber and the action fully closed and locked. The action can only be opened when the firing-pin is forward. This rifle is made on the well-known solid top and side ejecting principle used by them on all their arms since 1889. Their breech bolt closes the opening flush with the outside of the frame. This construction is patented, and it can be had only on the Marlin. The Marlin Baby Repeaters are all chambered to take both the .22 short and the .22 long-rifle cartridges, but the rifles as sent out will handle only the .22 short cartridges through the magazine and carrier. When the purchaser wishes to use the .22 long-rifle cartridges, he can send to the dealer or the factory for an extra carrier for the .22 long rifle cartridge only, which will interchange with the carrier for shorts in his rifle. These carriers may be interchanged at will in a moment's time without tools. In Fig. 2 we illustrate the rifle with a 20-inch round barrel, weight about 3 pounds, 11 ounces, the catalogue price of which is \$12.50. They make the same with 20-inch octagon barrel, the catalogue price of which is \$13. Extra carriers complete, each, \$2. Barrels can be furnished 20 inches long only. Capacity of magazine 14 .22 short cartridges with one in the chamber, giving 15 shots without re-loading. The frames are blued. The butt-plates are steel, blued finish. No other style can be furnished.

THE ROYAL BLUE WASHER.

The H. F. Brammer Manufacturing Co., Davenport, Iowa, after an experience of thirty years in the Washer business, are placing before the trade the Royal Blue Washer, which is claimed to embody all the improvements which would naturally spring from an association with this class of manufactures for so long a time. The tub of the Royal Blue Washer is made of selected kiln-dried, Louisiana cypress, with legs solid with the tub and well braced; the inside surface is corrugated, similar to a washboard, thus affording the greatest possible amount of rubbing surface. The lid is made of two thicknesses of lumber, screwed together to prevent warping and is steam tight. The dasher block is made of hard wood; the dasher of iron and heavily galvanized. The gearing is made from the best grey iron and steel

MARLIN BABY REPEATING RIFLE MODEL 18.

boring, rifling, chambering and inside barrel finish are claimed to be all up to the old Ballard standard, which they have made for over thirty years. The frames are drop-forged from the best quality open-hearth gun-frame steel. The buttstocks and fore-

and will run forward or backward with perfect ease and is always in gear. It reverses automatically. Is finished in the natural color of the wood with the castings and hoops painted a Royal Blue enamel.

OUR CANADIAN LETTER

(By Our Special Correspondent.)

TORONTO, JUNE 5, 1906.

The Spring season just closed has been one of the most prosperous seasons in the history of the trade in Canada. Building has been pushed rapidly in all parts of the Dominion, the mild Winter and early Spring allowing a large amount of work to be gotten under way much earlier than usual. Consequently the total of the building permits issued so far exceeds by from one-third to one-half the record amount of last year. The local factories are all working to their fullest capacity with enlargements under way in many cases, and new ones springing up constantly, particularly in points of vantage in order to supply the Western trade. In the shovel industry, for instance, the trade has been in the control of a combination which made an annual payment to the shovel interests of the United States in return for the latter keeping out of the Canadian market. Last year, however, two new shovel factories were built in Ontario, one at Hamilton and the other at Peterboro, and these are busy working this year to supply a demand which could hardly have been handled by the factories of the old combination. Very few English shovels are imported. The wonderful railway development going on in Northern and Western Canada is responsible for much of the activity, while the rich mineral discoveries in the cobalt district in New Ontario has been the incentive inspiring the establishment of fully a score of new Hardware stores. In this district the Ontario Government is pushing its railway northward with the intention of establishing communication with Hudson's Bay. North of the Height of Land a couple of hundred miles north of Lakes Huron and Superior there is a vast clay belt of land with a similar soil and climate to Manitoba and within the next few years it is certain that a large migration will take place to this virgin district where fruits and vegetables can be grown, it is said, with no more danger of frost than in older Ontario. The wonderful railway development of Manitoba and the Northwest Provinces is well-known to all Americans because of the thousands who are disposing of their interests in the Middle and Northwestern States to locate in this modern Eldorado where blizzards and cyclones are practically unknown and where the famous No. 1 hard Manitoba wheat grows in abundance. But still farther West in British Columbia there is also extensive opening up work of new territory and in addition to the three Canadian transcontinental lines already constructed, or in course of construction, Jim Hill is planning to again take part in the development of the Western portion of his native land and has been making a triumphal tour of the region between Winnipeg and Vancouver where it is proposed that his railway line will traverse. All of this expansion means much to the Canadian and American manufacturers of Hardware, the products of whose factories are used in the constructive work of development and on the shelves of the stores which follow the railroads.

NO CHANGE IN LAWS AGAINST COMBINES.

Despite strong influence and active work on the part of practically all branches of mercantile industry in Canada it has been practically decided that there will be no change in the criminal code for another year at least. The prosecution of the plumbers, tack manufacturers and the grocers' guild last Winter attracted widespread attention, most of the cases being still hung up in the courts without a decision being reached. Everything hinged upon the word "unduly," which had been quietly inserted a couple of years ago in Section 520 of the Criminal Code, naming penalties for "unduly" enhancing the prices of articles of commerce by combinations of merchants or manufacturers. The most recent decision is that the Wampole Company, a manufacturing drug concern, cannot compel a retail druggist to adhere to an agreement to sell their goods at a certain minimum price. The agreement had been drafted by the manufacturers and jobbers and retailers contracted to sell at the prices agreed upon. Now this contract plan has been declared illegal by Judge Clute, but an appeal will be entered. This decision will practically prevent the newly formed Ontario Retail Hardware and Stove Dealers' Association from arranging prices in any way except by the dealers in the smaller towns coming together, and agreeing to stop price cutting.

NEW PROCESS FOR MAKING WHITE LEAD.

What promises to be a factor in the white lead trade is a patented process of manufacture controlled by George E. Kingsley, of Toronto. Mr. Kingsley has been at work on a secret process for some years and has it now to such a state of perfection

that the production of a pure white lead direct from galena is a matter of only twenty-four hours.

The manufacture of white lead is ordinarily a long series of treatments beginning with smelting the ore into pig lead, and then casting or rolling it into thin sheets, after which it passes through the corroding period and is made ready for market in from seven to eleven weeks.

The new process is by precipitation, and the finished product is an amorphous hydrocarbonate of lead (white lead), which in appearance has that pure whiteness so much desired. Other features claimed for the new process are a complete saving of all by-products, and a reclaiming of the solvents used in the treatment, which make the process an economical one.

A five-ton plant was in operation in England last year and produced a white lead said to be of a very high grade in covering capacity. A similar plant will be in operation shortly in Toronto. Machinery and appliances for a fifty-ton plant are now being made.

Galena, from which lead is made, is found in large quantities in Northern Ontario, and blende, or blackjack, a zinc ore which has also been successfully treated by the same process, is found in many places in Eastern Ontario and Quebec.

NEWS OF THE TRADE.

T. B. Lee has retired from the general managership of Rice, Lewis & Son, Toronto, and has gone on a trip to Europe. A. Burdette Lee, the president of the company, has succeeded his cousin as manager.

The Sherwin-Williams Company have under construction a \$20,000 addition to their factory at Montreal.

The Crandell Cutlery Company, Bradford, Pa., are asking for concessions from the city of London with a view to establishing a branch factory in Canada.

P. M. Carter, general manager of the Carter White Lead Company of Canada, has returned to Omaha, being succeeded as manager by J. B. Bell, formerly Canadian representative of the National Lead Company.

The S. F. Bowser Company, Fort Wayne, Ind., who have had a branch of their oil tank and pump system business in Toronto for some time, have purchased a site and will erect a large factory.

The Western Hardware Company, Regina, Assn., whose large store and warehouses were destroyed by fire in May, will immediately rebuild.

Munderloh & Company, Montreal, are to erect a new building for the manufacture of electrical supplies.

The Winnipeg Paint & Glass Company are to erect a large warehouse at Calgary, Alberta.

Charles Dietrich, of Shurley & Dietrich, saw manufacturers, Galt, has as a souvenir of the San Francisco earthquake the key of his room at the St. Francis Hotel.

The Merrick-Anderson Company, wholesale Hardware merchants, Winnipeg, have been incorporated as a limited liability joint stock company with a capitalization of \$500,000.

Shurley & Dietrich, Galt, are enlarging their new factory.

The Taylor-Forbes Company, Guelph, the largest manufacturers of Hardware and heating goods in Canada, are enlarging their plant and have secured larger and better sample and warerooms for their branch at Montreal.

O. M. Hodson, organizer of the Ontario Retail Hardware Association, has been appointed Toronto representative of the H. R. Ives Company, Montreal, who recently disposed of all their Hardware foundry patterns to the Taylor-Forbes Company, but who still make iron beds, hot water boilers, etc.

The Forbes Hardware Company, Vancouver, have been succeeded in business by the Forbes and Van Horn Company.

The Canada Paint Company are to enlarge their Winnipeg factory.

The Rapid Tool Company, Peterboro, are to undertake the manufacture of the Caldwell lightning auger bit in Canada and their factory will have a capacity of 1,000 per day.

NEW YORK METAL CEILING CO.

The New York Metal Ceiling Co., Nos. 537-541 West Twenty-fourth Street, New York, have decided to double the size of their plant. About sixteen years ago this business was started on a very modest scale, and has outgrown the 30,000 square feet of floor space now occupied. The company has increased its capital by the issue of \$200,000 of 8 per cent. preferred stock.

NO WONDER IT'S POPULAR.

One of the most attractive hangers, showing the finish of a fine piece of lithography, is the latest emanation from the advertising studio of the J. Stevens Arms & Tool Co., 460 Main street, Chicopee Falls, Mass. This beautiful hanger, which is well presented in the accompanying illustration, measures 15 by 20 inches and is printed in ten colors from a masterpiece painted by a

well-known artist. It is artistically executed, and would be an ornament to any wall, adding to the attractiveness of a sportsman's den, or could be placed to advantage in a local club room. With a liberality worthy of praise these hangers are furnished gratuitously to the Hardware and Sporting Goods trade, while the general public can obtain them by sending six cents in stamps. On the principle of "helping the dealer" sell the goods, this kind of advertising is appreciated by the dealer who knows the advantage of ornamenting his windows with something so attractive. Send for one.—Do it now.

THE AMERICAN CAN COMPANY.

The American Can Company, having outgrown their spacious offices on the seventh and eighth floors of the Bowling Green Building, removed on May 1st to their new eight-story steel frame fire-proof office and manufacturing building at No. 447 West Fourteenth Street, New York City.

This structure, fronting on Fourteenth Street, and extending through the block to Fifteenth Street, is the largest building in the country devoted exclusively to the manufacture of tin cans.

The basement and five floors are devoted to manufacturing. On the three upper floors are located the Executive and General Offices; also those of the Atlantic Sales District. The offices of the Central Sales District are located in Chicago, and those of the Pacific Sales District in San Francisco.

In addition to these District Offices, the company maintains twenty local and sales offices and thirty-nine factories, located at advantageous shipping points throughout the country. At twenty-three of these factories special attention is given to the manufacture of special cans used by meat, lard and fish packers, manufacturing druggists, paint and varnish manufacturers, and all others using a tin package. These "Specialty Factories" are located at

Lubec, Me.
Boston, Mass.
New York City (3)
Newark, N. J.
Philadelphia, Pa.
Baltimore, Md.
Richmond, Va.
Atlanta, Ga.
New Orleans, La.
Savannah, Ga.
Cleveland, Ohio

Hamilton, Ohio
Toledo, Ohio
Detroit, Mich.
Maywood, Ill.
Chicago, Ill. (3)
St. Paul, Minn.
Davenport, Iowa
St. Louis, Mo.
Kansas City, Mo.
San Francisco, Cal.
Portland, Ore.

Bellingham, Wash.

These factories, being so widely distributed, you are assured of a sure source of supply, as the disabling of one factory does not interfere with deliveries from the remaining twenty-two. Another great advantage is the saving in freight because of the nearness of their delivery point to your factory.

The American Can Company is now better able than ever to handle with despatch orders for any style of tin cans demanded by the various industries throughout the country using a tin package.

OLD BILL MILLER.

E. C. ATKINS COMPANY'S VETERAN SAW MAKER.

A man of seventy whose muscles have been his stock in trade in exchange for life, peace, happiness and health, is still working at hard labor with the E. C. Atkins Company of saw manufacturers.

Although so old a man, he still has muscles as strong as most young men, reminding one of the pictures of the warriors of old with their gray hair and stern visage. He has a clear mind, an enthusiasm for his work as keen as the youthful apprentice, and an earnestness born of long years of faithful service.

The secret of the success of Mr. Miller's life is his joy in doing good work. And he has done good work and has shown himself a peer among his fellow craftsmen. It is something to have given saws the brightest polish ever known in the history of the world. That is a fond memory with Mr. Miller. He likes to tell of the development of the Atkins Company from a small industry to its present great magnitude. He likes to tell of his early connections with the business and the founder of the company who worked side by side with him, of the problems they confronted and worked out together and their ultimate triumph over hard obstacles.

AN INDUSTRY'S DEVELOPMENT.

"I began holding circular saws for Mr. Atkins in 1864. The place then was a little one-story building across the alley there."

The old man moved toward the door to catch some fresh air, smiled at the pleasant memory of his former employer.

"Atkins worked alongside me part of the time and was also his own bookkeeper. He had a desk and a stool to sit on in one corner of the room and that was about all there was to the business department.

"Atkins had a temper as fine as the saws the firm manufacture and a character as true as the steel they are made of. Most of the time he was in the best of humor, but sometimes he would get mad and fire a man for something, but he would be just as quick to hire him over again the next day.

"He worked right with me many a day and always wanted to make every saw the best possible. He was ambitious to turn out a grade of goods no one could duplicate. His prizes I helped him win show the results of his honest efforts."

HARD WORK.

"How did you like the work when you first began?" was asked.

"I wanted to quit the first day," replied the old man with a smile, "and the second day I thought I'd have to. Mr. Atkins told me to stay. I was so sore I couldn't eat. He begged me to stay and told me I would be all right after a few days. He explained that I was young and strong and that in three or four days I would be all right. He worked with me and after five days I felt fine. The stiffness and soreness had left my muscles and the work soon seemed like play to me. I felt like a fighting cock.

"My health was better than it had ever been in my life. There is nothing like work with the muscles to give a man an appetite. I have seldom been sick, although I am seventy years old. I polished saws day and night for two months for exhibition at the Chicago World's Fair and that was too much for me and I was laid up a while.

PRIDE IN EFFORTS.

The mention of his participation in the manufacture of prize-winning saws caused Mr. Miller to warm with enthusiasm as he told of his work on those self-same saws which were wonders in their department in those great exhibitions where the craftsmen of nations vied with each other for supremacy in workmanship.

When asked whether, if he had it all to do over, he would pursue the same course he has in the past and engage in the same work, the old man replied: "No, I believe I would go on a farm. Lots of people do not know what it means to have the fresh outdoors."

The ceaseless clang of hammers, the stubborn steel in the hands of honest toilers smeared with the regalia of black and dirt, which proclaimed them heroes as well as would have scars of hard-fought battles, the apparent monotony of the turmoil and whiz of machinery, gave ample cause for a desire for the outdoors, after the labors of forty-one years, and proclaimed a sacrifice to humanity deserving of the laurels of highest praise.

STRONG BOXES A NECESSITY.

The English commercial agent at Durban, South Africa, again calls attention to the importance of carefully packing goods sent to South Africa. In Natal, as well as in other South African colonies, large quantities of imported goods have still to be conveyed by ox wagons, and great losses are suffered through improper packing. For packages going to the country per wagon as many as possible should not exceed 200 pounds each, and in no case should a package exceed 450 pounds in weight—that is, for mixed goods. The transshipment and rough handling require strong boxes.

"THE RETAIL MAIL ORDER PROBLEM."

Butler Bros., New York, Chicago and St. Louis, have issued a booklet on "The Retail Mail Order Problem" that treats the subject so exhaustively it deserves to be read by every retailer in the trade, for in every page will be found the right kind of ammunition to do good service, as they truly say among the first words in which they introduce the book to the reader: "If you are willing to cut away wornout prejudices, ready to avail yourself of modern means for curing present troubles, and prepared to labor as hard and to wait as long for a cure as your own particular case may require—then there is a message in this booklet for you. For the competition of retail mail order houses can be overcome by you—right where you are—not as easily as ten years ago, but far more easily now than ten years hence."

In the 120 pages which follow consistently in their line of argument, they demonstrate conclusively the force of what they urge "to help the local retailer to a new and less disheartening view of the retail mail order house; to persuade him of his personal ability to solve his personal retail mail order problem; to provide plenty of definite practical things to do—in a variety representative enough to suggest many more definite practical things to do."

In the 23 chapters into which this broadside of argument is divided will be found cogently expressed the material they announce they have been three years in collecting. The short, pithy paragraphs with which the booklet is filled make it very interesting reading to the dealer into whose hands it is placed, in every one of which may be seen the controlling thought that provides the thread of the discourse, so convincing to read, so easy to digest. The numerous side-heads are printed in red which add to the readable character of the book and assist the interest which the contents inspire.

The intense interest taken in the problem presented may be judged by the fact that the first edition of the booklet, consisting of 25,000, was wholly exhausted by the advance requests for the book; and the second edition of 25,000 is nearly exhausted, so that those who have not seen it will need be rapid in requesting it ere they are entirely gone. In separating the goods that are more readily disposed of by mail order methods, it is shown that goods which in retail stores stand upon the floor, instead of being exhibited in less conspicuous places, are the most sought after by catalogue houses, and more easily sold. This includes bicycles, vehicles, implements, sewing machines, furniture, refrigerators, stoves, baby carriages, sets of china and other crockery, etc. The things which they refer to as being hard to retail by mail are: "Popular-priced goods of all sorts. The sales of the retail mail order houses are not large enough to help themselves, nor to hurt retailers very much." It is noticeable that when the mail order house embarks in manufacturing, it is almost invariably the case it is of a bulky nature.

We convey to our readers a good sample of the characteristic contents of the booklet by transcribing the following from Chapter X, giving an idea of the helpful character of its pages:

SURPLUS STOCK.

Surplus stock, remember, swells investment and shrinks sales. It ties up capital, causing not only the loss of interest on investment, depreciation in the value of goods, insurance and storage charges, but also the additional and much greater loss of profits that might have been made on sales of other things bought with the money unnecessarily tied up.

Surplus stock not only reduces one's working capital but it stops the compounding of profit which comes from turning investment over and over again.

Turn the surplus of any stock into cash, even though loss be taken, and invest the proceeds in no more of another line than will serve to supply the demand until a fresh lot can be obtained—that is one disposition of surplus stock which will help to keep profits above the point of fixed expense.

Action based upon that fact has contributed to the largest department store successes in the big cities, the successes that have been achieved in smaller towns all over the country, and the successes in the mail order field.

WORTH WHILE EFFORT.

Of course this way of merchandising means effort, and effort applied in the right direction. But you are certainly willing to make the necessary effort when all over the country are merchants who have proved The Butler Way of variety to be profitable while also effective in the solution of the retail mail order problem?

Don't let old time ideas of what is proper or not proper, in this or that store, keep you from securing and maintaining that variety which is so essential in making yours the up to date store with which to solve your personal retail mail order problem.

Look around you. Are you not likely soon to be alone in your town in observing the exclusive "right" of some other merchant to sell this or that item of merchandise?

Note what this or that merchant chooses to handle as part of his line. Would any two merchants be likely to agree wholly as to what is or what is not "properly" included in the line of any particular store? Would all the other merchants of your town even agree that everything you now carry is "properly" included in your own stock?

Why waste time in complaints about the tendency toward variety in the stocks of all stores—or even in airing opinions that business is merciless in its demands to-day.

Everything has its compensations—the fiercer the competition, the more business for everybody. Have you not been too slow in taking up and pushing new lines of goods, even some that properly belong in your store? Have you paid constant attention to the little things?

For example, you know that men have grown rich in selling nothing but five and ten cent goods. Yet have you a 5 and 10 cent department in your store that is worthy of even a passing glance?

Why complain that other merchants are "improperly" adding your lines while you do not even keep the lines you have in a condition that meets the demands of your trade to-day?

A WASTE OF ENERGY

Do you see any space wasted in retail mail order catalogues... complaints that their customers want the "wrong" things and the "wrong" way of serving them?

Can you afford the waste of energy in opposition, active or passive, to trade tendencies as they are?

BE WILLING TO PROFIT

Cultivate your willingness to make variety a distinguishing characteristic of your merchandising, clear up to the point where you stand willing to add—at least in your bargain department—any kind of legitimate merchandise the moment you are convinced that there is profit for you in so doing.

Begin the process by taking your present stock and arranging it in departments. Start simple records of results that will enable you to know what stock is really necessary for each department, and also to know how well one department pays in comparison with another.

In departmentizing your stock, you will have brought to notice the many goods that should have been sold long ago. Sell them. You can—for there is a price at which everything will sell.

Take the money thus realized and invest it in other goods different from those you have but still goods that you think will be appropriate in your store.

Make each investment in the new line no greater than is needed to supply a limited demand until you can get another lot of goods.

LET RESULTS GUIDE YOU

Every time let the results in each added line determine whether that line shall or shall not be continued. And be guided, too, by those results in deciding on new lines to be added.

Thus, eventually, you will have added every line that seems to you "proper" in your store. By that time you will have personal knowledge of the advantages of the many-line over the single-line store to guide you in deciding whether you will or will not go farther towards making yours a department store.

Then it would be well to ask yourself again the question which you should ask now—Is there any good reason why I would not be proper for me to sell any kind of goods I want to sell?

A SALABLE LINE FOR WIDE AWAKE DEALERS.

The successful Hardware dealer of to-day must carry in stock something more than Hardware in the ordinary acceptance of the word. During recent years a very profitable line to seek the Hardware merchant is Fencing. We do not refer at this time to the ordinary woven wire fence sold to farmers, but to the light, graceful and attractive fences of steel sold for enclosing residences, parks, cemeteries and other finished grounds. Nothing sets off a residence like a good first-class modern fence. A very attractive line of these goods is advertised in this issue by the Ward Fence Company of Portland, Ind. These people make a very large and varied line of fencing, all of which they sell to the trade at prices which give the dealer a better than ordinary profit. These are not goods that have to be carried in stock. They can be shown from the catalogue and orders taken and sent in to the factory as sales are made. All that a dealer needs is to keep a copy of the catalogue and price list where it

**THE WARD FENCE.**

can be referred to at a moment's notice. The manufacturers are large advertisers and always co-operate with their trade. Inquiries are referred to their nearest customer. They also furnish a generous amount of printed matter and aid otherwise by every means possible to build up the business through their dealers. Any merchant who is not now carrying a line of fence will do well to correspond with these people and those who already have a line will find it advantageous to write the Ward Fence Company and get their prices.

DIFFERENCE IN THE METHODS EMPLOYED IN SEEKING A MARKET FOR OUR GOODS IN MEXICO.

Consul J. A. LeRoy, of Durango, furnishes an interesting report on the American method of extending trade in Mexico. Among other things he says:

American methods of putting their goods before the buyers in Mexico are, speaking generally, not so effective nor in the long run so economical as those of European selling nations, especially Germany. It is perhaps natural that a traveling man who is sent all the way from Germany to America should come better equipped with samples, with knowledge of the language, and understanding of its business wants and methods than the average traveler from the United States who simply "runs across the border" to see if perchance he can "pick up" a little business for his firm.

But it is hardly creditable to American enterprise that exporting firms which have already established lines of trade with Mexico should so commonly send on tours through this country men who may know everything about their lines of goods, but who do not know Spanish (sometimes not at all, often in a fashion that only invites ridicule), and do not know or care to learn the business methods of the country. Such men, striking Durango for instance, can go only to those German or other foreign houses where there is a buyer who speaks English (and the Germans are almost invariably linguists). He must follow, in other words, simply the established lines of trade; he can not go outside of those lines, to work up new demands in other quarters, often enough among the smaller dealers whose establishments he affects to despise. And through lack of the language and of the intercourse which he might have while in the country, he is unable to see Mexico except through the eyes of the foreigners with whom he talks; his imagination and understanding of trade possibilities are not awakened, and he gains no new ideas of value for the benefit of his home office. Cheap traveling men, who can pick up orders in a brisk and breezy fashion in the West and Southwest of our own country, are not the men who may be expected to do business in Mexico. The professional "hustler" is quite apt to be of no use down here. Men of education and culture, with gentlemanly manners, and a knowledge of the language, its people, and their customs, are the sort of traveling men American firms need, not only for this country, but for all Spanish America; they can be found, usually in these very countries, and they are worth extraordinary prices.

KNOWLEDGE OF SPANISH ESSENTIAL.

The flood of American catalogues and circulars that is poured into this country does comparatively little good. In any event, there are but few lines where catalogues in English will be of help. And in those cases where catalogues and circulars are sent out in Spanish, the effect is quite often worse than if they were in English, owing to the ludicrous Spanish into which they are put. Not every graduate of a two months' course in a language "academy" in our cities, or every whilom sojourner in the Philippines, Mexico, or South America is necessarily equipped to make real translations into Spanish of matter that is in large part technical, and which, moreover, often describes new ideas or methods, the phraseology of which is unknown to the Spanish-American readers, and therefore needs to be put in a careful and even roundabout Spanish version. The amount of bad and laughable Spanish that is printed in the United States and mailed about the countries to the southward is vexing and oftentimes amusing. Where it does not excite ridicule it offends the ideas of polite correspondence, through being merely a transliteration of the rather curt English sentences and forms, instead of a rendering into the elegance and courtesy of Spanish phrases. Some of our export associations of more or less doubtful standing are among the chief offenders in this respect. Good translators into Spanish from English are most commonly Spaniards or Spanish-Americans themselves who have a first-class knowledge of English. They are more often good translators into the Spanish than are men whose language is English, but who have learned Spanish, even though quite fluent in speaking it. In any event, the really good translator is the exception, and he is worth hunting up and worth high wages when he is found.

MOTOR TRADE.

GREAT BRITAIN THE GREATEST PRODUCER.

Consul Frank W. Mahan, of Nottingham, furnishes the following on the cycle and motor-car trade of Great Britain:

So far this year the cycle and motor-car trade of Great Britain is fully up to the high-water mark of 1905. This is especially true of the cycle trade, which last year, emerged from a period of depression and at a bound reached prosperity. It is quite impossible to get accurate figures of output, values, and the like in the cycle industry. The last effort made by this consulate in the direction of a local factory was rudely repulsed, owing to an alleged belief that the inquiry was made at the direct instance of American cycle makers seeking a market in England.

But sufficient information is obtainable to place the output of cycles in this country in 1905 at about 600,000 machines, of which about 48,000 were exported. The number imported is not learned, but it was relatively small.

Well-informed judgment places the United Kingdom in the van of all countries as a cycle producer; or, at least, as the most independent of all, in having practically absolute control of its home market. There is probably no British trade of equal magnitude in which foreign competition now troubles this country less.

LOW-PRICED MACHINES POPULAR.

The great cycle output of last year is attributed to the new policy of low-priced machines. The \$40 to \$60 cycles were generally reduced to \$30 to \$50. Up to a recent date the only cheap machines in this country were foreign imports. It is claimed that the cheap British cycles of to-day are much superior to those of foreign make at the same prices. Last year only 2,345 cycles were imported, of which the average value is given as £6 4s. From this comparison it is deduced that Great Britain need fear nothing from outside competition.

While the home consumption of cycles in 1905 was unusually large—over 550,000—an even larger consumption is expected this year. All factories have prepared for an increased output, and manufacturing was so active during the past winter that the accumulated stock now ready for instant delivery is estimated at about 200,000 cycles. A great increase of exports is also expected, and this is warranted by the value of the foreign sales in January and February, which were 30 per cent. greater than those in the same months last year.

INCREASE IN MOTOR CARS.

An increased motor-car trade is also foreshadowed this year, but foreign competition is here a serious factor. About 16,000 cars were made in this country in 1905, valued at about \$20,000,000. The imports were less in number, but average value being higher, the total value was nearly the same as that of the home product. Imports have steadily increased in recent years, and have greatly increased this year so far, in comparison with 1905 and 1904. The exports last year totaled only \$2,500,000, but encouragement is found in the fact that this is an increase of over 50 per cent. in comparison with 1904 and 1903, and also in the fact that the exports in January and February of this year increased nearly 100 per cent. over those of the same months in 1905. Another hopeful aspect of the situation is that the British motor-car industry is but an infant, with boundless possibilities of growth and development before it.

Little is said of motor cycles in trade reports. They have been in scant favor lately, having so many defects which seem irremediable. Comparatively few were made in this country last year, in the absence of active demand and owing to the disposition of many owners to get rid of their machines at almost any price. The probability for the present year is not yet foreshadowed.

CREDIT MEN AND SALESMEN.

Credit men will always believe that credit men are born, and not made, and salesmen will always believe that salesmen are born and not made, but the practice or art of both is founded on a scientific foundation.

As your facts are correct, as your conclusions are warranted, so your success is measured. The gathering of these facts is a science—the use of them an art.

Hence, the science of money is the foundation of finance; book-keeping has shaped the science of accounting; transportation, advertising, insurance—all are fundamentally sciences. Science lies back of credit, as it lies back of banking, which is the highest form of credit science. Salesmanship is based on the science of self-knowledge of humanity, a knowledge of goods.

"Credit is the transfer of commodities involving the return of an equivalent at some future time," and you must be sure that you are going to get it, and that it is equivalent. The creditman, therefore, must base his calculations on the desirability of a risk on the chances of getting that return on goods or collateral at a normal valuation.

The scientific man diagnoses a credit proposition from the facts and figures of a man's past and present—not only on what he has in the way of dollars and cents, but what he has in the way of business knowledge. Does the proposed risk know his business? For incompetency ruins more men than lack of capital. He gets facts and figures on the risk's business methods such as: Is the man selling at a profit? And how does he know? For the scientific credit man understands that most cost systems are sops to conscience, and most bookkeeping the product of underpaid and overworked hopelessness.

The scientific credit man knows that business is sensitive; it goes only where it is invited, and stays only where it is well treated. He, therefore, considers the advertising, the salesmanship and the competition of his proposed risk. He considers the personality of the management, for morals are important.

He then considers the present financial worth—the present valuation in dollars and cents. The risk that passes such a scrutiny can hardly be a poor one—and no one of you will deny the legitimacy of the requirements. That no one of you applies the entire test to each new account goes hardly without saying. Too many of your propositions are based on confidence—not based on facts and figures, but on the psychological abstractions of your intuitions, or an arbitrary and blind confidence in a lot of figures called a statement.

Scientific credit will be based on a knowledge of the risk's business—what it is and what it should be—for that alone can determine the chances of receiving an equivalent at a future time.

The salesman must be taught. There are two dangers from which a salesman may suffer. Often the salesman's first object or impulse is to sell the customer all he can make him buy, and the second impulse is to make a favorable report on conditions that the order will be accepted.

The salesman needs to be shown that he gains nothing by urging his house to speculate; that it is often better to take an order for \$50 worth, instead of one for \$500; that the best way to kill competition is to let it get the bad business, all the cut-price orders.

I have met salesmen who could not demonstrate their goods; they did not know their goods. They sold on the theory of big promises; they were grafters, hot air artists. Any salesman who loads up a customer with too many goods commits a crime against his house, because an overloaded customer is a dissatisfied customer.

It does not pay to constantly make new customers—but it does pay to make old customers grow. The most valuable salesman makes his customers grow by showing judgment in catering to their needs and not to his own.

Business must be organized in every detail in these days of sharp competition. The life insurance business is to-day the most scientifically organized of all businesses. Some businesses have schools for salesmen for the express purpose of instructing them in the use and the selling of the machine or article they are to sell. This method results in the salesman having confidence in their goods. This is the scientific method, and we have the salesman as a scientific product of the school.

We realize that a salesman must be more of a credit man than he has been, and that a credit man must be more of a salesman than he has been.

The process of education can be carried on by the credit man coming into closer contact with the salesman than in the past. The time has passed when the credit man wrapped himself in his cloak of dignity, considering his position too lofty for him to associate with the selling force.

The credit man now takes the salesman into his confidence; he and the sales manager stand close together, they work with a common interest and object. In a prominent house, for instance, the credit man is empowered to offer prizes to the salesman who has the cleanest business. Each month the sales bulletin shows.

Men who had accounts placed for collection.

Men who had accounts overdue.

Men who had clean sheets.

The rivalry among the selling force produces the best kind of results in right selling and right terms.

This method produces solidarity in the force. It produces a complete unity of action. Business houses are commencing to understand that men must be handled like armies. Houses are getting better control of their selling force, because business must be handled quickly and without friction. The days of special favors are rapidly waning. Houses are getting in personal touch with their demand.

Advertising has solved the question of keeping in touch with our demand and in knowing it. We now own the man's trade for our goods. We can swing it to whom we please. Retailers want us to send it to them. Handling our goods means simply supplying the demand for them. The salesman takes the orders. The credit man picks the men whom he wants in a town. The day of a trust in Providence and second-sight reading of character for credit, and a hot air performance as salesmanship, is doomed.

The crying need of the hour is education in right methods, right systems, and a more complete comprehension of the idea that there is a to-morrow in which we wish to do business. Education has done much for us. But it may do more. Japan owes her present success to perfection of method—to unity of person; Russia owes her failure to a blind faith in mere bulk.

In business blind faith in mere bulk—bigness, capital—is not the strategy that wins the commercial battle. Knowledge—knowing how; knowing the game—will win more battles than mere money will ever win. We must educate.—E. St. Elmo Lewis in *Salesmanship*.

GOSSIP ABOUT SPOONS.

It is evident that spoons were unknown to early man, but a Scotchman has remarked they were quickly discovered when the first bowl of broth was cooked. At the epoch of hot broth in the evolution of man a spoon was found to be indispensable. As the ledle to the pot, so is the spoon to the bowl. Savages used spoons of wood, but even before the formation of a bowl Nature provided scallop-shells for the savage whose caldron smoked by the sea-shore, and those who dwelt in the forest glade found spoons at hand. All the most necessary utensils of the kitchen, remarks the *Ironmongers' Chronicle*, have their originals in the workshop of Nature; the knife is in the flint, the fork in the pronged stick, the ground is the model both of saucepan and bowl, the divided cocoanut provides a perfect cup, and the broad leaf or round piece of bark a plate. In early days spoons were only used for hot liquid, such commodities as boiled rice and semi-solid foods being eaten with sticks and forked twigs. The people of Barbary used neither knives nor forks and rarely spoons; in most cases the Oriental used a spoon for drinking purposes only. Coming down to times nearer our own, it would appear that early British silversmiths and goldsmiths made some excellent and artistic spoons, examples of which may be seen in public museums and private collections. Curiously, the spoon has been entirely neglected in heraldry, although nearly every household article of utility was pressed into the service in the construction of crests and armorial bearings.

In the Crown treasures of Great Britain there are several famous spoons, the most notable being the Coronation spoon, used for anointing the Sovereign. It is made of gold, and is a fine piece of work, an elegant arabesque pattern being engraved on the inner surface. It is of great antiquity, being known to have been used in the twelfth century. At one time spoons were constantly used for taking snuff. It has been well said that spoons are used in every function. They are with the king at his crowning, with the babe at his christening, the corpse at his burying, and the rest of the world at snuff-taking. The tea-drinkers of a century ago were very proud of their caddy spoons, and collections of old silver contain many beautiful examples of decorated tea-caddy spoons. Spoons have always been used as gifts—the christening spoon given to children, and the wood spoons to brides for good luck. Silver spoons figure conspicuously among the inventories of silver plate in the past; to-day they only take a place along with many other table appointments, so many of which are used in sterling silver or electro-plate, according to the wealth of the owners. All persons know how to drink a health or receive a toast at feasts, but the ancient custom of holding up spoons in honor of the donor of the feast is a forgotten habit.

The gift of spoons by sponsor or visitor is an old English custom still maintained, although not to the extent it was formerly. St. Paul's day, the first festival of an Apostle in the year, was often the occasion of gifts, hence the custom of giving Apostle spoons. Buyers and sellers of old silver know the value of Apostle spoons, and how their worth increases as the set preserved becomes more complete. Many persons gave one or more spoons to their godchildren, always including a spoon with the representation of the Apostle to whom the child or the donor was dedicated. Only wealthy donors gave full sets; consequently some of the less favored apostles are very rare, and spoons bearing their images now sell for exceedingly high figures.

A very scarce book on "The Spoon," of American origin, published in 1845, containing about one hundred illustrations of different types dating from the earliest times, showing the number of different patterns of spoons which had been introduced from time to time by enterprising silversmiths and leaders of fashion. In foreign countries also spoons were employed until quite recent years, but chopsticks have always been used in China for eating rice and other preparations for which Western people would require spoons.

Coming down to times when spoons were regarded as necessary table appointments, we find that certain fashions in patterns and shapes have prevailed at all periods. At the present time, when there is a revival of art and a general adoption of reproductions of all old types, it is difficult to understand how tenaciously the housekeepers of bygone days clung to the style of the period in which they lived, and even sacrificed priceless antiques in order to have their silver plate refashioned. So in the past, after the days of "seal heads" and some of the cruder patterns of spoons, "rat-tails" came into vogue. Among the more ornate patterns which have prevailed during the past century or so may be mentioned "thread," "bead," "shell," "lily," and "king's" patterns. The "fiddle" has had a longer and more extended life than most other patterns and is still very generally employed for household use.

ARKANSAS RETAIL HARDWARE ASSOCIATION

The seventh annual convention of the Arkansas Retail Hardware Association was held at Little Rock, June 5, 6 and 7. The attendance was the largest in the history of the association, and it was estimated that there were between 200 and 300 representatives of the retail Hardware business of Arkansas present, in addition to many representatives of jobbing concerns, both in Arkansas and other States.

The convention was called to order at 10 o'clock by President Thomas B. Stewart of Newport, and prayer was delivered by Rev. O. J. Wade of Little Rock. The address of welcome was delivered by George C. Naylor, editor of the *Arkansas Democrat*, and was responded to on behalf of the association by Emmett E. Mitchell of Morrilton. The report of the executive committee was made by John M. Pittman of Prescott, after which announcements on behalf of the traveling men and associate members were made by W. N. Brandon of Little Rock. This was followed by other announcements and remarks on general topics by visitors and members.

In the afternoon a closed session for members only was held. The first order of business at the afternoon session was the annual address of President Thomas B. Stewart of Newport.

SECRETARY TAYLOR'S ADDRESS.

This was followed by the annual address of Secretary and Treasurer C. E. Taylor of Little Rock. In the course of his remarks Mr. Taylor said:

"The work of our association during the year just closed has been marked by progress that has been gratifying to those who have kept in touch with it. New members have been received, old ones retained and a general associational interest has been developed that augurs well for the future of our organization.

"The traveling men who joined our organization last year as associate members under the provision made for them have been very helpful to us. They have brought in a number of members through the year, and have aided in furthering the work of the association in many ways. I am sure that every member of our convention will appreciate the truth of the statement that the traveling man is a fine individual to have loyal to you as a friend. This loyalty to the interests of the association has been continued during the year, as is further shown by the large attendance here to-day, which is due in some measure at least to the influence of the traveling men.

"The number of members has grown steadily during the year, we having gained ground rapidly among the dealers of the State. Some few are not yet members of our association, especially in Northwest Arkansas. We need their influence, as well as their help, and I hope that our convention will develop some means of reaching those dealers.

"Our financial condition is good. We have all debts paid and a little money in the treasury. This is gratifying to those who have watched the growth of our association."

The address of Mr. Taylor was followed by the report of the delegate to the national convention, Hamp Williams, of Hot Springs, and an address by M. L. Corey, secretary of the National Retail Hardware Association.

NEW MEMBERS ELECTED.

The Committees on Membership, Transportation and Grievances made their reports. The Committee on Membership recommended the election of the following new members, which was adopted: Jordan & Harris, Fordyce; M. O. Burton & Co., Wynne; W. H. Ellis Hardware Company, Argenta; C. W. Maxfield Company, Batesville; W. E. Hickman, Brinkley; Grummer Hardware Company, Conway; J. H. Martin, Gillett; Garner Bros., Lamar; John Patten & Co., Morrilton; J. W. Lentz Store Company, Piggott; Prescott Supply and Hardware Company, Prescott; Springdale Hardware Company, Springdale; J. F. Whaley, Stuttgart; Wickersham & Weeks, Yellville; J. D. Crockett, Denning; Cooper-Craig Hardware Company, Argenta; DeLong Machinery Company, Morrilton; N. G. Cartwright, Osceola; Lonoke Mercantile Company, Lonoke; Barnett Bros. Mercantile Company, Batesville.

In the evening a banquet was given by the Arkansas Travelers in honor of the Hardware association in the assembly room of the Gleason hotel.

The second day's session of the seventh annual convention of the Arkansas Retail Hardware Association was more largely attended than that of the first day, a number of delegates and visitors having arrived since. The morning session was called to order at 9.30 o'clock in the assembly room of the Gleason Hotel by President Stewart, and the first order of business was a

symposium, in which several retailers told how they sold certain articles, which was followed by suggestions from traveling representatives of the interests allied with the retail Hardware business. The symposium included the following subjects: "How I Sell a Pocket Knife," by T. J. Mott of Helena, to which suggestions were added by W. D. Walf, representing Keen Kutter Kuttler; "How I Sell Holiday Goods," with suggestions by John M. Lofton of Hibbard, Spencer, Bartlett & Co.; "How I Sell Paint," by W. B. Hammond of the Sherwin-Williams Paint Co.; "How I Sell a Cook Stove," by W. N. Brandon of the Phillips-Buttorff Mfg. Co., and "How I Sell a Cultivator," by R. R. Roys of Russellville, with suggestions by George L. Turner of the John Deere Plow Co. The talks were impromptu, and the dealer stated his experience, the amount of stock carried and his methods of advertising and selling. The traveling men offered suggestions as to how business may be increased.

HAMP WILLIAMS,
of Executive Committee.

The last paper of the morning session was read by Frank T. Longley, secretary of the Retail Grocers' and Merchants' Association of Little Rock. Its subject was "What a Local Association of Merchants May Do," and it was an account of the work that has been done by the Retail Grocers' and Merchants' Association.

THE AFTERNOON SESSION.

At the afternoon session papers were read by John M. Pittman of Prescott on "Why Our Association Should Take More Interest in Hardware Mutual Fire Insurance," and by John A. Plummer of Marianna on "Some Problems of the Hardwareman and Suggestions as to Their Solution."

The association closed its convention June 7 and adjourned to meet next in Little Rock, June, 1907. Only a morning session was held, and in the afternoon the members participated in the parade given by the Arkansas Travelers.

At the concluding session a paper was read on "The Relation of the Retail Merchant to the Jobber," by W. T. Oberst of Blytheville, which was followed by a discussion, and an address on "New Issues" was delivered by M. L. Corey of Indiana, secretary of the National Retail Hardware Association.

Officers were elected for the year ending June, 1907, as follows: President, Emmett E. Mitchell, Morrilton; first vice-president, Joseph L. Davis, Magnolia; second vice-president, R. W. Meriwether, Paragould; secretary and treasurer, C. E. Taylor, Little Rock; members Executive Committee for term ending June, 1907, Hamp Williams, Hot Springs; R. F. Roys, Russellville; J. P. Simpson, Malvern; T. J. Mott, Helena; for term ending June, 1908, John M. Pittman, Prescott; Thomas B. Stewart, Newport; N. T. Richmond, Fort Smith.

THE HOT SPRINGS CONVENTIONS

Sixteenth Annual Convention Southern Hardware Jobbers' Association AND Tenth Semi-Annual Convention American Hardware Manufac- turers' Association Tuesday, Wednesday, Thursday and Friday June 12, 13, 14 and 15, 1906

SOUTHERN HARDWARE JOBBERS' ASSOCIATION. OFFICERS.

- PRESIDENT.**
F. B. Dunlop, Speer Hardware Co., Ft. Smith, Ark.

Sixteenth Annual Convention of the
SOUTHERN HARDWARE JOBBERS' ASSOCIATION.
HOT SPRINGS, VA. TUESDAY, WEDNESDAY,
THURSDAY AND FRIDAY, JUNE 12, 13, 14 and 15,
1906.

TUESDAY MORNING SESSION.

The convention was called to order at 10:30 A. M., at the New Homestead Hotel.

President F. B. Dunlop in the chair.

The reading of the minutes of the 1905 Convention was dispensed with, as they were already published.

President F. B. Dunlop then delivered his

ANNUAL ADDRESS.

Gentlemen of the Southern Hardware Jobbers' Association:
One year ago we met in this beautiful place and throughout the intervening months we have retained many pleasant memories of the occasion.

When I entered upon the duties of the office to which you so generously honored me one year ago, I was thrilled with an earnest ambition of doing more for the advancement of our interests than has proven possible. The report of the Secretary-Treasurer will acquaint you with what has been accomplished.

I desire to express in behalf of the membership of our association our sincere regrets over the misfortune of the Crane-Hinman Hardware Company, of Yazoo City, Miss., who sustained the loss of their business by a cyclone which visited them during the early part of the present year. We also extend our sympathy to the Moore & Handley Hardware Company, of Birmingham, Ala., in the loss of a portion of their stock by fire.

I called a meeting of the Executive Committee, to convene in Pittsburgh, Pa., on March 28th and 29th to meet with a like Committee from the American Hardware Manufacturers' Association, at which time a program for this meeting was formulated. The meeting was both interesting and profitable.

HARMONIOUS.

Conditions regarding some lines are not satisfactory, but a review of the situation generally as compared with that existing a few years ago reveals a vast improvement. Never before in the history of our association have manufacturers so respected us and appreciated the work we are doing in endeavoring to have the output of their factories go through legitimate channels.

The Wholesale & Retail Joint Committee is doing most ex-

cellent work. Owing to pressure of business affairs Mr. R. M. Dudley, the representative of our association on this committee found it necessary to resign a few months ago and I appointed Mr. W. L. Sanford of the Roberts, Sanford & Taylor Company, of Sherman, Texas, to fill the unexpired term. Mr. Sanford is thoroughly capable of discharging the duties of the position and we were fortunate in being able to secure his services.

Since our last meeting portions of our fair Southland have been stricken with a terrible scourge. Business was paralyzed for a term of months and sorrow and suffering reigned supreme; but the South is accustomed to adversities and while the clouds that hovered over her for a period of months were dark and ominous, yet when they had cleared away she recuperated quickly.

Co-incident with the completion of the inter-oceanic canal, now in process of construction across the Isthmus of Panama, the United States will have witnessed the dawn of a commercial era, pregnant with the richest possibilities for an enormous increase in the value of her export trade. Upon the profitable distribution of the surplus products of our fields and factories

F. B. DUNLOP,
President.

DEPENDS THE FUTURE PROSPERITY OF OUR COUNTRY.

New markets must be found, trade relations with foreign countries must be cultivated. The revenue derived from the disposal of that portion of our products remaining after the wants and necessities are supplied, contributes to the surplus wealth of the country which is needed in meeting the demands and requirements of civilization.

In many respects the most significant feature of our export trade is the business in manufactured products. All statistics on this subject are followed with the greatest interest, and

THE INTERNATIONAL SUPREMACY OF THE UNITED STATES

in the coming decade will be very largely based upon its grasp of the world's markets for finished products of the great manufacturing industries.

Coming almost simultaneously with the report of the United States Steel Corporation, the annual statistics of the American Iron & Steel Association emphasizes the fact that the year 1905 was one of unprecedented activity and what is particularly impressive as regards the outlook for results in the current year is the fact that the closing days of last year were much the most active and the new year opened with a volume of business which continues to the present time, and promises to provide

A NEW HIGH RECORD FOR THE YEAR 1906,

notwithstanding the rapid pace set by the preceding year, unless some serious disaster should occur such as a protracted industrial war, or a serious failure of the crops.

Credit and confidence are essential to progress under civilization, and it cannot be expected that either can ever be spared. The greater progress a nation makes in civilization the more general becomes the extension of credit, the greater the confidence and the more stable the relations existing between communities and between individuals. Care in granting of credits, moderation in using them, and the average trading ability of our business men have clearly increased during the past few years.

THE LESSON IS ONE OF CARE, COURAGE AND CONFIDENCE, not one of vain-glory and overboldness.

The railroads are becoming more powerful as time goes on and if they are allowed to continue unhampered will prove to be one of the greatest menaces to the country in the future; and I recommend that we keep up the fight now being waged until a satisfactory law governing common carriers is enacted.

The relation of the consular service to our foreign commerce is a very close one, and we cannot overestimate the importance of making it adequately and effectively responsive to the growing demand of the great agricultural and industrial interests of the United States for an expansion of our export trade. The selection of consuls should be made solely

WITH REGARD TO THEIR WORTH AND THEIR FITNESS FOR THE OFFICE which they are to occupy. If we are to strengthen and improve the service so as to secure the best results, we must above all things divorce it from the spoils system.

You have been kept fully posted regarding the efforts of a powerful element to have enacted a measure known as Parcels Post Bill. While this pernicious piece of legislation is dead at the present time, yet no doubt it will appear later in some other form, and you are admonished to be on the alert at all times. This same element is also insisting upon the numbering of Rural Free Delivery boxes which would be a great blow to the legitimate retail trade of the country. You can readily see the powerful influence that is fostering these movements and I trust you will continue to do everything in your power to prevent the enactment of legislation so harmful to the legitimate retail interests of the country.

The world stood aghast when the horrifying news of one of the greatest disasters of the age came across the continent by telegraph recently. One of the fairest cities of the nation, San Francisco, was stricken and devastated by the forces of earthquake and fire, great portions of the city were utterly destroyed, hundreds of people killed, and pestilence, want, woe and misery reigned supreme in what but the day before had been one of the happiest communities in this country, but with characteristic western pluck her citizens have rallied and will build even a greater city than the one recently destroyed.

We are admonished by the history of the past year that the wheels of the juggernaut of time are grinding relentlessly onward. We cannot speak of our dead comrades without strengthening the affection we have for the living.

WE CANNOT PRAISE THEM WITHOUT INCREASING OUR DEVOTION to those virtues which were so luminous in their lives. We cannot pay tribute to their good deeds without comforting their kindred and begetting in the hearts of their children a desire to reproduce in their own lives the excellent qualities that were conspicuous in the lives of their fathers. Members will please rise while I read the names of those of our members who have crossed the dark river of death since our last meeting.

Col. B. F. Atkinson of the Atkinson-Williams Hardware Company of Fort Smith, Ark., died September 21st, 1905, in the 68th year of his age. He was a man whose moral integrity was never questioned and whose happy, lovable disposition endeared him to all with whom he came in contact. Let his example be cherished and his name be held in everlasting remembrance.

Mr. Edmund Orgill of Orgill Bros. & Company, of Memphis, Tenn., departed from this life in Sept. 1905, in the 81st year of his age. He had been identified with the Hardware interests of the South for more than fifty years, and was known to be unselfish, incorruptible and the very soul of honor. May his upright, honorable career through life be an inspiration to us all.

I believe that our association has now approached that point of strength, usefulness and permanency which we have all looked forward to with much interest. I feel that you can safely be relied upon to handle all questions of recommendations for future work or policy. Let us, however, hold fast to what we have gained—be careful and prudent in taking on new duties, remembering that the main thing which keeps the association in existence is to prove to the manufacturers our usefulness and need in distributing his products for him,

AND IN RETURN TO SECURE FROM HIM PROPER RECOGNITION and his cordial and sympathetic co-operation.

In conclusion I desire to extend my heartfelt thanks to the whole membership for the universal courtesy extended to me during my term of office, and I especially desire to thank the Secretary-Treasurer and members of the Executive Committee as well as the chairmen of the various special and standing committees for their loyalty to me during the past year.

Secretary Treasurer C. B. Carter made the following report in part:

REPORT OF SECRETARY-TREASURER.

Again, and for the 11th time, it gives me pleasure to present for your consideration a report of my stewardship for the past year, and perchance to offer suggestions, or through the efforts of the Association to enable you not only to conduct your busi-

ness upon a more satisfactory and profitable basis, but to facilitate and simplify matters in which you are all severely interested.

We have communicated with our membership through 68 general letters, and trust that the information and suggestions submitted from time to time have proven interesting and helpful to our membership. We do not issue general letters simply because we haven't anything else to do. We, of course, like to keep in almost constant touch with our members, yet we always desire to have something of importance to present before imposing upon your time in reading the general letters that go out. To give you an idea of the extent of our correspondence we would state that we have mailed from our office something over 11,600 letters since our last Convention. The writer has also done considerable traveling in the interest of Association work, his mileage amounting to 11,519 miles.

COMPLAINTS.

I am very much gratified, indeed, to advise that our records show a total absence of complaints of one member against another; and, in fact, that there has been only a very limited number of occasions where a member has filed complaint against a competitor—a Southern jobber not connected with our organization—and these isolated complaints of one jobber against another has been occasioned almost entirely by the larger jobbers.

C. B. CARTER,
Secretary-Treasurer.

cultivating too aggressively the territory which might be termed foreign to their operations. While the statement has been made by our own member that he feels privileged to cultivate any territory on the face of the earth, at the same time, we feel that there is a limit to a jobber's operations. In fact, we know it is when considering the securing of profitable business. Soliciting business far remote from a jobber's place of business brings him in contact with retailers who are not positively familiar with his standing and reputation near home, and it is but reasonable to infer that there must be some special concessions or advantages offered to secure business from a local jobber with whom the retailer is acquainted and has had dealings. Please understand that we are not advocating the curtailment of a jobber's business and have no objections whatsoever for a jobber securing all the business possible in whatever territory he may wish, but we do wish to impress upon the trade who are reaching out in this manner, the fact that there is an equity of interest that should discourage this direction, and for which they have our sincere thanks. They will in the end become the beneficiaries.

In closing report for our past year's work we would invite your attention, especially to ways and means for securing as members a number of large concerns who have not as yet affiliated with our organization, or who were previously members but who have resigned for good reasons or otherwise. The fact that every Southern jobber is being benefited by the work performed by our Association, which is carried out at the expense of our members who constitute 30% of the eligible concerns, is not right, is not just, and in one respect, burdensome. The fact

that we have and are accomplishing benefits of actual monetary value is self-evident, and we feel that something could be and should be done to awaken the interests of those on the outside. Just how this can be done we are unable to state, but we would suggest that it lies to some extent with the manufacturers to show a preference, or at least a distinction, between those who co-operate with them and assist in working out trade issues and those who do not. This is a pertinent question and one which I think should be considered at this Convention.

We have had some few resignations since our last meeting but the new members received are in excess of those who have dropped out. We are not only holding our own in members but growing, and the power, influence and good which can be realized from our organization are innumerable.

Thanking you for your patience in listening to this report, trusting that there will be found food for thought in suggestions offered, assuring the members and officers—particularly our worthy President, Mr. Dunlop,—of my hearty appreciation of the assistance received in our work and for the many courtesies extended me during the past year, I respectfully present this report.

The Transportation Committee made the following report:

REPORT OF THE COMMITTEE ON TRANSPORTATION.

Your Transportation Committee begs to report as follows: At the time our last report was submitted we had up the question of extending the special classification so that the Cheap Family Dial Scales might be shipped under the classification allowed on "Scales made wholly of Iron." This was declined.

We have made several efforts to have files put in third class instead of second, all of which were declined. In October the Classification Committee reduced Sweat Pads to fifth-class, carload minimum 16,000 lbs. This is an illustration of the advantage of Manufacturers working with us. We have every reason to believe this adjustment could have been made five years ago had not the largest Manufacturer in the country insisted that we could not get fifth class and he entered his plea for third-class which was granted while our fifth-class suggestion was turned down at that time. We are glad to acknowledge the wisdom of the present arrangement where the Manufacturers and Jobbers are working together on this line.

Our request in December for a fifth-class carload rating on locks and knobs was also declined.

In October we were threatened with an effort to place such restrictions on the moving of Loaded Shells and Cartridges and Caps as would have been very burdensome to the Jobbers. Thanks to the strong effort made and the co-operation of many of our members in taking the matter up with the several Traffic Managers, our Southern Lines declined to enforce here the ruling of the Pennsylvania Railroads in Pennsylvania. The Transportation Committee wishes to thank each of the members who wrote personal letters to the Chairman and to the Traffic Managers for their assistance in this matter.

R. F. Bell of Fort Worth, Texas, has been particularly active in that State and we trust his efforts will merit the success they deserve to secure more favorable classification and rates to our Texas members. In this connection will also refer to the successful effort of Jas. R. Adams of Tyler, Texas. He is now at work to secure a re-adjustment of the classification and rates on Childrens' Vehicles in carloads into Texas.

By reason of the detailed reports already rendered, our members are in touch with the work done to further more satisfactory laws with reference to the power of the Interstate Commerce Commission. Unfortunately quite a number of Shippers misconstrued the efforts of the Interstate Commerce Law Convention which resulted in a lack of harmony at the October meeting at Chicago. At this writing, however, indications are that the Senate will concur with the House Bill in such a manner as to bring a considerable measure of relief along the line asked for. This question will have to be decided right before it will stay settled, and for the good of all concerned we hope that a wise and reasonable law will be enacted before April 1st.

We co-operate with the effort to have the Senate Committee investigate also the express service, charges and discriminations. We trust that in due time better adjustments can be made in that direction and would suggest that our Committee for next year keep this in view. We might also suggest that next year's committee might be able to do something with reference to aggravating delays in the movement of freight, both through and local; also the unreasonable delays in the settling of just claims for over-charges, loss and damage.

In urging improved service we must try to be patient because the Transportation Lines have their difficulties due to the enormous volume of business, such as Hardware Jobbers exper-

iened in supplying their customers during the past year or two. We would caution our members against mistakes in attempting to group too many lines of goods in one car to secure the benefit of carload rates of freight. This can wisely be done with some goods, but to insist on it in other directions would only lead to the possibility of large local Retailers making up carloads and thus cutting out the local Jobbers' advantage as a Jobber. We would suggest that the Transportation Committee for next year consist of four members instead of three as at present. This is important because of the various interest in our large membership. We would suggest that H. C. Fox of Arkansas, or a Texas man, be selected and we believe Mr. R. F. Bell is more active than any one else in the matter and Mr. Miller of Memphis, Tenn., could also probably serve his section and the middle south, east of the Mississippi, including Tennessee and Mississippi. We would suggest that some Georgia or Carolina man be appointed and that a Virginia man be appointed. Each of these parties could then give personal attention to the matters in his territory.

R. D. WARREN,
• First Vice-President.

The Press Committee reported that they would be prepared to perform their duties when called upon at the present session of the convention.

The Committee on Grievances reported that there had been no complaints referred to them for adjustment.

The Chairman of the Manufacturers' Committee, R. M. Dudley, in a written communication, reported to the Association that nothing had been brought to his attention during the year as Chairman of that Committee. He expressed his regret at being unable to be present at the session.

The Chairman of the Metal Committee, Bruce Keener, reported that he had no report to make, as chairman of the committee; that the members were evidently highly pleased with this commodity, as there had been no complaint of any kind filed with the committee.

The Executive Committee, O. B. Barker, Chairman, made the following report:

REPORT OF THE EXECUTIVE COMMITTEE.

Gentlemen of the Southern Hardware Jobbers' Association:

In presenting a report of the past year's work, and in suggesting plans of the coming year, your executive committee realizes the responsibility imposed upon it, yet they are, as they have been in the past, willing and anxious to the best of their ability to perform all the duties coming within their province. As the years go by and each succeeding convention shows not only an increased membership, but additional interest manifested not only by our members, but by the manufacturers from whom we should expect—and not without disappointment—protection and generous treatment, it is no simple matter for your executive committee to satisfactorily and successfully forecast events and at all times meet the issues as they develop. So please bear in mind the limitations of the human mind and the peculiar conditions which confront us—for your executive committee are human just like

the rest of you and equally prone to err. Please understand, however, that it is not our purpose to acknowledge our mistakes and short-comings, but we are merely prefacing this report with the statement that we have not been able to successfully consummate all the plans which have been presented for the correction of trade abuses and the improvement of other matters of vital interest to the Southern Hardware jobbing trade.

At the Executive Committee meeting this year, for the first time within the history of our organization, the innovation was introduced of holding joint executive committee meetings of our own and the American Hardware Manufacturers' Association. The meeting was held in Pittsburgh on March 26th, 27th and 28th, and was well attended. All the members of our Committee were present except Mr. Keener, who was unavoidably detained at home. Our conferences were characterized by the most generous good feeling between the Manufacturers' Association and our own, and we feel that in future years this same policy should be carried out. Especially is this desirable for the reason we hold a joint convention and it is, of course, desirable that all the details in connection with the same should be fully decided

O. B. BARKER,
Chairman of Executive Committee.

upon and worked out with the least possible friction and complication. The plan of combining the program of each association in a common book speaks for itself. This also is a move in the right direction and will unquestionably have a tendency to bring about a more cordial feeling between the jobbing and manufacturing interests of the entire country. The old opinion that formerly prevailed that the manufacturers were seeking every opportunity to beat the jobbers, and that the jobbers lay awake at night scheming whereby they could get the best of the manufacturers has long since disappeared, and justly so. The interests of these two classes are and should be so closely interwoven that the most perfect understanding should exist, each working for the other's welfare, both socially and in a business way. The question may be asked as to why so much stress is laid on social obligations. To our mind there is much in business besides strict business ethics. Life, at best, is of short duration, and there should be pleasure and enjoyment; and how can more perfect happiness be realized than from a personal acquaintance and friendship between those engaged in the same line of business, and who come in almost daily contact through correspondence or in personal conferences; and is there any better way to bring about this feeling than through meetings such as we are now celebrating, occurring once or twice each year.

The greater part of the Committee's time at the Pittsburgh meeting was devoted to the discussion of matters pertaining to the welfare of the jobbers individually and as a whole in their relationship with each other and with the manufacturers. These discussions resulted in the program which we will carry out at this convention. More detailed particulars of these various subjects will follow.

UNIFORM SIZE LOOSE LEAF CATALOGUE.

At our convention here last year the suggestion was embodied in your Executive Committee's Report that the time was opportune for the adoption of a uniform size leaf for loose leaf catalogs and a uniform size catalog for the jobber's publication. A Committee was appointed, conferences held and their report was

presented to you the latter part of last year, details of which will again be presented to you at this convention in a report from this committee, and we take this opportunity to urge upon our members the wisdom of adopting as their standard the size sheets recommended. There are several reasons why this course should be followed.

1st. It will enable the manufacturers to supply descriptions and illustrations of new goods in such a manner as will enable the jobbers to keep careful track of the same, as the majority of the jobbers are using loose leaf binders for the use of the office and of their traveling salesmen. The same is true when the manufacturers issue new lists and discounts, and, in fact, many manufacturers have already adopted the plan of supplying the jobbers with their requirements in loose leaf sheets of their general line.

2nd. By securing the manufacturers' co-operation in the adoption of these uniform size loose leaf catalogs, the jobbers will be enabled to classify and file the catalogs in a very simple manner, compared to the great variety of sizes of catalogs which have previously reached the jobbers from manufacturers throughout the country.

3rd. It will lead up to some uniform plan whereby a number of jobbers may prepare catalogs together at a minimum expense.

Our Secretary advises us that a great many manufacturers have expressed deep interest in this movement and have, or will conform to our views in this direction.

The report then referred to the subject of "Special Brands," and reported a satisfactory condition in the trade with reference to that subject.

Referring to the subject of Mutual Fire Insurance, the report was as follows:

The Mutual Fire Insurance question, which was discussed through a very desirable paper at our last convention by Mr. C. H. Miller, was referred to a special committee whose report will be presented later on. This report was also submitted to our membership on June 12th of last year, but we have not learned whether or not our members have adopted these suggestions of that committee. We feel that there is a possibility of our members saving considerable money in the way of premiums by adopting the suggestion of the Mutual Fire Insurance Committee, and we present the same again for your further consideration.

PARCELS POST AND OTHER POSTAL MATTERS.

The past year has been a very busy one in connection with our efforts to defeat the Parcel Post measure, which has been pending in Washington for some time, also in our efforts to defeat the proposed recommendation through the Post Office House Committee for the consideration of third and fourth class mail matter. The adherents of a Parcels Post bill were soon convinced that there was going to be so much opposition to the passage of any such laws that they agitated the proposed consolidation of third and fourth class mail matter, thinking that the mercantile interests of the entire country would possibly not pay much attention to this latter movement on account of their efforts in opposition to the Parcel Post measure. However, we are happy to state that so much pressure was brought to bear in opposition to both measures that both have been, for the present abandoned, although there is a possibility that one or the other or both of these propositions may be resurrected at some later date. Our Association, through the Secretary, has been indefatigable in its efforts to defeat these measures, and we, therefore, feel very well satisfied with our efforts in this direction. It is clearly patent that should either of these measures have been recommended to Congress and afterwards adopted that it would have entailed untold loss to the retail interests of the country, which would, of course, have very seriously adversely affected the jobbing interests. The value of trade organization was never better illustrated than in this work. Without organization, at least one of these measures would have been passed, and it would have resulted in the actual loss to the jobbers and retailers of the country of many millions of dollars. This but illustrates the adage, "In times of peace, prepare for war."

Another feature in connection with the post office department which was brought forward by the catalogue houses was the proposition as to numbering the Rural Delivery letter boxes and permit the delivery of mail direct to these boxes by number only. This would have proven a most effective weapon in the interest of the catalogue houses, but organized trade efforts brought such a flood of protests to Washington that the order granting such privileges was annulled.

In connection with the above subjects your Committee feel very much gratified, indeed, at the work accomplished by the Catalog House Committee, a detailed report of which will be presented at a later session.

The report referred to the poultry netting trade.

The report then referred to the subject of maintenance of prices.

It was moved, seconded and carried, that the report of the Executive Committee be taken up for discussion in detail at a later session.

The President announced that the present Committees would continue to hold office during the Convention.

The Cast Plow Committee and the Steel Plow Shape Committee presented their reports.

The Standard Size Loose Leaf Catalog Committee, J. D. Moore, Chairman, made the following report:

REPORT OF COMMITTEE ON STANDARD SIZE LOOSE LEAF CATALOGUE.

After a careful canvass of our membership, both as to the size of catalogues and loose leaf binders they are now using and their ideas and wishes as to something more desirable, if any, we recommend the adoption of the following size sheet for the regular printed bound catalogues: 8 $\frac{1}{4}$ x11 inches. For use in loose leaf binders, we recommend the adoption of sheet 9 $\frac{1}{2}$ x11. Ordinarily the printing space on either sheet will be the same, the loose leaf ledger being wider to permit of its being inserted in the loose leaf binders, the necessary margin for binding being greater than in the regular bound books. Printing space or type form should not be over 6 $\frac{3}{4}$ x9 $\frac{1}{4}$ inches on either bound catalogues or on sheets for loose leaf binders.

Your Committee does not recommend the adoption of any particular style or make of loose leaf binders; however, for your information would suggest the "Tengwall" Binder as one possessing excellent merits. Price \$3.00 each in one dozen lots.

Address The Tengwall Co., Chicago, Ill.

Very respectfully,

J. D. MOORE,
CHAS. H. IRELAND,
C. B. CARTER,
Committee.

SPECIAL AND STANDING COMMITTEES.

We desire to express in behalf of the Association our thanks for the good work accomplished by our standing and special committees. While some of the committees have not presented elaborate reports, yet they have been persistent in their efforts to do all that was expected, or at least all they could do. Conditions in a general way are very satisfactory, indeed, and accordingly there has been no opportunity for some of the committees to do effective work, at the same time they are ready, willing and anxious to serve the Association to the best of their ability.

We feel especially proud of our efficient transportation committee. As Chairman, Mr. W. E. Newill has accomplished wonderful results when we consider the obstacles he has overcome in attaining his purpose.

The Steel Plow Shape Committee and the Cast Plow Committee have done excellent service, which will result in actual dollars and cents benefits to our members.

DELAYS IN DELIVERY OF FREIGHT SHIPMENTS.

Our attention has been called to the inconvenience experienced by our membership in regard to the slow movements of freight over the respective railroads of the country, and as this is a matter of so much importance to the trade, both from the jobbers' and manufacturers' standpoint, we shall, therefore, have the pleasure of hearing from Mr. John Donnan on this subject, who has posted himself on this question preparatory to presenting the same for your consideration and action. We recommend the adoption by this Association of a strong resolution looking towards proper relief from the conditions that now exist and further, that we have this matter presented before one of our joint meetings and secure similar action upon the part of the American Hardware Manufacturers' Association.

INDEFINITE REBATES.

We think it well to put ourselves on record as opposed to any and all forms of plans offered by the manufacturers in the way of indefinite rebates for the sale of their goods.

It has been moved by Mr. Barker that the Committee be continued and requested to present the matter in some way before the Manufacturers' Association at its present session. The motion was carried.

The Committee on Mutual Fire Insurance reported as follows:

REPORT OF THE MUTUAL FIRE INSURANCE COMMITTEE.

We, your Committee, to look into the subject of mutual fire insurance and report back to the Association, submit the following:

1. We believe that mutual fire insurance is based on sound and correct principles and eliminates a large part of the expense

necessary in old line companies and will furnish pure insurance at the lowest rates; and, hence, is desirable on our part.

2. We do not believe it advisable for the present, owing to the limited business our membership would give to a company, which could be written on a sound basis where the risks were limited to \$5,000.00 each, would authorize us in organizing a company of our own; and for this reason, we recommend that those of our membership who have insurance to place at present to give it to some mutual company or organization, which would be more economical than to have a small company which would require all the premiums to maintain an office and other fixtures and necessary charges.

Respectfully submitted,

J. D. MOORE,
BEN. J. SCHUSTER,
GEO. E. KING.

On motion the Association took a recess until 2 P. M., at which time a joint meeting would be had with the American Hardware Manufacturers' Association.

C. W. ASBURY,
Vice-President.

TUESDAY AFTERNOON SESSION, JUNE 12, 1906.

The American Hardware Manufacturers' Association and the Southern Hardware Jobbers' Association met in joint session at 2 p. m.

President Dunlop of the Jobbers' Association called the Associations to order. He introduced Rev. Dr. Williams of Augusta, Georgia, who invoked the divine blessing.

An address of welcome was given by the president of the Southern Hardware Jobbers' Association, F. B. Dunlop, a most hearty welcome indeed, who spoke as follows:

ADDRESS OF WELCOME BY THE PRESIDENT.

Ladies and Gentlemen:

It is with genuine pleasure that I welcome you to this the 16th annual convention of the Southern Hardware Jobbers' Association, and like the Spaniard of olden times, who upon stepping within the portals of the house of a Spanish gentleman found within a host, who with salutation profound bade him welcome and with his hand upon his heart exclaimed: "My house and all that is within is yours," so I as heartily welcome you today and sincerely trust that your short stay here may be both pleasant and profitable, and when you shall have returned to your home may you retain many pleasant memories of this occasion.

What more delightful place could have been chosen for our meeting than this beautiful spot nestling amongst the mountains of Virginia!

How many fond memories cluster around the name of this grand old State! The chivalry and patriotism of her men, the beauty, culture and grace of her women are known and admired in every city, town and hamlet in this country.

I am truly glad to see that so many of the ladies have honored us with their presence. They are an inspiration and are

ever indispensable. Ladies, when we think of you we think of the sunlight, around you cluster all the tenderest ties that bind us to this beautiful earth, and in our dreams of Heaven you are there. With a deep admiration for all that is good, beautiful and true I hope that you will continue to grace each succeeding convention of this association with your charming presence.

Hot Springs is yours during the convention, and Mr. Irby Bennett, the modest but exceedingly worthy chairman of the Reception Committee, and his associates will take pleasure in doing everything possible for your enjoyment.

I thank you ladies and gentlemen for your patient, courteous attention.

C. W. Asbury, vice-president of the American Hardware Manufacturers' Association, responded to the welcome of President Dunlop in the following words:

Mr. President, Ladies and Gentlemen: I feel provided with very poor tools. Words are indeed poor to adequately and properly express the pleasure the Manufacturers feel in meeting you on this occasion; but, gentlemen, don't be misguided into the belief that you are the sole cause of this emotion, a goodly share is due to the insuperable delight we have in meeting the ladies—those whom you delight in recognizing as the bosses at home.

In addition to the pleasure we have in meeting old friends and in greeting new ones, I am sure we all experience a thrill in visiting this spot, surrounded as you are by nature's beauty in the very heart of Old Virginia. You are responsible in drawing us from the whirling hum-drum of flying machinery, the foundry and glowing furnace to this atmosphere. Could it be possible for the human brain to conceive at first thought other than gratitude? We are here to consider the complications, perplexities and irregularities in our respective businesses, but not with the all absorbing and fixed idea that the evils are the only elements that engage our thoughts. There are good business transactions which will, no doubt, mitigate some of the evil practices. There are, undoubtedly, evils in the Hardware trade we should fight vigorously and earnestly for their correction, but not with a determination to rectify the evils out of all proportion to their import so that they completely overshadow all that is good. With this thought I desire to express again simply, but with earnestness, the pleasure and gratitude we feel at being privileged to be with you.

PRESIDENT DUNLOP: Mr. J. T. McAllister, whom you all remember, who had agreed to respond to the address of welcome, is sick and Mr. George E. Nelson has agreed to respond in his stead.

MR. NELSON said:

THE HOMESTEAD HOTEL.

WELCOME TO HOT SPRINGS.

Mr. Chairman, Ladies and Gentlemen:

As most of you are advised, I was not selected to deliver this address on this occasion. As some of you may not have known this, I think it is due you for me to say that at this late hour I stand here to do what I can to fill the place of my friend, Joseph T. McAllister, to whom, and not to myself, this signal honor was accorded; and who, if he were here with us to-day, would I know, with clear head, bright intellect and warm heart meet the requirement of this occasion with fearlessness, honesty and ability. And when, at this late hour, I think of the place I have assumed to fill, it makes me feel my inability all the more and causes my embarrassment to rise to a point where it threatens the veritable destruction of any sentiments which, under normal conditions, I might be able to express.

It was a beautiful custom which originated long years ago for the representative men of every age to gather themselves together at certain periods of the year and discuss matters of common interest and concern.

Neither history nor tradition goes back far enough to mark the period when this custom was brought into life. But we do know that way back in the early ages, in Athens, the mother city of the arts and sciences, that the leaders of that age—the

representative men of the times, men who formed, shaped and moulded public opinion, would convene there at regular intervals, exchange ideas and do what they thought was best and most promotive of the public weal; and we know likewise, that they met in like manner in the Forum, in historic Rome, before the Christian Era, in close fellowship, to discuss similar questions.

These were noble, patriotic men, who gave freely of what they possessed, and whose one purpose was the betterment and upliftment of their fellow men. These social gatherings gave to them strength and renewed power to meet again the solemn duties of life, and a deeper and richer love for human nature, and closer communion between man and man.

And so it is with you here this day, and I know your purposes are largely the same. With hands free and feet loosed from your business, it gives you intense pleasure to mingle at these gatherings to renew friendships, to exchange ideas and to quicken your attachment not only to these institutions to which you have given, and are now giving, the best years of your life in devoted service, but also quickens your attachment for your fellow man, strengthens your love for and faith in him, and enables you busy men, for a little while at least, to indulge in the better side, the social aspect of life.

Freed for a day from the cares and perplexities of our everyday life, we delight to turn back a few leaves in Time's great volume, to get down closer to nature, to be boys again for a day, and commune for a little while with the spirit of the past.

In the almost superhuman endeavor, rush and hurry incident to the immense business enterprises which we witness in this decade, which require men to think so quickly and to move so fast, it is well for us to pause like this from time to time to free our minds from business cares and mingle together in social intercourse, for being here with these manly men—men of accomplishments, men of deeds, men who have forged ahead through discouragements and difficulties, pushing aside one stone after another, as they moved along the path to successful life, ever putting the mile posts behind them as they have gone; men who have a deep and abiding faith in, a little better at least for the time they have tarried here—mingling here in social intercourse, I say, with such men, and these fair women, whose presence always lends so much beauty and so many graces to every occasion, will, I know, often strengthen and refine us and make us better able to stand up and fight like men again when the day of duty comes.

Twelve months upon the tide of events, and we find ourselves drifting back to this old familiar shore, where you had such a good time last year, when some of you got a little too much and fell by the wayside as boys will do, and others of you who did not get too much, simply because with them it was like pouring water into a hollow tree, and there was not enough on the market to be "too much" for them.

I know these associations are formed for noble, manly purposes. Others conceived in the same spirit have lived in favor for a thousand years. My earnest hope is that this one may live and grow and strengthen and prosper; that each of you and yours may yet have many years of successful endeavor, which will bring to you peace and plenty; that men from the north and east and west and south, God bless her, may ever mingle therein united, hand in hand, and whenever you or yours may wend your way towards Virginia, she will meet you on the border with the olive branch of peace and welcome; and if in after years, your thoughts may revert to old Bath County, know ye that her healthful, life giving waters, her fertile valleys and rolling hills, will stand here with outstretched arms in the name of her people, to welcome your return, and that upon them you may read everything written in Nature's matchless hand, "Welcome, to each and every one of you, a hearty welcome."

PRESIDENT DUNLOP: The next on the program is an address by Mr. S. G. Gilfillan of Ironton, Ohio, on "Good Fellowship."

MR. GILFILLAN: Ladies and gentlemen, it seems almost posthumous for me to step upon this platform after having listened to the elegant, beautiful and delightful words that have been uttered by the gentlemen who have preceded me, yet I am here by invitation and not because I had the nerve to accept, but because I did not have the nerve to reject the invitation.

Continuing, Mr. Gilfillan said:

GOOD FELLOWSHIP.

What a grand subject and yet how appropriate, for where will you find so much good fellowship to the square foot as at a Joint Convention of the Southern Hardware Jobbers and American Hardware Manufacturers.

I deeply feel my utter inability to properly handle the subject, and still I am willing to do my best towards entertaining and interesting you, for who could refuse a request coming from such

good fellows as Messrs. Barker, Ireland, Keener, Webber and Carter.

I concluded that I would look up the meaning of "Good Fellowship," but the more I looked the less I knew and was convinced that it was too deep for me; I therefore concluded that the best definition I could give was the "Golden Rule"—i. e.—"Do unto others as you would have others do unto you," and that would be the acme of Good Fellowship. If one would follow this rule what a genuine good fellow he would be, and how happy we all would be if we always treated others as we would have them treat us.

In my efforts to get a satisfactory definition for Good Fellowship, I was reminded of a dialogue that took place between two darkies at a Negro Minstrel Show not very long ago: One darkie mentioned the fact of his great responsibilities, when the other immediately said: "There you go again using big words that you do not know the meaning of;" when he replied, "What did you say; don't know the meaning of responsibilities?" The other darkie answered: "That is what I said;" when he replied, "What? I don't know the meaning of responsibilities? Well I

S. G. GILFILLAN.

should say I do for I have got them. Responsibility means, why responsibility means, well it just means responsibility and that is all," and that is the way I feel about Good Fellowship, and yet there are a great many ways, that is, supposedly, ways of being good fellows and that brings to my mind a conversation that took place between a very sick man and some of his friends who were visiting him. The aforesaid sick man in a very deliberate way said: "Well boys, if I die I suppose that you will send flowers to my funeral," and his friends replied: "Yes indeed we will." The sick man then said: "To cost as much as five dollars?" His friend replied: "Yes, perhaps more;" when the sick man replied; "Well, cut the flowers out and give me three dollars in cash, for I need the money." The moral to this story is to say or to do things while our friends are alive rather than after they have passed into the great beyond, but pardon me please while I quote from a short article that fits in here very nicely:

THE VALUE OF PRAISE.

"Has it ever struck you what a sweetener of life lies in a few words of appreciation and encouragement? How few of us take the trouble to stop a few moments and praise a servant for work well done, or even pause to tell our nearest and dearest how we appreciate all the daily services which we have apparently never noticed. When our friends die we hasten to send beautiful flowers as a last appreciation of our love for them; but, would it not be better if we had helped them by a little praise when they were working, or if we had cheered them in the dark days when they were troubled and suffering? Only a few kind words of appreciation; the cost is nothing, but the recompense is beyond price. Let the husband tell his wife how much he prizes her love for him, and the wife tell him how truly she recognizes all his care for her; and the mother should reveal in words how much she values her children's affection, while the child who says to its mother, "Thank you for all your love to

me," has rewarded her far beyond knowledge or understanding."

And yet I do not propose to preach a sermon, but simply to say that as we lead but one life here on earth, we must make that life beautiful and to do this Good Fellowship is absolutely necessary. How easy it is to drop from the sublime to the ridiculous if you desire to refrain from becoming tiresome, and therefore I am going to tell a story which may possibly be familiar to most of the men, but I am quite sure will be new to the ladies, and I know they will laugh if only from sympathy with me. A lawyer of my acquaintance tells this story of a personal experience while trying a case in an Iowa court. A boy about fourteen years old had been put on the stand and the opposing counsel was examining him. After the usual preliminary questions as to the age of the witness, residence and the like, he then proceeded:

Have you any occupation? No

Don't you do any work of any kind? No.

Just loaf around home? That's about all.

What does your father do? Nothing much.

Doesn't he do anything to support the family? He does odd jobs once in a while if he can get them.

As a matter of fact, isn't your father a pretty worthless fellow, a dead beat and a loafer? I don't know sir; you had better ask him; he's sitting over there on the jury.

We are often told that a little fun now and then is relished by the best of men, and yet sometimes even Good Fellowship is overdone as in the case of Senator Bailey of Texas. The Senator tells of an experience he had not long ago while staying in a country place down South. He received a telegram urging him to come to Washington at once and made arrangements for immediate departure. The place was two miles from the railroad station, and as the schedule had been recently changed, his host did not know the time for departure of the train, and there was but one train each day. A negro was sent hastily to enquire from the station master the time for the departure of the train. Three hours later the negro returned and the farmer angrily asked him where he had been and if it took three hours to ask when the train was due. The negro tried to explain by saying that it did not take three hours to ask when a train went by, but he added that the station man was such a liar that no one could take his word, and, therefore, "I just stayed to see for myself, and for once in his life he told the truth, for she sure did pass dar just when he said she would," and thus Senator Bailey was one day late in getting back to Washington.

We all want to be good fellows and show our Good Fellowship for the ladies, and along that line I have something that I think fits the case exactly—it is entitled, "An Appeal to Saint Peter."

Won't you tell us, good St. Peter,

Are there any women angels?

Any angels in your kingdom

Of the feminine persuasion?

For we have always pictured Heaven,

As a place most satisfying,

Filled with love, and light and music,

Filled with angels fair and graceful,

Floating through the ambient zone,

With a soft and rhythmic motion.

With their white robes clinging to them.

Now these wise men rise and tell us

That these things have no foundation,

That the hopes we fondly cherished

Are but idle dreams and empty.

So please tell us, good St. Peter,

Won't you give a sign from Heaven

Ere we quit this earthly temple,

Ere we climb the golden stairway,

For unless you can assure us

That the wise men and the learned

One and all are quite mistaken,

Or are trying just to bluff us,

We will change our way of living,

Have a good time while we stay here,

For we care not for Heaven

Where there are no lady angels.

And now for fear that I may destroy the Good Fellowship that now exists and to prevent tiring you beyond reason, I will close with a story that might be my fate if I continue any longer:

One morning a Sabbath School was about to be dismissed and the youngsters were already in anticipation of relaxing the cramped little limbs after the hour of confinement on straight-backed chairs and benches, when the superintendent arose and instead of the usual dismissal announced, "And now children, let me introduce Mr. Smith, who will give us a short talk." Mr. Smith, smilingly arose and after gazing impressively around the class room, began with "I hardly know what to say," when the whole school was convulsed to hear a small thin voice in the rear lisp, "Thay amen and thit down."

PRESIDENT DUNLOP: We will now hear from Irby Bennett, Chairman of the Reception Committee.

MR. BENNETT: Ladies and gentlemen, I had an elaborate report prepared for this occasion, but unfortunately my baggage has been delayed. My only pleasure is the applause that I receive when I appear as I have this morning. You no doubt expect a speech from me and I am more than equal to the occasion. I would deliver that speech, as I say, but for the fact that my notes have gone astray, and in that event you expect that I will tell you a story, but Gilfillan anticipated me. He told all the new ones that I know—that is the parlor stories.

IRBY BENNETT,
Chairman Reception Committee.

I thank you very much for your applause and I am awful glad to greet you men and women. I am awful glad to greet the manufacturers and the jobbers. It is a real pleasure to be Chairman once more of the entertainment committee. The Committee is long enough; we do not want to add any more to that committee. I have not done a thing. I came three days before this convention was called to order and I have only seen three of that Committee and they are now waiting in the room to the left of the office for the contributions from the jobbers and manufacturers. Mr. Hottel is the Chairman of that Committee and if any of you jobbers or manufacturers have not done your duty, you want to do it now. Now the best part of my speech comes—a photograph will be taken on the right of the hotel immediately after adjournment this afternoon. Now you ladies all want to get in that, and of course the majority of you gentlemen.

I have not much of a report to make for my committee, ladies

The banquet to-morrow night, Wednesday, my Committee have not prepared as elaborate a programme as we have formerly done at these conventions, but we have done all that the jobbers felt that we should do. They did not want us to do anything which might detract or call from their meetings any member of their association. The manufacturers were quite as solicitous to have their members all in their meetings, and for that and other reasons we have not prepared an elaborate programme, and what we do, aside from the entertainment this evening, which will be an impromptu affair in this room, we will have some songs, some recitations and some dancing probably, but we will try to amuse you from half past eight until ten o'clock. I will not mention the names of the distinguished artists that will perform or do stunts. Some of them are going to do stunts, you know, and I might say in parenthesis, that President Dunlop of the Southern Hardware Jobbers' Association is going to sing us a song and that is quite sufficient, and I know you will all be there. I would say something about Mr. Asbury, but Mrs. Asbury is here.

Now I think it is up to me to say what the boy said to Gilfillan: "Say your prayers and quit."

President Dunlop called on Mr. T. James Fernley, secretary-treasurer of the National Hardware Association, for some remarks.

MR. FERNLEY said: Mr. President, at a time when it seems to

be desired on the part of so many to once more look into camera and see what is produced by it, I would not detain audience, but I simply want to say it gives me a great deal of pleasure to come here as a representative of the National Hardware Association, I think for the twelfth consecutive time, note the continued interest in this meeting. Our association learned a great deal from the Southern Hardware Jobbers' Association. I think this feature of having the ladies at our meetings was first introduced by this organization, surely it gives us a great deal of pleasure on all association occasions now to have our wives, and for some of us, the mothers of our children, present on occasions of this kind.

I am very much delighted to-day to see that the young of the trade are recognized to the extent they are. Twenty years ago men who were at the head of these organizations were old and gray haired, but to-day you will find young fellows budding into manhood as presidents of these associations. I think this bodes well for the future.

I have come here, Mr. President, to enjoy myself and to discuss trade subjects, and I beg of you if you have on your mind anything of the trade nature you will wait until after the departing train before you mention it. I do not want to discuss the heavy subjects which we hear so much of. I will even mention them, as it might recall them to your mind. I only want to say to you that the National Hardware Association looks with a great deal of pleasure on the growth of the association movement throughout the country. We feel it particularly appropriate to come here because this is practically the present association among the jobbing trade, and it affords much pleasure to meet with you.

A gentleman asked me this afternoon, while sitting on the lawn, where I came from. I told him I came from heaven and he was unkind enough to reply that evidently I did not have a turn ticket. I want to assure you that when I come into such an assemblage as this I do not feel that I would want a return ticket, but feel as if I would like to banish all business and stay here indefinitely. I thank you.

The convention then took a recess until the next morning at 10 o'clock.

WEDNESDAY MORNING SESSION, JUNE 13.

The convention was called to order by President Dunlop at 10:30.

The roll was called showing 32 firms represented. The secretary stated that more were expected on trains to arrive.

Frederick Fox of Pine Bluff, Ark., read the following paper:

INCREASED EXPENSES DEMAND INCREASED PROFITS

Mr. Chairman and Gentlemen: The subject, Increased

JOHN DONNAN,
Chairman Cast Plow Committee.

expenses Demand Increased Profits, is a proposition so patent on its face that were it not that the subject admitted the question of ways and means it would hardly admit of argument.

The high wage idea seems to permeate all branches of business. Never in the history of the country have the wage earners been more completely master of the situation than now.

good book-keeper can command from \$100.00 per month up, and no business can afford a cheap book-keeper. Good salesmen command from \$75.00 and up, and I find then the men to whom I pay the best salaries are the cheapest. These ideas extend to porters and drivers. In these positions we run colored help and they can get work any time at what we would consider excessive wages not long ago, and when we have these fixed expenses worked out to the best of our ability we must see the assessor and then the tax collector and the fire insurance agency, and now here comes the district for paving, sewers and other public improvements that must be met. So when we foot up the totals we wonder where the tide will turn and where the money is to come from to pay the expense account. Now just so sure as we go into business just so sure will we fall heir to these contingencies, to such an extent that when we make our footing at the close of the year we think ourselves fortunate if it does not take more than 10 per cent. of our gross sales to meet them. These are fixed facts and the burning issue with us all is what is the best way to provide for this feature and leave a reasonable profit on our investments. Negatively you cannot meet them selling nails and wire at a profit that barely pays the expense of handling. You cannot meet them selling rope, galvanized ware and wood and willow ware and other items that the wholesale grocer puts on the market at prices that do not pay the Hardware merchant the expense of doing business, and I wish to say here that I do not endorse the idea that these lines should be cut out of the Hardware merchant's stock. They legitimately belong to us. Let's hold them. But right here is where we need to be thoughtful and bring our brains to bear in the handling of this question. This is the place that we want to draw the line on items I have touched on. I have not mentioned them all, and those that do help us out and pay their way. Let our salesmen understand that it is quality and not quantity that you are more particular about—that you think more of the sale of a dozen razors than 20 kegs of nails,—in other words to fix their minds and energies on profit-paying items and not think so much of trying to sell large bills—carloads if you please—that pay an exceedingly small percentage,—in some cases less than the fixed expense of doing business.

As to the best methods of putting these ideas into effect. I have no doubt I could be responded to intelligently by every member on the floor, our ideas varying largely on account of local environments, and I hope we may hear from quite a number.

As to my own ideas, I say, sell as good an article in any line as your customer will buy. It will, in nearly all cases, enable you to realize a better profit and is less apt to get you into trouble. Impress on your salesmen seasonable lines—not too many at a time—that you want pushed specially. Have him take a sample of some novelty occasionally. Put good goods at the disposal of your salesman, and do not be afraid to ask a price for them. There is one other idea I wish to mention, and that is, let the jobbers doing business in a given territory arrange a meeting once a year and have a heart to heart talk over trade conditions and prices, but our mistake is being overzealous to get orders. Let's ask and answer questions and I think it will go a long way in blotting out a number of our troubles that perplex us not a little and frequently cause unnecessary cutting of prices.

The increased expense has come to stay. Let's inject the profit-getting idea into our business, not that we may impose on any one, but that we may obtain our honest dues, which is a reasonable profit on capital invested.

Remarks were called for on the subject.

MR. BARKER said that his firm had endeavored to overcome the increased expense by increasing the volume of their business, but that there was a limit to this and the question was how to increase the profits after the volume of business could not be increased.

MR. MOORE: I don't know as I have any solution to offer. It seems hard to get any concert of action. About the best way would be to resolve individually that we would market our goods at a profit. I think a very good thing is, if we know we are selling staples without a profit, is to quit, and if each man will quit we will all quit.

MR. EWING spoke on the subject and referred to the small profit made on a number of staple articles. He suggested as a partial remedy the co-operation of jobbers together in maintaining prices and not resorting to ruinous competition.

JOHN DONNAN spoke on the subject and expressed the opinion, which was loudly applauded, that the only thing lacking to make better prices was backbone and common-sense on the part of the jobbers.

MR. IRELAND suggested the remedy of allowing salesmen only credit on sales which showed a profit.

MR. ESHLEMAN: There are two or three little points I would like to bring out before you pass from this subject. I suggest that as I think all of you employ your salesmen more or less on the percentage basis, a plan upon which to meet these contingencies is that of allowing a man credit only for such goods as he actually makes a profit on. I was formerly troubled a great deal with the matter of competition until I reached a point when I absolutely refused to give the privilege of meeting anybody's prices, and I have cut down my sales, but whatever I sell I get a profit on.

Following the flag, the goods into which metal enters as a basis of them belongs to the Hardware trade. I believe that we have got into that rut where we concede to the furniture dealers the sale of stoves, to department stores certain other lines of goods, the crockery houses certain others and the jewelry houses certain other lines. We are making the mistake of our lives at that point. I believe that Mr. Simmons is the best Hardware merchant in the United States, and he has acted on identically opposite of that plan, and anything that makes him a profit and he makes a rich profit because he has never cut out anything that ever was sold in a Hardware store.

Now there is another thing I wish to suggest to you and that is this antique furniture. This is the day of antique furniture and people are hunting all over the country for it. Now we are hunting around like the old fore-runners of the Spanish Invasion in this country for the perennial spring of youth hunting for those things to bring us fabulous wealth when we have them lying around in our own stores. We are imagining that Mr. Simmons has a sort of way of creating profits out of things, and if we could get on to his mode of doing it we would make a fortune too. I don't believe we will make it in that way. I suggest this that the tea scale that costs you 75 cents you can sell for \$2.50 by calling it the Rose of Sharon or some other sort of name.

Another thing, your expenses are too large and you are allowing the small things to get away in that way, by not taking care of the incidental expenses of the house, and the money we take in across the counter is slipping through the cracks in the floor and we absolutely don't know where it is going. If I had a criticism to make of the jobbers it would be that there is slipping through the cracks in the floor, through the back-doors and through careless clerks a great deal of our profits, and it is the little things that are eating away the profits.

THE PRESIDENT: We have with us Mr. J. C. Miller and we would like to hear from him.

MR. MILLER: Gentlemen, it is my experience in the supply, as well as yours in the Hardware business, that the expense of doing business is increasing and gradually the profits are decreasing. As Mr. Donnan says, we cannot blame anybody but ourselves for not getting profits. The manufacturers want to see us make profits. If we simply get together we can maintain prices and make some money and I am working along that line with the supply men. My instructions to my traveling men are not to sell anything that we do not make a profit on and it becomes necessary to give our men the inside information regarded as private, so they know competition when they see it and some of them would give the customers the benefit of it, and the only thing I had to do was to get rid of the man that did it. There are a great many articles that there is no profit in and I have quit handling them. The thing we need is back-bone, the nerve to ask a price and get it.

MR. SANFORD: Mr. President, I had an experience in business this year which has been worth a great deal to me and it may be worth something to you. It is surprising what men can do if they make up their minds to do it. Then there is another thing, we give the retail buyers credit for knowing more than they do.

This last year, owing to the failure of crops, there has been a loss of about \$30,000,000 and conditions were therefore hard in our territory. For the first eight months of our fiscal year our sales fell off and the profits were cut down considerably, so that we suffered a loss, and so I made up my mind that profits could be realized and we made enough money to declare one of the best dividends in the history of our business. I made not only increased sales but increased the prices and increased the profits. I called in the traveling men 'Xmas week and showed them our losses, the expense of the business, and then gave them prices and impressed on them that they must carry out our policy, and so we increased prices all along the line. We have made a profit and if you will follow the same policy you can make profits too.

MR. MOORE: Don't you find, Mr. Sanford, that the cutting of the prices, rather than the increase in your prices, results in the other fellow getting the sales.

MR. SANFORD: Of course we lose some, but we have to do it to maintain the price.

MR. DUNLOP: Mr. Stuart, I would like to hear from you on the expense account proposition.

MR. STUART: There is a question I would like to ask Mr. Sanford. Do you classify your customers at all?

MR. SANFORD: From St. Louis, we usually ascertain St. Louis prices and add the freight.

MR. STUART: I find in my experience it is profitable to check the price of every item sold by the salesmen, and when there are any irregularities at all, I call his attention to it. When they cut the price 10 per cent and they don't hear anything about it, they consider it satisfactory and it is not long before that price is quoted generally. I find it very profitable to call attention to all these things. I think we make too much over our competitors' prices, when possibly it is only an isolated case, but the salesmen pick it up and report it and the house takes it up and almost from the start that price becomes general. I think the jobbers ought to get closer together and work with each other for increase and correct the difference in prices.

PRESIDENT DUNLOP: We will now proceed with the Executive Committee's report.

MR. BARKER: There is some reference made to the Loose Leaf Catalog and that will be reported on later. I move that the resolution as to the size of the sheets and character of the sheets be passed so that our resolution goes before the manufacturers requesting them, as far as possible, to adopt it.

Motion seconded and carried.

There is another matter that should be attended to and that is the question of indefinite rebates. We should put ourselves on record as being opposed to the plan adopted by many manufacturers as to the indefinite rebates.

MR. ESHLEMAN: I move, Mr. Chairman, that that resolution be formulated and forwarded to the manufacturers with request that it be read before the manufacturers.

Motion duly seconded and carried.

MR. BARKER: About the only other recommendation we make is to put another rail in our fence. We have a great many applications from people to join our association, who in their statements show that they have got the capital and men hanging around to do business, that they do so many dollars and cents in business and some times they are located on a narrow-gauge road or on a new road, and sometimes we have trouble in finding them on the maps and the recommendation is that we amend Section 2, Article 3 by adding: "Located in recognized jobbing centers."

It was moved, seconded and carried that the change be made in the constitution and by-laws as recommended.

It was moved, seconded and carried that the report of the Executive Committee be adopted as a whole.

THE PRESIDENT: I would suggest that we have Mr. Donnan's paper, because it is the intention to have a committee take that also to the Manufacturers' Association while they are in session.

MR. DONNAN: Mr. Chairman, I want to bring up a matter before this association that I have given a great deal of thought to and it not only affects this association but it affects the manufacturers and the United States as a whole, and I think I can best say what I want by reading a letter which I wrote to our president with regard to the same.

"MR. F. B. DUNLOP, PRES.,

FORT SMITH, ARK.

DEAR MR. DUNLOP:

Knowing you to be broad-gauged in every respect and feeling that you, through our Executive Committee, will be willing to co-operate in any movement looking to the interests not only of our Association, but to our country at large, I wish to lay the following matter before you:

For several years the railroad systems have given to the shippers of this country, both jobbers and manufacturers, the most miserable service. In our city we have complaint after complaint from our customers of slow delivery, and we are compelled in a large proportion of the shipments we make to have our goods traced to delivery. While they claim to give us a schedule of 250 miles per day on their through freights, almost daily instances can be produced in which they make a schedule of from two miles to one quarter of a mile an hour. If the business of the jobbing and manufacturing trade of this country was confined to the limits of their own States, our corporation commission could rectify same; but, as you well know, ninety-five per cent of our business is interstate, and, therefore our corporation commissions are as worthless to us on the larger proportion of our business as a lot of jay-birds sitting in convention in Alaska. When we approach the railroads, asking that they help us in some way, we are told month in and month out, year in and year out, that their roads are congested with freight, traffic-blocked, and that they are double tracking their lines and give us in

every instance some such frivolous excuse; consequently, each of us, as jobbers and manufacturers, and the individual chambers of commerce of our respective cities have no more effect upon them than water upon a duck's back.

To my mind the time has now arrived when the merchants and manufacturers of this country should rise in their might and endeavor to do something that will result in remedial measures. The most effective manner in which to meet an immovable body is with an irresistible one—the railroads are the immovable and Congress the irresistible—and I submit to you the following:

Do you not think that it would be a wise measure for our association to adopt, asking that each member of our association which covers every State in the South, will write to their senators and representatives, stating the conditions that exist and that we ask to co-operate with us the chambers of commerce in every city represented by our association? Not only this, but that we ask the Secretary of the National Hardware Association to make a similar request of that body, and that we also ask the co-operation of the American Hardware Manufacturers' Association, who will be in session with us.

The Hardware jobbing trade of America and the Hardware manufacturers of America are shippers of the largest tonnage of this country, and we should be able to have great weight in influencing our senators and representatives in Congress to co-operate with us in remedying the above-mentioned evils, and especially so if we can secure the co-operation of the other associations of this country, and I would suggest a measure of this kind passed through Congress and appended to the rate bill when it is perfected, as follows:

W. L. SANFORD,
Of Catalogue House Committee.

It is well known that the railroads of this country advertise an average schedule of 250 miles per day on their through rates. As jobbers and manufacturers we would be willing for them to make 150 miles per day and be perfectly satisfied if they gave us such service, but in the event of their not making a schedule of 150 miles per day, my idea is that we try to get Congress to penalize every railroad of this country five per cent. per day wherever the 150-mile schedule is not maintained. In the event that a shipment is made to or for us of say 600 miles at the end of the fourth day their time limit would be up, and on the fifth day they are penalized 5 per cent. on the amount of freight charged, the sixth day 10 per cent., the seventh day 15 per cent., the eighth day 20 per cent., and so on until our goods are delivered to us. If such a law could be added to the present rate bill, the merchants and manufacturers would have some recourse by which to have their evils redressed, whereas, as it now stands, they have none. In the writer's humble opinion unless some such measure is appended to the rate bill and that soon, and the railroads of this country are, in the future, allowed to continue to treat its shippers in the manner in which they have been doing, for fully three years past, the time is not far distant, when, if a vote of the shippers of this country was taken, rather than stand the injustice to which they have been subjected, fully 75 per cent. of the most conservative merchants and manufacturers of America would cheerfully vote for governmental control of railroads.

MR. DONNAN thereupon offered the following resolution and suggested that the same be brought before the manufacturers' association.

WHEREAS, It is well within the knowledge of this association that the railroads as a rule, throughout the country, do not give deliveries or shipments commensurate in time with the remuneration they collect for handling such shipments; and

WHEREAS, This state of affairs has continued for a great number of years to the injury of the business interests of both shipper and consignees; and

WHEREAS, The present conditions in this matter are worse than ever before and we see no prospect of immediate or future improvement of this intolerable situation; therefore, be it

Resolved, That this association pledges itself, at a time to be decided on, to advocate and forward by all lawful means within its power the enactment by the Congress of the United States of an act to empower the Interstate Commerce Commission to issue a rule to all railroads requiring a time limit on all Interstate shipments conforming to length of haul and with a percentage of discount on freight bill payable to consignee for each 24 hours' delay beyond the daily movement prescribed by the commission.

It was moved and seconded that the resolution be adopted and that a committee of three be appointed to appear before the manufacturers' association with the request that they give it their endorsement and that this committee appear before that association while they are here in session, so it will get the benefit of both organizations.

The motion was carried unanimously.

The president appointed the following committee to meet with the manufacturers and prepare such resolution as was suggested by Mr. Donnan:

Messrs. John Donnan, George E. King and J. B. Yerkes.

PRESIDENT DUNLOP: I would like to announce committees: Finance Committee—J. D. Moore, Charles H. Ireland and Bruce Keener. Resolutions Committee—Fred. Fox, J. E. Keyser, C. B. Hancock. Nominating Committee—Messrs. Ewing, Sanford and King.

Whereupon a recess was taken until 2 P. M., at which time a joint session was to be held with the American Hardware Manufacturers' Association.

AFTERNOON JOINT SESSION,
Wednesday, June 13.

The conventions of both associations met in joint session at 3:45 p. m., with vice-president Asbury of the Manufacturers' Association in the Chair. He opened the proceedings by calling the attention of the delegates to the lateness of the hour and expressing his regret that the souvenir attractions had probably delayed the opening of the meeting.

Mr. Ireland offered the following resolutions:

RESOLVED, That it is the request of both the jobbers and the manufacturers that in future no souvenirs be distributed by any one until the last day of the convention, and that on that day, one hour be given, say at 3 o'clock, at which time this was to be set aside for this most desirable and serious purpose. Most respectfully submitted.

The resolution was seconded and unanimously adopted.

THE CHAIRMAN: We will now hear from W. W. Webber of Fort Smith, Ark., who will read a paper on the subject.

"THE EFFECTS OF QUALITY DIFFERENTIALS."

I confess I approach this subject with long teeth and ere I am done, may dig up more snakes than I can conveniently kill in the time allotted, but I am conscious of the correctness of my position and am not afraid that even my most radical opponent here to-day will accuse me of chasing an "Aurora Borealis." The term "Quantity Differentials," and the effect of same for the purpose of this argument means the making by a manufacturer of low price to a large buyer, and a price that is higher on the identical goods to a smaller buyer.

WHEN EACH ONE BUYING MUST COMPETE IN THE SAME TERRITORY for the same trade. That this is true and has been true from time immemorial cannot be successfully denied, but the fact that it has obtained is no argument in defense of it and does not prove that the practice is right or that it is good business.

At the time each manufacturer was operating his plant independently of all others in the same line of business it was possible for the small or medium buyer to get concessions that would put him in line, but in this day of consolidations or Gentlemen's Agreements, or pooling where there is a fixed and fast price, and the trade is parcelled out and assigned to A, B and C, lists with a 5 or 10 per cent. differential prevailing between each—the man whose business does not warrant the purchase of the first or second quantity is handicapped to the extent of the differential, and just so long as this practice prevails, just that long

will the manufacturers' product be distributed in an unnatural and unequal way. I do not believe there is a manufacturer here to-day who will controvert this statement.

This is an age of quick transportation and a time when

A BUYER IS NOT CONFINED TO ANY PARTICULAR MARKET.

If "B" makes a price on an article that is not satisfactory to the buyer, he interviews "A" and if the latter has the former bested in buying he has him on the hip in selling, and the result is "A" gets the business at a margin whereas if "B" takes it at the competitive price he has lost money—and he must take it or keep his goods because "A" has set the pace. This is not confined to one or two items in a man's business, but on the contrary has grown limitless in its ramifications until it affects our entire line.

I have always been led to believe that it was my duty to foster and encourage a customer—to build him up and help him to expand to the end that he may be useful to me, that I may use him to make money for myself while he makes money for himself—that it is a foolish and mistaken policy to load him to the gunwales with an item that I know he cannot sell profitably in competition with his neighbor, and of course I do know because I am master of the situation, and when I thus make fish of one and fowl of the other and expect both to be useful to me disappointment awaits me around the corner. We only ask that we be put on an equitable basis—that if differentials must be made they should not be so glaring and unequal as to amount prac-

W. W. WEBBER,
Of Executive Committee.

tically to a prohibition. You can never hope to have an even distribution of your business and numberless loyal and satisfied customers when with this knowledge aforethought.

YOU DELIBERATELY EQUIP ONE MAN TO ANNIHILATE ANOTHER.

It is one of the impossible things in business.

Those to whom you give the hot end of the poker will never remember you very kindly, and to those to whom you give an inside, put on the ground so to speak, always have a sneaking idea that some other fellow is in the cellar. That is human nature to a hair. Whenever you place a customer at a disadvantage you must know that in so far as your line is concerned he cannot make a success of it—that if he sells your goods at all it must be done at a niggardly margin or no margin at all and that eventually he must cease to be useful to you. Were he to give you an order for enough goods to command the inside, you would remark that he needed a guardian and then and there advise your credit man to keep a weather eye on him—and yet

YOU PLACE TEMPTATIONS BEFORE US EVERY DAY,

knowing that if we take the small amount at the long price we are destined to unload at no margin, and if we take the greater quantity to get the short price we have water on the brain.

We are not croakers, but we do insist that we should not be expected to accomplish the impossible, you must not expect us to get \$1 for an item that can be bought for ninety cents, especially when the item is one of your own make and this difference in price made possible by you. If all your customers had the same buying and distributing capacity this question would never rise or if it did would solve itself. There is no necessity

for specialization or the calling of names, but there are seated here to-day manufacturers who know that my allegations are true though their deductions may not be the same as mine and I would not have them infer that we are making a demand—but only an effort to demonstrate to you that

UNDER THE PRESENT CONDITIONS YOUR POLICY IS WRONG, and as proof of this we cite that on any item where there is free and open competition with no strings tied to it in the way of classified lists the business is done by those who are favorably located in the matter of freight rates; but on all items the sale of which is manipulated by a joint agreement of those producing them and where the quantity governs the price you find a different state of affairs. I concede that there may be conditions under which a quantity price must be made by a manufacturer. One would be where he has produced too much, or the consumption has not reached the proportions he figured on and he must unload to lighten his burden, but where a manufacturer has a steady and even demand for his product and his output is controlled by years of experience in his line such a condition is rarely seen, and in naming his selling price it occurs to me that wisdom would dictate that he make it possible for all who handle his product to make a reasonable margin.

There are jobbers before me to-day to whom some Hardware items are absolutely distasteful and they are striving with might and main to eliminate them from stock, and while the manufacturer, whose goods come under this ban may be strongly entrenched and hard to oust, the time will surely come when he will feel the effects. The constant dripping of water will wear away the hardest stone.

THE CHAIRMAN: I feel perfectly justified in saying that the manufacturers, I believe, will recognize this as a very important subject and I would be very glad, indeed, to hear from any of you on the floor.

MR. GARLAND was called on for remarks. He said in part: I am very happy to say in our line of goods at the present time we have the same price to all jobbers, that is on account of the peculiar conditions governing; at the same time it seems to me that this is a very important subject, and it is very hard to get manufacturers to make the same price on any quantity, whether it be to the jobber or to the consumer. It seems to me that the laws of trade are not in favor of such a move. When a manufacturer buys raw material he usually gets a lower price on a thousand ton quantity than a man who purchases but 50 tons. The speaker referred to the natural tendency of manufacturers to sell in bulk where it was possible to avoid numerous credits and added expense occasioned by sales in small quantities.

ROBERT GARLAND,
Chairman of Executive Committee.

At the close of Mr. Garland's remarks, the chairman called up the subject, "Uniform Freight Classification" for general discussion. He said an attempt had been made to get some large railroad man—a man with large railroad interests—to attend the afternoon meeting for the purpose of giving the delegates of both associations at first hands the position of the railroads, but they had not been successful in securing the attendance of the proper party.

Mr. J. C. Schmidt, of the Manufacturers' Association, suggested that if anything was done in regard to uniform freight classification that the Manufacturers' Association and the Southern Hardware Jobbers' Association should get together in proper committees and consider the subject. Mr. Schmidt said he would like to hear from the Southern Jobbers on the subject of differentials, so the committee of their Association could have an idea what the wishes of the Southern Jobbers were on the subject.

MR. MOORE: I have been discussing the subject with the other Jobbers. My idea is that we would like to have a good differential between carload and less than carload, and in that way it would help the jobbers to get a little better profit.

MR. SANFORD, of Texas: Mr. President, the freight question

J. D. MOORE,
Of Advisory Board.

is not a pleasant one for us in Texas. We have spent more time working on freight matters than we have in buying goods. As I had occasion to say this morning, and I repeat, that the life of the Texas jobber depends upon the differential between carload and less than carload shipments and as that differential is decreased or increased, so is our prosperity increased or decreased. We never go to the railroad people and ask that they increase the differential by advancing the less than carload rates, because by so doing we would antagonize the retail dealers, but we are eternally hammering for lower rates on carload shipments and in so doing we enlist the interest and co-operation of the retail trade as well. So, from our standpoint, we would ask the gentlemen to use their influence for the widening rather than the narrowing of the differential between the carload and less than carload shipments.

MR. MOORE: The Southern Jobbers would be very glad to see a uniform classification throughout the country. It would simplify matters very much.

MR. POND of the Nicholson File Company: It would seem to me wise for your committee, or a joint committee, or somebody to consider the matter relating to the rates.

THE CHAIRMAN: I would suggest that the two committees confer together before leaving Hot Springs, with the hope of drawing a resolution which can be introduced into the Executive sessions of the respective associations of the Manufacturers and Jobbers.

Gov. GOODELL said he was in favor of rate legislation by Congress. He said it seemed to him a sort of patchwork for us to attempt to secure better rates upon this railroad and upon that and attempt to get the whole thing accomplished. He said he believed if a proper rate bill was framed upon the principle of a square deal that the classifications would be made all right.

JOHN DONNAN, of Richmond, addressed the meeting and read a letter which he had sent to Mr. Dunlop, President of the Jobbers' Association, on the subject of freight rates and delays of goods in transit. This was the same letter which had been read by him at the jobbers' meeting in the morning. He also read a copy of the resolution which had been adopted by the Jobbers at their last session on the subject.

BANQUET.

The banquet of the two Associations was given as a joint function on Wednesday evening, June 13. Julius C. Birge officiated as toastmaster, a position for which he was well qualified. He was introduced by N. A. Gladding in his happiest manner, when Mr. Birge delivered the following words of welcome.

ADDRESS OF J. C. BIRGE.

Ladies and Gentlemen:—The graceful and highly flattering introduction of your chairman makes it clear to me, at least how he secured a good life partner. He is able to speak very comforting words and if part of what he said were true I might hire out to become a Governor.

Now, my friends, with a view if possible to give the keynote to the spirit of this occasion, I would request that you all rise and sing Auld Lang Syne.

J. C. BIRGE.

It is clearly the plan of our committee that this occasion shall be a social diversion and not a business session. Possibly not all folly—certainly not all Hardware. I have just discovered on the program that, without previous information, I am to welcome somebody or something, possibly the Spring time. You were given three hearty addresses of welcome yesterday and one very much needed prayer, recommending that the healing waters here should become your chief beverage. One or two of the officers whose names follow mine are doubtless responsible for this appointment. Mark Twain on being asked his opinion of the future places of reward and punishment replied that for personal reasons he would not like to do so, because he had friends in both places. I think, or at least, hope I have friends in both, those gentlemen, which fact would make it indelicate for me to express my opinion concerning the placing of my name on the program. As is true that one would make himself conspicuous if his legs were longer than necessary to reach from his body down to the ground, so on the same theory I imagine that, unless a toastmaster desires to make himself especially conspicuous his introductory remarks need be no longer than are necessary to reach from his head up to the next speaker.

Now, were more verbiage desired I assure you that I could, on opening up my cold storage, find two or three old frozen jokes which, if they were thawed out and labeled, "1906," could be served as the potted meats are proposed to be served by the investigated packers, with a date as an assurance of freshness, but the few jokes which I have and keep in reserve would not need to be treated with chemicals. It is gratifying that competitors in business who are understood to be fighting each other on their home fields will sit together as friends and brothers. Yes, Cain and Abel and also I believe Jacob and Esau were brothers and I presume that Jacob is still abroad in the land ready to exchange a mess of pottage for a patent right or possibly to accept a railroad pass or rebate. We understand, of course, that there is no gentlemen in this audience who ever have been guilty of accepting any railroad courtesies of that character and it is evident from the vigorous expressions of our law makers and the press that they also are absolutely innocent. But when a

great conflagration swept over Chicago in the North and Baltimore in the South, when destructive floods deluged Johnstown and Galveston, when the mighty earthquake upheaved Charleston in the East and San Francisco in the West the merchants and manufacturers were the first to come to their relief.

I am informed that one Sacramento Hardware merchant recently transferred one-half his entire stock of merchandise to his competitors in San Francisco at the sacrifice of his own prestige and profit.

While idle millionaires sailed their princely yachts along the shores of the Mediterranean that they might feast their eyes on ruined cities at the foot of Vesuvius apparently unmindful of the personal suffering, the busy men at home were sending aid. The merchants and manufacturers of America as competitors are holy terrors but in every other department of life they are the most brotherly people on the face of the globe.

It therefore seems eminently proper that we hear from the heads of the two leading organizations present at this convention and it is my pleasure first to call upon F. B. Dunlop, of Arkansas, the President of the Southern Hardware Jobbers' Association. He needs no introduction to this audience.

President Dunlop responded felicitously in the following characteristic manner:

PRESIDENT DUNLOP'S ADDRESS.

He spoke as follows:

Mr. Toastmaster, Ladies and Gentlemen: I believe it was Socrates who said that "he is a wise man who knoweth himself." Measured by such a standard, I can, for once, claim to be possessed of some little wisdom, for I am most fully convinced that I am in no way related to Chauncey M. Depew, and in this connection I am reminded of a news item I noticed in a paper not long since informing the reader that Mr. Simkins had fallen out of a carriage and broken his neck, but received no further damage. I apprehend that after I shall have finished this address you will have received no further damage than my speech, the probabilities being that it will prove fatal.

Commerce has ever been the hand maiden of progress, both as it affected that state in shaping its destiny and as it effected the individual in furnishing an inducement to expend his energy in channels that would bring blessings to mankind, thereby developing in himself the higher and better elements of his nature. Men who take but a cursory view of history are apt to contend that the civilization and progress of the nineteenth century is due alone to the accomplishments of great generals, illustrious men of letter, investigators into the mysteries of science and the fiery eloquence of a Luthe, a Calvin or a Knox. No question but what they contributed to it, but throughout the time, as statesmen, poets, generals, preachers and scholars, have been struggling toward the better light, there has been a class of men who with silent energy have contributed inestimably to all that has made nations great and mankind better. I speak of the manufacturers.

I am glad to have the privilege of being with you to night and glad of the opportunity of bringing to you a message of peace, good will and brotherly love from the South. While the prime object of the organization of which I have the honor to be President is to promote the financial welfare of its members, yet in endeavoring to better our financial condition, we have not been unmindful of other obligations. While our association is sectional as pertains to its membership, yet we endeavor to disseminate patriotic sentiment and to promote the growth of a peaceful, loving American brotherhood, through which shall run no such geographical mark as "Mason and Dixon's Line."

I am confident that there is not a member of the Southern Hardware Jobbers' Association who will not support me in saying that we stand for National unity and American brotherhood; that we will cherish what is good and great in the history of every section of our common country; that we will claim as our common heritage the noble virtues and illustrious deeds of our great men whether they lived in Ohio or Virginia, in Massachusetts or South Carolina or whether in the late Civil strife they wore the Blue or the Gray. Grant and Lee, Sherman and Jackson, Hancock and Stuart, on both sides generals of unblemished character, belong to no section but to the whole country. They are "immortal names that were not born to die" and their fame is the common heritage of us all.

We will bind the laurel to American manhood wherever we find it and catch from it an inspiration for higher achievements in our country's service, for when the last American soldier has folded his arms to "sleep the sleep that knoweth no waking" and has been lovingly laid to rest in a patriotic grave, yea, when generation after generation shall have come and gone, Southern and Northern poets will sing their praises in historic song and Northern and Southern historians will faithfully portray and proudly point to the matchless bravery of the American soldier as one of the proudest monuments of our country's glory.

The adversities of the South have stirred her manhood, stimulated her energies and prepared her to work out for herself and posterity a far greater and more fruitful career than she ever attained when the tide of her fortunes ran at its flood. She takes no step backwards, she turns no wheel of revolution, but under the Stars and Stripes and to the music of Hail Columbia she touches elbows with all brother Americans in their glorious onward march of peace, progress and prosperity.

The rainbow of hope for the future has risen auspiciously and painted the skies of the years to come with a destiny for our fair Southland, pregnant with opportunities which shall ripen into the fulfillment of our fondest dreams. The violets still bloom in the depths of her valleys, while the starse sit each upon his ruby throne and watch with sleepless eye a golden land of beauty and sunshine from which even in the disruption of southern institutions the old romance has never departed. Why should the cypress droop across the path of hope, or mourning mark the memorial of a dead cause from which has sprung deathless glory and strong, new purposes, destined to live on forever to splendid results.

We are bonded together as never before in the common bonds of union, loyalty, fraternal love and civil liberty and after a third of a century of peace and prosperity we are kneeling side by side at the altar of a re-united faith.

C. W. Asbury was down on the programme for his share in the oratorical honors, which he repaid as follows:

MR. ASBURY'S SPEECH.

Mr. Toastmaster, Ladies and Gentlemen: I know it is quite the ordinary thing for those who are not fitted for after dinner speaking to express surprise at being called upon. I, therefore, follow the custom. When I accepted the nomination for Vice-President of the American Hardware Association, I thought I could take a long chance, especially as the gentlemen who was unanimously elected President was addicted to golf and could reasonably be expected to survive his term of office. How poorly we sometimes calculate is now demonstrated. Speaking of vice-presidents, I am going to relate a true story of the visit of two gentlemen who occupied that office in different corporations at Pittsburgh. They came from a little city in New Britain and as is quite the common thing, finding themselves in Pittsburgh short, they concluded to call upon a manufacturer whom they knew to be long, and introduced themselves, with an idea of a slight touch. They went to his residence and were ushered into the drawing room by the butler, and when the gentleman came in, they introduced themselves as Vice-Presidents of their respective corporations. He went to the foot of the stairs and called to his wife, "Jane, hurry up, there are two presidents to see you." He came back and they corrected him by again saying they were Vice-Presidents of their respective companies. He went to the foot of the stairs and called "Jane, you needn't hurry. They are only vice-presidents."

It sometimes happens that thoughts are very poorly expressed and upon this facility of expression I am again reminded of a conversation I heard in another great Hardware center, Reading, Penn. As you all know the early settlers of my State came largely from Europe and settled largely in clans, the Scotch-Irish going to the western part of the state and from them has developed the great captains of industry with whom we are all familiar. The quakers took possession of that corner of the state in which my own city is located. From them is sprung simple solid stability, a certain disposition which is greatly admired in some sections. The Germans were shrewd enough to take possession of the fertile valleys in Lebanon, Schoolkill and Burke counties and they stick to the other customs of east and the west being a composite of thrift and energy. And the youth have some times adopted it to use with the English. It was such a conversation I heard. When the train stopped at Reading one of these Germans got on the car, took one of the few vacant seats. He suddenly remembered that he had forgotten an affectionate farewell and went to the platform. When the train started he returned to find that another German had taken possession of the coveted seat. He looked at him a few seconds and said:

"Vell, if a fellow was gone and comes back, is he gone?" The other replied:

"Vell he was, but he aint."

During our stay here, there has been some differences of opinion among some of us and there probably will be differences later, but to-night, gentlemen, we join in a feast of love and high appreciation and hopefulness of coming similar occasions. Upon the subject of hope I know that many of you have read in the trade press a motto adopted by Hardwaremen in San Francisco, but for the benefit of those who have not heard it, with your indulgence, I will read it.

Keep a-going, if you strike a thorn or rose,

Keep a-going.

If it hails or if it snows,

Keep a-going.

'Taint no use to sit and whine, when the fish ain't on your line,

Bait your hook and keep a-trying,

Keep a-going.

When cold weather kills your crops,

Keep a-going.

When you tumble from the top,

Keep a-going.

Suppose you are out of every dime, getting broke aint any crime,

Tell the world you're feeling fine,

Keep a-going.

If a fakir predicts a 'quake or if mother earth does shake,

Keep a-going.

'Taint no use to whine and cry,

Keep a-going.

I fully realize that little was expected of me and this is emphasized when I look at the names of the distinguished gentlemen who are to follow. It would probably have been wiser had I responded in the same way in which I heard a governor of one of our great states respond to a toast to which he had been assigned. His response in full was: Gentlemen, I thank you, my position here reminds me very much of the engineer who had designed a great bridge. He rather expected when the bridge was completed and at the dedication exercises he would be called upon to make a speech and was careful enough to prepare himself. When the day arrived and his turn came, he opened up very boldly, "Ladies and Gentlemen, the spot upon which we now stand, forty years ago was a howling wilderness." Having reached that point he seemed to forget why he was there. He thought exercise would renew his memory, so he started again, "Ladies and Gentlemen, the spot upon which we now stand, forty years ago was a howling wilderness. I wish to heavens it was now." But it would be unfair for me to leave you with such an impression as such is not sincerely my wish except so far as my appearance on this platform. I do most sincerely wish that we may have the pleasure of many such occasions and the privilege of meeting you all.

Ex-Governor Hoard of Wisconsin made an address on "Definitions," which was thoroughly enjoyed by those present, who were edified by his sensible views.

Ex-Governor Benton McMillan of Tennessee made a rattling address, rightfully named as "Recollections of Twenty Years in Congress," and they were reminiscent to the fullest extent. He kept the audience in good humor while rehearsing the many incidents in which he took part, so all regretted when he had concluded.

The subject of "Enterprise and Comradeship" was left for Rev. Willard Scott, D. D., of Worcester, Mass., to enlarge upon. which he did in such humorously effective manner that his many witticisms kept them all so full of mirth with the stories he told he was voted by all, "A fellow of infinite jest and most excellent fancy."

THURSDAY MORNING SESSION, JUNE 14.

The convention was called to order in executive session at 10 o'clock. The proceedings opened with report of committees.

The Press Committee made its report.

John Donnan of the Cast Plow Committee reported.

The report of the Steel Plow Committee was received.

James H. Kennedy, Editor of the *Hardware Dealers Magazine*, then addressed the convention on

THE BEST BUSINESS IN THE WORLD.

Mr. President, Ladies and Gentlemen of the Hardware Trade of America:

The theme which has been selected by your committee for a very brief discussion at this hour, recalls to mind an aged clergyman who chose for his text the one word "Woman"—a subject about which, experimentally, the average minister knows very little.

Looking over his congregation he said, impressively, "There is but one perfect woman in this world," and then after a long pause he added, "and every man in this congregation believes that he has her."

Thus should it be in the hour of one's life. No man can be said to be perfectly fitted into his business or professional environment, unless he believes with all his soul, and mind, and prejudices, that this business, or profession, is for him the very best in the world.

There are men who succeed when they do not love the occupation in which they are engaged. There are men, possibly, who can be happy even though they do not love their wives, but in both cases they are compelled to replace enthusiasm with a very

large amount of hard work, and in the case of the husband, to use a great deal of diplomacy.

There is everything in this choice of life's occupation in getting a good start that is good because it is the right start. Few men there are who, when once upon a specified plane of endeavor, are permitted to leave off and begin again; to have a second start, no matter how so much it may be desirable.

They tell of an Irishman who was shown an old house by the roadside, and told that it was haunted. That the owner would be glad to give it to the man who would remain in it for one night.

"Sure and that's my chance," said Pat, as he started to find the owner and the key.

He locked himself in and went directly to bed, and being of an even temperament, in ten minutes was fast asleep. At midnight he was awakened by groans, and the rattling of chains and on looking up, he saw a ghost sitting on the rail at the foot of his bed.

Pat captured his clothes as he went, took the stairs at one leap and flew down the highway like a Mercury with triple wings. After a run of a mile, he dropped on a log and gasped for breath. He heard a hollow cough near him and there on the other end of the log sat the ghost.

"That was a great run we had," he said.

"You're right," gasped Pat, "and as soon as I get me breath, we will have another one."

There are some men who begin life in a field of labor that does not provide in every sense of the word the fullest opportunity for the best use of their powers and for their personal happiness in that occupation, who are able oftentimes, by severe exercise of courage and self will, to lay aside an opportunity that may seem profitable, and devote themselves to that line of work for which they have discovered their fitness. Like Pat, they wait for the coming of that which the athletes call their second wind, and in the long run are quite certain to outdistance the ghost in their race upon the highway of life.

While the college graduate, whose course of study has been long enough in the formative period of his life, for his ideas to mature and for the discovery of the bent of his talents, is in the main able to select a future environment of business or profession suited to his tastes and talents, no such happy condition is offered to the average boy, who leaves the high school, or more often the grammar school, and begins immediately upon the serious business of life; the youth who answers your advertisement "A Boy Wanted," and begins at the bottom of your ladder at from five to six dollars per week.

He has reached the age where but one idea is impressed upon him—that he must find something to do; in too many cases prematurely impelled forward by the knowledge that the little he can earn will be a welcome addition to the family purse.

What means has he for discovering that one ideal situation for which nature intended him, and how could he be expected to recognize it, in his immature boyhood? Once in a thousand times he may fall into it; once in a hundred, may he come near to it; many a time he misses it altogether.

His choice of an occupation is in the most cases one of blind chance only. He sets forth to secure a position. The first place upon which he stumbles may be the means of determining his future. A law office is in need of a boy, and he becomes a lawyer when he should be herding steers in Texas. A drug store engages him. He becomes a druggist, when he should be drawing plans for cathedrals, or building bridges across the gorges of the Rockies. He is set to selling shoes, and sells them until he handles his last last, when he should have been in the pulpit, saving souls and discoursing against the sins of a godless generation. He goes into the Hardware business, when he by right should have gone into politics, and won his way to the more than imperial honor of the Presidency of the United States. Or he edits a trade journal when he ought to have been on the highways pounding sand.

There may be no practical method by which this state of affairs can be remedied. In an ideal state of society—in that time when there are no catalogue houses, and but one jobber to a State—a plan will be formed by which each young man will be set at first in the one groove intended for him, and be able to pursue that which for him has become the best business in the world. The manual training schools are a step in the right direction. The parents could aid greatly were they willing to study their children as they do the market reports, or the fashion plates. The teacher who knows his children can give much good advice. The employer can render valuable aid if he looks upon each young boy committed to his care, as a trust imposed upon him, and seeks to learn for what he is best fitted, and aids him in his best natural development.

There is an old saying that the child is father to the man, and students of social economics have gone so far as to declare

that the pictures made by a school boy will indicate the bent of his mind in his years of future development.

Thus the boy who makes skeletons upon his slate will undoubtedly be a doctor. If he draws crooked lines and indicates diagrams that begin somewhere and eventually go nowhere, he will in all likelihood become a lawyer.

If he is happy drawing pictures of Hades and the worm that dieth not, he will undoubtedly become a minister. If he is continually making dollar marks, he will in all probability develop into a Hardwareman, although there are many members of the profession who declare that they have not made a dollar in the last five years.

Still the making of money is not all there is, even in business life. They tell a story of a prominent banker in a small New England town who became rich by methods of close economy and the appropriation of as much of the local wealth lying around loose as he could get his hands on.

This successful financier eventually went the way of all earth, and his loving widow erected above his grave a handsome monument upon which were chiseled these simple and expressive words "He did his best."

But this tribute of love to departed worth was not regarded by the community as complete, until some other person appeared with a pencil and wrote under those touching words, "He did his best," the one word, "friend."

I do not believe there is any line of business, or any vocation pursued by man where there is greater love for the work by those who are engaged in it, or a higher respect for its possibilities, its honor, its solid qualifications, than can be found in the Hardware trade.

There are reasons why those who make and sell Hardware are justified in this loyal and affectionate regard. It is a clean and respectable occupation. It does not lend itself readily to trusts, as was discovered some time ago by a number of estimable gentlemen who sought to gather the jobbing trade under one great canopy of allied and prosperous usefulness. It has never yet been investigated by congressional committees, nor do foreign nations set up bars and special restrictions against its products, as they have in the case of the Great American Hog and other American commodities.

It has never been charged like a certain trust connected with the oil trade with having employed methods of competition that lie loosely between the petty larceny of the sneak thief and the brass knuckles of a highwayman. Nor has it been charged with killing animals already dead and long since prepared for oblivion, and in sending forth rotten products in tin cans for the depletion of mankind, and for an extension of the emoluments of the doctor's trade.

It is not only clean and respectable, but it requires for its best development, a class of men who are above the average of education and intelligence. The training it requires before one can master the intricacies of its many ramifications, is one of severity and continuous application. Any boy can learn the art of drawing molasses from a barrel, or of measuring sugar into the scales without letting the sand fall on the floor; but it takes a long course of application to know all about tools in their endless variety; about the thousand and one things that make up a Hardware stock; about the manner in which goods are made, so that they can be described intelligently; and the way in which they are used, so that the purchaser can secure the best possible benefits from his purchase.

The Hardware business is one of the best in the world because of the small proportion of failures recorded against it. It requires not only brains and experience, but capital. It is a business to which men become attached, and over which they grow enthusiastic after they have so far mastered it, as to appreciate the high and honorable position that it occupies in the world of trade.

It is thoroughly American in its personnel and tendencies. In the grocery trade, in the fruit trade, and especially in the ready-made clothing trade certain of our friends who are of foreign descent, predominate to a large degree. But in nine cases out of ten, the American Hardwareman is of native birth, as was his father and his grandfather.

It is no reflection on our adopted friends from across the waters, that they should not have seized upon the Hardware trade and made it their own. The fact that they have not, is an indication that this business beyond all others, is one of heredity and descent, and that the Hardware millionaire who rides about the streets of our cities in his automobile, can look back with pride to a grandfather who made his goods in a dingy little shop in the backyard, and sold them from door to door, in a new and most successful competition against the foreign-made Hardware of that earlier day.

I do not know of any special reason why these things should be said to you gentlemen here to-day; in fact I have heard most of you tell the same story much more eloquently, with greater fervor and with an inborn conviction that nobody would dare

dispute the superiority of the Hardware trade; reminding me of that Congressman in Ohio of whom an admiring constituent said: "Brown is the greatest statesman in the United States."

"What makes you say that?" inquired a by-stander.

"What makes me say it! Why man, even Brown admits it himself."

Not too often can the admonition be urged upon the successful man of business, not only to discover the bent of mind and the latent capabilities of the boys and young men who are in his employ, but also to use the force of his instruction and example in educating them into the belief that the way to make a success of the business is to love it with all their hearts and souls and to devote themselves to it with all the strength of mind and body.

In conclusion, gentlemen of the Hardware trade, let me cite to you, as an example of what this love of one's business leads to in the way of labor and success, the words of Theodore Roosevelt as summing the whole matter up in one phrase.

Said a friend to him, "How is it, Mr. President, that you are able to perform so many gigantic labors of such immense responsibility without breaking down under the strain?"

Instantly and with an emphasis that gave double meaning to his words, this stalwart first American responded:

"Because I like my job."

The Committee on Resolutions made the following report and presented the following resolutions which were unanimously adopted:

RESOLUTIONS.

The Southern Hardware Jobbers' Association, we, your Committee on Resolutions, beg leave to submit the following report:

Resolved, That we extend to F. B. Dunlop, President, and to C. B. Carter, Secretary-Treasurer, and the officers of this association, including the executive committee, our hearty thanks for their faithful services during the past year.

Resolved, That we extend to the Entertainment Committee, through its chairman, Irby Bennett, our sincere thanks for the many pleasurable features provided for the members of this association and its guests, that have contributed so much toward making our leisure moments enjoyable, especially the very delightful banquet from which we emerged a few hours ago.

Resolved, That we cordially thank Henri H. Beers for the fearless and genial manner in which he has met the problems involved in the discharge of duties of sergeant-at-arms of this organization and to commend his zeal in assembling our business sessions.

Resolved, That a hearty vote of thanks be extended to the management of Homestead Hotel, through their gentlemanly host, Fred Sterry of J. McLaughlin and W. H. McLintoe for the efficient manner in which they have provided for our every comfort and to assure them that we carry only pleasant memories of this session of this convention.

Resolved, That we extend to the ladies in attendance upon our convention a hearty vote of thanks and take this occasion to again express our appreciation of the inspiration and sunshine and good influence so gently but so efficiently exercised during the leisure part of our convention.

Resolved, That we most heartily enjoy the very close intercourse and evidences of friendship and good will extended the Southern Hardware Jobbers' Association by the American Hardware Manufacturers' Association, and to assure them of our appreciation and to venture the hope that as these annual conventions come and go that these relations may become stronger and the mutual interest of one to the other may become more apparent to both and express the desire that our relations may be cordial and beneficial.

Resolved, That we express with very great pleasure and thanks for the very excellent addresses delivered by ex-Governor W. D. Hoard and ex-Governor Benton McMillan, and last, but not least, to Rev. Willard Scott at the banquet on last evening and to express the hope that the high ideals held before us by these able gentlemen may be an inspiration to us and make us seek more diligently to attain better things.

Resolved, That we express our thanks to the trade papers which are represented at this convention, recognizing their importance to us we cordially invite them to be present at all of our conventions and solicit their aid and counsel.

Resolved, That on the death during the past year of Edmond Orgill and Col. B. F. Atkinson this association has sustained the loss of two of its most esteemed members, who have now passed to their eternal reward in the fullness of their ripened powers, leaving behind them a rich harvest of labors faithfully done for a long period and sweet memories of their personal virtues and charm for the consolation of those who knew them best to whom this association hereby express its sincere sympathy. Fred Fox, J. E. Keyser, C. B. Hancock, Committee.

C. B. Carter, Chairman of the Catalogue House Committee, read his report, in the course of which he tendered his resignation as Secretary-Treasurer of the Association for the reason that he was about to engage in another occupation. Mr. Moore presented a resolution for adoption on the subject of

CLASSIFICATION OF JOBBING HOUSES

which was as follows:

To the American Hardware Manufacturers' Association:

GENTLEMEN:—Whereas there appears to be a growing tendency in the territory occupied by our association to establish semi-jobbing houses at new and unimportant points, which are not recognized as

jobbing centers and inasmuch as these concerns are not in position to conduct a jobbing business because of limited facilities, therefore be it resolved that we request the manufacturers that before prices to or in any way, quoting said concerns, that they first be advised by this association concerning the same. We proceed with the view that the interest of the jobbers and manufacturers are mutual and they should, therefore, co-operate along these and all lines in order to secure the proper returns for the capital and labor invested, and that each refrain from doing anything that will militate against the interests of the other; therefore, resolved that the Associated Hardware Jobbers' Associations respectfully request the American Hardware Manufacturers' Association when formulating their trade prices for the territory occupied by our association that they invite and respect the decision of this association. J. D. Moore, C. H. Ireland, Bruce Keener, Committee.

On motion the resolution was adopted with the understanding that the same would be immediately presented to the American Hardware Manufacturers' Association for their consideration.

W. L. Sanford, Sherman, Texas, Roberts, Sanford & Taylor Company, next opened the discussion regarding the

BEST METHOD OF POSTING TRAVELING MEN.

Mr. President:

There are two classes of jobbers, and their business methods are largely dissimilar. Those situated in the large cities whose traveling men are handled exclusively by mail, and those located in smaller trade centres whose traveling men report in person to the house every week or two. We belong to the latter class, which, indeed, constitutes the majority of the membership of the Southern Association, and it is to them alone that my remarks are directed.

TRAVELING MEN ARE A TREMENDOUS FACTOR IN THE SUCCESS OF ALL JOBBING HOUSES,

and to underestimate their worth is a grave mistake. In character and ability they are equal to the men of any profession, and in resource and energy they outstrip them all. The unsuccessful soon drop out, while those who fully measure to the standard requirements are men of force, sound judgment and broad business views, who in many instances are superior to the men under whom they work. They receive the best pay of all employees, because they earn it, and when there is an important vacancy in the house, it is generally filled by a man who has served a term on the road. The office man, treading daily the same worn path; performing the same routine of work; surrounded by the same people, and hedged in by the narrow limitations of his little workshop, frequently becomes dwarfed in his views and narrow in judgment, while the traveling man out in the busy world, in constant contact with the representatives of other houses, both in his line and others, meeting people of all kinds and from many sections with their various and novel ideas, mingling with the consumer, the retailer and the railroad, viewing men and measures from a higher point, becomes himself broader every day of his life. And these facts should be ever borne in mind in dealing with him. Many of his mistakes are from lack of information for which his house, and not himself, is responsible. He is susceptible of business education and is anxious for it, and if he is not well informed, it shows that there is something wrong with the system in the house. He occupies a position different from that of any other employee. While the house shapes a general policy and establishes certain rules for his guidance, still the details must be left to him, and away from the house he must exercise his own judgment and meet the ever changing conditions as he finds them. The war office wins or loses the battle. No matter what stock we may carry, how great the size and assortment, nor to what advantage it has been bought, it will stay on the shelves and prove a bad investment if the salesmen cannot bring these advantages in a convincing manner to the attention of the trade. So, I repeat: traveling men are a tremendous factor in the success of all jobbing houses.

IN THE SALE OF GOODS THE POSTED MAN IS ALWAYS THE MASTER OF THE SITUATION.

I found this true in my ten years' experience on the road, as well as in a subsequent and equal experience as buyer and manager of a business. If the buyer knows more of the details of manufacture, of freight rates, and market conditions than the salesman, then the latter is at a decided disadvantage; and the opposite is true, when the situation is reversed. It is also a fact that the best posted salesman, all else being equal, invariably controls a larger business than his competitors. We are all prone to yield our judgment and patronage to those who know more on a subject than we do, and are slow to give a hearing to those whom we think know less. What is true in all other matters is especially true in the purchase and sale of goods. Now, if these statements are correct, and I am sure that no one will challenge them, it follows that the thorough posting of salesmen is a matter of vast importance to a house, and so fully am I entrenched in this belief that I devote more time and thought to this work than to any other part of our business.

Where freight rates play an important part in the purchase and sale of goods, it is the case in the Southwest especially, the

SALESMEN SHOULD BE MADE FAMILIAR WITH BOTH THE DISTRIBUTING AND INTERSTATE RATES AND THE SHIPPING WEIGHT OF GOODS.

The price of an article in Chicago may be twenty-five per cent. less than the local price, but when the transportation charges are added it may be shown that the local price is ten per cent. less. The shrewd and unscrupulous competitor may sell goods for direct shipment from factory, stating that they weigh about so much and take fourth class rate, when in fact they weigh more than stated and take possibly first class rate. Again, the large jobber, possessing greater influence, may underbill the weight of shipments, securing a less than tariff freight for the customer. This is often done, and works a severe injustice on the local jobber. In some cases the shipments are billed so low that the retail merchants get local shipments at a less rate per hundred pounds than the jobber pays on carload shipments. The salesman should be in a position to show up such false statements, and such unfair competition, and by so doing secure the business to which he is entitled by reason of having a lower delivered price. The profit of a local jobber is practically the differential between carload and less than carload rates, and as this difference is diminished, so is his profit. Therefore, the salesman must be a freight man also, and watch that interstate rates be not lowered by the sharp and illegal practices of the larger jobbers.

THE SALESMEN SHOULD BE GIVEN ALL INFORMATION POSSIBLE RELATIVE TO THE MANUFACTURE OF GOODS,

and the methods employed by manufacturers, and used by competitors to cheapen the cost of goods. If his competitor is selling a 45 pound vise stamped 50 pounds, or 7 ounces Wagon Covers stenciled ten ounces, or tinware made of 85 pounds instead of 100 pounds plate; or patent grass snaths labeled patented bush, or stamped instead of drawn steel rakes, or lighter than standard gauge corrugated iron, he should be able to detect and expose the fraud. A large number of local salesmen actually believe that large jobbers manufacture the goods bearing their trade mark; while, as a matter of fact, they are the same goods which their own houses are offering for sale, the only difference being in the paper labels which they bear. Furthermore, many old patents have expired and many imitation goods are being placed upon the markets constantly, and it is very necessary that the salesmen be kept informed on the subject, otherwise, we find him trying to meet with the genuine article the price on the imitation. This can be accomplished by putting before him whatever information the buyer may gain by his visits to factories, or by conversation with their representatives. And here it might be stated, that a buyer can make no better investment of his time and means than by visiting as often as possible the factories from which he buys. He gains information that cannot be obtained in any other way, and this becomes doubly valuable when imparted to his traveling men, and this should be done at every opportunity.

THE SALESMEN OF LOCAL JOBBING HOUSES SHOULD BE GIVEN THE ACTUAL DELIVERED COST OF THE GOODS.

I know that this policy will meet with much opposition, but I would rather rely upon a man's intelligence than upon his ignorance. It is true that a salesman having the correct cost will more often cut the selling price, but it is also true that in many cases he will fail to secure the business by not having the actual cost. It is just as easy to educate a salesman to get 20 per cent. as 12½ per cent. profit, or 30 per cent. as 20 per cent. profit, and when you have educated him to get the profit your business demands, you have accomplished something worth while. You have attained an object that will be of service to the man, and through him a vast benefit to you. Pardon this illustration:

It is a whole lot better and safer to drive a horse with open bridle, having him become accustomed to the cars, than to anchor your safety on the fact that he has on blinds and cannot see the things that might frighten him. It is all in getting a man started right, in getting his sights elevated to the proper height. The salesman gets a big profit on razors, not because he doesn't know the cost, but because he is educated to get it. I believe in appealing to a man's pride, intelligence and ambition, in having him feel that he is a part of the business, and that the success of the business depends upon his effort and judgment; and this is quite true so far as his own territory is concerned. I believe in winning his confidence by freely imposing confidence in him. But, if you find a man that is insensible to such an influence, then it is best to let him go. I believe in sitting down with a salesman and having a frank, informal talk, swapping experiences, exchanging ideas, discussing policies and reviewing conditions, getting his views on plans and prices, and then adopting them if they are better than mine, and they frequently are. After such a conference, he will have learned a great deal, and so will the manager if his mind is not clouded with self-importance and self-assertion.

A SALESMAN THAT CANNOT BE ENTRUSTED WITH ACTUAL COST OF THE GOODS IS NOT WORTHY OF THE PLACE HE FILLS,

and the quicker you get rid of him, the better.

In this paper, I have endeavored to emphasize the matters upon which a salesman should be posted, viz.: Freight rates and classification; shipping weight of goods, manufacture of goods, light weight and imitation goods, cost of goods.

Just what means shall be employed in conveying this information is a matter of individual preference. In our own business, we supply our salesmen with condensed tariff sheets, giving the competitive rates into their territory; we issue weekly change sheets giving the actual delivered cost and selling price, and if the goods on hand have advanced we give both the actual cost, and in parallel columns what the goods would cost to-day. This encourages them to make a profit based on the advance, and at the same time puts them in position to meet competitors who continue selling at the old cost, as many frequently do. We also file in a regular and convenient place for their inspection, all letters that we think will be of interest and benefit to them; and these they usually look over whenever they come to the house. This puts them in a position to talk intelligently to the trade on all subjects relating to the Hardware business. In fact, it educates them, and that is the object toward which we strive.

MR. BARKER: There is one reference in the gentleman's paper that I wish to attack and that is that after an advance he seems to be willing to sell at the same old cost. This is a matter we thrashed out a good many years ago and we differ on that policy very widely. I believe when goods advance the minute we get the information we should advance the prices in effect.

MR. SANFORD: I know that would meet with opposition. I have traveled on the road for ten years myself and we sell goods on the advance, almost invariably.

MR. MOORE: My experience has been that it is not well to have the cost too prominently in men when trying to sell.

J. G. Lyons, of Little Rock, Ark., read a paper on the subject,

"BACKBONE, AN ESSENTIAL ELEMENT."

which referred to certain prices on commodities in the Hardware line and the importance of holding up the price. This subject was discussed at some length. Matters of an executive character connected with the affairs of the association were taken up and discussed.

T. James Fernley, Secretary-Treasurer of the National Hardware Association, addressed the association at some length in reference to matters in which his association and the Southern Association were mutually interested.

The report of the Nominating Committee was called for. Col. Eshleman, of that committee, reported that the committee had been unable to find any better material than was in the present list of officers, and therefore recommended for the election the old officers, as follows:

FOR PRESIDENT—F. B. Dunlop, Fort Smith, Ark

FIRST VICE-PRESIDENT—R. D. Warren, Memphis, Tenn.

SECOND VICE-PRESIDENT—Frank S. Gray, Jacksonville, Fla.

EXECUTIVE COMMITTEE—O. B. Barker, Lynchburg, Va.; Charles H. Ireland, Greensboro, N. C.; Bruce Keener, Knoxville, Tenn.; W. L. Sanford, Sherman, Texas.

On motion the nominees were unanimously elected by a rising vote. The president called on Mr. Barker of the committee on place of next meeting for a report.

Mr. Barker reported that it had been impossible for the committee to reach a decision. He stated that the manufacturers' association had not yet reached a decision as to the next place of meeting and he suggested that the matter be left in the hands of the committee to be taken up at a later day and the members notified. On motion the convention adjourned *sine die*.

Among the jobbers who were in attendance were the following:

O. B. Barker, Lynchburg, Va., Barker-Jennings Hardware Co.; H. S. Perkins, Louisville, Ky., Belknap Hardware & Mfg. Co.; H. H. Beers, Richmond, Va., Sergeant-at-Arms; John Donnan, Richmond, Va., W. L. Donnan Hardware Co.; Charles H. Ireland, Greensboro, N. C., Odell Hardware Co.; Bruce Keener, Knoxville, Tenn., C. M. McClung Co.; W. L. Sanford, Sherman, Texas, Roberts, Sanford & Taylor Co.; F. B. Dunlop, Ft. Smith, Ark., Speer Hardware Co.; C. B. Carter, Knoxville, Tenn., Secretary-Treasurer Southern Hardware Jobbers' Association; C. R. Wright, Vicksburg, Miss., Wright Bros. Hardware Co.; C. G. Wright, Vicksburg, Miss., Wright Bros. Hardware Co.; John M. Graham, Rome, Ga., Griffin Hardware Co.; John Hoen, Baltimore, Md., Henry Keidel & Co.; L. W. New, Philadelphia, Pa., E. K. Tryon, Jr., & Co.; B. F. Eshleman, New Orleans, La., Stauffer, Eshleman & Co.; E. R. Philip, Atlanta, Ga., American Can Co.; J. B. Columbia's Brightest Star

Hauthaway's "Star" Brand

Harness Dressing and Harness Oil Blacking---

Their equal in quality, in salability, in all-around satisfaction—has yet to be produced, anywhere, by any one.

Half A Century On the Market

Is sufficient popular endorsement of these goods to be in every hardware store in the land.

Sell? Try a sample order of

Hauthaway's Star Harness Dressing

It gives a beautiful polish, will not crock or smut, will make any harness, new or old, look fresh, clean and handsome.

Hauthaway's "Star" Harness Oil Blacking both oils and blackens—imparts new life and looks into any harness.

HAUTHAWAY'S AXLE OIL--

With the Hauthaway body—not a greasy body, but a full frictionless, wear-resisting body—solves the "hot-box" question. It makes axles as slippery as eels.

Handle the "Star" Brand. It leads to sure and good profits. Send for catalog and prices.

C. L. HAUTHAWAY & SONS

346 Congress Street

BOSTON, MASS.

WHERE DOES THE MONEY GO ?

One dealer writes: "My sales amount to \$600 per week. I make 20 per cent. profit on everything I sell, my total expenses are \$80 per week—still I am not making money—**What's the matter?**"

Why that's easy—failure to record charge sales—carelessness or dishonesty of clerks, or a faulty system of keeping accounts.

Our Standard system gives you a check on all leaks. Costs you nothing to learn all about it—saves you money, time and worry after you do.

THE STANDARD CASH REGISTER CO.,

WABASH, IND.

28 FACTORY ST.

YOU CAN BUY

a kind of a watch for \$1.00. Nevertheless, when you want a reliable one you pay something more. It is the same way with Hack Saw Blades.

THE "STAR" BLADE

costs a little more than other brands, but the difference in price is offset ten times over by the difference in the cutting qualities.

MILLERS FALLS COMPANY,

28 WARREN STREET,

NEW YORK.

"L & G" GENUINE STAG HANDLE CARVERS

With silver ferrules, are so well made, and such attractive, all-the-year-round and Holiday sellers, that you are blind to your own interests not to investigate their merits.

Sixty-Eight Years on the Market

We make Table Cutlery of every description. Also Painters', Druggists' and Butchers' Knives.

Our long experience at the business is the best guarantee of their excellence.

Have you our complete catalogue?

Get it to-day.

It will open your eyes to your needs in the best selling Table and other Cutlery.

Lamson & Goodnow Mfg. Co.

N. Y. Office, 45 Murray St.

Shelburne Falls, Mass.

ROSE Water Coolers

Are a distinct step in advance of any other Water Cooler on the market.

Why? Because

The **TEMPERATURE** of the water is maintained evenly. It does not become injurious "Ice Water" but cool, refreshing "Spring Water."

PURITY: Water and Ice are kept in separate compartments. The Rose Water Cooler has no coil pipes, corners, crevices or un-get-at-able parts to make it foul, slimy or sour.

WATER CONTAINERS: Made of antiseptic, filtering earthenware, faced with white porcelain. Are removable for cleaning.

ECONOMY: Rose Coolers Use 50% Less Ice Than Any Other Cooler On The Market.

That's worth considering. The Rose Cooler will pay for itself in a season.

SIMPLICITY: There's nothing complicated about it. The Rose Cooler is built for hard usage.

POPULARITY: Our sales this year are four times as large as last year—conclusive evidence that the Rose Cooler is a quick seller, the very reason why you, Mr. Hardwareman, should handle it.

The Rose Water Cooler is the Best for Hotels, Schools, Offices, Public Buildings, Stores, Homes.

We have a special proposition for Hardwaremen. Write us to-day.

The Rose Manufacturing Co.,

505-7-9-11-13 West 50th St.
New York City.

We are doing some effective advertising of

SARGENT'S ARTISTIC HARDWARE AND EASY SPRING LOCKS

and as a result intending builders are becoming interested and will use the better grades of our hardware in their buildings. You should share in this profitable business and can do so if you will supply the buildings to be erected in your neighborhood with these standard goods. Every building so fitted means a satisfied builder—your pleased customer. If you desire any information regarding these goods please write us; we shall be glad to post you.

Sargent's Gem Food Chopper

always a good seller, is growing in popularity and sales are increasing. It is well advertised and you know how that helps. It should be in your stock.

Sargent's Planes

both Wood Bottom and Iron, stand the daily test of the work-bench. They are intended for the use of careful mechanics who want the best tools. We warrant them fully in every respect.

Do you sell these high grade tools?

SARGENT & COMPANY, Manufacturers

NEW HAVEN, CONN.

NEW YORK

BOSTON

CHICAGO

The *Marlin* Baby Featherweight Repeater. A new high-grade .22 caliber repeating rifle which weighs only 3 pounds 10 ounces!

But this gun is no toy. It is a new and business-like rifle. It combines all the good old *Marlin* features—solid top, side ejection and simple mechanism—with the newer sliding forearm action which is so easy to work without spoiling the aim.

The reduction of cost and weight is positively not at the expense of *Marlin* quality. The high standard *Marlin* drop forgings are used in the breech block, frame and inside working parts. The rifle has the pleasant *Marlin* balance. Both .22 short and .22 long-rifle cartridges can, by means of an extra carrier, be used in the same

gun—a *Marlin* feature which all rifle shooters greatly enjoy.

The *Marlin* standard of accuracy is maintained in the highest degree by the most careful boring and the deepest grooving, which last care gives the barrel about double the life of the product of other rifle makers.

Take a *Marlin* Featherweight on your fishing trip or to the summer camp. Take one home to the farm or wherever your vacation finds you, and see what pleasure a good, light .22 caliber repeater can add to your outing.

It is an ideal squirrel rifle and can be relied upon to get all the killing power there is out of any .22 cartridge in hunting any sort of small game.

If your dealer cannot supply you write us direct. A complete description of this wonderful little rifle is given in our 1906 Catalogue. Sent FREE for six cents postage.

TO ALL DEALERS HANDLING FIREARMS

The above is one of seven half-page magazine "ads" to be used by the Marlin Company in their 1906 advertising campaign. These advertisements will be inserted in a list of magazines selected for their *quality*, known to be bought and read by a class of people financially able to buy **MARLIN** repeaters, and having a total guaranteed circulation per month of 5,000,000. Estimating five readers to a magazine, this will give a total for seven months of 25,000,000 readers.

In addition, **MARLIN** goods are advertised in farm papers, hardware papers, sporting goods papers and in many miscellaneous publications.

In our advertisements we ask for six cents in postage stamps. This means that a person must furnish paper and envelope, a two-cent stamp for mailing, include six cents and take the time and trouble necessary to write us a letter. Our object is to cut out catalog collectors, young boys and girls and people who are not interested enough to invest ten cents and the time and trouble necessary.

We reason that if a person is interested enough to do this, it is worth our while to go after him seriously and earnestly, and on all inquirers answering these advertisements and spending ten cents on us we spend more than twenty cents.

We send each and every one a 136-page catalog illustrated with hundreds of engravings, having a beautiful cover in colors and containing a large amount of general information interesting and instructive to all shooters whether they use **MARLIN** repeaters or not.

We send also a copy of our 96-page illustrated testimonial book and a personal letter in which we refer them to the nearest dealer that we know who carries a good stock of **MARLIN** goods and is enterprising enough to follow up an inquirer and try to sell the man a **MARLIN** repeater.

We also send to that dealer the name and address of the party inquiring, thereby putting the dealer and the consumer in direct communication one with the other. We also follow up the customer and urge him to buy through the dealer.

Our advertising campaign each year brings us thousands of inquiries and makes us a great deal of expense and trouble, as you can readily see, but we believe that it pays us and it will pay you if you will take part in it.

If you are interested please write us and give us full particulars as to exactly where you stand on **MARLIN** goods. If you are with us we want to know it and send you some of this business. Write us to-day and tell us whether you want to be on our dealers' list or not.

The Marlin Firearms Co., 89 Willow Street, New Haven, Conn.

REVIEW OF THE MARKETS.

WIRE NAILS: The mills continue to make shipments on contract orders. The California wants now so regular in the market call for large quantities of this class of goods especially. A readjustment of freight rates in some directions is responsible for lower prices being reported, where previous quotations are affected. The market is in excellent condition, and steady in tone. Quotations are as follows: f.o.b. Pittsburgh, plus actual freight to point of delivery, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|--------------------------------|--------|
| Carloads to jobbers..... | \$1.85 |
| Carload lots to retailers..... | 1.90 |

New York.—Demand among local jobbers reported as being only moderate. Range of prices satisfactory and jobbers' prices on small lots from store fully maintained, being quoted on the basis of \$2.15 per keg.

CUT NAILS: At the recent meeting of the Cut Nail Association prices were reaffirmed, making no allowance for the sluggish condition affecting the market. Filling contract orders keeps the mills moderately busy. Concessions on carload or larger lots of moderate limit are reported. Quotations are as follows: \$1.75 to \$1.80, base, for carload lots, f.o.b. Pittsburgh; \$1.85 for less than carloads, f.o.b. Pittsburgh; \$1.95 for carload lots, on dock, New York; \$2 for less than carloads on dock, New York. Iron Cut Nails at points west of Buffalo and Pittsburgh are held at 5 to 10 cents advance on Steel Cut Nails.

New York.—Local demand is moderate, prices running nominally the same as have prevailed. Jobbers' prices are maintained on small lots from store, which are quoted at \$2.05 per keg.

BARB WIRE: Jobbers' stocks are extremely light, and sales consist entirely of small lots to bring them up to normal requirements. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | Painted. | Galv. |
|--|----------|--------|
| Jobbers, carload lots..... | \$2.00 | \$2.30 |
| Retailers, carload lots..... | 2.05 | 2.35 |
| Retailers, less than carload lots..... | 2.15 | 2.45 |

SMOOTH FENCE WIRE: The mills have been entering large orders for the future, which will not affect the month's supply, which during the month has resulted in large shipments. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

| | |
|---------------------------|--------|
| Jobbers, carloads | \$1.70 |
| Retailers, carloads | 1.75 |

The foregoing prices are for base numbers 6 to 10. The other numbers of Plain and Galvanized Wire take the usual advances.

AMERICAN SCREW COMPANY: Under date May 24, American Screw Company, Providence, R. I., issues a discount sheet quoting revised discounts on Flat Head Brass Wood Screws, and also on Tinned Tinners' Rivets, while at the same time change is made in the net addition for metallic tinning of Rivets or Burrs from 2½ to 3½ cents per pound. The new prices are as follows:

| | discount |
|---|--------------|
| Flat Head Brass Screws..... | 82½ and 10 % |
| Tinners' Rivets, tinned | 70 % |
| Additional charge for metallic tinning Rivets or Burrs, per pound | 3½ cents |

BINDER TWINE: General market quotations f.o.b. Eastern factories may be given as follows:

| | |
|--|------------|
| White Sisal (500 feet to the pound)..... | 9¼ to 9½ |
| Standard (500 feet to the pound)..... | 9¼ to 9½ |
| Standard Manila (550 feet to the pound)..... | 10½ to 10¾ |
| Manila (600 feet to the pound) | 11½ to 12 |
| Pure Manila (650 feet to the pound)..... | 12½ to 13 |
| Less than car lots ¼ cent advance. | |

ROPE: The following prices may be said to represent the market:

| | Cents per Pound. |
|-----------------------------------|------------------|
| Pure Manila, 7-16 and large..... | 12½ to 13 |
| B Quality Manila | 11½ to 12 |
| Pure Sisal, 7-16 and larger..... | 9½ to 10 |
| No. 2 Sisal, 7-16 and larger..... | 8 to 8¼ |

LINSEED OIL: Under date of June 12 the following quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels.....40 cents per gallon.

In lots of 5 barrels or more.....39 cents per gallon.

The "American" brand for respective quantities, 2 cents per gallon less.

The five-barrel price applies only to deliveries of that quantity at one time.

Double Boiled Linseed Oil, 2 cents per gallon higher than Raw.

Regular Boiled Linseed Oil, 1 cent per gallon higher than Raw.

Calcutta Oil68 cents per gallon.

THE PHILADELPHIA TRADE.

The procession of the seasons has again brought to us the delightful month of June, when even a Hardware man feels more like writing poetry than trade reports but we shall try to curb our pen and keep it down to the prosaic level of the Hardware business. It is hard to conceive of a Spring more favorable to bright crop prospects. Providence has so alternated cold and warmth, sunshine and rain that the country is most beautiful and crops everywhere promise well. About ten days ago we had a short spell of dry weather which threatened to develop into a drought. The rains came in due time to prevent disaster, so that fear is removed for the present.

Our country dealers feel the effect of the promising weather and report a large and satisfactory volume of business. It is hard to find a better index of trade than the orders which come to us voluntarily by mail, and mail orders this Spring are unusually numerous and well assorted, showing that goods are actually needed and wanted for immediate use. The market is firm and with some lines, higher prices are being announced owing to increased cost of manufacturing. We hear of still other prominent lines on which advances will probably be forthcoming July 1st but these changes in price are moderate and not of sufficient importance to justify or induce speculation. This is as it should be and the dealer who buys from time to time for his actual needs will probably find his business in the most satisfactory shape.

With the advent of Summer and resumption in the coal districts of mining, money is beginning to move more freely and collections are easier. The large volume of business done this Spring should result in heavy collections during the next sixty days and no better use can be made of money when received than to pay debts. Such an investment is the very best investment a man can make, and woe usually betides the man who, allured by promises and expectations of larger profits, defers paying his debts and uses his money for speculation. There is nothing—not even a brother—that sticks as closely to one as a debt and long after speculative investments have banished in golden dreams the ugly visage of debt remains to stare the unhappy investor in the face.

Evidently it is time we put a stop to this article for we began by almost writing poetry and have concluded by writing a sermon. *Verbum sat.*

BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

A wet May makes good hay, and a good grass crop in northern Ohio is of great benefit, besides it makes a large sale of lawn mowers and haying tools. The anticipated advance in pig iron was delayed by the settlement of the Longshoremen's strike, but the large purchase of rails may renew its possibility. The high price of pig tin has compelled an advance in tin plate, and will affect the price of all articles in which tin and tin plate are used. Copper and aluminum are very high, affecting many articles in the Hardware line. The heavy purchase of rails for 1907 is a prophecy affecting next year's business. There is good reason for thinking that prices on many lines will be higher in 1907. Manufacturers have anticipated a decline in raw material and hesitated about advancing prices, but when they are convinced that they cannot improve their margins from that source, they will advance selling prices. The farmers are busy preparing for continued prosperity, and a good many business men are busy trying to keep out of jail, as they belong to combinations. The Sherman law and State laws were regarded as jokes until recently. Most people have a notion of what is criminal and fail to realize that the legislature can make an act criminal that was

not so before. Power is conferred upon the Legislature to decide what is wrong, and make it a crime and all good citizens must accept their decision. In the complexity of business new wrongs appear, making changes in the criminal code necessary. The number liable to punishment was never so great before. Legislation may be in advance of public sentiment; at least it causes confusion and discontent. This is not always an evil. It may improve our conception as to what is fair competition. Combinations were formed to avoid the evils of competition between competitors. The new legislation is an attempt to protect the public. The question of public, versus individual rights, seems to be to the forefront. The people through their representatives are demanding a square deal ultimating public sentiment in law and officials are unusually active in prosecution.

THE LOCKWOOD-TAYLOR HARDWARE CO.
C. B. LOCKWOOD, Pres.

THE PITTSBURGH TRADE.

May was a record month for the Hardware jobbers of Pittsburgh. Retailers all seem to want goods, and want them quickly, so that it has kept the jobbers working to their capacity to supply the demand. Some sections are still suffering from the stoppage of coal mining, but where the mines are running trade is very active. On June 12 avote will be taken in Pittsburgh and Allegheny on the question of consolidation. "Greater Pittsburgh" is the slogan, and an active campaign is being waged by friends of the movement. These comprise practically all the business men of both cities, and the large property holders, who believe it will be of benefit to both cities. We have a community of nearly one million people hereabout, and this is the first step toward making this a great city.

LOGAN-GREGG HARDWARE CO.

THE DAVENPORT TRADE.

The editor cannot realize how much he is asking when he wants a trade letter written this hot weather and especially on a rare day in June, when the golf links are in perfect condition; baseball season at its height; country roads smooth and dustless, inviting long drives through the country, which in Iowa is now a veritable garden of Eden. How can he have the heart to do it? The volume of trade is fully up to normal; there is plenty of money necessary to handle the business largely on a two off for cash basis; conservative buying seems to be the rule, but the legitimate demand seems to warrant large and frequent orders. With regard to promises for the future, you are aware that while Iowa is generally regarded as an agricultural State, it has many resources. The products of the Iowa hen alone, according to the State census of 1905, amounts to the snug sum of \$11,705,475. Growing crops of all kinds never looked better than now.

SICKELS, PRESTON & NUTTING CO.

THE MINNEAPOLIS TRADE.

We have had too much rain. In some sections it will seriously affect the wheat crop. It is not too late by any means to raise some other kind of crops, but the area so effected is so comparatively small it will not cut much figure. On the other hand, the moisture has done so much good in so-called dry sections, northwestern part of North Dakota, for instance, that it will, undoubtedly, more than offset any damage in other sections. Business is good, with every prospect of best business the Northwest has ever had. There is some considerable irregularity in prices in this city, and every prospect of its growing worse. It is quite unfortunate that this is so for there is business enough for everyone, and no reason why the business should not pay usual profits, but unfortunately there are certain conditions here at this time that it is hard to control, and unless they are controlled they certainly will grow worse.

W. K. MORISON & Co.

THE SAN FRANCISCO TRADE.

Conditions in California are about as noted in last report. The San Francisco situation is steadily improving. The banks have been reopened a week and without limit as to payments, and have more money than they care to have on hand. The public have the same feeling, and are depositing more money in the banks than they are drawing out. This piling up of spot gold coin is resulting in large shipments of it to the East from whence it came for general relief. The different stock exchanges also opened this week for the first time since the earthquake-fire, and the wholesale and retail houses are resuming as fast as they can get temporary roofs over their heads. From now on the return to regular business will be rapid. The heavy three days' rain of the last week in May, usually classed as belonging to the "dry season months", while naturally damaging to the berry and cherry crops, and hay cut and down on the ground, is considered of great benefit to vineyards and orchards on the whole, and almost assures the State another year of prosperity.

My sympathy is with the Hardware dealers who are not feeling at all pleased with the dilatory tactics in vogue with many of the insurance companies in delaying payments to policy-holders. It is developing that there are both "good" and "bad" insurance companies. As a matter of fact, the State Insurance Commissioner is drawing up a "good" list and a "black" list of insurance companies which have losses here, and will send them to every insurance commissioner in the United States, and to every newspaper that will print them.

One of the front-rank steel men of San Francisco, who prefers that his name be not mentioned in this connection, remarked this week as follows: If the rebuilding of the city within five years depended upon the energy, pluck, perseverance and confidence of the people, there is little doubt that it could be ac-

complished. But the question is, where is the structural steel to come from? To be sure, at present, orders from San Francisco take precedence over all others, both in this country and abroad. But how long will this condition last? If it were possible for the steel mills of the world to increase their output, the problem would be easier of solution. But both in the East and in Germany mills have been running to their fullest capacity both night and day for the past two years to supply the demand that existed before San Francisco suddenly became the greatest steel market of the world. Within a year Eastern builders will be clamoring to have their orders filled, and it cannot be readily seen how the manufacturers will be able to resist their demands. It will be necessary to slack off on the San Francisco supply, and attend to home custom. For some reason, people who are informed on the steel situation are inclined to believe that Germany will continue to give San Francisco precedence over all other markets longer than the East will. It is not likely, though, that the German mills will continue for five years to devote themselves exclusively to San Francisco. In addition to this, there is the labor problem to be considered. It will take an army of skilled men to build the business section of this town in five years. Whether this labor can be secured is a question. Then there is the danger of strikes, both here and among the mill workers. Of course, the talk is now that wages will not be raised; but human nature is frail in some respects, and when the first flush of enthusiasm passes away there may be labor troubles to impede progress. Also, the steel must be brought here. I do not believe there are enough ships not engaged in other work to handle such an amount of material, even if the mills could turn it out. I do not wish to be thought an alarmist, but it must be remembered that the city cannot be rebuilt on enthusiasm alone, and it is well seriously to consider such things as labor, material and sources of supply.

Members of San Francisco Lodge, No. 68, International Association of Machinists, who have lost their tools through the fire will be supplied with a new set of tools to the amount of \$5 by any dealer in San Francisco, Oakland, Berkeley, Alameda, Stockton, Sacramento, San Jose and Santa Rosa, for account of the L. S. Starrett Company of Athol, Mass., manufacturers of machinists' tools, upon presenting an order from Charles W. Meyer, the financial secretary of the lodge. The L. S. Starrett Company contributed \$1,000 cash to the general relief fund for the sufferers by the San Francisco fire. When appealed to for tools for the machinists the company declined on the ground that such contribution might displease its patrons on this Coast, but instructed its Pacific Coast agent, W. H. Stanley, to issue these orders for tools to the amount of \$2,000, and the dealers are instructed to use the orders in payment of their account with the Starrett Company.—*Industrial Press Association.*

HARDWARE PATENTS

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitors of American and Foreign Patents, Washington, D. C. and St. Paul Building, New York City.

- 818,755. CARPET SWEEPER. W. H. Emmert, Chicago, Ill.

POPULAR TALKS ON LAW

Copyrighted 1905, by William C. Sprague, President The Sprague Correspondence School of Law.

CONTRACTS.

NO. 1, IMPORTANCE OF SUBJECT. DIFFERENCE BETWEEN CONTRACT AND AGREEMENT. EXPRESS AND IMPLIED CONTRACTS. THE CONSIDERATION.

The law of contracts lies at the foundation of nearly every branch of the law. It is, therefore, the first and most important subject not only for the law student, who is studying law for the purpose of practicing, but for the layman, who wants to understand in a general way his legal rights and obligations.

We are making contracts day by day, usually unconscious of the fact. When I hail a street car and it stops for me and I step aboard, I enter into a contract with the corporation that owns and operates the car, for a breach of which I am liable in damages, as is the corporation. Every time I buy something in a store, no matter whether it be a steam engine or a pin, I am making a contract. In hiring servants and agents, in renting and subletting property, in buying provisions for my table, in buying tickets for an entertainment—in fact, in almost every act that is not purely social in its nature, I am entering into a contract. Indeed, business is but another name for the making and executing of contracts. The importance, therefore, of one's knowing at least the general principles of contracts is evident.

Some persons use the words "agreement" and "contract" as synonymous, that is, meaning the same thing. A contract is always an agreement, either expressed or understood, but an agreement is not always a contract. I may make an agreement with you to spend the evening at your home, but that agreement is not a contract. I am bound by the rules of etiquette and good morals to fulfill the agreement, but in case I do not fulfill it, I am not bound by the law to suffer damages by reason of my failure; nor could you go into a court and compel me to fulfill it.

Therefore, one distinction between a contract and an agreement is that the former is an agreement enforceable at law, that is, an agreement that the law will either compel me to pay damages for failing to perform, while the latter is not so enforceable.

Another distinction between an agreement and a contract is this: The law says that in a contract a man contemplates legal relations, that is, he intends to put himself under legal obligations, and in an agreement he does not so intend, his purpose being merely to bind himself by a social obligation. We have nothing to do in these talks with merely social obligations; we treat only of such engagements or agreements as the law holds binding.

We distinguish, too, between kinds of contracts; for instance, a contract may be express or it may be implied. An express contract is one where the terms are expressed or stated, either orally or in writing. An implied contract is one where the facts in connection with the matter are such that the law will infer certain things. If I go into a store where I have credit, take up an article, and say to the clerk, "I will take this. Charge it to me," the contract is not an express contract; there is no price set, no time of payment indicated, no promise of payment. The law, however, infers that I have made a promise to pay a reasonable price for the article in a reasonable or the customary time.

We often hear it said that a contract is not good without a "consideration," or that a contract must have a "consideration" to support it. The meaning of this is simply that a promise cannot be enforced in law unless something is paid or promised to be paid for the promise, or unless the person to whom the promise is made has done something or suffered some loss by depending on the promise. If I promise to make you a present and fail to do so, you cannot hold me by law accountable for breaking my promise, no matter how much inconvenience or unhappiness it may cause you. If, however, I promise to do something for you or give you something in consideration of your paying me something, no matter how small, or doing something for me, or suffering some loss, I can be held to the promise. It is in this sense that the law requires that in order for a promise to be binding, it must have a consideration—another word for price.

It used to be said that whenever a promise was under seal, that is, where it was in writing and the promisor attached to his name his seal, the law would forbid the promisor from denying that there was a consideration. In other words, the fact that a seal appeared on the promise was evidence conclusive that there was a consideration received, and in a suit at law to compel the performance of the promise the promisor could not bring in evidence to the effect that he had received nothing for the promise, and therefore was not bound by it. Our present law, however, has almost wholly done away with this fiction. Now the consider-

ation of a promise may be inquired into, whether it be under seal or not.

It must not be thought that in order to support a promise the other party must necessarily *give* something or *promise* to *give* something. If he is to lose or suffer something or promises to give up something, the consideration is a valid one. If I promise to give you a hundred dollars if you stop smoking for six months, and, depending upon my promise, you do stop smoking for six months, I am bound to pay the one hundred dollars. In this case you have not given anything or promised to give anything to me, but you have suffered a loss, or have given up something, depending upon the promise. It has always been held that a promise is a good consideration for a promise, that is, my promise to do something for you, if given in exchange for a promise by you to do something for me, makes a valid contract. The most common example of this sort of a contract is the marriage contract, under which each party promises, and the promise of each is a consideration for the promise of the other.

Sometimes it is not an easy matter to determine whether the contract has a consideration or not. It should be understood that where one is already bound in the law to do a thing, this promise to do that thing is not a sufficient consideration to support a contract.

Suppose, for instance, that you owe me a hundred dollars and the debt is overdue. I say to you, "If you will pay me the hundred dollars you owe me, I will give you the rent of a house free for a month." Depending on my promise, you pay me the hundred dollars, and I refuse to give you the house. Am I justified in law in refusing? What is the consideration for my promise to give you the house free for a month? It is the doing by you of something that you are already bound to do; therefore the law says there is no legal consideration, and it will not compel me to let you have the house.

Suppose that you have minor children and do not support them, as in law you are bound to do, giving them food, shelter, medicine, and education such as is reasonable considering your abilities, etc. I say to you, "If you will treat your children for a year as you are bound to in the law to treat them, I will give you five hundred dollars." You accept the arrangement and provide your children with clothing, medicines, education, etc., as in law you are bound to do, and then ask me for the five hundred dollars, and I refuse to give it to you. You bring suit against me. My lawyer in court pleads that you were in law already bound to do the things which you promised to do. The court agrees with him, and the case is dismissed.

You start to build a house for me, under a contract to complete it for a certain amount. Before you finish it, you find you are going to lose money. You say, "I will not finish it unless you pay me \$500 more." I make a promise to do so, and you finish the house. The question arises as to whether I am bound to pay the extra price that I have promised. In good morals I may be bound to; in law, I am not.

(To be continued.)

REPAIRING OF KNIVES IS POPULAR.

Chicago men who have formed sentimental attachments for their pocket knives need no longer break the ties of years or superstition when accidents overtake their favorite pieces of cutlery. Expert knife repairing within the last half-dozen years has become an established branch of the cutler's work in Chicago shops and every week sees scores of knives restored to usefulness after their owners had mourned them as broken beyond repair and about decided to throw them away. Some of the knives, says the *Chicago News*, are sent hundreds of miles by mail or express and, neatly repaired, make quick journeys homeward to comfort their owners.

"Yes," said one of the expert cutlers who repaired knives at a bench in the alley end of a narrow little cutler's shop in Clark street, "we get a good deal of this sort of work. It keeps us busy all the time. Men become closely attached to knives they have carried year in and year out and when a blade is snapped at last some of 'em get so they can hardly eat. I've seen men almost cry for joy to see their old knives that they have carried so many years fixed up as good as new again. Funny, isn't it, what a lot of memories will stay around an old jackknife?"

"People who have knives fixed are all cranks," said a young workman. "They've got to have everything just so. A little too much grinding on a blade and you've got to put another one in. Once I had to put five new handles on one old man's knife before I got one that suited him. He said he'd carried it twenty years and it had helped him make his fortune and he wasn't going to have it neglected in its old age. It cost him twenty times its value to have the old knife fixed, but he was as tickled as a kid with a new top when the job was over."

Gillette Safety Razor

NO STROPPING NO HONING

The Most
Wonderful Selling
Razor
in the World

It pleases every customer, who in turn brings a new customer.

"The Gillette" sales are permanent, no shelf worn stock. It turns orders to money and profits.

HARDWARE MANUFACTURERS' RECORD

Hardware manufacturers, the country over, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Alton, Ill.—The Federal Tool Company, a new manufacturing plant, has begun work near Federal, just east of the city limits. The plant is owned by C. F. Herb and C. L. Beall, and will make wooden handles of all kinds.

Batavia, N. Y.—Papers of incorporation of the N. P. K. Polish Company have been filed. The company is formed to continue the business of manufacturing stove and nickel polish and Saffrol cream soap which Nathaniel P. Knapp has carried on about two years. It is provided in the papers that the authorized capital of the company shall be \$20,000. Mr. Knapp holding 100 shares, Hobart B. Cone five and Newell K. Cone two. These are the directors. The company's place of business is in the Bank of Genesee building.

Boston, Mass.—Collins Axe Co. has been incorporated to manufacture axes, edges, hatchets; capital, \$100,000. President, J. W. Collins; treasurer, F. P. Butman, Holbrook, Mass.; clerk, S. P. Wardner, No 28 State Street, Boston.

Branford, Conn.—The Atlantic Wire company has been incorporated with a capital of \$2,000. The incorporators are W. E. Hitchcock, J. W. Kent and M. F. Folk.

Brooklyn, N. Y.—The Atlantic Co. has been incorporated to manufacture Hardware and metallic products; capital, \$10,000. Incorporators: J. H. Sayres, P. H. Sayres, J. H. Cooke, Brooklyn.

Canton, O.—Announcement has been made that Canton capitalists have organized a \$400,000 company to erect in Canton an immense plant for the manufacture of enameled ware. The company's official title is The Republic Stamping and Enameling company. The incorporators are Charles H. Knight, Edward K. Sober, Louis A. Lotchot, W. G. Saxton and Jacob B. Snyder.

Detroit, Mich.—The Detroit Wire & Iron Works has been incorporated with a capital stock of \$10,000 to manufacture wire cloth, wire goods and wire work of every description. The officers are T. L. Smith, president and general manager; J. H. Gregg, vice-president; James I. Krauss, secretary and treasurer.

East St. Louis, Ill.—Articles of incorporation of the Taylor-Clark-Oberbeck stove company have been filed at Belleville. The incorporators are Carl T. Taylor, G. L. Clark and Fred Oberbeck; capital stock, \$30,000.

Jersey City, N. J.—The Flagg Cutlery Company has been incorporated. Capital \$100,000. Incorporators—James H. Flagg, John De Saulles and George M. Clark.

Newark, N. J.—National Sweeper Co. has been incorporated to manufacture carpet sweepers and carpet cleaning machines; capital, \$100,000. Incorporators: A. R. Palmer, C. C. Kern, T. R. Finan, Newark.

Quincy, Ill.—The Blank Mfg. Co. has been incorporated by Charles A. Blank, Homer M. Swope and Henry C. Wiethaupt. The company will manufacture galvanized steel chain pumps and tubing and all kinds

of sheet metal specialties in copper, brass, tin, etc.

Waterbury, Conn.—A certificate of incorporation has been filed by the Risdon Tool Works, Inc., which plans to make, design and sell dies, models, patterns, tools and machinery. Sidney A. Risdon, Charlotte A. Risdon and Wendell L. Shepard, all of Waterbury, are the incorporators. The authorized capital stock is \$15,000.

Worcester, Mass.—Hydraulic Packing Co. has been incorporated to manufacture and deal in elevator and pump packing; capital, \$10,000. President, Charles R. Lane, No. 10 Jaques Avenue; treasurer, Burt H. Beckwith, No. 340 Main Street; clerk, James M. Hoey, No. 81 Russell Street, Worcester, Mass.

Worcester, Mass.—International Mfg. Co. has been incorporated to manufacture tools. Capital, \$30,000. Incorporators: George A. Reed, William Thompson, Napoleon R. Thibert.

Changes and Improvements.

Anderson, Ind.—The Anderson Tool Co. which was recently reorganized, has added several new lines of manufacture, including a sanitary butter former, self computing butter machine, aluminum scoop and a putty knife. The company has built a large addition to its factory. The officers are J. A. Van Osdal, president; B. D. Emanuel, secretary, and H. G. Wilcox, treasurer.

Bridgeport, Conn.—Papers increasing the capital stock of the Bridgeport Hardware Mfg. Co. from \$75,000 to \$125,000 have been filed.

Columbus, O.—The Capital Lock-Nut & Washer Co. has increased its capital from \$3,000 to \$75,000. The president of the company is T. R. Ryan and the secretary is L. L. Ayres.

East Douglas, Mass.—The American Axe & Tool Co. is to make extensive additions to its works. A new machine shop, a tempering room and a third building will be constructed.

Frankfort, Ind.—The Frankfort Handle Company, composed of J. M. Cleveland, of Indianapolis, and H. C. Sheridan, T. N. Lucas, J. W. Palmer and C. H. Montgomery, of this city, has sold the Cleveland handle factory to G. B. Burrell, of Cleveland, O., and J. H. France and C. H. Wendt, of Ft. Wayne.

Fredericksburg, Va.—John T. Dale, of Chicago, owner of the Southern Foundry and Machine Works, of this city, has sold the plant to the Acme Mfg. Co. of New York. They will, in the near future, begin operations in manufacturing a patent churn, wickless oil stove, superior fire extinguisher, besides running a regular foundry and repair shop. John W. Fischer, of New York, is president, and E. D. Middlekuffs vice-president.

Hamilton, Ont.—The Hamilton Tool & Optical Co., Ltd., has been reorganized. H. Bernard and B. Broughton becoming large shareholders, and appointed to the directorate, A. Hutton being mechanical superintendent.

Kenton, O.—The plant of the Hardware Mfg. Co. will soon be enlarged very considerably. Plans and specifications are be-

ing drawn up, and work on the new building will be commenced as soon as possible. One of the new buildings will be a new foundry room 60x198 feet, and will give employment to twenty-eight additional moulders and increase the force of the balance of the factory in proportion.

Newark, N. J.—Extensive improvements are now under way at the Valley Forge Cutlery Company's plant, 24 South Sixth Street, owing to the greatly increased business during recent years. The largest one under way is a three-story and basement building of brick and slow burning mill construction, having 24,000 square feet of manufacturing floor space. This is built directly adjoining the old building on the north with a frontage of 57 and a depth of 257 feet.

New Castle, Ind.—Excavation work has commenced for the additions to the Hoosier Mfg. Co. plant, which will be rushed to completion as soon as possible. Four buildings will be erected, each of brick and two stories high, and when completed the plant will be one of the largest kitchen cabinet factories of its kind. The increased size will necessitate the employment of an additional 100 men.

New Haven, Conn.—The Union Horse Nail Company, has filed a certificate of increase of capital stock from \$150,000 to \$300,000.

Omaha, Neb.—The Larsen-Baker Ice Machine Co. has just completed some very extensive improvements at its plant which have materially increased their capacity and further extensions are necessary. The company increased its capital stock from \$150,000 to \$250,000, for the purpose of making these improvements and buying the necessary equipment.

Pine Meadow, Conn.—The Chapin-Stephens Co., manufacturers of rules, planes, levels, gauges, etc., is to make extensive improvements to its plant this season. A water power acquired some two years ago with the Chapin machine shop property will be developed and a new turbine water wheel installed. The Chapin Building, a two-story structure, 30x180 feet, has been renovated.

Springfield, Mo.—The United Iron Works Co., which operates several plants in different States, contemplates the erection of a new machine shop, 150x200 feet, in Springfield. The new shop is to be equipped with an electric crane and other modern machinery. At this plant boilers, engines, coal mining and ice and refrigerating machinery are manufactured.

Torrington, Conn.—The Union Hardware Company has begun the erection of buildings for the increase of its plant, which will cost from \$30,000 to \$40,000. One building will be of brick, two stories, 132 by 30 feet. A store house 362 by 30 feet will be of fire proof construction, and a second shed will be 61 by 31 feet.

Vassar, Mich.—The Parker Plow Co., which manufactures plows, sleighs and general castings, will leave this place on July 1 for Richmond, that town having raised a bonus of \$1,000 and will give a large manufacturing building at \$5,000, taking that much stock. The firm will be re-incorporated and capitalized at \$25,000. John Parker of this place owning the controlling interest.

BICYCLE AND SPORTING GOODS RECORD

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Stores, Incorporations, Etc.

Canton, N. Y.—J. B. Bushton has incorporated to construct canoes and boats; capital, \$15,000. Incorporators: L. P. Rushton, W. N. Beard, G. H. Bowers, Canton, N. Y.

Hamburg, Pa.—Lemon Fister and Levi Williamson have formed a partnership; firm style, Fister, Williamson & Co.

New Haven, Conn.—The John H. Pardee company has filed a certificate of incorporation. The authorized capital stock is \$5,000. The incorporators are John H. Pardee, Frank A. Barrows, Carrie F. B. Pardee and Agnes K. Barrows, all of New Haven. The company will make and deal in sporting goods, toys, etc.

New York.—F. A. O. Schwartz has incorporated for the purpose of manufacturing toys; capital \$200,000. Directors: H. F. Schwartz, New York; M. Debevaise, Summit, N. J.; R. S. Mead, Jr., Briarcliffe Manor, N. Y.

Niagara Falls, N. Y.—G. & J. M. Rae's well known sport outfitting establishment has re-opened at 106 Falls street.

Pittston, Pa.—Garrison's new store is located at 24 North Main street, opposite Williams street, and is stocked with electrical goods, athletic and base-ball goods of all kinds, bicycles in all the leading makes and phonographs.

Savannah, Ga.—Henry P. Thompson and C. W. Gasque, under the firm name of Thompson & Co. have opened up a new store.

Traverse City, Mich.—J. W. Houghton and George Manning have opened a new store.

Changes and Improvements.

Bedford, Iowa.—Willis & Hook, of Bedford, Iowa, are successors to the Hardware and sporting goods business formerly conducted by C. L. Willis.

Bennington, Vt.—E. T. Griswold has purchased the sporting goods store of J. L. McGurk, this making the third time within a year that Mr. Griswold has bought out a competitor. This is the old firm of E. B. Griswold & Son, established in 1875.

Burlington, Vt.—Smith Bros., dealers in sporting goods, have added a bicycle department to their business.

Chicago, Ill.—Jacob Willig, manufacturer of gymnastic apparatus and gymnasium equipments, has removed his office and factory from 71 Washington street, to 117-119 North Peoria street.

Chicago, Ill.—The Excelsior Automobile Supply Co. is a new concern established this Spring at 1436-1438 Michigan avenue, and Paul F. Platt, formerly of Denver, is the manager. The building, especially erected for this trade, occupies a lot 50x175 feet, has double store front and is three stories in height.

Exeter, Cal.—W. E. Wild has enlarged his sporting goods business by the purchase of the entire stock of sporting goods and bicycles owned by the Auto Hardware Company. Mr. Wild owns two stores.

Milwaukee, Wis.—The entire sporting goods line of W. L. Candee, of 411 Milwaukee street, has been purchased by Gimbell Brothers, of that city.

Nashville, Tenn.—The Hardware and sporting goods business of Clark & Jennings will hereafter be conducted by Dan G. Clark, Jr.

Steele City, Neb.—The Hardware and sporting goods business of B. L. Tripp has been purchased by H. A. Clapp.

Winona, Minn.—The Eagle Electro Plating Company, soon to occupy the premises at 51 West Second street, will consist of three departments; a sporting goods store, a taxidermist's shop and an electric plating works. Everything in the way of sporting and athletic goods for both indoor and outdoor uses will be handled.

Fires.

Bridgeport, Conn.—Four magazines on

the testing grounds of the Union Metallic Cartridge Co., of Bridgeport, Conn., exploded recently, rocking the city and doing considerable property damage. Two explosions with but a second's interval were heard in many parts of the State. Windows were shattered and a panic occurred among the inhabitants of the city. The four magazines contained 25,000 pounds of powder each. So far as is known, no person was injured.

Corsicana, Tex.—J. F. Lamb, fire; loss, \$750.

Indianapolis, Ind.—Sears Bros. Co., 809 Massachusetts avenue; loss about \$500.

Xenia, Ohio.—Officers of the Miami Powder Company estimate that the losses resulting from the explosion of the glazing mill at one of their plants will approximate \$12,000. This includes the loss of 12½ tons of finished powder.

Burglaries.

Alexandria, Md.—Thieves broke into the sporting goods store of Robert E. Knight, of 621 King street, a short time ago, and carried off a half-dozen revolvers, a quantity of baseball goods, bicycle lamps and razors.

St. Joseph, Mo.—The gun repair shop of J. F. Mitchell, 615 Messanie street, was broken into recently by burglars. Ten dollars in cash, a number of fine revolvers and several hundred cartridges were taken.

Miscellaneous.

Buffalo, N. Y.—The following officers were elected at the last meeting of the Standard Wheeling Club: President, Ernest Landes; vice-president, John Dick; financial secretary, Joe Nuerohr; recording secretary, George Clark; treasurer, William Spriser; sergeant-at-arms, William Adams; captain, C. J. Smith.

Colorado Springs, Colo.—The Pike's Peak Motorcycle Club has been organized with some twenty members and these temporary officers: President, G. W. Blake; secretary, F. W. Davis; treasurer, C. M. Angell.

COLUMBUS SHOW CASE Co., Columbus, Ga., and 716 Broadway, New York, are the publishers of a catalogue entitled "Store Interiors," which will be found of interest to every dealer. Interior views are given of stores of various kinds throughout the country, accompanied by testimonials, as this company are designers and manufacturers of all kinds of show cases, store furniture, etc. In the foreword they state: "Look through this booklet carefully and we assure you it will be time well spent even for the very busy merchant—you will get ideas upon which you can build. After you have gone through, write and outline the arrangement you desire and let us make you plans and offer suggestions. If you are a successful merchant, you can be of great assistance to your customers in making their selections; likewise, knowing our business, being experts in our line, we believe that we can help you. Another thing; don't fail to read what our customers have to say in regard to our work. Satisfaction goes a long way in equipping your store. You will probably spend the greater part of your life in your store, and your customer will see your equipment every hour in the day as long as you are in business."

LACONICS.

He submits to be seen through a microscope, who suffers himself to be caught in a fit of passion.—*Lavater.*

The way to gain a good reputation is to endeavor to be what you desire to appear.—*Socrates.*

Two of the World's Winners

The MAJESTIC WASHING MACHINE

We Manufactured
and Sold 41,430
MAJESTICS in 1905
beside many other
makes.

Does that tell the story?

We will verify these
figures if you wish us to.

It is the quickest sel-
ler and commands the
biggest profit to you of
any Washing Machine
made. That is why you
should sell it. The tub

of the **Majestic** is made of selected **Virginia White Cedar**, and will stand the action of water a life time. It is bound with our celebrated **Electric-Welded Wire Hoops**, is steam-tight and easy to operate. Two hundred thousand satisfied customers will testify to all we say.

The SNOW BALL

FREEZER

AFTER telling you what we have done with the **Majestic** Washing Machine in seven years, it is easy to introduce to you the **Snow Ball Freezer**. It is as good a freezer as the **Majestic** is a Washing Machine. The **Snow Ball** tub is made also of **Virginia White Cedar**, is bound with electric-welded wire hoops which cannot fall off, and is specially varnished so as to make it attractive and easy to sell. The inside parts are heavily plated with pure block tin which makes it thoroughly hygienic. The outside castings are rust proof.

Whether you are **JOBBER** or **DEALER** write
us to-day for particulars and prices which will
surprise you.

POLO--- Complete Polo Outfits, including Polo Goal Cages, Arena Guard Nets, Polo Skates (professional and amateur) Polo Shoes, Leg Guards, Polo Balls, Finest Grade Hickory Polo Sticks, Polo Suits. Over two million Henley Skates sold in the U. S.

Send for Catalogue and Official Polo Guide.

M. C. HENLEY, Richmond, Ind.

Wrings the Mop dry

These are the wringers that sell.

Both feet rest firmly on the floor—no danger of upsetting bucket and wetting feet. Pressure that wrings mop is from a *spring*, not from the foot. Two springs, one on either side are independent of each other, pressure adjusts itself to any unevenness of mop—wrings all of mop thoroughly.

Tub is strong and extra braced. Rollers are solid maple and *never* stick. Attractively labeled—make good display in your store—sure to please customers.

Ask your jobber.

PRICES CURRENT

The prices in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

ZINN

AUTOMATIC SAFETY RAZOR

Won for Itself One Thousand New Customers in a Single Month!

Conclusive evidence that its simplicity—its twenty-four always keen blades, needing neither honing nor stropping—the all-satisfying shaves they give—have “made good” our every claim for it.

Thousands of pleased customers proclaim

The ZINN the Chief of Safety Razors.

If skeptical at all, try a ZINN. A shave or two will convince you quicker than a wink. It will do more than that. It will make you a ZINN enthusiast—will help you talk ZINN to your customers.

We have a special agency proposition for you.
Ask us about it and Rock Bottom prices.

Show A Customer
A ZINN Blade--

He Will Buy
A ZINN Razor

The GEM JUNIOR Seven Blade \$1.⁰⁰ Safety Razor

Is the latest addition to the famous “Gem” family of Safety Razors.

It is simple in construction, sanitary and strong. Will last a lifetime.

Every blade adjusts itself automatically, and gives quick, clean, comfortable shaves.

When dull, can be stropped the same as any razor with the extra handle furnished.

We also exchange seven dull Gem Junior blades for seven keen blades and 25 cents.

Foreign retail price of razor complete, \$1.50.

We protect you by our absolute guarantee.

The GEM CUTLERY CO., 34 Reade St., New York

The World's Oldest and Best Safety Razor Makers.
